Sparton Corporation Pension Plan

Notes to Financial Statements

1. Plan Description

The following description of the Sparton Corporation Pension Plan (the Plan) provides only general information. Participants should refer to the Plan Agreement or the Summary Plan Description for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan established to provide both normal and early retirement benefits, termination benefits, and death and disability benefits to all eligible employees of Sparton Corporation and its wholly owned subsidiaries: Sparton Electronics, Inc., Sparton Technology Inc., and Sparton Medical Systems, Inc. (collectively, the Company). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

On January 29, 2014, the Board of Directors of the Company authorized management to begin the process for a Standard Termination of the Plan (see Note 3), subject to re-approval based on a set threshold of the final settlement costs. The process of terminating the Plan has not been initiated. Once the process is initiated, termination is expected to take 18 to 24 months and can be discontinued by the Company at any time prior to final termination and participant benefit funding.

Contributions

All contributions to provide benefits under the Plan are made by the Company. Effective April 1, 2000, the Plan no longer allows voluntary participant contributions. The employer contributes such amounts as deemed necessary on an actuarial basis to provide the trust with assets sufficient to meet the benefits to be paid to the Plan's participants. The Plan has met the minimum funding requirements of ERISA.

Pension Benefits

Prior to April 1, 2000, under the former plan design, participants were entitled to monthly pension benefits beginning at normal retirement age (age 65) equal to \$2.25 per year of service, with a maximum of 40 years. If the participant made voluntary contributions as defined, monthly benefits also included 1.5% of the final 10-year average monthly earnings multiplied by the years of contributory credited service, to a maximum of 30 years. Pension benefits under the Plan consist of accumulated benefits under the former plan design, as contributory service was frozen. In addition to the contributory service being frozen, the 10-year average monthly earnings previously used were amended to five-year monthly average earnings. Effective April 1, 2000, the participants earn annual principal credits, which are calculated as 2% of the participant's salary, plus annual interest credits, based on the interest rate for the 30-year Treasury Bill. A transitional benefit is provided to eligible participants who, upon retirement, would have otherwise received a lower pension benefit under the Plan than the participant would have been entitled to under the former plan design.

The Plan provides a reduced benefit for early retirement (age 55-64). Participants who apply for early retirement must have completed at least five years of service and attained age 60, or 10 years of service and attained age 55.

Sparton Corporation Pension Plan

Notes to Financial Statements

Participants may elect to receive their benefits in the form of a monthly payment, a lump-sum payment, or a joint and survivor annuity determined in accordance with reduction factors in the Plan.

The Plan was amended as of April 1, 2009. Future benefit accruals and participation were frozen as of the Plan amendment date, and all participants became 100% vested.

Death and Termination Benefits

Upon termination of employment prior to retirement, an employee with at least five years of service receives the actuarial value of their accrued pension. Upon the death of an active employee, the employee automatically becomes 100% vested regardless of the number of years of service, and the benefit is paid directly to the beneficiary of the employee. In no event is the death or termination benefit less than the employee's own accumulated contributions plus interest thereon.

Disability Benefits

A vested participant who becomes disabled and has completed 15 years of service and attained age 50 is eligible for benefits equal to the accrued normal retirement benefit.

Administrative Expenses

Certain expenses of the Plan are paid by the Company, such as actuarial and audit fees. In 2016 and prior years, the Company also paid the Pension Benefit Guarantee Corporation (PBGC) (a U.S. governmental agency) premiums. Certain expenses, such as trustee fees, and in 2017, PBGC premiums, are paid by the Plan.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared under the accrual method of accounting.

Subsequent Events

Subsequent events have been evaluated by management through April 12, 2018, the date these financial statements were available to be issued.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts in the financial statements. Actual results could differ from those estimates.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported, based on certain assumptions pertaining to interest rates, inflation and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations

Sparton Corporation Pension Plan

Notes to Financial Statements

and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term, and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. See Note 5 for discussion of fair value measurements.

Payment of Benefits

Benefits are recorded when paid.

3. Plan Termination

The Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan, subject to the provisions set forth in ERISA. There are two ways the Plan can be terminated.

In a "Standard Termination," the Company would fully fund the Plan and settle all individual participant benefits either via payment of a lump sum or purchase of an annuity contract.

In a "Distress Termination," the net assets of the Plan would be allocated as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (a) Unpaid benefits attributable to participants' contributions.
- (b) Benefits that former participants or their surviving spouses have been receiving for at least three years, or that which participants eligible to retire for that three-year period or their surviving beneficiaries would have been receiving if they had retired with benefits at the beginning of that three-year period. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
- (c) Other vested benefits insured by the PBGC up to the applicable limitations (discussed below).
- (d) All other vested benefits (that is, vested benefits not insured by the PBGC).
- (e) All nonvested benefits.

