Continental Graphics Employee Pension Plan

Notes to Financial Statements

Note 1 – Plan Description

The following description of the Continental Graphics Employee Pension Plan (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General – The Plan is a defined benefit pension plan covering all eligible employees of Continental Graphics Corporation (the Company) who were hired prior to January 1, 2006, except for leased and contracted employees and employees who were covered under a union-negotiated plan. To be eligible for participation in the Plan, the employee must have met the following criteria by January 1, 2006: was at least 21 years of age, had completed 90 calendar days of consecutive service, and was scheduled to work 35 or more hours per week. Additionally, other employees hired prior to January 1, 2006 were eligible if they had completed 1,000 hours of service in a consecutive 12-month period and attained age 21. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

As a result of a resolution of the Board of Directors of the Company dated March 3, 2014, employee contributions and pay-based benefit accruals for participants in the Plan ceased effective January 1, 2016. As a result of this freezing of the employee pension contributions and accruals, beginning January 1, 2015, the Company is making enhanced Company contributions to the Employee Savings Plan of Continental Graphics Corporation (Savings Plan) for eligible employees hired on or after January 1, 2006, as follows:

- 3% of eligible compensation for those under 40
- 4% of eligible compensation for those age 40–49
- 5% of eligible compensation for those age 50 and over

Also as a result of the freezing of the employee pension contributions and pay-based benefit accruals for participants in the Plan, effective January 1, 2016, the Company is making additional Company contributions to the Savings Plan for all eligible Company employees who are participants in the Plan as follows:

- 9% of eligible compensation in 2016
- 8% of eligible compensation in 2017
- 7% of eligible compensation in 2018

In addition, effective January 1, 2015, the Company increased the employer matching contribution percentage in the Savings Plan for all eligible Company employees from 50% to 75% of each employee's contributions up to 8% of the employee's annual eligible compensation.

Administration – Charles Schwab Bank (Schwab) is the trustee of the Plan.

Notes to Financial Statements

Note 1 – Plan Description (continued)

Funding policy –Prior to January 1, 2016, employee contributions were required at one percent of annual earnings up to the Social Security taxable wage base, and three percent of earnings over the taxable wage base. The funding policy of the Plan is for the Company to contribute an amount that meets or exceeds the annual ERISA minimum funding requirements. The minimum funding requirements of ERISA were met in the 2017 and 2016 plan years. Employer contributions totaling \$3,000,000 and \$5,837 were contributed for the plan years ended December 31, 2017 and 2016, respectively.

The employee contributions reported in 2016 related to certain contributions withheld from the participants' paychecks on December 30, 2015.

Benefits and vesting – Participants are fully vested with regard to the accrued retirement benefits attributable to their accumulated contributions. Participants become fully vested in the portion of their accrued retirement benefits attributable to the Company's contributions upon completion of five years of vesting service and also upon death or disability or reaching normal retirement age.

The normal monthly retirement benefit at age 65 is equal to (a) 1 percent of the participant's highest five-year average monthly earnings prior to January 1, 2016, up to his or her Social Security covered compensation and (b) 1 $\frac{3}{4}$ percent of the participant's same average monthly earnings in excess of his or her Social Security covered compensation, with both (a) and (b) multiplied by the number of years of service prior to January 1, 2016. Annual benefits may not exceed the lesser of \$195,000 adjusted for cost of living in accordance with Section 415 of the Internal Revenue Code (IRC) or 100 percent of the participant's average compensation for the highest three consecutive compensated years while a participant was employed. Benefits generally begin after the normal retirement age of 65, although early retirement and benefit payments are possible after reaching age 55 and completing five years of service.

The accrued pension derived from participant contributions is equal to the actuarial equivalent of the participant's accumulated contributions, credited with interest compounded annually up to the earlier of the participant's normal retirement age or annuity starting date.

