1. DESCRIPTION OF THE PLAN:

The following description of the Pfautler (United States), Inc. Steelworkers (Local No. 1498) Retirement Plan (the Plan) provides only general information. Participants should refer to the *Summary Plan Description* for a complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan which covers substantially all hourly employees of Pfautler (United States), Inc. (the Company) who are members of the collective bargaining unit, Local Union No. 1498, United Steelworkers of America and who meet eligibility requirements of the Plan. The Plan provides pension, death, and permanent disability benefits.

Funding policy

The Company has agreed to contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to participants. It is the intention of the Company to make annual contributions in amounts at least sufficient to satisfy the minimum funding requirements under the Employee Retirement Income Security Act of 1974 (ERISA). At its discretion, the Company may decide to make contributions in excess of the minimum funding requirements but all contributions are intended to satisfy any maximum deduction limits; all contributions are made contingent on their deductibility. The Plan has met the ERISA minimum funding requirements.

Plan termination

The Company has the right to terminate the Plan and to discontinue contributions. However, no action shall alter the Plan or its operation that would violate the provisions of any collective bargaining agreements pertaining to pension benefits. Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC's guarantee, while other benefits may not be provided for at all.

Pension benefits

Eligible employees who have completed at least five years of service are entitled to monthly retirement benefits beginning at normal retirement age (62) as computed below:

A member who is eligible to receive a normal retirement benefit is entitled to a monthly benefit equal to the member's years of credited service multiplied by the following rate:

- (1) \$13.00, if his last day worked is on or after January 1, 1982 but prior to October 1, 1982;
- (2) \$14.00, if his last day worked is on or after October 1, 1982 but prior to October 1, 1983;
- (3) \$15.00, if his last day worked is on or after October 1, 1983 but prior to October 1, 1984;
- (4) \$15.50, if his last day worked is on or after October 1, 1984 but prior to October 1, 1989;
- (5) \$16.50, if his last day worked is on or after October 1, 1989 but prior to October 1, 1990;
- (6) \$17.50, if his last day worked is on or after October 1, 1990 but prior to October 1, 1991;
- (7) \$18.50, if his last day worked is on or after October 1, 1991 but prior to October 1, 1992;
- (8) \$19.50, if his last day worked is on or after October 1, 1992 but prior to October 1, 1993;
- (9) \$20.00, if his last day worked is on or after October 1, 1993 but prior to October 1, 1994;
- (10) \$20.50, if his last day worked is on or after October 1, 1994 but prior to September 17, 1995;
- (11) \$22.50, if his last day worked is on or after September 17, 1995 but prior to September 20, 1998;
- (12) \$25.00, if his last day worked is on or after September 20, 1998 but prior to September 17, 2001;
- (13) \$30.00, if his last day worked is on or after September 17, 2001 but prior to September 19, 2004;

- (14) \$34.00, if his last day worked is on or after September 19, 2004, but prior to September 17, 2008; and
- (15) \$38.00, if his last day worked is on or after September 17, 2008.

On and after January 1, 1988, if a member delays retirement beyond normal retirement age, his delayed normal retirement benefit will be calculated based on the benefit multiplier in effect on the date of his actual retirement plus the amount of credited service at his actual retirement.

The Plan permits early retirement beginning at age 55 with no benefit reduction when age plus years of credited service total 85. Early retirement at age 55 with at least ten years of credited service is permitted but the benefit is reduced by one-third of one percent for each month by which the member's first benefit payment precedes the month of his attainment of normal retirement age. Pension benefits may be paid in the form of joint and survivor annuities. Terminated vested members with a lump sum actuarial equivalent benefit of less than \$1,000 may take their benefit in a lump sum. Employees terminating before rendering five years of service forfeit the right to receive any portion of accumulated plan benefits.

The Plan complies with the Modification to the Internal Revenue Code Section 415 limits made by the Pension Funding Equity Act of 2004, the Pension Protection Act of 2006 and the final regulations released during 2007 under Code Section 415. The Plan has added a Qualified Optional Survivor Annuity option as required under the Pension Protection Act.

Effective January 1, 2011, the Plan was frozen. There is presently no intention to terminate the Plan. As a result of the freezing of the Plan, credited service will not include any period of service after December 31, 2010 for the purposes of determining the amount of a participant's normal retirement benefit. There will be no new entrants to the Plan on or after January 1, 2011.

2. SIGNIFICANT ACCOUNTING POLICIES:

The following are the significant accounting policies of the Plan:

Basis of accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment valuation and income recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for a discussion of fair value measurements.

The Plan records purchases and sales of securities on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes gains and losses on investments bought and sold as well as held during the year.

