Independent Auditor's Report

To the Plan Administrator
The Marfo Company
Employee Stock Ownership Plan

Report on the Financial Statements

We have audited the accompanying financial statements of The Marfo Company Employee Stock Ownership Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2017 and 2016, the related statement of changes in net assets available for benefits for the year ended December 31, 2017, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2017 and 2016, and the changes in net assets available for benefits for the year ended December 31, 2017, in accordance with accounting principles generally accepted in the United States of America.

Independent Auditor's Report (Continued)

Emphasis of Matter

As discussed in Note 6, the financial statements include investments representing 99.9% of net assets available for benefits as of December 31, 2017 and 2016, whose fair values have been estimated by management in the absence of readily ascertainable fair values. Because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the investments existed and the differences could be material.

Other Matter - Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets held at end of year as of December 31, 2017 is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

The Marfo Company Employee Stock Ownership Plan

Notes to Financial Statements

Note 1. Description of Plan

The following brief description of The Marfo Company Employee Stock Ownership Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for complete information.

General: The Marfo Company (the Company) established the Plan effective January 1, 1994. The Plan operates as an employee stock ownership plan (ESOP) and is designed to comply with Section 4975(e)(7) and the regulations thereunder of the Internal Revenue Code of 1986, as amended (Code) and is subject to the applicable provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. The Plan is administered by an Administrative Committee comprised of two Company officers appointed by the Company's Board of Directors. The trust department of an independent third-party bank is the Plan's trustee.

Eligibility: Employees of the Company are generally eligible to participate in the Plan after six months of service providing they worked at least 500 hours within the six month period, and are 21 years of age or older. Participants who do not have at least 1,000 hours of service (two consecutive periods of 500 service hours) during such plan year or are not employed on the last working day of a plan year are generally not eligible for an allocation of Company contributions for such year. If an employee incurs a separation from service during the second half of a plan year due to death, disability, or attainment of normal retirement age, such participant is eligible to share in the allocation of Company contributions and participant forfeitures, if any, regardless of the number of hours of service completed during the plan year.

Contributions: The Company may make contributions, at the discretion of the Board of Directors, of (a) cash to enable the Plan to repurchase shares from participants requesting a distribution from the Plan or (b) Company common stock. Participant contributions are not permitted.

Participant accounts: The Plan is a defined contribution plan under which a separate individual account is established for each participant. Each participant's account is credited as of the last day of each plan year with an allocation of (a) Company contributions, (b) forfeitures of terminated participants' non-vested accounts, and (c) investment income and losses. Allocations of shares of the Company's common stock are based on the ratio of each participant's points for the plan year compared to the points of all eligible participants for that plan year. A participant shall be awarded one point for each \$100 of compensation, as defined, for the plan year and twenty points for each year of service with the Company.

Vesting: Company amounts credited to participant accounts become vested at 20% after two years of participation and an additional 20% per year thereafter, and are fully vested at the end of six years. Earlier vesting may occur upon one of the following: (a) attainment of normal retirement age defined as the later age 65 or the fifth anniversary of the participant's commencement day into the Plan; (b) death; (c) total or permanent disability; or (d) termination of the Plan.

Forfeited accounts: Forfeited amounts are reallocated to active participants in the year forfeited, based upon the same allocation method used for Company contributions. Forfeitures reallocated amounted to 0.4506 shares of stock and \$5 in cash for the plan year ended December 31, 2017. There were no unallocated forfeitures at December 31, 2017 and 2016.

Note 1. Description of Plan (Continued)

Payment of benefits: A participant may receive the vested value of their account upon termination of employment at the end of the fifth plan year following the plan year in which termination of employment occurs. A participant, or their beneficiary, may also receive the vested value of their account upon attainment of normal retirement age, total or permanent disability, or death no later than as soon as practicable following the plan year in which the event occurs. The Code requires that a participant receive a minimum distribution after the end of the calendar year following the later of (1) the calendar year in which they turn age 70 1/2, or (2) the calendar year in which they retire. Participants who are at least age 55 with at least 10 years of participation in the Plan may elect to diversify a portion of their account. Diversification is offered to each eligible participant over a six-year period.

Distributions are made in the form of cash or Company stock. Under the put option provisions of the Plan, the Company is obligated to repurchase participant shares of Company stock which have been distributed under the terms of the Plan. During 2017, the Company repurchased 88.9041 shares from participants with a fair value of \$2,067,565.

Put option: Under federal income tax regulations, the Company stock that is held by the Plan and its participants and is not readily tradable on an established market, or is subject to trading limitations includes a put option. The put option is a right to demand that the Company purchase any shares of its stock distributed to participants for which there is no market. The put price is the fair value of the stock as determined by the most recent independent appraisal. The put option will be exercisable for at least 60 days after the distribution of the Company stock from the ESOP, with an additional 60-day period during the next plan year, if not previously exercised. The purchase price may be paid by the Company in either a single lump-sum payment or in installments, with interest, over a period not exceeding five years.

