Report on the Financial Statements

We have audited the accompanying financial statements of I.B.E.W. Local Union No. 64 Pension Fund, which comprise the statements of net assets available for benefits as of December 31, 2017 and 2016, and the related statements of changes in net assets available for benefits for the years then ended, and the statement of accumulated plan benefits as of December 31, 2016, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform that audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding I.B.E.W. Local Union No. 64 Pension's net assets available for benefits as of December 31, 2017, and changes therein for the years then ended and its financial status as of December 31, 2016, and the changes in its financial status for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplemental Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets held for investment as of December 31, 2017, is presented for the purpose of additional analysis and is not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

NOTE A - DESCRIPTION OF PLAN

The following description of I.B.E.W. Local Union No. 64 Pension Fund (the "Plan") is provides only general information. Participants should refer to the Plan agreement for more complete description of the Plan's provisions.

- 1.) General** - The I.B.E.W. Local Union No. 64 Pension Fund is a defined benefit plan covering all eligible members of Local Union No. 64 of the International Brotherhood of Electrical Workers. Established in 1970, the Plan provides for pension, death, and disability benefits. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).
- 2.) Pension Benefits** - Under the Plan, employees with 5 or more years of service, at least 3 of which are after May 1, 1970, are entitled to monthly pension benefits beginning at normal retirement age 62 equal to \$4.50 for each year of service between May 1, 1960, and May 1, 1970 plus, 4.00% of the contributions made on their behalf between May 1, 1970 and January 1, 2003, and 2.25% of contributions after January 1, 2003 to February 26, 2006 with no benefits accruing after February 26, 2006 and before January 1, 2010, 0.75% of contributions made between January 1, 2010 and December 31, 2013, 1.00% of contributions made between January 1, 2014 and December 31, 2015, 1.25% of contributions made between January 1, 2016 and December 31, 2016, and 1.50% of contributions made on or after January 1, 2017 with a guaranteed return of 100% of the contributions made to the fund on their behalf. Effective January 1, 2010, only the first 6% of wages contributed to the plan are considered for benefit accruals. Participants may elect to receive their pension benefits in the form of a joint and survivor annuity. If employees terminate before 5 years of service, they forfeit the right to receive the benefits they have accumulated.
- 3.) Death and Disability Benefits** - When a participant dies prior to retirement, a death benefit equal to the amount of contributions made on his behalf is paid to the participant's beneficiary, or if greater in value, the Qualified Preretirement 50% Joint and Survivor benefit. Active employees who become totally disabled after completing 5 years of service are entitled to full benefits commencing on the first day of the seventh month following the date of disability and continuing for the duration of the disability.
- 4.) Early Retirement Benefits** - Participants who have 10 years of service and who have reached the age of 57 may elect to retire and receive benefits computed as previously described, reduced by 1/4 of 1% for each month that the participant retires prior to reaching normal retirement age 62.
- 5.) Contributions** - Effective November 28, 2016 the union agreement stipulates that employers who employ members of I.B.E.W. Local Union No. 64 are required to contribute to the plan an amount equal to 13% of the employee's wages. From January 1, 2016 through November 27, 2016 the rate was 12%.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

- 1.) Basis of Accounting** - The accompanying financial statements are prepared on the accrual basis of accounting.
- 2.) Use of Estimates** - The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, and disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and the changes therein. Actual results could differ from those estimates

I.B.E.W. Local Union No. 64 Pension Fund

Notes to Financial Statements

December 31, 2017 and 2016

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

- 3.) Investment Valuation and Income Recognition** – Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's trustees determine the Plan's valuation policies utilizing information provided by the investment advisers and custodians. See Note D for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investment bought and sold as well as held during the year.

- 4.) Actuarial Present Value of Accumulated Plan Benefits** - Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during their last five years of credited service. The accumulated plan benefits for active employees are based on their average compensation during the five years ending on the date as of which the benefit information date. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by an actuary from Horizon Actuarial Services and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of December 31, 2016 are (a) life expectancy of participants (the sex distinct RP-2000 Mortality Table with Blue Collar adjustment, projected to 2020 using Scale AA) (b) retirement age assumptions (the assumed average retirement age was 62.0) and (c) investment return. The 2016 valuation included an assumed average rate of return of 7.50% net of investment expenses, the same as in the 2015 report, and a current liability rate of 3.05%, down from 3.28% in the 2015 report, and expenses are added to normal cost. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2017. Had the valuations been preformed as of December 31, 2016, there would be no material differences.

- 5.) Payment of Benefits** - Benefit payments to participants are recorded upon distribution.
- 6.) Administrative Expenses** – The Plan's expenses are paid by the Plan as provided by the plan document. Expenses incurred in connection with the general administration of the Plan and investment related expenses that are paid by the Plan are recorded as deductions in the statement of changes in net assets available for benefits.

