Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

INDEPENDENT AUDITORS' REPORT

To the Trustees and Participants of
Filtran Pension Plan
Des Plaines, Illinois

Report on the Financial Statements

We have audited the accompanying financial statements of Filtran Pension Plan (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2017 and 2016, the related statements of changes in net assets available for benefits for the years then ended, and the statement of accumulated plan benefits as of December 31, 2016, the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Filtran Pension Plan's net assets available for benefits as of December 31, 2017 and 2016, and the changes therein for the years then ended, and its financial status as of December 31, 2016, and the changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules, Schedule H, Line 4(i) - Schedule of Assets (Held at End of Year) as of December 31, 2017 and Schedule H, Line 4(j) - Schedule of Reportable Transactions for the year ended December 31, 2017, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

FILTRAN PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

As of and for the Years Ended December 31, 2017 and 2016

NOTE 1 - Description of the Plan

The following description of the Filtran Pension Plan (the "Plan") provides only general information. Users of these financial statements should refer to the plan document for a more complete description of the Plan's provisions.

General

The Plan is a non-contributory defined benefit pension plan established for the benefit of eligible employees of Filtran LLC (the "Company"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). An employee becomes eligible on the date they become an employee of the Company pursuant to a collective bargaining agreement between the Company and the Shopman's Local Union No. 473 of the International Association of Bridge, Structural, Ornamental and Reinforcing Iron Workers (affiliated with AFL-CIO).

Contributions and Funding Policy

All contributions under the Plan are made by the Company. Contributions are based upon actuarial calculations of amounts necessary to provide for defined pension benefit payments upon retirement or death. The calculations are made annually by Correll Company, the actuary retained by the Plan ("Actuary"). The funding policy contribution is calculated as the minimum contribution required by ERISA for the applicable plan year. It is the Company's policy to make contributions of an amount at least equal to the minimum contributions required by ERISA. The Company made contributions of \$337,827 and \$321,896 for the years ended December 31, 2017 and 2016, respectively, which exceeded the minimum required contribution as calculated by the Actuary. Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Vesting

Participants are vested with completion of 5 years of service. A participant becomes fully vested in their accrued pension if their employment terminates because of a) total and permanent disability after 10 years of credited service, b) attainment of early retirement age after 10 years of credited service or c) attainment of normal retirement age.

Pension Benefits

Benefits may be paid to the participant or beneficiary upon death, disability, retirement or termination of employment, as defined in the plan document. The Plan provides for normal retirement at either age 65 with the completion of five years of service, early retirement at age 60 and completion of 10 years or disability retirement benefits after 10 years of vesting service. Normal retirement benefits are calculated monthly and equal to the product of \$32.50 and Years of Service completed by the participant. A participant may elect an early distribution of the retirement benefit, in which case the accrued pension benefit will be decreased by 0.3% for each complete month by which the distribution precedes the normal retirement date. Participants may elect to receive the value of their accumulated benefits as a lump-sum distribution if the actuarial equivalent of the accrued benefit is less than \$25,000. If employees terminate before rendering five years of service, they forfeit the right to receive the portion of their accumulated plan benefits attributable to the Company's contributions.

FILTRAN PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

As of and for the Years Ended December 31, 2017 and 2016

NOTE 1 - Description of the Plan (cont.)

Death and Disability Benefits

If an active employee dies at age 55 or older, a death benefit equal to the value of the employee's accumulated pension benefit is paid to the employee's beneficiary. Active employees who become totally disabled receive annual disability benefits that are equal to the equivalent normal retirement benefit they have accumulated as of the time they become disabled. Disability benefits are paid until normal retirement age, at which time disabled participants will receive the normal retirement benefit equal to the employee's accrued benefit as of the date of disability.

NOTE 2 - Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation of fair value of investments presented in the accompanying statements of changes in net assets available for benefits.

Investment Valuation and Income Recognition

The Plan's investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's trustees determine the Plan's valuation policies utilizing information provided by the investment advisors and asset custodian. See Note 3 for a discussion of fair value measurements.

FILTRAN PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

As of and for the Years Ended December 31, 2017 and 2016

NOTE 2 - Summary of Significant Accounting Policies (cont.)

Investment Valuation and Income Recognition (cont.)

Purchases and sales of securities are recorded on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the gain and loss on investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2016 and 2015, were as follows:

	<u>2016</u>	<u>2015</u>
Standard Mortality	Annuity: RP-2014 Combined Annuitant/Non-annuitant Blue Collar Mortality Table; employee rates to age 64, annuitant rates age 65+, future mortality improvement according to Scale MP-2017	Annuity: RP-2014 Combined Annuitant/Non-annuitant Blue Collar Mortality Table; employee rates to age 64, annuitant rates age 65+, future mortality improvement according to Scale MP-2016
Discount rate	7.50%	7.50%

The actuarial valuation is determined using the beginning-of-the-year method. Therefore, the accumulated plan benefits as of December 31, 2016 is presented from information provided by the Actuary as of January 1, 2017. There has been no significant change in the Plan's provisions or coverage during this period.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE 3 - Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under authoritative guidance are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted market prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2 - Observable market based inputs or unobservable inputs that are corroborated by market data. Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of relevant observables and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2017 and 2016.

