LEGACY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2017 and 2016

(1) Description of the Plan

(a) General

The United Technologies Corporation Legacy Retirement Plan (the Plan) was established by the United Technologies Corporation (the Corporation), effective on December 31, 2016 in connection with the transfer of assets and liabilities from the United Technologies Corporation Employee Retirement Plan (the "Non-Rep Plan") and from the United Technologies Corporation Represented Employee Retirement Plan (the "Rep Plan") to the Plan. The Plan is a noncontributory defined benefit retirement plan. Any Participant whose accrued benefit was spun-off from the Non-Rep Plan or Rep Plan is an eligible participant. Although the Plan consists almost exclusively of former employees no longer accruing benefits, a participant who returns to active employment with the employer will remain a participant of this Plan. The Plan is administered by UTC (the Plan Administrator) and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

The Plan is administered by the Company's Pension Administration Committee (PAC). The Committee has overall responsibility for the operation and administration of the Plan. The Pension Administration Investment Committee determines the appropriateness of the Plan's investment offerings, and monitors investment performance.

On August 30, 2017, UTC transferred \$18,222,345 thousand of assets for certain participants' benefits from the Non-Rep Plan to the Plan. Benefits of certain terminated participants (i.e., participants who are no longer accruing a Plan benefit and are no longer actively employed by the Company or any participating business unit or subsidiary) were transferred from the Non-Rep Plan into the Plan. The actuarial present value of accumulated plan benefits as of December 31, 2016, does not reflect the impact of the transfer on the Plans liability.

The following brief description of the Plan is provided for general information purposes only. More complete information is provided by the Summary Plan Description and Plan Document, which are available from the Plan Administrator.

(b) Vesting and Benefit Provisions

All participants in the Plan are fully vested, having met the requirements for vesting in the plan in which they participated prior to the transfer to this Plan.

(i) Final Average Earnings

Generally, participants are eligible for retirement at age 65. Employees may elect to receive their pension benefits in the form of a joint and survivor annuity or other actuarially equivalent annuity. Under the final average earnings formula, at retirement, eligible employees are entitled to monthly pension benefits based on either a percentage of final average earnings (as defined) multiplied by years of credited service, subject to reductions determined by applying a specified percentage to the participant's social security amount, or a fixed benefit multiplied by the years of credited service. Eligible participants will receive early retirement benefits, reduced in a manner set forth in the plan document, based upon age and service at termination. If, upon termination, the present value of the pension benefit as of the participant's normal retirement age is equal to or less than \$5,000, the vested portion of the benefit will be transferred to an IRA account if the participant does

LEGACY RETIREMENT PLAN

Notes to Financial Statements

not elect otherwise. The Plan also provides for disability and pre-retirement death benefits for certain groups of employees. As noted above, all benefits under the Final Average Earnings formula were frozen effective December 31, 2014.

(ii) Cash Balance

Under the cash balance formula, for each calendar month, a pay credit will be added to the participant's cash balance account in an amount equal to the pay credit rate for the plan year times the earnings paid to the participant during the month. For each calendar month, an interest credit will be added to a participant's cash balance account in an amount equal to his or her cash balance account as of the last day of the immediately preceding calendar month times the monthly applicable interest rate for the calendar month. Under the cash balance formula of the Plan, certain participants may elect single lump-sum payments, rollover their single lump sum payment, or receive monthly annuity payments. Other participants may only choose to receive monthly benefit payments from the Plan upon retirement. If, upon termination, the present value of the pension benefit as of the participant's normal retirement age is equal to or less than \$5,000, the vested portion of the benefit will be transferred to an IRA account if the participant does not elect otherwise. The Plan also provides for disability and pre-retirement death benefits.

(iii) Represented Employee Benefit Provisions

Generally, participants are eligible for retirement at age 65. Employees may elect to receive their pension benefits in the form of a joint and survivor annuity, or other actuarially equivalent annuity. Eligible employees are entitled to monthly pension benefits based upon the participant's years of credited service and fixed benefit rates. The rates vary for each business division.

Eligible participants could receive early retirement benefits, reduced in a manner set forth in the plan document, based upon age and service at termination.

If, upon termination, the present value of the pension benefit as of the participant's normal retirement age is less than or equal to \$5,000, the vested portion of the benefit will be transferred to an IRA account if the participant does not elect otherwise. The Plan also provides for disability benefits and pre-retirement death benefits for certain groups of employees.

