INDEPENDENT AUDITORS' REPORT

To the Administrative Committee of
the UPS Pension Plan:

We have audited the accompanying financial statements of the UPS Pension Plan (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2017 and 2016, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the UPS Pension Plan's net assets available for benefits as of December 31, 2017, and the changes therein for the year then ended and its financial status as of December 31, 2016, and the changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplemental Schedule

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets (held at end of year) as of December 31, 2017, is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This schedule is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. This schedule has been subjected to the auditing procedures applied in our audits of the financial statements and certain additional procedures, including comparing and reconciling such schedule directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, such schedule is fairly stated in all material respects in relation to the financial statements as a whole.

UPS PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2017 AND 2016

1. DESCRIPTION OF THE PLAN

The following description of the UPS Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General—The Plan was established on January 1, 1973, and has been amended periodically. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended, and is a noncontributory, defined benefit pension plan for certain employees of United Parcel Service, Inc. (the "Plan Sponsor") and subsidiary companies (together, "UPS") who are covered by a collective bargaining agreement, which provides for their participation in the Plan.

Contributions—Contributions to the Plan are made solely by UPS. UPS's funding policy is to contribute amounts that will at least satisfy the minimum funding requirements of ERISA, but do not exceed the maximum tax-deductible requirements of the Internal Revenue Code (IRC) as provided by the Plan's independent actuary. In accordance with this funding policy, UPS contributed \$1,200 million and \$534 million to the Plan for the years ended December 31, 2017 and 2016, respectively. The 2016 amount included \$234 million remitted on March 1, 2017 and is shown as contributions receivable in the statements of net assets available for benefits. UPS met the minimum funding requirements of ERISA for the years ended December 31, 2017 and 2016.

Eligibility—The current provisions of the Plan generally provide that an eligible employee automatically becomes a participant on January 1 or July 1 immediately following the date that the person meets both of the following requirements:

- a. The employee is at least 21 years old.
- b. The employee has completed at least 750 paid hours of service during the first 12 months of hire or during any calendar year thereafter.
- c. The part-time employee has completed at least 375 paid hours of service during the first 12 months of hire or during any calendar year thereafter.

Pension Benefits—Benefits are payable based on the years of vesting credit, as defined, as either single-life or joint annuity benefits, as follows:

- a. Upon completion of five years of vesting credit, the full benefit amount will be paid at normal retirement age, as defined by the Plan.
- b. Upon completion of 10 years of vesting credit, a reduced amount may be paid, provided that the participant is at least 50 years of age (55 years of age for some employee groups).

- c. Regardless of age, if an employee has completed at least 10 years of vesting credit and becomes totally and permanently disabled, a disability benefit amount will be paid.
- d. Upon completion of five years of vesting credit, a partial or full benefit amount may be paid as defined by the Plan in the event of a participant's death.

Lump Sum Distribution—During the fourth quarter of 2016, certain plan participants and surviving spouses were offered the option to receive a one-time payment of their vested benefit. Approximately 11,500 participants accepted this option, accelerating \$271 million in benefit payments during 2016 while reducing the number of participants who are due future payments from the plan.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting—The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Use of Estimates—The preparation of financial statements in conformity with GAAP requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Master Trust—As of December 31, 2017 and 2016, the majority of the Plan's investment assets are held in trust accounts at Bank of New York Mellon (the "Trustee") and consist of an undivided interest in investment accounts of the UPS Group Trust (the "Master Trust"), a master trust established by United Parcel Service, Inc. (the "Company") and administered by the Trustee (see Note 5).

Risks and Uncertainties—The Plan and the Master Trust utilize various investment securities, including common and preferred stocks, corporate debt instruments, U.S. government securities, money market funds, collective trust funds, registered investment companies, 103-12 investment entities, partnerships, joint ventures, and real estate. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Investment Valuation and Income Recognition—Investments are stated at fair value. If available, quoted market prices are used to value investments. Certain investments' estimated fair values are based on unobservable inputs that are not corroborated by observable market data, and are thus classified as Level 3. Investments that do not have a

readily determinable fair value, but which provide a net asset value ("NAV") (or its equivalent) developed consistent with Financial Accounting Standards Board ("FASB") measurement principles as of December 31, are valued using NAV as a practical expedient. These investments are not classified in Levels 1, 2, or 3 of the fair value hierarchy, but are included in the totals in the tables shown in Note 7. Purchases and sales are recorded on a trade-date basis. Interest is recorded on an accrual basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits—Benefit payments to participants are recorded upon distribution.