I.B.E.W. Local Union No. 64 Pension Fund

Notes to Financial Statements

December 31, 2017 and 2016

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

7.) Subsequent Events – The Plan has evaluated subsequent events through September 4, 2018, the date the financial statements were available to be issued.

NOTE C – FUNDING POLICY

As a condition of the I.B.E.W. collective bargaining agreement, effective November 28, 2016 participating employers are required to contribute 13% of the employees' pay to the Plan on a monthly basis. The rate from January 1, 2016 to November 27, 2016 was 12%. The contributions for 2017 exceeded the minimum funding requirements required by ERISA.

Although there is no intention to do so, contributions to the plan can be discontinued at any time and the plan can be terminated subject to the provisions set forth in ERISA.

NOTE D - FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs in to valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has ability to access.

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in active markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If an asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation of the method used for assets measured at fair value. There have been no changes on the methodologies used at December 31, 2017 and 2016.

Money Market – Valued at the cash available in the account at December 31, 2017 and 2016, respectively.

U.S. Government Securities – Valued at the closing price as reported in active markets.

Mortgage Securities – Valued at the closing price as reported in active markets.

I.B.E.W. Local Union No. 64 Pension Fund

Notes to Financial Statements

December 31, 2017 and 2016

NOTE D – FAIR VALUE MEASUREMENTS – Continued

Mutual Funds – Valued at the daily closing price as reported by the fund. Mutual Fund held by the Plan are open-ended mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Corporate Bonds & Debentures – Valued at the closing price as reported in active markets.

Common/ Collective Trusts – Valued at the NAV of units of a bank collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

Common/ Collective Trusts – Real Estate - Value is based on beginning of the year value of the Plan's interest plus actual contributions and allocated investment income, less actual distributions and allocated administrative expenses.

The following table sets forth by level, with in the fair value hierarchy, the Plan's assets at fair value as of December 31, 2017 and 2016:

Notes to Financial Statements

December 31, 2017 and 2016

NOTE E – INVESTMENTS

The Plan's investments are held by various custodial institutions.

NOTE F - TAX STATUS

The plan obtained its latest determination letter on June 26, 2015, in which the Internal Revenue Service states that the Plan, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the plan administrator believes the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for the years prior to 2014.

NOTE G – RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made, and the actuarial present value accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE H – PLAN TERMINATION

Although it has not expressed any intent to do so, the Trustees have the right under the Plan to discontinue the operations of the Plan and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants will become 100 percent vested in their accounts.

NOTE I – RELATED PARTY AND PARTY IN INTEREST TRANSACTIONS

Certain Plan assets are invested in funds managed by custodians of the Plan. As described in Note B, the Plan paid certain expenses related to plan operations and investment activity to various service providers. These transactions are party in interest transactions under ERISA.

Statement By Enrolled Actuary

Plan Sponsor: Joint Board of Trustees of the International Brotherhood of Electrical Workers Local Union Number 64 Pension Trust Fund

EIN: 34-6654696

Plan Number: 001

Plan Name: IBEW Local Union No. 64 Pension Plan

Valuation Date: January 1, 2017

Enrolled Actuary: Kevin M. Culp

Enrollment Number: 17-07423

Actuarial assumptions: The actuarial assumptions and methods are individually reasonable and, in combination, represent the enrolled actuary's best estimate of anticipated experience under the Plan.

Census data and financial information: The actuarial valuation, on which the information in this Schedule MB is based, has been prepared in reliance upon the participant census data and financial information furnished by the Plan administrator and the auditor. The enrolled actuary has not made a rigorous check of the accuracy of this information but has reviewed it and concluded it to be reasonable for the purpose of this actuarial valuation. The amounts of contributions and dates paid shown in Line 3 of Schedule MB were listed in reliance on information provided by the Plan auditor.

This Schedule MB reflects the Trustees' decision to stop applying the special amortization rule under the Pension Relief Act of 2010 ("PRA") effective for the January 1, 2012 valuation. Prior to this, the Trustees applied the provisions of funding relief and specifically elected to utilize:

- Special extended funding standard account amortization of the Eligible Net Investment Loss incurred during the plan year beginning January 1, 2008
- Extended asset smoothing in the asset valuation method of the difference between the actual and expected market value of assets as of January 1, 2009

Attached as separate exhibits are:

- Line 6 – Statement of Actuarial Assumptions/Methods
- Line 6 – Summary of Plan Provisions
- Line 8b(1) – Schedule of Projection of Expected Benefit Payments
- Line 8b(2) – Schedule of Active Participant Data
- Lines 9c and 9h – Schedule of Funding Standard Account Bases