(2) Summary of Accounting and Reporting Policies

The significant accounting and reporting policies followed by the Plan are summarized below:

(a) Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles (U.S. GAAP).

(b) Payment of Benefits

Benefits are recorded when paid.

(c) Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of net assets available for plan benefits at the dates of the financial statements, the changes in net assets available for plan benefits during the reporting periods, disclosure of contingent assets and liabilities, and other amounts reported in the financial statements and accompanying notes. The actuarial present value of accumulated plan benefits and contributions to the Plan are estimates which are based upon the actuarial methods and assumptions selected regarding salary rates, employee termination rates, mortality rates and other factors. Actual results could differ from those estimates.

(d) Contributions

Employer contributions are determined on an actuarial basis and are recorded during the Plan year to which they pertain.

(e) Administrative Expenses/Related Party Transactions

Expenses incurred in the administration of the Plan including fees paid to third-party administrators and other expenses, primarily actuarial fees and Pension Benefit Guaranty Corporation (PBGC) premiums, are paid from the Plan's assets.

Certain plan investments are managed by The Bank of New York Mellon, N.A. (the Trustee). These transactions qualify as party-in-interest transactions. For the years ended December 31, 2017, fees paid by the Plan or allocated to the Plan in the Master Trust for investment advisory services and trustee services to the Trustee amounted to \$23,338 thousand.

(f) Master Trust

The Plan's interest in the UTC Master Trust (Master Trust) is based upon the value of units of participation as certified by the Master Trust Trustee (see note 6). Master Trust investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of the Plan's interest in investment income (loss) and realized and unrealized appreciation (depreciation) in the market value of the invested assets of the Master Trust, net of investment advisory and trustee fees, is allocated to the Plan by the Trustee based on the Plan's proportionate interest in the Master Trust.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date. Interest income is recorded as earned. UTC performs ongoing due diligence reviews of the Master Trust's investments and has retained a consultant to provide quarterly reports, including a performance review.

(g) *Risks and Uncertainties*

The investment managers retained by the Plan Administrator have discretion to invest Master Trust assets in derivative financial instruments to manage risk as well as to enhance yields. These derivatives are primarily in the form of forward foreign exchange contracts, and various equity and interest rate futures. Such derivative instruments are reported at fair value within the Master Trust, and the changes in fair value are reported currently in the net appreciation (depreciation) of the Master Trust and not deferred. The future foreign exchange contracts represent an obligation to receive or disburse the change in the market value of the index. A portion of the Master Trust's assets are invested in international securities. As a result, the Master Trust assets are exposed to risk from fluctuations in foreign exchange rates.

By nature, all financial instruments involve risk, generally market risk, arising from changes in stock and bond prices, interest rates or currency exchange rates, credit risk, and the risk that an issuer or counter party will default on an agreed-upon transaction.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change.

Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(h) *Fair Value Measurement*

U.S. GAAP provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

- **Level 1** – The types of instruments classified as Level 1 are valued based on quoted market prices in active markets.
- **Level 2** – The types of instruments classified as Level 2 are valued based on inputs other than quoted prices that are observable for the asset, such as quoted prices for similar instruments in active markets or similar instruments in markets that are not active and model-based valuations for which all significant assumptions are observable or can be corroborated by observable market data.
- **Level 3** – Investments classified as Level 3 have inputs based on unobservable price data. They typically trade infrequently and therefore have little or no price transparency. Fair value pricing is developed based on the best information available which can include the reporting entity's own data.

**UNITED TECHNOLOGIES CORPORATION
LEGACY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2017 and 2016

An asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan Administrator believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Transfers between levels, if any, are recorded as of the date the transfer occurred.

(3) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service employees have rendered as of the actuarial valuation date. Accumulated plan benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation to determine benefit obligations as of December 31, 2016 were:

	2016
a. Discount rate	4.24% per year
b. Mortality table/Mortality projection scale	RP-2014/MP-2016
c. Retirement age	Decrement averaging at age 61; for certain employees earlier of age 63 and 25 years of services and age 65, and for other employees earlier of age 63 and 16 years of service and age 65

The present value of accumulated plan benefits as for December 31, 2016 increased by \$696,405 thousand due to transfer of benefits associated with the spin-off from Non-Rep Plan and Rep Plan to the Plan. The Plan considered the impact of the MP-2017 projection scale and determined the impact to be immaterial.