Expenses—Administrative expenses of the Plan are paid by the Plan, as provided in the Plan document.

Subsequent Events—For the year ended December 31, 2017, subsequent events were evaluated through October 9, 2018, the date the financial statements were available to be issued.

New Accounting Standards—In February 2017, the FASB issued Accounting Standards Update (ASU) 2017-06, Employee Benefit Plan Master Trust Reporting. The amendments in this ASU remove the requirement to disclose the percentage interest in the master trust for plans with divided interests and requires that all plans disclose the dollar amount of their interest in each of those general types of investments. This supplements the existing requirement to disclose the master trust's balances in each general type of investment. In addition, the ASU requires the disclosure of the master trust's other asset and liability balances and the dollar amount of the plan's interest in each of those balances. The amendments in this ASU are effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Plan elected to early adopt ASU 2017-06 as of December 31, 2017, as permitted, and applied the provisions retrospectively, as required. The Plan presents the investment disclosures required by this new guidance in Note 5. There are no effects on the statements of net assets available for plan benefits or the changes therein.

3. PLAN TERMINATION

Although it has not expressed any intention to do so, UPS has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and, subject to collective bargaining for represented employees, to terminate the Plan.

In the event of termination of the Plan, the Plan assets shall be allocated in accordance with priorities specified in Section 4044 of ERISA. Generally, Section 4044 provides the following priorities:

- a. The lowest benefit in pay status for at least three years (or which would have been if the participant had retired that long ago)
- b. Other insured benefits
- c. Other noninsured, nonforfeitable benefits
- d. All other benefits

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC"), if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits, should the Plan terminate at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and may also depend on the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the existing assets and the PBGC guaranty, while other benefits may not be provided at all.

4. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

Benefits under the Plan are based on either (1) the higher of the regular pension benefit or service pension benefit for those employees whose benefit is calculated as a set dollar amount for each year of service provided; or (2) employees' average compensation during the highest five consecutive calendar years of pensionable pay during the 10-year period ending on the earlier of the participant's termination date, date of death, or Plan termination date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary. The amount results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts of interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of December 31, 2017 and 2016, are as follows:

	2017	2016
Mortality	RP-2014 healthy blue collar mortality table, with MP-2016 mortality improvements after 2007 assuming the long-term rate of mortality improvement phases down to 0.5% by 2022.	The RP-2014 healthy blue collar mortality table, with MP-2016 mortality improvements after 2007 assuming the long-term rate of mortality improvement phases down to 0.5% by 2022.
Discount rate	8.50 %	8.75 %
Average retirement age	62.1	62.0

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present values of the Plan's accumulated plan benefits as of December 31, 2017 and 2016, are as follows (in millions):

	2017	2016
Vested benefits:		
Other participants	\$3,276	\$2,956
Participants and/or beneficiaries currently receiving benefits	<u>982</u>	<u>830</u>

Nonvested benefits	<u>236</u>	<u>210</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$4,494</u></u>	<u><u>\$3,996</u></u>

The changes in the actuarial present values of the Plan's accumulated plan benefits for the years ended December 31, 2017 and 2016, are as follows (in millions):

Actuarial present value of accumulated plan benefits—December 31, 2015	\$3,813
Increase (decrease) during the year attributable to:	
Additional benefits accumulated	115
Benefit payments ¹	(382)

¹ Includes 11,469 lump sum elections made as part of the December 2016 lump sum opportunity.

² Reflects update of mortality improvement scale table from modified MP-2014 to modified MP-2016.

³ Reflects update of ASC 960 interest rate from 8.75% to 8.50%.

5. INTEREST IN MASTER TRUST

As of December 31, 2017 and 2016, the majority of the Plan's investment assets are held in trust accounts at the Trustee and consist of an undivided interest in an investment account of the Master Trust, a master trust established by the Company and administered by the Trustee. Use of the Master Trust permits the commingling of trust assets with the assets of the Plan for investment and administrative purposes. Although assets of multiple plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income and administrative expenses are allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

The fair value of net assets and investments of the Master Trust as at December 31, 2017 and 2016, is summarized as follows (in millions):

	2017		2016	
	Pension Plan	Group Trust	Pension Plan	Group Trust
Investments:				
U.S. government securities	\$ 1,665	\$ 7,919	\$ 1,256	\$ 6,364

Plan's interest in Master Trust as a percentage of the total, rounded		<u>21 %</u>		<u>20 %</u>

The net investment earnings of the Master Trust for the years ended December 31, 2017 and 2016, are summarized below (in millions):

	2017	2016
Dividend and interest income	\$ 502	\$ 480
Net appreciation in fair value of investments	4,433	1,461
Master Trust administrative expenses	<u>(106)</u>	<u>(106)</u>
Investment income of Master Trust	<u>\$4,829</u>	<u>\$1,835</u>
Plan's interest in investment income of Master Trust	<u>\$1,002</u>	<u>\$ 351</u>

6. INVESTMENTS

As of December 31, 2017 and 2016, the Plan's investments are presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust.