Voting rights: Voting rights with regard to the Company stock held by the trustee will generally be exercised by the trustee as directed by the Plan's Administrative Committee, except for voting rights with respect to certain major corporate events, as defined. In the case of a major corporate event, each participant is entitled to direct the Administrative Committee as to the voting rights attributable to the shares allocated to their respective account.

Plan termination: While the Company has not expressed any intent to terminate the Plan, it reserves the right to terminate the Plan at any time, subject to Plan provisions. Upon such termination of the Plan, the interest of each participant in the Plan is fully vested and will be distributed to such participant at the time prescribed by the Plan terms and the Code.

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein. Actual results could differ from those estimates.

Investment valuation and income recognition: The shares of the Company common stock are valued at fair value as determined annually by an independent appraiser. The net depreciation in fair value of investments includes investments bought, sold, and held during the year. See Note 6 for discussion of fair value measurements.

Note 2. Summary of Significant Accounting Policies (Continued)

Contributions: Contributions are recognized when declared by the Company.

Payment of benefits: Benefits are recorded when paid.

Administrative expenses: All expenses of maintaining the Plan are paid by the Company.

Risks and uncertainties: The Plan investments consist primarily of the Company's common stock, which is exposed to various risks, such as interest rate, market, and credit risks, as well as valuation assumptions based on earnings, cash flows, and other such techniques. Due to the level of risk associated with the investment in the common stock and to uncertainties inherent in estimates and assumptions, it is at least reasonably possible that changes in the value of the common stock will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits. The financial statements include investments representing 99.9% of net assets available for benefits as of December 31, 2017 and 2016, whose fair values have been estimated by management in the absence of readily ascertainable fair values.

Subsequent events: The Plan Administrator has evaluated subsequent events through October 2, 2018, the date the financial statements were available to be issued.

Note 3. Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated October 29, 2003, that the Plan and its underlying trust qualify under the applicable sections of the Internal Revenue Code (IRC) and therefore are exempt from federal income taxes. Although the Plan has been amended and restated since receiving the determination letter, the plan administrator believes that the Plan is designed and currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination. The Plan is subject to routine audits by taxing jurisdiction; however, there are currently no audits for any tax periods in progress.

Note 4. Administration of Plan Assets

The Plan's assets, consisting principally of shares of Company common stock, are held and administered by the trustee of the Plan, under the direction of the Administrative Committee. Certain administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

Notes to Financial Statements

Note 5. Investments

The Plan's investment in shares of Company common stock at December 31 is summarized as follows:

	2017	2016
Common shares	781.9314	870.8355
Cost	\$ 7,942,744	\$ 8,848,819
Fair value	\$ 16,493,428	\$ 20,248,136

Note 6. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodology used for assets measured at fair value. There has been no change in the methodology used at December 31, 2017 and 2016.

Company common stock: Valued at fair value as determined by an independent appraisal. The independent appraiser considered the income, market, and asset valuation techniques consistent with prior years. The appraiser took into account historical and projected financial data, cost of equity, cost of debt, capital structure, and market comparables, and fair value of the Company assets and liabilities. The independent appraiser determined that adjusted balance sheet method was the appropriate methodology to utilize, which is consistent with prior years. Plan management has also determined that a market participant would recognize a discount for lack of marketability.

Notes to Financial Statements

Note 6. Fair Value Measurements (Continued)

The valuation process involves plan management's selection of an independent appraiser. Plan management accumulates data for the appraiser from the audited financial statements of the Company. The appraiser prepares a preliminary report which plan management, along with the ESOP trustee, reviews in detail, discusses and approves.

The method described above may produce a fair value that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation method is appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets measured at fair value as of December 31:

	2017			
	Level 1	Level 2	Level 3	Total
Company common stock	\$ -	\$ -	\$ 16,493,428	\$ 16,493,428

	2016			
	Level 1	Level 2	Level 3	Total
Company common stock	\$ -	\$ -	\$ 20,248,136	\$ 20,248,136

Changes in fair value levels: To assess the appropriate classification of investments within the fair value hierarchy, the availability of market data is monitored. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Plan management evaluates the significance of transfers between levels based upon the nature of the investment and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2017, there were no transfers in or out of Level 3.

The table below sets forth a summary of changes in the fair value of the Plan's level 3 assets for the year ended December 31, 2017.

Balance, beginning	\$ 20,248,136
Unrealized loss related to investments held at the reporting date	(1,687,564)
Purchases	421
Sales	(2,067,565)
Balance, ending	\$ 16,493,428

Note 7. Party In Interest Transactions

The Plan's investments are in the common stock of the Plan sponsor, The Marfo Company, therefore these transactions qualify as party in interest transactions. The Plan's cash is held in an account with Fifth Third Bank, who is the trustee of the Plan; therefore, these transactions qualify as party in interest transactions. The Plan has several service providers that are considered parties in interest under ERISA.