UNITED TECHNOLOGIES CORPORATION
LEGACY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2017 and 2016

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(4) Funding Policy

UTC's funding policy is to make periodic contributions to the Plan in amounts that will meet or exceed the annual ERISA minimum funding requirement. The Plan has met the minimum funding requirements of ERISA for the years ended December 31, 2017 and 2016.

(5) Plan Termination

Although UTC has not expressed any intent to terminate the Plan, it may do so at any time. In the event the Plan terminates, the net assets generally will not be available on a pro rata basis to provide for participant's benefits. The maximum amount of PBGC guaranteed benefits for terminations in 2017 at age 65 is \$5,369 per month. Whether all plan participants receive their full plan benefits, should the Plan terminate at some future time, would depend on the priority of these benefits and the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC. Some benefits may be fully or partially provided for by the existing plan assets and the PBGC guarantee while other benefits may not be provided for at all.

Upon termination, UTC shall give notice to the PBGC and shall comply with its procedures and lawful orders. As soon as it may do so, UTC thereupon shall cause all amounts in the hands of the Trustee and Insurance Companies to be allocated and distributed in the manner and order set forth in Section 4044 of ERISA to the extent of the sufficiency of the Plan's assets.

Additional information concerning the priority order of participants' claims to the assets of the Plan upon termination can be obtained from the Summary Plan Description, which is available from the Plan Administrator.

(6) Investment in Master Trust (Unaudited)

UTC has entered into a Master Trust agreement with The Bank of New York Mellon, N.A. as Trustee. Under this agreement, certain pension plans of UTC and its subsidiaries combine certain of their investments in the Master Trust.

Participating plans receive units of participation in this pool of investments based on their contributions to the Master Trust. The plans redeem units of participation to meet plan requirements to pay pension benefits and administrative expenses.

UTC stock held in the Master Trust had a fair value of \$344,159 thousand and \$302,057 thousand at December 31, 2017 and 2016, respectively. UTC stock held in the Master Trust represents approximately 1.3% and 1.4% of the Master Trust's Net Assets at December 31, 2017 and 2016, respectively.

During the years ended December 31, 2017 and 2016, the Master Trust's investments (including investments bought and sold, as well as investments held during the year) appreciated as follows:

	<u>\$ 3,032,445</u>	<u>2,112,174</u>

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2017 and 2016.

Quoted market prices are used to value equity and certain actively traded debt investments when available. Investments in securities traded on national and foreign securities exchanges are valued using the pricing services' reported sale prices on the last business day of the year or, if no sales were reported on that date, at the last reported bid prices.

Forward currency contracts, futures and options are valued at the exchange rates and market prices prevailing on the last business day of the year. Both exchange rates and market prices are readily available from published sources. Temporary cash investments are stated at fair value.

The Plan's interest in certain common collective trusts and limited partnerships are reported at the net asset value (NAV) reported by the fund managers. NAV is used to estimate the fair value of the Plan's interest therein, unless it is probable that all or a portion of the investment will be sold for an amount different from NAV. As of December 31, 2017, the Plan had no specific plans or intentions to sell investments at amounts different than NAV.

For securities that have no quoted market price, including those valued using NAV, many factors are considered in arriving at that fair market value, which include the following:

Common collective trusts invest in other public or private individual assets as determined and managed by the fund. The Plan's interest in the common/collective trust funds are based on the fair values of the underlying investments. Investments in collective trust funds are valued at their respective NAV per share/unit on the valuation date. There are no unfunded commitments and investments can be redeemed monthly with 30-120 days notice.

UNITED TECHNOLOGIES CORPORATION
LEGACY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2017 and 2016

Limited partnerships, valued using NAV per share practical expedient, principally private equity investments, are valued quarterly by the general partner using various valuation methods such as discounted cash flows, earnings multiples and market multiples. Valuation adjustments occur which reflect changes in operating results, financial condition, or prospects of the applicable portfolio company. Since valuation estimates are typically lagged a quarter, a fourth quarter roll-forward valuation process is used for fund level partnerships. This process takes into account latest reported valuation, monthly capital calls, management fees, return of capital, income distributions, and realized gains/losses.