Actuarial present value of accumulated plan benefits

Accumulated plan benefits (see Note 4) are those estimated future periodic payments that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired and terminated vested participants or their beneficiaries, and (b) present participants or their beneficiaries.

Benefits for retired and terminated vested participants or their beneficiaries are based on the monthly pension benefit rate per the Plan times years of credited service. The accumulated plan benefits for active participants are based on the monthly pension benefit rate per the Plan times years of credited service through the valuation date.

Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

Operating expenses

Certain expenses of maintaining the Plan are paid by the Company and certain expenses are paid by the Plan.

Use of estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Subsequent events

The Plan has evaluated subsequent events through the report date, the date the financial statements were available to be issued.

3. INFORMATION PREPARED AND CERTIFIED BY WELLS FARGO, N.A.:

The Plan management has elected the method of compliance permitted by 29 CFR2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Wells Fargo, N.A., the trustee, has certified to the completeness and accuracy of all investments reflected on the accompanying statements of net assets available for benefits as of September 30, 2017 and 2016, and the supplemental schedule of assets (held at end of year) as of September 30, 2017; the related investment activity reflected in the statement of changes in net assets available for benefits for the years ended September 30, 2017 and 2016 and the information reflected on the supplemental schedule of reportable transactions for the year ended September 30, 2017.

4. ACCUMULATED PLAN BENEFITS:

A consulting actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefit information as of the beginning of each plan year is as follows:

	October 1	
	<u>2016</u>	<u>2015</u>
Vested benefits:		
Participants currently receiving payment	\$ 13,972,798	12,913,234
Vested benefits for other participants	7,478,900	8,684,027
	<u>21,451,698</u>	<u>21,597,261</u>
Nonvested benefits	447,111	369,179
	<u>\$ 21,898,809</u>	<u>21,966,440</u>

	October 1	
	<u>2016</u>	<u>2015</u>
Actuarial present value of accumulated plan benefits at beginning of year	<u>\$ 21,966,440</u>	<u>20,793,331</u>
Increase (decrease) during the year attributable to:		
Interest accumulation	1,436,625	1,359,511
Benefit payments	(1,366,208)	(1,304,861)
Assumption changes	<u>(138,048)</u>	<u>1,118,459</u>
Net increase (decrease)	<u>(67,631)</u>	<u>1,173,109</u>
Actuarial present value of accumulated plan benefits at end of year	<u>\$ 21,898,809</u>	<u>21,966,440</u>

Significant assumptions underlying the actuarial computations at the beginning of each plan year are:

Discount rate	6.75% (6.75% in the prior year)
Retirement age	Based on age when first eligible to retire with unreduced benefits
Actuarial method	Projected unit credit cost method
Mortality rates	RP-2014 Table fully projected with the scale MP-2015 mortality assumption

The significant assumption changes reflected in the October 1, 2016 actuarial valuation was the change in the retirement rates. The significant assumption changes reflected in the October 1, 2015 actuarial valuation was the change in the mortality rates due to the change in mortality table.

Actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

5. FAIR VALUE MEASUREMENTS:

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at September 30, 2017 and 2016.

Interest bearing cash: Valued at the daily closing price as reported by the fund plus accrued interest. Interest bearing cash funds held by the Plan are open-end funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The interest bearing cash funds held by the Plan are deemed to be actively traded.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of September 30, 2017:

	September 30, 2017	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Interest bearing cash	\$ 568,580	568,580	-	-
Mutual funds	27,771,169	27,771,169	-	-
Investments at fair value	<u>\$ 28,339,749</u>	<u>28,339,749</u>	<u>-</u>	<u>-</u>

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of September 30, 2016:

	September 30, 2016	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Interest bearing cash	\$ 632,508	632,508	-	-
Mutual funds	26,760,329	26,760,329	-	-
Investments at fair value	<u>\$ 27,392,837</u>	<u>27,392,837</u>	<u>-</u>	<u>-</u>

6. RISKS AND UNCERTAINTIES:

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

7. TAX STATUS:

The IRS has determined and informed the Company by a letter dated March 26, 2012 that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has not been amended since receiving the determination letter, therefore, the plan administrator and the plan's tax counsel believe that the Plan is designed, and is currently being operated, in compliance with the applicable requirements of the IRC and, therefore, believe that the Plan is qualified, and the related trust is tax-exempt.

8. SUBSEQUENT EVENT:

Effective July 1, 2018, the Plan was amended to offer a voluntary window program between the period July 1, 2018 through July 31, 2018 to participants with a deferred vested retirement benefit with present values not exceeding \$45,000 as of September 1, 2018. Eligible participants are able elect to have their benefits distributed in accordance with the options described by the Plan document.

Actuarial Asset Value

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.75% (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2014-2015 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years.