Pension assets utilizing Level 1 inputs include fair values of equity investments and U.S. government securities that were determined by closing prices for those securities traded on national stock exchanges, while securities traded in the over-the-counter market and listed securities for which no sale was reported on the valuation date are valued at the mean between the last reported bid and ask prices.

Level 2 assets include certain bonds that are valued based on yields currently available on comparable securities of other issues with similar credit ratings, mortgage-backed securities that are valued based on cash flow and yield models using acceptable modeling and pricing conventions, certain equity instruments and certain investments that are pooled with other investments held by the trustee in a commingled employee benefit trust fund. The investments in the commingled funds, including collective trust funds, are valued by taking the percentage owned by the respective plan in the fair value of the underlying investments of the trust fund, which was determined in accordance with the paragraph above.

Certain investments' estimated fair values are based on unobservable inputs that are not corroborated by observable market data, and are thus classified as Level 3. These investments include certain corporate debt instruments.

Investments that do not have a readily determinable fair value, and which provide a NAV (or its equivalent) developed consistent with FASB measurement principles, are valued using NAV as a practical expedient. These investments are not classified in Levels 1, 2, or 3 of the fair value hierarchy, but are included in the totals in tables shown in Note 7. These investments include fixed income, hedge funds, private equity, credit and real estate. Investments in hedge funds are valued using reported NAVs as of December 31. These assets are primarily invested in a portfolio of diversified, direct investments, and funds of hedge funds. Investments in fixed income, private equity, credit and real estate are valued using fair values per the most recent partnership audited financial statements, adjusted, as appropriate, for any activity between the date of the financial reports and December 31. These assets are invested in limited partnership interests in various private equity, private debt and real estate funds. The real estate investments consist of U.S. and non-U.S. real estate investments and are broadly diversified. The fair values may, due to the inherent uncertainty of valuation for those alternative investments, differ significantly from the values that would have been used had a ready market for the alternative investments existed, and any differences could be material.

Approximately \$5,610 million and \$3,871 million of the Master Trust assets are held in commingled stock funds that each hold U.S. and international public market securities for the years ended December 31, 2017 and 2016, respectively. The Master Trust held the right to liquidate its positions in these commingled stock funds at any time, subject only to a brief notification period. No unfunded commitment existed with respect to these commingled stock funds at December 31, 2017 and 2016.

The Master Trust held approximately \$5,299 million and \$4,171 million of its investments in limited partnership interests in various private equity, credit and real estate funds as of December 31, 2017 and 2016, respectively. Limited provision exists for the redemption of

these interests by the general partners that invest these funds until the end of the term of the partnerships, typically ranging between 10 and 15 years from the date of inception. An active secondary market exists for similar partnership interests, although no particular value (discount or premium) can be guaranteed. At December 31, 2017 and 2016, unfunded commitments to such limited partnerships totaling approximately \$2,546 million and \$1,908 million, respectively, are expected to be contributed over the remaining investment period, typically ranging between three and six years.

The Master Trust held certain investments in limited partnership interests in various fixed income funds as of December 31, 2017 and 2016. No unfunded commitments existed with respect to fixed income funds as of December 31, 2017 and 2016.

As of December 31, 2017 and 2016, approximately \$2,922 million and \$2,708 million of the Master Trust investments are held in 19 and 20 hedge funds, respectively, that pursue multiple strategies to diversify risk and reduce volatility. Most of the funds require between two and three months' notice and allow redemptions either quarterly or semiannually while some allow for redemption after only a brief notification period with no restriction on redemption frequency. At December 31, 2017 and 2016, unfunded commitments to such hedge funds totaling approximately \$0 million and \$5 million, respectively, are expected to be contributed over the remaining investment period, typically ranging between two and four years.

As of December 31, 2017 and 2016, none of the Master Trust's investments represented 5% or more of total Master Trust net assets available for benefits.