Note 2 – Summary of Significant Accounting Policies

Basis of accounting – The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Use of estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, the disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Continental Graphics Employee Pension Plan

Notes to Financial Statements

Note 2 – Summary of Significant Accounting Policies (continued)

Risks and uncertainties – The Plan's investments are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with such investments, it is reasonably possible that changes in the values of the investments will occur in the near term and such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Valuation of investments and income recognition – The Plan's investments are stated at fair value. Fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability ("exit price") in an orderly transaction between market participants at the measurement date.

The Plan's investments in mutual funds, which are registered investment companies, and the money market fund are valued at the net asset value of shares held by the Plan at year end as quoted in an active market.

Purchases and sales of securities are recorded on a trade-date basis, and dividends are recorded on the ex-dividend date. Net appreciation or depreciation in fair value of investments consists of gains and losses on investments bought and sold as well as held during the year.

Accumulated benefits – The actuarial present value of accumulated plan benefits information in Note 4 is presented as of the beginning of the Plan year, as allowed by Accounting Standards Codification (ASC) 960, *Plan Accounting – Defined Benefit Pension Plans*.

Payment of benefits – Benefits are recorded when paid.

Expenses – Certain expenses associated with the administration of the Plan and trust, including actuarial fees, are paid by the Plan. The Company pays all other administrative expenses of the Plan, including accounting and legal fees, as applicable.

Subsequent events – The Plan evaluated subsequent events through July 23, 2018, the date the financial statements were available to be issued.

Note 3 – Fair Value of Financial Assets and Financial Liabilities

ASC 820 established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy are described below:

Level 1 – Values are based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 – Values are based on (a) quoted prices for similar assets or liabilities in active markets; (b) quoted prices for identical or similar assets or liabilities in non-active markets; or (c) valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

The methods used by the Plan may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level within the fair value hierarchy a summary of investments by general types of assets measured at fair value on a recurring basis at December 31, 2017 and 2016. As required by ASC 820, assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Plan's policy is to recognize significant transfers between levels, if any, at the beginning of the reporting period.

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of December 31, 2016

There were no transfers to or from Level 3 during the years ended December 31, 2017 and 2016.

Note 4 – Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future benefit payments, including lump-sum distributions, which are attributed under the provisions of the Plan to services rendered by employees through the actuarial valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) active employees or their beneficiaries.

The actuarial present value of the accumulated plan benefits has been determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The most recent actuarial valuation was prepared as of January 1, 2017. Had the valuation been performed as of December 31, 2016, there would be no material difference. The actuarial cost method used to calculate the Plan costs is the unit credit method. The significant assumptions underlying the valuation are as follows:

- Discount rate of 7%
- Interest on employee contributions of 5%
- Life expectancy determined by the RP-2014 base table adjusted to 2006 with MP-2014 mortality improvement scale and projected with MP-2017 improvement scale
- Retirement age of 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Notes to Financial Statements

Note 4 – Actuarial Present Value of Accumulated Plan Benefits (continued)

The actuarial present value of accumulated plan benefits as of December 31, 2016, was as follows:

Vested benefits	
Participants currently receiving payments	\$ 10,925,695
Other participants	<u>45,843,130</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$ 56,768,825</u></u>

Changes in accumulated plan benefits were as follows for the year ended December 31, 2016:

Actuarial present value of accumulated plan benefits	
December 31, 2015	<u>\$ 57,368,280</u>
Increase (decrease) during the year attributable to:	
Benefits accumulated (including the effect of non-investment experience)	106,083
Decrease in the discount period	3,867,236
Change in actuarial assumptions	(328,680)
Benefits paid	<u>(4,244,094)</u>
Net decrease	<u>(599,455)</u>
Actuarial present value of accumulated plan benefit	
December 31, 2016	<u><u>\$ 56,768,825</u></u>

The change in actuarial assumptions for the year ended December 31, 2016 represents a change in the mortality improvement scale.

