Schedule SB, Line 24 Changes in Actuarial Assumptions

Farmers National Bank Actuarial Valuation as of January 01, 2017 Executive Summary

Changes since Prior Valuation and Key Notes

There have been no changes to the plan provisions since the last valuation.

The interest rates and mortality assumptions have been updated as required under the Pension Protection Act, all subsequent legislation, and associated IRS Regulations, including the changes presented by the Bipartisan Budget Act of 2015. These changes resulted in an increase in the Funding Target, and Target Normal Cost.

To better reflect anticipated plan experience, the assumed withdrawal rates were changed to follow the Crocker Sarason Straight T-7 table. This change results in a small decrease in the Funding Target, the Target Normal Cost and present value of accrued benefits.

To better reflect anticipated plan experience, the ASC 960 discount rate was changed from 6.00% per annum to 5.00% per annum. This change results in an increase in the Present Value of Accumulated Benefits.

To better reflect anticipated plan experience, the actuary's long-term rate of return assumption for funding purposes was changed to 5.00% per annum effective with the 1/1/2017 valuation. This change results in no change in the 2017 valuation, but could impact future valuations.

To better reflect anticipated plan experience, for ASC 960 purposes, the mortality improvement scale was updated from the generational MP-2015 projection scale to the generational MP-2016 projection scale. The RP-2014 Mortality Table continues to be the underlying mortality basis. This change results in a small decrease in the Present Value of Accumulated Benefits.