For fixed-income securities, the market approach pricing methodology is primarily used where observable prices are obtained by market transactions involving identical or comparable securities of issuers with similar credit ratings. Mortgages have been valued on the basis of their future principal and interest payments discounted at prevailing interest rates for similar investments.

Real estate investments are valued on a quarterly basis; principally, rental property subject to long-term leases has been estimated on the basis of future rental receipts and estimated residual values discounted at interest rates commensurate with the risks involved. These valuation estimates are supplemented by third-party appraisals on an annual basis.

Fair value information for investments, net that are measured at fair value on a recurring basis is as follows at December 31, 2017 and 2016 (in thousands):

LEGACY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2017 and 2016

In preparing its fair value disclosures, the Plan has considered the nature of the underlying investments in classifying its investments by type and valuation level. The classification of investments in the Master Trust statement of net assets reflects a classification based on the structure of the investment. As an example, real estate held within a limited partnership structure may be classified differently. The Plan believes the presentation of investments by valuation levels is representative of the required disclosures.

(b) Quantitative Information about Significant Unobservable Inputs Used in Level 3 Fair Value Measurements

The following table represents the Master Trust's Level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments as of December 31, 2017, and the significant unobservable inputs and the ranges of values for those inputs (in thousands):

Level 3 investment	Fair value	Principal valuation technique	Significant unobservable inputs	Range of significant input values
Real estate	\$ 1,333,289	Discounted Cash Flow Analysis	Revenue Growth Rate Discount Rate Exit Cap Rate	0%–11% 6.5%–9.5% 5.75%–9%
Limited partnerships	\$ 1,499,700	Market Value Comparable Company Analysis Discounted Cash Flow Analysis Expected Returns Benchmark Pricing Comparable Yields Recent Financing	EBITDA Multiples WACC Illiquidity Discount Control Premium Lack of Control Discount Tangible book value Revenue Multiple Terminal Capitalization Rate Yield	2.8X–20X 6%–25% 0%–37% 0%–30% 5%–17% 0X–0.8X 1X–5X 0%–7.5% 0%–22.5%

In estimating fair value of the investments in Level 3, the Plan Administrator may use third-party pricing sources. In substantiating the reasonableness of the pricing data provided by third parties, the Plan Administrator evaluates a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

(c) Derivative Financial Instruments

Derivatives in the plan are primarily used to manage risk and gain asset class exposure while still maintaining liquidity. Derivative instruments mainly consist of equity futures, interest rate futures, interest rate swaps and currency forward contracts.

At December 31, 2017 and 2016, the Master Trust had open foreign currency contracts to purchase approximately \$14 million and \$13 million, respectively, and sell approximately \$14 million and \$13 million, respectively, of various foreign currencies.

Notes to Financial Statements

December 31, 2017 and 2016

(7) Tax Status of the Plan

The Internal Revenue Service has determined and informed the Plan Administrator by a letter dated June 6, 2018 that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan Administrator and the Plan's legal counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

U.S. GAAP requires plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2017 there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements.

The Plan is subject to routine audits by taxing authorities; however, there are currently no audits in progress for any tax periods.

(8) Related Party and Party in Interest Transactions

As described in note 6, certain plan investments are shares of UTC stock. As described in note 2, the Plan paid certain expenses related to plan operations and investment activity to various service providers. These transactions are party in interest transactions under ERISA.

(9) Subsequent Events

The Plan Administrator evaluated subsequent events through September 28, 2018, the date of issuance of its financial statements and determined that there are no additional items to be disclosed.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year as required by regulations under IRC §430
Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2016 plan year.)</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits not valued	<p>All benefits described in the Plan Provisions attachment were valued. Willis Towers Watson has reviewed the plan provisions with United Technologies Corporation and, based on that review, is not aware of any significant benefits required to be valued that were not.</p> <p>The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.</p>

Assumptions Rationale - Significant Economic Assumptions

Funding discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Crediting rate on cash balance accounts	<p>The cash balance interest crediting rate under the UTC plans is generally based on the applicable months' 30-year US Treasury yield in the prior year, subject to plan-specific minimum rates -- 3.80% (UTC Legacy salaried and Sikorsky Union Legacy), 5.00% (UTC Legacy Salaried and Non-Union Hourly Rocketdyne), and 5.00% (Legacy Goodrich cash balance benefit). UTC has reviewed the historic spread between the long-term high quality (AA) corporate bond yields and U.S. 30 year Treasury yields and has set and maintained the spread between the discount rate and interest crediting rate at 100 basis points.</p> <p>After examining historical variability in this rate, and considering the increase in interest crediting expected to be caused by the minimum interest credit, we believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.</p>
Annuity / Lump Sum conversion rate	The assumed annuity conversion rate is equivalent to the discount rate; We believe that the selected assumption does not significantly conflict with what would be reasonable.
Administrative expenses	Administrative expenses are estimated based on historical experience and future expectation.

