Notes to Financial Statements

Note 1. Plan Description

The following brief description of the Gallo Vineyards, Inc. Hourly-Paid Ranch Employees Retirement Income Plan (the "Plan") is provided for general information purposes only. Participants should refer to the summary plan description for more complete information.

General:

The Plan is a defined benefit plan which provides pension benefits to substantially all full-time hourly paid ranch employees of Gallo Vineyards, Inc. (the "Company"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions:

The Company contributes an amount to the Plan which will meet or exceed the annual ERISA minimum funding requirement. The Company's annual contributions are based on actuarially determined amounts. The Plan satisfied the minimum funding requirements of ERISA for the years 2017 and 2016.

Vesting and benefit payments:

The Plan has a 5 year cliff vesting schedule, whereby the participants' benefits are 100% vested upon completion of five years of service and are payable beginning at age 65. Employees may elect to receive their benefits as a life annuity or a joint and survivor annuity payable monthly after retirement or termination. When an annuity is elected, it is based on the benefit rate, years of service and the employee's compensation.

Plan termination:

The Plan is intended to be permanent; however, the Company's Board of Directors retains the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In such event, accrued benefits for all participants become fully vested and the assets of the Plan shall be allocated as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

b. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency), up to the applicable limitations (discussed below).

c. All other vested benefits (that is, vested benefits not insured by the PBGC).

d. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, a statutory ceiling exists, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For pension plans terminating in 2018, the maximum guaranteed amount is $5,420 per month ($65,040 annually). That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Note 2. Significant Accounting Policies

The following is a summary of significant accounting policies applied in the preparation of these financial statements:

Basis of accounting:

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits during the reporting period and disclosure of the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment valuation and income recognition:

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements. Purchases and sales of investments are recorded on a trade-date basis. Interest income is accrued when earned. Dividend income is recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statements of net assets available for benefits.

Benefit payments:

Benefit payments are recorded when paid.

Plan fees:

During the years ended December 31, 2017 and 2016, certain expenses of maintaining the Plan are paid by the Plan, unless otherwise paid by the Company. Expenses paid by the Company are excluded from these financial statements. Investment related expenses are included in net appreciation (depreciation) of fair value of investments.

Recently adopted accounting pronouncements:

The Financial Accounting Standards Board (FASB) has issued Accounting Standards Update 2015-12 *Plan Accounting – Defined Benefit Pension Plans* and 2015-07 *Fair Value Measurements.* These standards provide guidance on the accounting and reporting for defined benefit pension plans and fair value measurements. These statements are effective for years beginning after December 15, 2015. The Plan implemented these statements for the year beginning January 1, 2016. The adoption of the standards did not affect the statements of net assets available for benefits as of December 31, 2017 and 2016.

Note 3. Tax Status

The Plan obtained its latest determination letter on January 25, 2018, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's tax counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require the Plan administrator to evaluate tax positions taken by the Plan and recognize a tax liability for any uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by tax authorities; however, there are currently no audits for any tax periods in progress. The Plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2015.

Note 4. Fair Value Measurements

FASB provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to

unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB are described as follows: Level 1 - inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access; Level 2 - inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means; Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2017 and 2016:

Registered investment companies (mutual funds): The fair values of mutual funds are valued at quoted market prices which represent the net asset value of shares held by the Plan at year-end.

Pooled separate accounts: Separate accounts that invest exclusively in mutual funds or a portfolio of securities are valued at the net asset value of the underlying mutual fund and underlying pool of securities. Those separate accounts that invest in collective trust investments are valued at the price of the underlying investment received from the fund manager.

Alternative investment: A group trust that offers units of participation in specific investment funds. The investments in the investment fund are valued at net value less the value of liabilities of such investment fund as of the valuation day.

The preceding methods described may produce a fair value calculation that may not be indicative of net realized value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth, by level within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2017 and 2016:

		December 31, 2017		
		Fair Value Measurements Using:		
	Fair Value	***Level 1***	***Level 2***	***Level 3***
Pooled separate accounts	$ 475,855	$ -	$ 475,855	$ -
Registered investment companies	7,919,802	7,919,802	-	-
Alternative investment	2,483,861	-	2,483,861	-
Total assets at fair value	$ 10,879,518	$ 7,919,802	$ 2,959,716	$ -

		December 31, 2016		
		Fair Value Measurements Using:		
	Fair Value	***Level 1***	***Level 2***	***Level 3***

Total assets at fair value	$ 10,789,462	$ 7,624,163	$ 3,165,299	$ -

Realized and unrealized gains and losses included in the statements of changes in net assets available for benefits for the years ended December 31, 2017 and 2016, are reported in net appreciation (depreciation) in fair value of investments.

Note 6. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts, excluded from Plan assets, are excluded from accumulated Plan benefits.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary, Massachusetts Mutual Life Insurance Company, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of January 1, 2017 and January 1, 2016 were (a) life expectancy of participants (the RP2014 Mortality Table and the Adjusted RP2014 Mortality Table were used, respectively), (b) retirement age assumptions (the assumed average retirement age was between 55 to 70), and (c) investment return. The 2017 and 2016 valuations included an assumed average rate of return of 6.5%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

The actuarial present value of accumulated plan benefits at January 1 were as follows:

	2017	*2016*
Vested benefits:		
Participants currently receiving benefits	$ 533,729	$ 411,332
Other vested benefits	9,349,087	8,948,620
Total	9,882,816	9,359,952
Nonvested benefits	4,425	-
Total	$ 9,887,241	$ 9,359,952

The increase in the actuarial present value of accumulated plan benefits is attributable to the following:

	2017	*2016*
Beginning of year	$ 9,359,952	$ 9,448,068
Benefits accumulated and actuarial experience	1,278,561	1,471,328
Benefits paid (accrual basis)	(612,956)	(1,447,409)
Effect of assumption change	(138,316)	(112,035)
End of year	$ 9,887,241	$ 9,359,952

Note 7. Party-in-Interest Transactions

For the years ended December 31, 2017 and 2016, certain Plan investments are shares of mutual funds managed by Mass Mutual Financial Group, a subsidiary of Massachusetts Mutual Life Insurance Company, the Plan's actuary. In addition, fees paid to the trustees/recordkeeper amounted to $18,811 and $15,711 for the years ended December 31, 2017 and 2016, respectively. These transactions qualify as party-in-interest transactions which are exempt from the prohibited transaction rules.

Note 8. Reconciliation of Financial Statements to Form 5500

Certain balances included on Schedule H, Part I and II on the Annual Return/Report of Employee Benefit Plan (Form 5500) have been reclassified for the purpose of presentation in the financial statements.

Note 9. Subsequent Events

The Plan has evaluated events and transactions subsequent to December 31, 2017 through June 25, 2018, the date the financial statements were available to be issued, noting no significant items requiring further discussion.

Actuarial Assumptions

Interest:	January, 2017 IRS Segmented Yield Curve limited by the MAP-21 corridor as amended by HATFA
Preretirement Mortality:	IRC Sec 430 2017 Static Non-Annuitant Tables
Postretirement Mortality:	IRC Sec 430 2017 Static Annuitant Tables