As of December 31, 2017 and 2016, approximately \$651 million and \$45 million, respectively, of Plan assets were held outside of the Master Trust. These amounts are held in interest-bearing cash.

7. FAIR VALUE MEASUREMENTS

ASC 820, Fair Value Measurements and Disclosures, provides a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value as follows: Level 1, which refers to securities valued using unadjusted quoted prices from active markets for identical assets; Level 2, which refers to securities not traded on an active market, but for which observable market inputs are readily available; and Level 3, which refers to securities valued based on significant unobservable inputs. Assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Certain investments that are measured at fair value using the NAV per share (or its equivalent) practical expedient have not been classified as Levels 1, 2 or 3 in the below fair value hierarchy, but are included in the total.

The following table sets forth by level, within the fair value hierarchy, a summary of the Master Trust investment assets at fair value (in millions) at December 31, 2017.

- ² The Investment Committee of the Master Trust has established and instituted the Investment Policy Statement (IPS) to implement and monitor investment strategies and/or guidelines across asset classes. The Master Trust's IPS addresses the below items such as establishing appropriate governance provisions; defining investment objectives; determining strategic asset allocation; monitoring and reporting the investments on a regular basis; appointing/dismissing investment managers, custodians, consultants, advisors; risk management (including various measures used to evaluate risk tolerance); determining/defining the mandates for investment managers; rebalancing of assets; and determining investment restrictions/prohibited investments.

Pension assets are invested in accordance with applicable laws and regulations. The primary long-term investment objectives for pension assets are to: (1) provide for a reasonable amount of long-term growth of capital given prudent levels of risk exposure while minimizing permanent loss of capital; (2) generate investment results that meet or exceed the long-term rate of return assumption for the Plan; and (3) match the duration of the liabilities and assets of the Plan to reduce the need for large employer contributions in the future. The Master Trust meets these objectives by employing investment managers who are engaged to actively manage assets within the guidelines and strategies set forth by the Investment Committee of the Master Trust. Active managers are monitored regularly and their performance is compared to applicable benchmarks.

The following table presents a roll-forward from the beginning to ending balances of the fair value measurements using significant unobservable inputs (Level 3) (in millions) for the years ended December 31, 2017 and 2016:

The valuation methods as described in Note 6 may produce a fair value estimate that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other

market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Master Trust is subject to master netting agreements, or netting arrangements, with certain counterparties. These agreements govern the terms of certain transactions, and reduce the counterparty risk associated with relevant transactions by specifying offsetting mechanisms and collateral posting arrangements at prearranged exposure levels. Since different types of transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different master netting arrangement possibly resulting in the need for multiple agreements with a single counterparty. Master netting agreements are specific to each different asset type; therefore, they allow the Master Trust to close out and net its total exposure to a specified counterparty in the event of a default with respect to any and all the transactions governed under a single agreement with the counterparty.

The following is a summary by counterparty of the Master Trust's net exposure to derivative assets and liabilities, by financial instrument type, available for offset and net of collateral under master agreements at December 31, 2017 (in millions):

8. FEDERAL INCOME TAX STATUS

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated April 14, 2016, that the Plan and related trust were designed in accordance with the applicable regulations of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter; however, the Company and Plan management believe that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, and the Plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2017, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2014.

9. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

All Plan and Master Trust investments are managed by Bank of New York Mellon. Bank of New York Mellon is the trustee as defined by the Plan, and therefore, these transactions qualify as exempt party-in-interest transactions. Fees paid by the Plan for investment management and associated trustee/custodian services incurred to the trustee were \$0.4 million and \$0.2 million for the years ended December 31, 2017 and 2016, respectively.

The Plan Sponsor provides accounting and administrative services to the Plan; therefore, these transactions qualify as exempt party-in-interest transactions. Fees paid by the Plan for administrative services were \$0.3 million and \$0.2 million for the years ended December 31, 2017 and 2016, respectively.

10. RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500

A reconciliation of amounts reported in the Plan's financial statements to amounts reported in the Form 5500 is required by ERISA. The Plan's statements of net assets available for benefits and changes in net assets available for benefits agree to the Form 5500 for the years ended December 31, 2017 and 2016.

11. SUBSEQUENT EVENTS

As of December 31, 2017, we had approximately 280,000 employees, employed under a national master agreement and various supplemental agreements with local unions affiliated with the Teamsters. The agreements ran through July 31, 2018. Some of these employees are covered by the Plan.