Assumptions Rationale - Significant Demographic Assumptions

Benefit commencement date for deferred benefits

The assumptions were selected by UTC based on an experience study prepared in 2015.

Marital Assumptions

► Percent married

The assumed percentage married was set based on UTC's observations regarding its employee population. For plans that permit a non-spouse beneficiary, a 100% married assumption was selected to account for the additional benefits available for a non-spouse beneficiary.

► Spouse age

The assumed age difference for spouses is based on general population statistics on the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

The United Technologies Corporation Legacy Retirement Plan (EIN: 06-0570975 / PN: 040) was established as a new plan on the stroke of midnight of December 31, 2016 in conjunction with the de minimis spinoff and merger of 20,291 retired or terminated vested participants from both the UTC Employee Retirement Plan (EIN: 06-0570975 / PN: 001) and the United Technologies Corporation Represented Employee Retirement Plan (EIN: 06-0570975 / PN: 010). The plan year beginning January 1, 2017 and ending December 31, 2017 is the first plan year for this plan. This 2017 plan year Schedule SB is the first Schedule SB filed for this plan.

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of the Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Annuity / Lump Sum conversion rate	The assumed annuity conversion rate is equivalent to the discount rate; We believe that the selected assumption does not significantly conflict with what would be reasonable.
Administrative expenses	Administrative expenses are estimated based on historical experience and future expectation.

Assumptions Rationale - Significant Demographic Assumptions

Benefit commencement date for deferred benefits

The assumptions were selected by UTC based on an experience study prepared in 2015.

Marital Assumptions

► Percent married

The assumed percentage married was set based on UTC's observations regarding its employee population. For plans that permit a non-spouse beneficiary, a 100% married assumption was selected to account for the additional benefits available for a non-spouse beneficiary.

► Spouse age

The assumed age difference for spouses is based on general population statistics on the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

**United Technologies Corporation
Legacy Plan (UTC Non-Rep)
All Salaried Employees**

Effective January 1, 2010, UTC salaried employees hired after December 31, 2009 will not be eligible to participate in the pension plan and will receive a company automatic fixed contribution in the UTC savings plan instead. Newly hired hourly management represented and Puerto Rico exempt employees will continue to be eligible to participate in the Non-Rep Pension Plan.

Effective January 1, 2015, all final average earnings related benefits under the Non-Rep Plan will be frozen. Affected participants will be eligible to continue to participate in the Plan under the UTC 3%-8% Cash Balance Plan beginning January 1, 2015.

Effective January 1, 2017, a lump sum option was added for all salaried employees and hourly cash balance groups upon termination, which applies to benefits without a full lump sum option. For non-cash balance groups, this new lump sum will be available for a 12-month period following termination of employment. Employees terminated during 2016 have until December 1, 2017 to make this election.

**United Technologies Corporation

Eligible Employees: Salaried employees of United Technologies Corporation who were hired between June 30, 2002 and December 31, 2009 or who elected the cash balance formula during My Pension.My Choice. to be effective as of April 1, 2003 (or as of a later cash balance effective date, where applicable). Select GE Security employees are eligible to participate beginning January 1, 2011.
- b. Participation Requirements: Eligible Employees become participants on the earlier of:
 - January 1 coincident with or following age 21

Pay credits are added to the cash balance account at the end of each month and are expressed as a percentage of monthly earnings. Pay credits are based on attained age as of December 31 of the current year according to the table below:

<u>Age as of December 31</u>	<u>Pay Credit as Percent of Earnings</u>
Up to age 30	3%
Age 30 to 34	4%
Age 35 to 39	5%
Age 40 to 44	6%
Age 45 to 49	7%

Age 30 to 34	4%

In general, any prior FAE benefit is only available as an annuity commencing at age 55 or later.