Mutual funds are valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The plan sponsor is responsible for the determination of fair value. Accordingly, they perform periodic analysis on the prices received from the pricing services used to determine whether the prices are reasonable estimates of fair value. As a result of these reviews, the plan sponsor has not historically adjusted the prices obtained from the pricing services. The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

NOTES TO FINANCIAL STATEMENTS As of and for the Years Ended December 31, 2017 and 2016

NOTE 3 - Fair Value Measurements (cont.)

The table below presents the balances of assets and liabilities measured at fair value on a recurring basis by level within the hierarchy.

Total assets at fair value	<u>\$ 1,674,415</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 1,674,415</u>

NOTE 4 - Parties-In-Interest Transactions

The Plan's investments are administered under a contract with Fidelity Investments Institutional Services Company, the custodian of the Plan ("Custodian"). Contributions are held and managed by the Custodian, who invests cash received, interest, and dividend income and makes distributions to participants. Fees incurred by the Plan for the investment manager services are included in net appreciation (depreciation) in the fair value of the investment, as they are paid through revenue sharing, rather than a direct payment. These transactions qualify as party-in-interest transactions which are exempt from the prohibited transactions rules of ERISA.

Certain expenses of the Custodian are paid by the Plan related to plan operations and investment activity described in Note 1. Additionally, certain administrative functions of the Plan are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

NOTE 5 - Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated June 10, 2012, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since receiving the determination letter, however, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

U.S. GAAP requires management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

As of and for the Years Ended December 31, 2017 and 2016

NOTE 6 - Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (a) Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.
- (b) Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations
- (c) All other vested benefits (that is, vested benefits not insured by PBGC).
- (d) All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However a statutory ceiling exists, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

NOTE 7 - Risk and Uncertainties

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

In addition, the Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

FILTRAN PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

As of and for the Years Ended December 31, 2017 and 2016

NOTE 8 - Concentrations

The Plan holds certain investments that represent 10% or more of the total net assets of the Plan's net assets available for benefits. As of December 31, 2017 and 2016, the Plan held two such investments totaling \$1,950,783 and \$1,348,092, respectively.

NOTE 9 - Subsequent Events

The Plan has evaluated subsequent events through October 2, 2018, which is the date that the financial statements were approved and available to be issued, for events requiring recording or disclosure in the Plan's financial statements.

ACTUARIAL COST METHOD AND PROCEDURES

Cost Method

The method used to determine annual contributions, to be made to develop the fund for expected benefit payments (i.e., to determine "costs"), is the method defined by the Pension Protection Act of 2006. The total cost for a plan year, under this method, is equal to an amortization of the unfunded cost ("Funding Shortfall") that is allocated to prior years ("Funding Target") plus the cost allocated to the current year ("Target Normal Cost"), together with interest at the effective rate of interest from the valuation date to the date of the contribution made to satisfy the funding requirement.

The Funding Target, under this prescribed method of determining the contribution requirement, is the sum of the individual funding targets for all participants. The individual funding target is the portion of the Present Value of Benefits (the "Present Value of Benefits" being the amount at the valuation date which, under the assumptions made, would be sufficient to provide all benefits payable to employees then covered by the Plan) that is allocated to prior service at the beginning of the plan year. The portion of the Present Value of Benefits that is assigned to prior service is the amount equal to the present value, at the valuation date, of the participant's accrued benefit based on service through the beginning of the plan year. The amount by which the Funding Target exceeds the adjusted Actuarial Value of Plan Assets is the Funding Shortfall.

The Target Normal Cost is the sum of the individual target normal costs for all active participants who have not yet fully accrued their benefit on the valuation date, plus the amount of plan-related expenses expected to be paid from plan assets during the plan year. The individual target normal cost is equal to the present value, at the valuation date, of the difference between the accrued benefit based on service through the end of the current plan year, taking into account any increase in the accrued benefit that would result from an increase in compensation during the year, and the accrued benefit based on service through the beginning of the plan year.

For the purpose of the target normal cost and funding target, the accrued benefit is determined under the plan's benefit formula(s) calculated using the projected compensation at the end of the plan year, if applicable, and the projection to the end of the plan year, under respective assumptions, of any other components that would be used in the calculation of the benefit except taking into account only credited service through the beginning or the end of the current plan year as indicated above.

The present value of benefits, for purposes of the funding target and target normal cost, is determined using specific mortality and interest assumptions as prescribed by the Pension Protection Act of 2006. The interest rate assumption consists of three segment rates: the first segment rate applies to payments expected to be paid during the first five years, the second segment rate applies during the next fifteen years, and the third segment rate applies thereafter. The effective rate of interest for a plan year is the single rate of interest that would produce an amount equal to the Funding Target for the plan year.

