Cone Drive Operations Hourly Union Pension Plan

NOTES TO FINANCIAL STATEMENTS

NOTE A - DESCRIPTION OF PLAN

The following description of the Cone Drive Operations Hourly Union Pension Plan (the "Plan") provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

General

The Plan, effective September 1, 1955, is a noncontributory defined benefit pension plan covering all eligible hourly union employees and is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The Plan was established to enable certain employees of Cone Drive Operations, Inc. (the "Company") to accumulate capital for retirement.

On October 26, 2010, the Plan was frozen, closing entrance to new participants.

Eligibility

Eligibility is met if the hourly employee is in the collective bargaining unit at the Traverse City, Michigan plant represented by Local 21 of the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAAAIW Local 21).

The Plan freeze prevents new entrants to the Plan.

Vesting

Participants earn rights to benefits based on years of continuous service. A participant is 100% vested after five years of credited service.

Actuarial Present Value of Accumulated Plan Benefits

Upon retirement or termination of service, a participant's benefits are based on a benefit rate and years of credited service. Benefits payable under all circumstances - retirement, death, disability and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date. Accumulated Plan benefits (see Note C) are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

Plan transactions are recorded on the accrual basis of accounting.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires the Plan Administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Shares of mutual funds are valued at quoted market prices which represent the net asset value of shares held by the Plan. Separate accounts are valued at the net asset values of the underlying mutual fund.

Appreciation or depreciation in the fair value of investments represents the change in the difference between aggregate fair value and aggregate cost of investments, including investments purchased, sold and held during the year.

Purchases and sales of securities are recorded on a trade-date basis.

Payment of Benefits

Benefits are recorded when paid.

Funding Policy

Contributions depend on the Plan's funded status and are determined by an independent actuary using the Long-Term Contribution Level assumption and Plan Accounting method. The Long-Term Contribution Level allocates the difference between the Benefit Liability and the Actuarial Value of Assets as a level dollar amount per year. This reflects the service projected to the age benefits are assumed to be paid and increase in benefit limits projected at 0 percent per year. The minimum contribution requirement of ERISA was met in 2017.

Subsequent Events

The Company has evaluated subsequent events and transactions for potential recognition and disclosure through October 5, 2018, the date the financial statements were available to be issued.

NOTE C - ACCUMULATED PLAN BENEFITS

An actuary from Principal Financial Group estimates the actuarial present value of accumulated Plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The accumulated Plan benefit information, as of January 1, 2017 is as follows:

Actuarial present value of accumulated Plan benefits:	
Vested benefits:	
Participants currently receiving payments	$ 14,975,588
Other participants	3,623,091
Total vested benefits	18,598,679
Nonvested benefits	53,791
Total present value of accumulated Plan benefits	$ 18,652,470

Changes in the actuarial present value of accumulated Plan benefits are as follows:

Actuarial present value of accumulated Plan benefits at January 1, 2016	$ 18,374,770
Increase (decrease) for:	
Increase for interest due to decrease in the discount period	1,057,078
Benefits paid	(1,535,993)
Benefits accumulated and Plan experience	(46,272)
Change in assumptions	802,887
Actuarial present value of accumulated Plan benefits at January 1, 2017	$ 18,652,470

Significant assumptions underlying the actuarial computations are:

Assumed rate of return on investments	6.00%
Mortality	IRS prescribed static tables with separate rates for annuitants during benefit payment period and non-annuitants before benefit payment period
Retirement	Determined by company experience with a weighted-average retirement age of 65
Accrued monthly benefit amount	$30.75 per year of credited service $31.25 per year of credited service effective 12/01/2012 $31.75 per year of credited service effective 12/01/2014

All actuarial assumptions are based on the presumption that the Plan will continue.

Changes in assumptions

The assumed rate of return on investments was changed from 6.25% to 6.00% at January 1, 2017; and the mortality table was updated for the applicable year. The Plan accounting mortality assumption has also been updated to the most recently available historical data.

NOTE D - FAIR VALUE OF FINANCIAL INSTRUMENTS

FASB ASC 820-10, *Fair Value Measurements*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820-10 are described below:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodology used for assets measured at fair value.

Mutual funds: Valued at the net asset value ("NAV") of shares held by the Plan at year-end.

Insurance contracts - separate accounts: Valued at the NAV of the underlying mutual funds held by the Plan's insurance contract issuer at year-end.