The accumulated contributions of active participants are presented as of the beginning of the plan year. As of December 31, 2016 and 2015, the accumulated contributions of active participants, including interest credited on those contributions, were approximately \$6,019,000 and \$6,635,000, respectively. As of December 31, 2016 and 2015, the rate for which interest was credited on the contributions was 5%.

Note 5 – Information Certified by the Trustee

Schwab is the trustee of the Plan. The following summary of unaudited information included in the Plan's financial statements and supplemental schedules of assets (held at end of year) and reportable transactions was certified by Schwab as of and for the years ended December 31, 2017 and 2016. The information was furnished to the Plan administrator, and the Plan administrator has obtained certifications from Schwab that the following information is complete and accurate:

- Investments at fair value as of December 31, 2017 and 2016
- Investment income for the years ended December 31, 2017 and 2016
- Information contained in the supplemental schedules of assets (held at end of year) and reportable transactions

Note 6 – Tax Status

The Plan received a determination letter dated November 4, 2015, in which the Internal Revenue Service stated the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since the date of the determination letter, however, the Plan administrator believes the Plan is designed and currently being operated in compliance with the applicable requirements of the IRC. Therefore, the Plan administrator believes the Plan's tax-exempt status has not been affected, and no provision for income taxes has been included in the Plan's financial statements.

Note 7 – Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event of termination of the Plan, the net assets of the Plan will be allocated, as prescribed by Section 4044 of ERISA, generally to provide the following benefits in the order indicated below:

1. Benefits attributable to employee contributions, taking into account those paid out before termination.
2. Annuity benefits to former employees or their beneficiaries who have been receiving benefits for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC), a U.S. governmental agency, up to the applicable limitations (discussed below).
4. All other vested benefits (vested benefits not insured by PBGC).
5. All non-vested benefits.

Continental Graphics Employee Pension Plan

Notes to Financial Statements

Note 7 – Plan Termination (continued)

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. The PBGC guarantees vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that PBGC guarantees.

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at the time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

A summary of the actuarial methods and assumptions used in the valuation is presented below:

Cost Method - The actuarial cost method used in this report for determining ERISA contributions is the Unit Credit cost method as defined by the Pension Protection Act of 2006. Under this method, an active participant's accrued benefit is calculated based on the Plan's benefit formula using current service and current compensation. Since this Plan is an Employee – Contributory plan, the Target Normal Cost has been reduced by the Expected Employee Contributions for the Plan Year.

Asset Method - The Actuarial Value of Assets (Valuation Assets) is equal to a 3-year averaging method as described in IRS Notice 2009-22. Under this method, the Valuation Assets is the average of the current and two preceding valuation date Market Value of Assets, where the preceding two years include expected earnings at the lesser of the third segment rate for that year or 7.00%.

Funding Target Discount Rates - The assumed discount rates on benefits paid in the future are based on the September 2016 Segment rates reflecting the Funding Stabilization provisions under HATFA and its current regulations:

<u>Segment</u>	<u>Rate</u>	<u>Applicable to benefit payments expected:</u>
1	4.16%	During first 5 years from the valuation date.
2	5.72%	During years 6-20 from the valuation date.
3	6.48%	During years 21 and beyond from the valuation date.

The Effective Rate is the equivalent single interest rate that would result in the same funding target, and is 6.04% for the 2017 plan year. Previously, the September 2015 PPA Segment rates were used (Effective Rate of 6.24%).

Different interest rates were used in developing liabilities associated with the Maximum Tax Deductible Contribution. The interest rates that were used for the Maximum Tax Deductible contribution calculations were as follows:

<u>Segment</u>	<u>Rate</u>	<u>Applicable to benefit payments expected:</u>
1	1.52%	During first 5 years from the valuation date.
2	3.80%	During years 6-20 from the valuation date.
3	4.79%	During years 21 and beyond from the valuation date.

Interest on Employee Contributions – 5.00% compounded annually.

Salary Rates – 3.50 % per year.

Social Security Wage Base – 3.50% per year.