On June 21, 2018 and on July 13, 2018, respectively, we reached tentative agreements with the Teamsters on two new five-year national master agreements in the U.S. Domestic Package and UPS Freight business units which, if ratified, would be retroactively effective as of August 1, 2018.

On October 5, 2018, after a twenty-one (21) day voting period, electronic ballots were counted and the results announced for UPS Teamster-represented employees in the U.S. Domestic Package business unit. Under terms contained in the Teamsters Constitution, the Teamsters declared that the tentative national master agreement is now considered ratified. It will be implemented as soon as the five remaining local and supplemental agreements are renegotiated and ratified. Separately, the UPS Freight National Master Agreement did not receive sufficient votes to be ratified. That new agreement will be implemented as soon as it is renegotiated and ratified.

Reciprocity load for Teamsters	Benefits attributable to reciprocity for current transfers are valued explicitly. For active participants assumed to transfer out at a future date, a load is applied to their liability based on participants assumed to be eligible for reciprocity (i.e. those that transfer to the IBT plan or a multi-employer plan recognizing reciprocity agreements).
--------------------------------	---

Assumptions Rationale - Significant Economic Assumptions

Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).
-----------------------	--

Rates of increase in:

- Compensation For 2013 Grandfathered Freight participants, annual compensation increase assumptions are linked to increases negotiated in the current collective bargaining agreements. This is an annual increase of 2.0%.

Assumptions Rationale – Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on an experience study conducted in 2015 with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Disability	Disability rates were based on an experience study conducted in 2015. Annual consideration is given to whether any conditions have changed that would be expected to produce different results in the future.
Transfer	Future transfer rates for the UPS Pension Plan part-time teamster population were based on an experience study conducted in 2015.
Retirement	Retirement rates were based on an experience study conducted in 2015. Annual consideration is given to whether any conditions have changed that would be expected to produce different results in the future.
Form of payment and percent married	The combined percent married and form of payment assumptions were based on an experience study conducted in 2015.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings. The average asset value must be within 10% of fair value, including contributions receivable.</p> <p>The method of computing the actuarial value of assets complies with the rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with UPS and is not aware of any significant benefits required to be valued that were not.

Change in Methods and Assumptions Since Prior Year

The segment rates used to calculate the funding target and target normal cost were updated.

The required mortality table used to calculate the funding target and normal cost was updated to include an additional year of projected mortality improvements.

Assumed administrative expenses were changed from \$47,000,000 in 2016 to \$32,000,000 in 2017.

Data Sources

Willis Towers Watson used asset data supplied by UPS. UPS furnished participant data as of January 1, 2017 and the dates and amounts of the contributions paid in 2017. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the company, the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. Assumptions and estimates were made by Willis Towers Watson actuaries when data was not available, and UPS confirmed the appropriateness of these assumptions and estimates. Willis Towers Watson is not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Schedule SB, Part V — Summary of Plan Provisions

1. Applicable to Non-Freight participants

Plan Provisions

Covered Employees	All employees who have attained age 21 and who have worked at least 375 hours (1,000 for employees of UPS Aviation Technologies (IIMorrow) and St. Thomas) during a calendar year and further provided that they are covered by a collective bargaining agreement which provides for coverage under the UPS Pension Plan.
Participation Date	All predecessor Plan participants on December 31, 1975 who are employees on January 1, 1976 became plan participants on January 1, 1976. Cartage Services employees who were participants in the Menlo Worldwide Forwarding, Inc. Hourly Employees' Pension Plan became eligible to participate in the UPS Pension Plan on December 19, 2004. All other employees become eligible to participate on the January 1 or July 1 immediately following attainment of age 21 and completion of a 12-month period of employment during which 375 hours of service (1,000 hours for employees of UPS Aviation Technologies (IIMorrow) and St. Thomas) are completed.

Definitions

Vesting service	One year for each calendar year in which an employee completes 375 hours of service (1,000 hours for employees of UPS Aviation Technologies (IIMorrow) and St. Thomas).
Benefit service	One year for each calendar year in which an employee completes at least 1,500 hours of service (1,800 hours for employees of UPS Aviation Technologies (IIMorrow), St. Thomas, and Cartage Services). Part-time Teamsters actively employed on or after August 1, 1999 receive one year for each calendar year with 750 hours (including years before August 1, 1999) with partial credit for fewer hours. The 2002 Teamsters contract extended the 750 hour rule to former part-time Teamsters who are currently working for UPS and have transferred to a Teamster multi-employer plan.
Normal retirement date (NRD)	<p>First of month coinciding with or next following the attainment of age 65 with five years of vesting service or participation. If a participant prior to January 1, 1989, first of the month coinciding with or next following the attainment of age 65.</p> <p>For full-time members of Detroit Local 243 (hired prior to October 23, 1997) and Local 698, attainment of age 60 with five years of vesting service or participation. (If a participant prior to January 1, 1989, first of the month coinciding with or next following the attainment of age 60.)</p>
Actuarial Equivalence	6% and 1983 Group Annuity Mortality (GAM): Male table for participants; Female table for beneficiaries

