Employees

It is assumed that there will be no new or rehired employees.

At-risk assumptions

For at-risk calculations, all participants eligible to commence benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on the date of decrement.

Funding Target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during the plan year.

Asset method

The asset method is market value. Under this method, valuation assets are equal to the market value of assets as of the valuation date plus the discounted present value of contributions expected to be made after the valuation date at the prior plan year effective PPA interest rate.

Participant data

Participant data were supplied by The Goodyear Tire & Rubber Company as of the census date.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2017 is used to determine the maximum deductible contribution for the tax year ending December 31, 2017.

Benefits not included in valuation

The Pre-Retirement Survivor Benefit is not valued for Vested Terminated Participants. To cover the cost of such benefit the pension for Vested Terminated Participants is reduced.

Actuarial Increases for Deferred Vested Participants Past Normal Retirement Age

Liability for deferred vested participants over age 65 reflects the probability of survival to the current age and includes the value of retroactive payments.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply a level of precision beyond that which is inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are truncated to be consistent with the instructions for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Unpredictable Contingent Events

No events are considered to have more than a de minimus likelihood of occurring.

Employees

It is assumed that there will be no new or rehired employees.

At-risk assumptions

For at-risk calculations, all participants eligible to commence benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on the date of decrement.

Funding Target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during the plan year.

Actuarial Increases for Deferred Vested Participants Past Normal Retirement Age

Liability for deferred vested participants over age 65 reflects the probability of survival to the current age and includes the value of retroactive payments.

Nature of actuarial calculations

The results documented in this report are estimates based on data that may be imperfect and on assumptions about future events. Certain plan provisions may be approximated or deemed insignificant and therefore are not valued. Assumptions may be made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply a level of precision beyond that which is inherent in actuarial calculations. Certain percentages determined in this report, such as the Funding Target Attainment Percentage, are truncated to be consistent with the instructions for Schedule SB of the Form 5500.

The assumptions selected for this valuation other than those prescribed by law, generally reflect long-term average expectations. If overall future plan experience is less favorable than assumed, the relative level of plan costs or contribution requirements determined in this valuation will likely increase in future valuations. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this actuarial valuation to analyze the potential range of future pension contributions, but we can do so upon request.

Unpredictable Contingent Events

No events are considered to have more than a de minimus likelihood of occurring.