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

Plan Name	International Brotherhood of Electrical Workers Local Union Number 64 Pension Trust Fund
Plan Sponsor	Joint Board of Trustees of the International Brotherhood of Electrical Workers Local Union Number 64 Pension Trust Fund
EIN / PN	34-6654696/001
Interest Rates	<p>7.5% per annum, compounded annually, net of investment expense for determining costs and liabilities.</p> <p>This assumption was developed based on our professional judgment, the investment policy and asset allocation for the Plan and considers the results of the 2016 edition of the Survey of Capital Market Assumptions by Horizon Actuarial Services, LLC.</p> <p>3.05% per annum for determining Current Liability</p>
Future Increases in Maximum Benefits and Plan Compensation Limitations	It is assumed that maximum benefit and plan compensation limitations under the Internal Revenue Code will not increase in the future.
Assumed Cost-of-Living Adjustments	None.
Operating Expenses	Any unreimbursed administrative expenses paid from the Trust (including investment consultant fees) during the prior Plan Year are assumed to be payable again this year. The amount is added to the Normal Cost, payable at the beginning of the year. The amount included this year for Operating Expenses is \$142,168.
Hours Worked	For the purposes of projecting future benefits (if applicable) and future payroll, it is assumed that the number of hours worked in future years by each non-retired participant will be the average annual hours the participant worked during the last 3 years. For participants with fewer than 3 years of service, the average is based on the average of hours during all complete calendar years. 1,800 hours is assumed for participants who have not worked a complete calendar year.

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

Contribution Income and Hourly Rate

Per Collective Bargaining Agreements

Commercial rates increased from 11% to 12% of \$32.02 on November 30, 2015; to 13% of \$32.27 on November 28, 2016 and will increase to 13% of \$32.92 on November 27, 2017.

Residential rates increased from \$17.60 to \$18.10 on June 1, 2015, to \$18.60 on May 30, 2016, and will increase to \$18.90 on May 29, 2017 (11% contribution).

Teledata rates increase from \$21.61 to \$22.05 on August 29, 2016 and to \$22.45 on August 28, 2017 (11% contribution).

Compensation for Plan Participants

Equal to a participant's expected hours worked times the hourly wage specified in the collective bargaining agreement.

Non-Disabled Mortality

Participants and Beneficiaries:

The sex-distinct RP-2000 Mortality Table with Blue Collar adjustment, projected to 2020 using Scale AA.

The non-disabled mortality assumption including future improvement was chosen based on a review of standard mortality tables and projection scales, historical and current demographic data, and reflecting anticipated future experience and professional judgment.

For determining the RPA '94 current liability, the mortality tables prescribed by the Pension Protection Act of 2006 were used.

Disabled Mortality

RP-2000 Disability Mortality for males and females, projected to 2020 using Scale AA.

The disabled mortality assumption including future improvement was chosen based on a review of standard mortality tables and projection scales, historical and current demographic data, and reflecting anticipated future experience and professional judgment.

For determining the RPA '94 current liability, the healthy mortality tables prescribed by the Pension Protection Act of 2006 were used.

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

Retirement

The following rates have been utilized as the assumed incidence of retirement:

Attained Age	Rate of Retirement
57	1%
58	1%
59	2%
60	2%
61	2%
62	60%
63	40%
64	60%
65	100%

The retirement rates described herein were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment.

Disability

Illustrations of the annual rates of disablement are shown in the table below for selected ages (the same rates are used for males and females).

Incidence of Disability (per 1,000)

Attained Age	Male/Female
20	0.60
25	0.85
30	1.10
35	1.47
40	2.20
45	3.60
50	6.06
55	10.09
60	16.27

The disability rates described herein were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment.

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

Withdrawal

Illustrations of the annual rates of withdrawal (for reasons other than mortality or disablement) are shown in the table below for selected ages:

<i>Representative Withdrawal Rates</i>		
Age	Males	Females
20	0.150	0.250
30	0.069	0.099
40	0.028	0.049
50	0.004	0.017
55	0.000	0.004

The withdrawal rates described herein were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment.

Reemployment

It is assumed that there will be no new or rehired employees.

Form of Payment

Participants are assumed to elect the normal form.

Marriage

85% of participants are assumed to be married.

Inclusion Date

The valuation date coincident with or next following the enrollment date on which the employee has employer contributions made on his behalf.

Spouse Ages

Females are assumed to be three years younger than their spouses.

Cost Method

The Traditional Unit Credit Cost Method is used to determine the normal cost and the actuarial accrued liability. The actuarial accrued liability is the present value of the accrued benefits as of the beginning of the year for active participants and is the present value of all benefits for other participants. The normal cost is the present value of the difference between the accrued benefits as of the beginning and end of the year. The normal cost and actuarial accrued liability for the plan are the sums of the individually computed normal costs and actuarial accrued liabilities for all plan participants.

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

Asset Valuation Method The actuarial value of assets is determined by adjusting the market value of assets to reflect the investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last four years at the rate of 25% per year. The investment loss for the 2008 Plan year is recognized over ten years (instead of four years) in accordance with the provisions of the Pension Relief Act of 2010, as elected by the Trustees. Expected investment return is calculated using the net market value of assets as of the beginning of the plan year and the benefit payments, employer contributions and operating expenses, weighted based on the timing of the transactions during the year. The actuarial value is subject to a restriction that it be not less than 80% nor more than 120% of the market value.