ACTUARIAL COST METHOD AND PROCEDURES

(continued)

Actuarial Value of Assets

Assets are valued at fair market value. Contributions made for the current plan year, with interest at the effective rate to the current valuation date, are excluded as well as any carryover or prefunding balance, unless elected otherwise.

Ancillary Benefits

Termination and death benefits under the plan are closely related to the amount that has been funded in anticipation of the pension benefit payable at normal retirement date. The provisions for ancillary benefits are assumed to be included in margins in the costs determined for pension benefits alone.

Life Insurance Policies

Some pension plans provide life insurance coverage for active participants. For whole-life type policies, the cash value of the contract will be available to apply pension benefits if the insured survives to normal retirement date. The premiums paid for such contracts are divided between death benefits and pension benefits for cost determination purposes. For universal-life type policies, the current cash value (or accumulation account if greater) is reduced by the present value of expected surrender charges, if any, and added to the Actuarial Value of Assets, and the death benefit cost is the net amount at risk multiplied by the insurer's one-year term insurance rate (or "risk rate"). For term-life type policies, which do not generate a cash value, the death benefit cost is the net annual premium on all policies in force on the valuation date.

ACTUARIAL COST METHOD AND PROCEDURES

Cost Method

The method used to determine annual contributions, to be made to develop the fund for expected benefit payments (i.e., to determine "costs"), is the method defined by the Pension Protection Act of 2006. The total cost for a plan year, under this method, is equal to an amortization of the unfunded cost ("Funding Shortfall") that is allocated to prior years ("Funding Target") plus the cost allocated to the current year ("Target Normal Cost"), together with interest at the effective rate of interest from the valuation date to the date of the contribution made to satisfy the funding requirement.

The Funding Target, under this prescribed method of determining the contribution requirement, is the sum of the individual funding targets for all participants. The individual funding target is the portion of the Present Value of Benefits (the "Present Value of Benefits" being the amount at the valuation date which, under the assumptions made, would be sufficient to provide all benefits payable to employees then covered by the Plan) that is allocated to prior service at the beginning of the plan year. The portion of the Present Value of Benefits that is assigned to prior service is the amount equal to the present value, at the valuation date, of the participant's accrued benefit based on service through the beginning of the plan year. The amount by which the Funding Target exceeds the adjusted Actuarial Value of Plan Assets is the Funding Shortfall.

The Target Normal Cost is the sum of the individual target normal costs for all active participants who have not yet fully accrued their benefit on the valuation date, plus the amount of plan-related expenses expected to be paid from plan assets during the plan year. The individual target normal cost is equal to the present value, at the valuation date, of the difference between the accrued benefit based on service through the end of the current plan year, taking into account any increase in the accrued benefit that would result from an increase in compensation during the year, and the accrued benefit based on service through the beginning of the plan year.

For the purpose of the target normal cost and funding target, the accrued benefit is determined under the plan's benefit formula(s) calculated using the projected compensation at the end of the plan year, if applicable, and the projection to the end of the plan year, under respective assumptions, of any other components that would be used in the calculation of the benefit except taking into account only credited service through the beginning or the end of the current plan year as indicated above.

The present value of benefits, for purposes of the funding target and target normal cost, is determined using specific mortality and interest assumptions as prescribed by the Pension Protection Act of 2006. The interest rate assumption consists of three segment rates: the first segment rate applies to payments expected to be paid during the first five years, the second segment rate applies during the next fifteen years, and the third segment rate applies thereafter. The effective rate of interest for a plan year is the single rate of interest that would produce an amount equal to the Funding Target for the plan year.

ACTUARIAL COST METHOD AND PROCEDURES

(continued)

Actuarial Value of Assets

Assets are valued at fair market value. Contributions made for the current plan year, with interest at the effective rate to the current valuation date, are excluded as well as any carryover or prefunding balance, unless elected otherwise.

Ancillary Benefits

Termination and death benefits under the plan are closely related to the amount that has been funded in anticipation of the pension benefit payable at normal retirement date. The provisions for ancillary benefits are assumed to be included in margins in the costs determined for pension benefits alone.

Life Insurance Policies

Some pension plans provide life insurance coverage for active participants. For whole-life type policies, the cash value of the contract will be available to apply pension benefits if the insured survives to normal retirement date. The premiums paid for such contracts are divided between death benefits and pension benefits for cost determination purposes. For universal-life type policies, the current cash value (or accumulation account if greater) is reduced by the present value of expected surrender charges, if any, and added to the Actuarial Value of Assets, and the death benefit cost is the net amount at risk multiplied by the insurer's one-year term insurance rate (or "risk rate"). For term-life type policies, which do not generate a cash value, the death benefit cost is the net annual premium on all policies in force on the valuation date.