Eligibility for Benefits

Normal retirement	Retirement on NRD
Service retirement	Service benefits are available after completing years of benefit service required for special pension. When reciprocity agreements exist, a prorated service benefit may also become available for Teamsters if their total benefit service in all Teamsters plans in which UPS participates is enough to meet the service requirements for these special benefits.
Early retirement	<p>For Ohio Rider, Dispatchers Local 545 and Cartage Services: attainment of age 55 and completion of at least 10 years of vesting service.</p> <p>For all other groups: attainment of age 50 and completion of 10 years of vesting service but not later than NRD.</p>
Postponed retirement	Retire after NRD
Disability retirement	Completion of 10 or more years of vesting service and total and permanent disability
Terminated deferred	Terminate for reasons other than death, retirement or disability after completing five years of vesting service. This includes participants who remain active with UPS, transfer to a different UPS-sponsored plan, and terminate after completing five years of vesting service.
Reciprocity	For Teamster participants who transfer from the Pension Plan to another Teamster plan in which UPS participates, the benefit service earned in the new plan will be counted towards eligibility for the service retirement benefits offered by the Pension Plan.
Preretirement spouse benefit	Die while a member of the plan, married, vested or after retirement or vested termination date but before benefit commencement
Lump sum death	Die while a member of the plan, vested, and no preretirement spouse coverage

INDEPENDENT AUDITORS' REPORT

To the Administrative Committee of
the UPS Pension Plan:

We have audited the accompanying financial statements of the UPS Pension Plan (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2017 and 2016, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the UPS Pension Plan's net assets available for benefits as of December 31, 2017, and the changes therein for the year then ended and its financial status as of December 31, 2016, and the changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplemental Schedule

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets (held at end of year) as of December 31, 2017, is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This schedule is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. This schedule has been subjected to the auditing procedures applied in our audits of the financial statements and certain additional procedures, including comparing and reconciling such schedule directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, such schedule is fairly stated in all material respects in relation to the financial statements as a whole.

UPS PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2017 AND 2016

1. DESCRIPTION OF THE PLAN

The following description of the UPS Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General—The Plan was established on January 1, 1973, and has been amended periodically. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended, and is a noncontributory, defined benefit pension plan for certain employees of United Parcel Service, Inc. (the "Plan Sponsor") and subsidiary companies (together, "UPS") who are covered by a collective bargaining agreement, which provides for their participation in the Plan.

Contributions—Contributions to the Plan are made solely by UPS. UPS's funding policy is to contribute amounts that will at least satisfy the minimum funding requirements of ERISA, but do not exceed the maximum tax-deductible requirements of the Internal Revenue Code (IRC) as provided by the Plan's independent actuary. In accordance with this funding policy, UPS contributed \$1,200 million and \$534 million to the Plan for the years ended December 31, 2017 and 2016, respectively. The 2016 amount included \$234 million remitted on March 1, 2017 and is shown as contributions receivable in the statements of net assets available for benefits. UPS met the minimum funding requirements of ERISA for the years ended December 31, 2017 and 2016.

Eligibility—The current provisions of the Plan generally provide that an eligible employee automatically becomes a participant on January 1 or July 1 immediately following the date that the person meets both of the following requirements:

- a. The employee is at least 21 years old.
- b. The employee has completed at least 750 paid hours of service during the first 12 months of hire or during any calendar year thereafter.
- c. The part-time employee has completed at least 375 paid hours of service during the first 12 months of hire or during any calendar year thereafter.

Pension Benefits—Benefits are payable based on the years of vesting credit, as defined, as either single-life or joint annuity benefits, as follows:

- a. Upon completion of five years of vesting credit, the full benefit amount will be paid at normal retirement age, as defined by the Plan.
- b. Upon completion of 10 years of vesting credit, a reduced amount may be paid, provided that the participant is at least 50 years of age (55 years of age for some employee groups).