Financial Information Financial information was obtained from the audited financial statements.

Pension Relief Act of 2010 The following special rules were elected by the Trustees under the Pension Relief Act of 2010:

- Special amortization rule: The portions of experience losses attributable to the eligible net investment losses incurred during the plan year ending December 31, 2008 are amortized in the funding standard account over a period ending December 31, 2037.
- Special asset valuation rule:
 - Expanded Smoothing: Eligible net investment losses incurred during the plan year ending December 31, 2008 are smoothed in the actuarial value of assets over a period of 10 years.

The special rules apply retroactively to the plan year beginning January 1, 2009. For purposes of determining the amounts of the eligible net investment losses to be recognized in the funding standard account under the special amortization rule, the "prospective" method described in IRS Notice 2010-83 was used.

The Trustees decided to stop applying the special amortization rule under the Pension Relief Act of 2010 ("PRA") effective for the January 1, 2012 valuation.

Participant Data Participant data as of the valuation date was supplied electronically by the Plan Administrator.

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

<i>Incomplete Participant Data</i>	Assumptions were made to adjust for participants and beneficiaries with missing or incomplete data, based on those exhibited by participants with similar known characteristics.
---	--

<i>Benefits Not Included in Valuation</i>	None.
--	-------

<i>Nature of Actuarial Calculations</i>	<p>The valuation results presented in this report are estimates. The results are based on data that may be imperfect and on assumptions made about future events. Certain plan provisions may be approximated or deemed immaterial for the purposes of the valuation. Assumptions may be made about missing or incomplete participant census data or other factors. Reasonable efforts were made to ensure that significant items and factors are included in the valuation and treated appropriately. A range of results different from those presented in this report could also be considered reasonable.</p>
--	--

The actuarial assumptions selected for this valuation – including the valuation interest rate – generally reflect average expectations over the long term. If overall future demographic or investment experience is less favorable than assumed, the relative level of plan costs determined in this valuation will likely increase in future valuations. Investment returns and demographic factors may fluctuate significantly from year to year. The deterministic actuarial models used in this valuation do not take into consideration the possibility of such volatility.

Normal Retirement

Eligible at age 62 with five years of vesting service.

The normal retirement benefit shall be equal to the sum of (i) a past service benefit, equal to \$4.50 per month per year of credited service (maximum of 10 years), plus (ii) a future service benefit, equal to 4.00% of the aggregate employer contributions made to the pension fund with respect to such employee prior to January 1, 2003, 2.25% of aggregate contributions made after January 1, 2003 and before February 26, 2006, 0.00% of aggregate contributions made after February 26, 2006 and before January 1, 2010, 0.75% of contributions made after January 1, 2010 and before January 1, 2014, 1.00% of contributions made after January 1, 2014 and before January 1, 2016, 1.25% of contributions made after January 1, 2016 and before January 1, 2017, and 1.50% of contributions made on and after January 1, 2017. Effective January 1, 2010, only the first 6% of wages contributed to the plan are considered for benefit accruals.

Early Retirement

Eligible at age 57 with both ten years of credited service and three years of future service credit.

The monthly early retirement benefit is determined in accordance with the normal retirement benefit based on past service credit and contributions to date of termination of employment reduced by $\frac{1}{4}\%$ for each month that the benefits are paid prior to the normal retirement date.

Disability Retirement

Eligible if totally and permanently disabled after completion of at least five years of future service credit.

The monthly disability retirement benefit is equal to the normal retirement benefit based on the past service credit and contributions made on behalf of the participant at the date he became disabled.

Deferred Vested Retirement

Eligible at any age with both five years of vesting service and three years of future service credit.

The deferred vested benefit available following termination is determined under the normal retirement formula deferred to age 62. After attaining age 57 with 10 years of credited service, a participant may request immediate benefits reduced for commencement prior to normal retirement date.

Summary of Plan Provisions

[Schedule MB, Line 6]

Surviving Spouse's Benefit

Eligible upon the death of a married participant who has completed five years of Vesting Service.

The participant's spouse will receive, at the date the participant would have reached age 57, unless a later is selected by the surviving spouse, 50% of the pension to which the participant would have been entitled had the participant retired on the day immediately prior to the benefit starting date and elected an immediate 50% Joint and Survivor option with his spouse as beneficiary.

Death Benefit

In the event of death of any employee prior to his retirement, his beneficiary will receive a lump sum payment equal to the aggregate credited employer contributions made to the pension fund with respect to such employee, to the extent that benefits otherwise payable from the Plan on behalf of the participant (including any Surviving Spouse's Benefits) do not exceed this sum.