Sparton Corporation Pension Plan

Notes to Financial Statements

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. That ceiling applies to those participants who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination, whichever comes later. For younger participants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted.

Whether all participants receive their benefits should the Plan terminate at some future time under a Distress Termination will depend on the sufficiency, at the time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the level of benefits guaranteed by the PBGC.

On January 29, 2014, the Board of Directors of the Company authorized management to begin the process for a Standard Termination of the Plan, subject to re-approval based on a set threshold of the final settlement costs. The process of terminating the Plan has not been initiated. Once the process is initiated, termination is expected to take 18 to 24 months and can be discontinued by the Company at any time prior to final termination and participant benefit funding.

4. Tax Status

The Plan obtained its latest determination letter on January 5, 2017 in which the Internal Revenue Service (IRS) stated that the Plan and related trust are designed in accordance with the applicable sections of the Internal Revenue Code (IRC). The Plan Administrator believes that the Plan is designed and is currently being operated in compliance with applicable requirements of the IRC.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of June 30, 2017 there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

5. Investments

In accordance with ASC 820, *Fair Value Measurements and Disclosures*, the Plan utilizes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Sparton Corporation Pension Plan

Notes to Financial Statements

The following provides a description of the three levels of inputs that may be used to measure fair value:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 - Significant observable inputs such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are observable or can be derived from or corroborated by observable market data by correlation or other means.

Level 3 - Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

The following valuation methodologies were used to measure the fair value of the Plan's investments:

Money market funds and mutual funds: Valued at quoted market prices in an exchange and active market, which represent the net asset values of shares held by the Plan.

Common stocks: Valued based on quoted market prices in the active market in which the securities are traded.

The Plan's valuation methods may result in a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Although Plan management believes the valuation methods are appropriate and consistent with the market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes gains and losses on investments bought and sold as well as held during the year.

The following tables set forth the Plan's investments by level within the fair value hierarchy. There have been no transfers into or out of Levels 1, 2 or 3.

6. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired participants or their beneficiaries, (b) terminated participants with vested benefits, (c) beneficiaries of employees who are deceased, and (d) present participants or their beneficiaries.

The actuarial present value of accumulated plan benefits is determined by an actuary from Towers Watson, and is that amount which results from applying actuarial assumptions to adjust the accumulated benefits to reflect the time value of money (through discounts for interest) and the probability of benefit payments (by means of decrement for such factors as death, withdrawal or early retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation were:

<i>June 30,</i>	2016	2015
Plan accounting discount rate	7.0%	7.5%
PPA effective interest rate	5.86%	6.07%

Sparton Corporation Pension Plan

Notes to Financial Statements

The foregoing actuarial assumptions are based on the assumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present values of accumulated plan benefits, as of the most recent actuarial valuation dates (using beginning of Plan year), are as follows:

June 30, 2016

Vested benefits	
Participants currently receiving payments	\$ 2,879,511
Other vested participants	3,238,525
Total vested benefits	6,118,036
Non-vested benefits	10,679
Total Actuarial Present Value of Accumulated Plan Benefits	\$ 6,128,715

The net change in the actuarial present value of accumulated plan benefits is as follows:

Year ended June 30, 2016

Actuarial Present Value of Accumulated Plan Benefits , beginning of year	\$ 6,684,124
Increase (decrease) during the year due to:	
Interest due to the decrease in the discount period	451,182
Benefits paid	(1,336,737)
Actuarial (gain) loss	228,050
Change in actuarial assumptions*	102,096
Actuarial Present Value of Accumulated Plan Benefits , end of year	\$ 6,128,715

* Includes effect of change from scale MP-2015 to scale MP-2016 and the change in Plan accounting discount rate to align with rate used for ASC 715-30-35 by the Plan sponsor.

7. Related Party Transactions

Certain Plan investments are shares of money market and mutual funds managed by PNC Bank, the Plan's trustee and, therefore, these transactions qualify as party-in-interest transactions. Fees paid to PNC Bank by the Plan totaled \$36,457 and \$39,809 for the years ended June 30, 2017 and 2016, respectively.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2015 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with the plan sponsor regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of July 1, 2016. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The plan credits interest to cash balance accounts using the May 30-year Treasury rate. Our long term estimate of the 30-year Treasury rate is 2.993%. This is the average of the 30-year Treasuries in effect for the three May 1 ^{sts} ending with May 1, 2016.
Rates of increase in:	
■ Assumed return for asset smoothing	The assumed return of 6.81% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, based on an analysis of the plan sponsor's investment policy we believe the rate to be above the third segment rate.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Assumed termination rates differ by age and gender because of expected differences in termination rates by gender.
Disability	Assumed disability rates differ by age and gender because of expected differences in disability rates by gender.