The method described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation method is appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value:

Assets at Fair Value as of December 31, 2017

	Level 1	Level 2	Level 3	Total
Mutual funds	$12,268,746	$ -	$ -	$12,268,746
Insurance contracts - separate accounts	-	6,047,434	-	6,047,434
Total assets at fair value	$12,268,746	$ 6,047,434	$ -	$18,316,180

Assets at Fair Value as of December 31, 2016

	Level 1	Level 2	Level 3	Total
Mutual funds	$12,104,852	$ -	$ -	$12,104,852
Insurance contracts - separate accounts	-	5,433,133	-	5,433,133
Total assets at fair value	$12,104,852	$ 5,433,133	$ -	$17,537,985

NOTE E - CERTIFIED INVESTMENTS

The Plan Administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the *Department of Labor Rules and Regulations for Reporting and Disclosure* under ERISA. Accordingly, the Trustee has certified that the information listed below is complete and accurate:

	2017	2016
Statement of Net Assets Available for Benefits		
Investments	$18,316,180	$17,537,985
Statement of Changes in Net Assets Available for Benefits		
Net appreciation in fair value of investments	$ 2,110,131	$ 988,830
Interest and dividends earned on investments	$ 328,664	$ 273,944

Disclosures in Note D.

All information in the supplemental schedule.

The Plan's independent certified public accountants did not perform auditing procedures with respect to information certified by the Trustee, except for comparing such information to the related information included in the financial statements and supplemental schedule.

NOTE F - PARTY-IN-INTEREST TRANSACTIONS

A party-in-interest is defined under Department of Labor regulations as any fiduciary of the Plan, any party rendering service to the Plan, the Company and certain others. Fees paid by the Plan for investment management services amounted to $129,755 and $115,306 for the years ended December 31, 2017 and 2016, respectively. Fees paid to mutual fund managers, the amounts of which are unknown, are netted against investment income. Professional fees for the administration and audit of the Plan were paid by the Company.

NOTE G - PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, the Plan assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated Plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all. Information about the PBGC's benefit guarantee and priority of benefits are available in the Summary Plan Description which is available at the personnel office of Cone Drive Operations, Inc.

NOTE H - TAX STATUS

The Plan obtained its latest determination letter in May 2014, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirement of the Internal Revenue Code. The Plan has not been amended subsequent to this determination.

All tax positions taken by the Plan have been assessed to have a near 100% likelihood of being sustained upon their ultimate settlement in the event they are examined by taxing authorities and, therefore, there are no unrecognized tax liabilities. The tax years that remain subject to examination by the Internal Revenue Service are 2014 - 2016.

Assumptions prescribed by law

Mortality

During benefit payment period
IRS Prescribed Mortality - Static Annuitant, male and female.

Before benefit payment period
IRS Prescribed Mortality - Static Non-annuitant, male and female.

Assumptions selected by actuary

Asset return

6.00% for the current plan year.

The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.

Expected expense

The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.

Retirement

Active participants

Age	Probability of retirement	Age	Probability of retirement
55	3%	61	10%
56	3%	62	30%
57	3%	63	50%
58	3%	64	10%
59	3%	65	remaining participants
60	5%		

Inactive participants are assumed to retire at age 62 with 10 years of service.

This assumption is based on the results of recent experience analysis and anticipated future experience. Some participants retire early since the plan provides an early retirement subsidy beginning at age 55.

Disability

1987 Commissioner's Group Disability Table, six month elimination period, male and female, multiplied by 0.50.

We rely on a publicly published table due to the limited size of the plan. The 1987 CGDT was recommended by the Society of Actuaries for pension valuation purposes.

Marriage	80% married; husbands are 3 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	2003 Society of Actuaries Small Plan Age Table, multiplied by 0.25. We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 0.25 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.
Form of benefit	Participants are assumed to receive their benefits on the normal form at the assumed retirement age.

Methods prescribed by law

Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target Normal Cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Benefit accrual	All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target. The portion based on the plan's definition of accrued benefit. The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement. The benefits included in target normal cost are calculated similarly, by splitting the benefits. The Target Normal Cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.

Methods selected by plan sponsor

Asset method

The asset valuation method is prescribed by law for plans that elect to use a value other than market value.

For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.

The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.

When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.

Segment rates

24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.

PBGC premium basis

Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 01/01/2014 plan year and the method must be used for five years before a change can be made.

Segment 1	Segment 2	Segment 3
years 0-5	years 5-20	years 20+
2.04%	4.03%	4.82%

Methods elected by actuary

Retirees

Assets and liabilities for current and future retirees are included.

Vested benefits

A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.

The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)
With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality	Based on RP-2006 total dataset mortality table projected to future years with historical and assumed mortality improvement (MI) rates using the Principal Mortality Improvement Scale (PFG2012-10). RP-2006 is a baseline mortality rates table underlying the SOA RP-2014 experience study as of central year of the experience data for 2004-2008 years. The Principal Mortality Improvement scale is based on the SOA MI model RPEC_2014_v2016 and Principal-selected assumption set published November 2016. For detailed rationale please see full Mortality documentation.
Interest rate used to value liabilities	5.50% The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.
Treatment of administrative expenses	No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses. Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer. Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