Normal Form of Payment

The normal form of payment shall be a pension payable monthly for the life of the participant. In the event that the participant dies before his accumulated pension payments exceed the total amount of credited contributions made on his behalf, his designated beneficiary shall receive, in a lump sum, the difference between the total amount of credited contributions and the accumulated pension payments.

A participant who is married at the time of his benefit commencement date will be presumed to have elected to receive the Qualified Joint and 50% Survivor option in favor of his spouse, unless he elects otherwise in writing and his spouse agrees. The Qualified Joint and 50% Survivor option is actuarially equivalent to the lifetime annuity to the participant.

Optional Forms of Payment

A participant may elect to receive, not earlier than his 57th birthday, a Joint and Survivor pension with either 50%, 75% or 100% of the participant's benefit continuing to the participant's spouse for her lifetime after the participant's death. A participant may also elect to have any of these Joint and Survivor options include a pop-up provision, which increases the monthly payment to the participant back to the lifetime annuity amount if his spouse should predecease him. Each of these options is actuarially equivalent to the lifetime annuity to the participant.

Pensioner Increases

Benefits for retired participants collecting benefits as of January 1, 1989 and January 1, 1991 were increased by \$30 per month.

Summary of Plan Provisions

***Changes Since Prior
Valuation***

Since the prior valuation, the following plan provisions have been changed:

The benefit multiplier was increased from 1.25% to 1.5% of contributions on and after January 1, 2017.

Schedule of Funding Standard Account Bases

The table above shows the outstanding amortization bases in the funding standard account as of the valuation date. The amortization bases are grouped as charges, which represent increases in the unfunded actuarial liability, and credits, which represent decreases in the unfunded actuarial liability.

Different types of amortization bases are as follows:

Abbreviation	Description
Initial Liab	Initial unfunded actuarial accrued liability
Exper Loss	Actuarial experience loss (charge only)
Exper Gain	Actuarial experience loss (credit only)
ENIL (2008)	Eligible net investment loss under the Pension Relief Act of 2010
Amendment	Plan amendment
Assumption	Change in actuarial assumptions
Method	Change in the cost method, actuarial valuation, or asset valuation method method
Combined	Combined charge base or combined credit base
Offset	Combined and offset charge and credit bases

Charge bases subject to an extension of the amortization period as described under Section 431(d) of the Code, if applicable are designated by [x]. Charge bases subject to a funding waiver are designated by [w].

The "ENIL (2008)" bases are the portions of the eligible net investment losses ("ENIL") for the plan year ending December 31, 2008. These bases are amortized over the period ending December 31, 2037, as permitted under the special amortization rule provided in the Pension Relief Act of 2010. The portions of the 2008 market value investment loss to be recognized have already been determined under the "prospective" method and are summarized in the table below.

Loss Recognized on January 1	Portion of 2008 ENIL to be Amortized	Amortization Period
2009	\$2,785,029	29
2010	531,577	28
2011	374,526	27
2012	426,745	26
2013	1,070,641	25
2014	841,214	24

The Trustees have decided to stop applying the special amortization rule under the Pension Relief Act of 2010 ("PRA") effective for the January 1, 2012 valuation. This report reflects this decision. As a result, the portion of the 2008 ENIL for years 2012 through 2014 shown in the table above will be amortized over 15 years instead of the amortization period shown in the table.

Justification for Change in Actuarial Assumptions

[Schedule MB, Line 11]

Changes in Assumptions Since the prior valuation, the following assumptions have been changed:

- The amount included for Operating Expenses changed from \$154,073 to \$142,168. The assumed operating expenses are added to the normal cost for benefits.
- The Current Liability interest rate was decreased from 3.28% to 3.05%, in accordance with the change in the IRS prescribed rates.
- The mortality rates used in determining Current Liability were changed as required by Treasury Regulation and IRS guidance.
- The negotiated hourly contribution/wage rates were increased as follows:
 - Commercial rates increased from 11% to 12% of \$32.02 on November 30, 2015; to 13% of \$32.27 on November 28, 2016 and will increase to 13% of \$32.92 on November 27, 2017.
 - Residential rates increased from \$17.60 to \$18.10 on June 1, 2015, to \$18.60 on May 30, 2016, and will increase to \$18.90 on May 29, 2017 (11% contribution).
 - Teledata rates increased from \$21.61 to \$22.05 on August 29, 2016 and to \$22.45 on August 28, 2017 (11% contribution).

**Justification for
Changes in Assumptions
and Methods**

The changes in the actuarial assumptions described above were made to better reflect anticipated Plan experience.

The changes in the interest rate and mortality tables used to determine the RPA '94 current liability were mandated legislative changes.

Plan Number: 001

Plan Name: IBEW Local Union No. 64 Pension Plan

Valuation Date: January 1, 2017

Enrolled Actuary: Kevin M. Culp

Enrollment Number: 17-07423

Actuarial assumptions: The actuarial assumptions and methods are individually reasonable and, in combination, represent the enrolled actuary's best estimate of anticipated experience under the Plan.