- c. Regardless of age, if an employee has completed at least 10 years of vesting credit and becomes totally and permanently disabled, a disability benefit amount will be paid.
- d. Upon completion of five years of vesting credit, a partial or full benefit amount may be paid as defined by the Plan in the event of a participant's death.

Lump Sum Distribution—During the fourth quarter of 2016, certain plan participants and surviving spouses were offered the option to receive a one-time payment of their vested benefit. Approximately 11,500 participants accepted this option, accelerating \$271 million in benefit payments during 2016 while reducing the number of participants who are due future payments from the plan.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting—The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Use of Estimates—The preparation of financial statements in conformity with GAAP requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Master Trust—As of December 31, 2017 and 2016, the majority of the Plan's investment assets are held in trust accounts at Bank of New York Mellon (the "Trustee") and consist of an undivided interest in investment accounts of the UPS Group Trust (the "Master Trust"), a master trust established by United Parcel Service, Inc. (the "Company") and administered by the Trustee (see Note 5).

Risks and Uncertainties—The Plan and the Master Trust utilize various investment securities, including common and preferred stocks, corporate debt instruments, U.S. government securities, money market funds, collective trust funds, registered investment companies, 103-12 investment entities, partnerships, joint ventures, and real estate. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Investment Valuation and Income Recognition—Investments are stated at fair value. If available, quoted market prices are used to value investments. Certain investments' estimated fair values are based on unobservable inputs that are not corroborated by observable market data, and are thus classified as Level 3. Investments that do not have a

readily determinable fair value, but which provide a net asset value ("NAV") (or its equivalent) developed consistent with Financial Accounting Standards Board ("FASB") measurement principles as of December 31, are valued using NAV as a practical expedient. These investments are not classified in Levels 1, 2, or 3 of the fair value hierarchy, but are included in the totals in the tables shown in Note 7. Purchases and sales are recorded on a trade-date basis. Interest is recorded on an accrual basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits—Benefit payments to participants are recorded upon distribution.

Expenses—Administrative expenses of the Plan are paid by the Plan, as provided in the Plan document.

Subsequent Events—For the year ended December 31, 2017, subsequent events were evaluated through October 9, 2018, the date the financial statements were available to be issued.

New Accounting Standards—In February 2017, the FASB issued Accounting Standards Update (ASU) 2017-06, Employee Benefit Plan Master Trust Reporting. The amendments in this ASU remove the requirement to disclose the percentage interest in the master trust for plans with divided interests and requires that all plans disclose the dollar amount of their interest in each of those general types of investments. This supplements the existing requirement to disclose the master trust's balances in each general type of investment. In addition, the ASU requires the disclosure of the master trust's other asset and liability balances and the dollar amount of the plan's interest in each of those balances. The amendments in this ASU are effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Plan elected to early adopt ASU 2017-06 as of December 31, 2017, as permitted, and applied the provisions retrospectively, as required. The Plan presents the investment disclosures required by this new guidance in Note 5. There are no effects on the statements of net assets available for plan benefits or the changes therein.

3. PLAN TERMINATION

Although it has not expressed any intention to do so, UPS has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and, subject to collective bargaining for represented employees, to terminate the Plan.

In the event of termination of the Plan, the Plan assets shall be allocated in accordance with priorities specified in Section 4044 of ERISA. Generally, Section 4044 provides the following priorities:

- a. The lowest benefit in pay status for at least three years (or which would have been if the participant had retired that long ago)
- b. Other insured benefits
- c. Other noninsured, nonforfeitable benefits
- d. All other benefits

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC"), if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits, should the Plan terminate at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and may also depend on the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the existing assets and the PBGC guaranty, while other benefits may not be provided at all.

4. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

Benefits under the Plan are based on either (1) the higher of the regular pension benefit or service pension benefit for those employees whose benefit is calculated as a set dollar amount for each year of service provided; or (2) employees' average compensation during the highest five consecutive calendar years of pensionable pay during the 10-year period ending on the earlier of the participant's termination date, date of death, or Plan termination date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary. The amount results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts of interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of December 31, 2017 and 2016, are as follows:

	2017	2016
Mortality	RP-2014 healthy blue collar mortality table, with MP-2016 mortality improvements after 2007 assuming the long-term rate of mortality improvement phases down to 0.5% by 2022.	The RP-2014 healthy blue collar mortality table, with MP-2016 mortality improvements after 2007 assuming the long-term rate of mortality improvement phases down to 0.5% by 2022.
Discount rate	8.50 %	8.75 %
Average retirement age	62.1	62.0