Census data and financial information: The actuarial valuation, on which the information in this Schedule MB is based, has been prepared in reliance upon the participant census data and financial information furnished by the Plan administrator and the auditor. The enrolled actuary has not made a rigorous check of the accuracy of this information but has reviewed it and concluded it to be reasonable for the purpose of this actuarial valuation. The amounts of contributions and dates paid shown in Line 3 of Schedule MB were listed in reliance on information provided by the Plan auditor.

This Schedule MB reflects the Trustees' decision to stop applying the special amortization rule under the Pension Relief Act of 2010 ("PRA") effective for the January 1, 2012 valuation. Prior to this, the Trustees applied the provisions of funding relief and specifically elected to utilize:

- Special extended funding standard account amortization of the Eligible Net Investment Loss incurred during the plan year beginning January 1, 2008
- Extended asset smoothing in the asset valuation method of the difference between the actual and expected market value of assets as of January 1, 2009

Interest Rates	<p>7.5% per annum, compounded annually, net of investment expense for determining costs and liabilities.</p> <p>This assumption was developed based on our professional judgment, the investment policy and asset allocation for the Plan and considers the results of the 2016 edition of the Survey of Capital Market Assumptions by Horizon Actuarial Services, LLC.</p> <p>3.05% per annum for determining Current Liability</p>
Future Increases in Maximum Benefits and Plan Compensation Limitations	It is assumed that maximum benefit and plan compensation limitations under the Internal Revenue Code will not increase in the future.
Assumed Cost-of-Living Adjustments	None.
Operating Expenses	Any unreimbursed administrative expenses paid from the Trust (including investment consultant fees) during the prior Plan Year are assumed to be payable again this year. The amount is added to the Normal Cost, payable at the beginning of the year. The amount included this year for Operating Expenses is \$142,168.
Hours Worked	For the purposes of projecting future benefits (if applicable) and future payroll, it is assumed that the number of hours worked in future years by each non-retired participant will be the average annual hours the participant worked during the last 3 years. For participants with fewer than 3 years of service, the average is based on the average of hours during all complete calendar years. 1,800 hours is assumed for participants who have not worked a complete calendar year.

Statement of Actuarial Assumptions and Methods

Contribution Income and Hourly Rate

Per Collective Bargaining Agreements

Commercial rates increased from 11% to 12% of \$32.02 on November 30, 2015; to 13% of \$32.27 on November 28, 2016 and will increase to 13% of \$32.92 on November 27, 2017.

Residential rates increased from \$17.60 to \$18.10 on June 1, 2015, to \$18.60 on May 30, 2016, and will increase to \$18.90 on May 29, 2017 (11% contribution).

Teledata rates increase from \$21.61 to \$22.05 on August 29, 2016 and to \$22.45 on August 28, 2017 (11% contribution).

Compensation for Plan Participants

Equal to a participant's expected hours worked times the hourly wage specified in the collective bargaining agreement.

Non-Disabled Mortality

Participants and Beneficiaries:

The sex-distinct RP-2000 Mortality Table with Blue Collar adjustment, projected to 2020 using Scale AA.

The non-disabled mortality assumption including future improvement was chosen based on a review of standard mortality tables and projection scales, historical and current demographic data, and reflecting anticipated future experience and professional judgment.

For determining the RPA '94 current liability, the mortality tables prescribed by the Pension Protection Act of 2006 were used.

Disabled Mortality

RP-2000 Disability Mortality for males and females, projected to 2020 using Scale AA.

The disabled mortality assumption including future improvement was chosen based on a review of standard mortality tables and projection scales, historical and current demographic data, and reflecting anticipated future experience and professional judgment.

For determining the RPA '94 current liability, the healthy mortality tables prescribed by the Pension Protection Act of 2006 were used.

Withdrawal

Illustrations of the annual rates of withdrawal (for reasons other than mortality or disablement) are shown in the table below for selected ages:

<i>Representative Withdrawal Rates</i>		
Age	Males	Females
20	0.150	0.250
30	0.069	0.099
40	0.028	0.049
50	0.004	0.017
55	0.000	0.004

The withdrawal rates described herein were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment.

Reemployment

It is assumed that there will be no new or rehired employees.

Form of Payment

Participants are assumed to elect the normal form.

Marriage

85% of participants are assumed to be married.

Inclusion Date

The valuation date coincident with or next following the enrollment date on which the employee has employer contributions made on his behalf.

Spouse Ages

Females are assumed to be three years younger than their spouses.

Cost Method

The Traditional Unit Credit Cost Method is used to determine the normal cost and the actuarial accrued liability. The actuarial accrued liability is the present value of the accrued benefits as of the beginning of the year for active participants and is the present value of all benefits for other participants. The normal cost is the present value of the difference between the accrued benefits as of the beginning and end of the year. The normal cost and actuarial accrued liability for the plan are the sums of the individually computed normal costs and actuarial accrued liabilities for all plan participants.

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

Asset Valuation Method The actuarial value of assets is determined by adjusting the market value of assets to reflect the investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last four years at the rate of 25% per year. The investment loss for the 2008 Plan year is recognized over ten years (instead of four years) in accordance with the provisions of the Pension Relief Act of 2010, as elected by the Trustees. Expected investment return is calculated using the net market value of assets as of the beginning of the plan year and the benefit payments, employer contributions and operating expenses, weighted based on the timing of the transactions during the year. The actuarial value is subject to a restriction that it be not less than 80% nor more than 120% of the market value.

Financial Information Financial information was obtained from the audited financial statements.

Pension Relief Act of 2010 The following special rules were elected by the Trustees under the Pension Relief Act of 2010:

- Special amortization rule: The portions of experience losses attributable to the eligible net investment losses incurred during the plan year ending December 31, 2008 are amortized in the funding standard account over a period ending December 31, 2037.
- Special asset valuation rule:
 - Expanded Smoothing: Eligible net investment losses incurred during the plan year ending December 31, 2008 are smoothed in the actuarial value of assets over a period of 10 years.

The special rules apply retroactively to the plan year beginning January 1, 2009. For purposes of determining the amounts of the eligible net investment losses to be recognized in the funding standard account under the special amortization rule, the "prospective" method described in IRS Notice 2010-83 was used.

The Trustees decided to stop applying the special amortization rule under the Pension Relief Act of 2010 ("PRA") effective for the January 1, 2012 valuation.

Participant Data Participant data as of the valuation date was supplied electronically by the Plan Administrator.

Statement of Actuarial Assumptions and Methods

[Schedule MB, Line 6]

<i>Incomplete Participant Data</i>	Assumptions were made to adjust for participants and beneficiaries with missing or incomplete data, based on those exhibited by participants with similar known characteristics.
---	--

<i>Benefits Not Included in Valuation</i>	None.
--	-------

<i>Nature of Actuarial Calculations</i>	<p>The valuation results presented in this report are estimates. The results are based on data that may be imperfect and on assumptions made about future events. Certain plan provisions may be approximated or deemed immaterial for the purposes of the valuation. Assumptions may be made about missing or incomplete participant census data or other factors. Reasonable efforts were made to ensure that significant items and factors are included in the valuation and treated appropriately. A range of results different from those presented in this report could also be considered reasonable.</p>
--	--

The actuarial assumptions selected for this valuation – including the valuation interest rate – generally reflect average expectations over the long term. If overall future demographic or investment experience is less favorable than assumed, the relative level of plan costs determined in this valuation will likely increase in future valuations. Investment returns and demographic factors may fluctuate significantly from year to year. The deterministic actuarial models used in this valuation do not take into consideration the possibility of such volatility.

Summary of Plan Provisions

Summary of Plan Provisions

[Schedule MB, Line 6]

Normal Retirement

Eligible at age 62 with five years of vesting service.

The normal retirement benefit shall be equal to the sum of (i) a past service benefit, equal to \$4.50 per month per year of credited service (maximum of 10 years), plus (ii) a future service benefit, equal to 4.00% of the aggregate employer contributions made to the pension fund with respect to such employee prior to January 1, 2003, 2.25% of aggregate contributions made after January 1, 2003 and before February 26, 2006, 0.00% of aggregate contributions made after February 26, 2006 and before January 1, 2010, 0.75% of contributions made after January 1, 2010 and before January 1, 2014, 1.00% of contributions made after January 1, 2014 and before January 1, 2016, 1.25% of contributions made after January 1, 2016 and before January 1, 2017, and 1.50% of contributions made on and after January 1, 2017. Effective January 1, 2010, only the first 6% of wages contributed to the plan are considered for benefit accruals.

Early Retirement

Eligible at age 57 with both ten years of credited service and three years of future service credit.

The monthly early retirement benefit is determined in accordance with the normal retirement benefit based on past service credit and contributions to date of termination of employment reduced by ¼% for each month that the benefits are paid prior to the normal retirement date.

Disability Retirement

Eligible if totally and permanently disabled after completion of at least five years of future service credit.

The monthly disability retirement benefit is equal to the normal retirement benefit based on the past service credit and contributions made on behalf of the participant at the date he became disabled.

Deferred Vested Retirement

Eligible at any age with both five years of vesting service and three years of future service credit.

The deferred vested benefit available following termination is determined under the normal retirement formula deferred to age 62. After attaining age 57 with 10 years of credited service, a participant may request immediate benefits reduced for commencement prior to normal retirement date.

Summary of Plan Provisions

[Schedule MB, Line 6]

Surviving Spouse's Benefit

Eligible upon the death of a married participant who has completed five years of Vesting Service.

The participant's spouse will receive, at the date the participant would have reached age 57, unless a later is selected by the surviving spouse, 50% of the pension to which the participant would have been entitled had the participant retired on the day immediately prior to the benefit starting date and elected an immediate 50% Joint and Survivor option with his spouse as beneficiary.

Death Benefit

In the event of death of any employee prior to his retirement, his beneficiary will receive a lump sum payment equal to the aggregate credited employer contributions made to the pension fund with respect to such employee, to the extent that benefits otherwise payable from the Plan on behalf of the participant (including any Surviving Spouse's Benefits) do not exceed this sum.

Normal Form of Payment

The normal form of payment shall be a pension payable monthly for the life of the participant. In the event that the participant dies before his accumulated pension payments exceed the total amount of credited contributions made on his behalf, his designated beneficiary shall receive, in a lump sum, the difference between the total amount of credited contributions and the accumulated pension payments.

A participant who is married at the time of his benefit commencement date will be presumed to have elected to receive the Qualified Joint and 50% Survivor option in favor of his spouse, unless he elects otherwise in writing and his spouse agrees. The Qualified Joint and 50% Survivor option is actuarially equivalent to the lifetime annuity to the participant.

Optional Forms of Payment

A participant may elect to receive, not earlier than his 57th birthday, a Joint and Survivor pension with either 50%, 75% or 100% of the participant's benefit continuing to the participant's spouse for her lifetime after the participant's death. A participant may also elect to have any of these Joint and Survivor options include a pop-up provision, which increases the monthly payment to the participant back to the lifetime annuity amount if his spouse should predecease him. Each of these options is actuarially equivalent to the lifetime annuity to the participant.

Pensioner Increases

Benefits for retired participants collecting benefits as of January 1, 1989 and January 1, 1991 were increased by \$30 per month.

Schedule of Funding Standard Account Bases

The table above shows the outstanding amortization bases in the funding standard account as of the valuation date. The amortization bases are grouped as charges, which represent increases in the unfunded actuarial liability, and credits, which represent decreases in the unfunded actuarial liability.

Different types of amortization bases are as follows:

Abbreviation	Description
Initial Liab	Initial unfunded actuarial accrued liability
Exper Loss	Actuarial experience loss (charge only)
Exper Gain	Actuarial experience loss (credit only)
ENIL (2008)	Eligible net investment loss under the Pension Relief Act of 2010
Amendment	Plan amendment
Assumption	Change in actuarial assumptions
Method	Change in the cost method, actuarial valuation, or asset valuation method method
Combined	Combined charge base or combined credit base
Offset	Combined and offset charge and credit bases

Charge bases subject to an extension of the amortization period as described under Section 431(d) of the Code, if applicable are designated by [x]. Charge bases subject to a funding waiver are designated by [w].

The "ENIL (2008)" bases are the portions of the eligible net investment losses ("ENIL") for the plan year ending December 31, 2008. These bases are amortized over the period ending December 31, 2037, as permitted under the special amortization rule provided in the Pension Relief Act of 2010. The portions of the 2008 market value investment loss to be recognized have already been determined under the "prospective" method and are summarized in the table below.

Loss Recognized on January 1	Portion of 2008 ENIL to be Amortized	Amortization Period
2009	\$2,785,029	29
2010	531,577	28
2011	374,526	27
2012	426,745	26
2013	1,070,641	25
2014	841,214	24

The Trustees have decided to stop applying the special amortization rule under the Pension Relief Act of 2010 ("PRA") effective for the January 1, 2012 valuation. This report reflects this decision. As a result, the portion of the 2008 ENIL for years 2012 through 2014 shown in the table above will be amortized over 15 years instead of the amortization period shown in the table.

Justification for Change in Actuarial Assumptions

[Schedule MB, Line 11]

Changes in Assumptions Since the prior valuation, the following assumptions have been changed:

- The amount included for Operating Expenses changed from \$154,073 to \$142,168. The assumed operating expenses are added to the normal cost for benefits.
- The Current Liability interest rate was decreased from 3.28% to 3.05%, in accordance with the change in the IRS prescribed rates.
- The mortality rates used in determining Current Liability were changed as required by Treasury Regulation and IRS guidance.
- The negotiated hourly contribution/wage rates were increased as follows:
 - Commercial rates increased from 11% to 12% of \$32.02 on November 30, 2015; to 13% of \$32.27 on November 28, 2016 and will increase to 13% of \$32.92 on November 27, 2017.
 - Residential rates increased from \$17.60 to \$18.10 on June 1, 2015, to \$18.60 on May 30, 2016, and will increase to \$18.90 on May 29, 2017 (11% contribution).
 - Teledata rates increased from \$21.61 to \$22.05 on August 29, 2016 and to \$22.45 on August 28, 2017 (11% contribution).

**Justification for
Changes in Assumptions
and Methods**

The changes in the actuarial assumptions described above were made to better reflect anticipated Plan experience.

The changes in the interest rate and mortality tables used to determine the RPA '94 current liability were mandated legislative changes.