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present values of the Plan's accumulated plan benefits as of December 31, 2017 and 2016, are as follows (in millions):

	2017	2016
Vested benefits:		
Other participants	\$3,276	\$2,956
Participants and/or beneficiaries currently receiving benefits	<u>982</u>	<u>830</u>

Nonvested benefits	<u>236</u>	<u>210</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$4,494</u></u>	<u><u>\$3,996</u></u>

The changes in the actuarial present values of the Plan's accumulated plan benefits for the years ended December 31, 2017 and 2016, are as follows (in millions):

Actuarial present value of accumulated plan benefits—December 31, 2015	\$3,813
Increase (decrease) during the year attributable to:	
Additional benefits accumulated	115
Benefit payments ¹	(382)

¹ Includes 11,469 lump sum elections made as part of the December 2016 lump sum opportunity.

² Reflects update of mortality improvement scale table from modified MP-2014 to modified MP-2016.

³ Reflects update of ASC 960 interest rate from 8.75% to 8.50%.

5. INTEREST IN MASTER TRUST

As of December 31, 2017 and 2016, the majority of the Plan's investment assets are held in trust accounts at the Trustee and consist of an undivided interest in an investment account of the Master Trust, a master trust established by the Company and administered by the Trustee. Use of the Master Trust permits the commingling of trust assets with the assets of the Plan for investment and administrative purposes. Although assets of multiple plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income and administrative expenses are allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

The fair value of net assets and investments of the Master Trust as at December 31, 2017 and 2016, is summarized as follows (in millions):

	2017		2016	
	Pension Plan	Group Trust	Pension Plan	Group Trust
Investments:

The net investment earnings of the Master Trust for the years ended December 31, 2017 and 2016, are summarized below (in millions):

	2017	2016
Dividend and interest income	\$ 502	\$ 480
Net appreciation in fair value of investments	4,433	1,461
Master Trust administrative expenses	<u>(106)</u>	<u>(106)</u>

6. INVESTMENTS

As of December 31, 2017 and 2016, the Plan's investments are presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust.

Pension assets utilizing Level 1 inputs include fair values of equity investments and U.S. government securities that were determined by closing prices for those securities traded on national stock exchanges, while securities traded in the over-the-counter market and listed securities for which no sale was reported on the valuation date are valued at the mean between the last reported bid and ask prices.

Level 2 assets include certain bonds that are valued based on yields currently available on comparable securities of other issues with similar credit ratings, mortgage-backed securities that are valued based on cash flow and yield models using acceptable modeling and pricing conventions, certain equity instruments and certain investments that are pooled with other investments held by the trustee in a commingled employee benefit trust fund. The investments in the commingled funds, including collective trust funds, are valued by taking the percentage owned by the respective plan in the fair value of the underlying investments of the trust fund, which was determined in accordance with the paragraph above.

Certain investments' estimated fair values are based on unobservable inputs that are not corroborated by observable market data, and are thus classified as Level 3. These investments include certain corporate debt instruments.

Investments that do not have a readily determinable fair value, and which provide a NAV (or its equivalent) developed consistent with FASB measurement principles, are valued using NAV as a practical expedient. These investments are not classified in Levels 1, 2, or 3 of the fair value hierarchy, but are included in the totals in tables shown in Note 7. These investments include fixed income, hedge funds, private equity, credit and real estate. Investments in hedge funds are valued using reported NAVs as of December 31. These assets are primarily invested in a portfolio of diversified, direct investments, and funds of hedge funds. Investments in fixed income, private equity, credit and real estate are valued using fair values per the most recent partnership audited financial statements, adjusted, as appropriate, for any activity between the date of the financial reports and December 31. These assets are invested in limited partnership interests in various private equity, private debt and real estate funds. The real estate investments consist of U.S. and non-U.S. real estate investments and are broadly diversified. The fair values may, due to the inherent uncertainty of valuation for those alternative investments, differ significantly from the values that would have been used had a ready market for the alternative investments existed, and any differences could be material.

Approximately \$5,610 million and \$3,871 million of the Master Trust assets are held in commingled stock funds that each hold U.S. and international public market securities for the years ended December 31, 2017 and 2016, respectively. The Master Trust held the right to liquidate its positions in these commingled stock funds at any time, subject only to a brief notification period. No unfunded commitment existed with respect to these commingled stock funds at December 31, 2017 and 2016.

The Master Trust held approximately \$5,299 million and \$4,171 million of its investments in limited partnership interests in various private equity, credit and real estate funds as of December 31, 2017 and 2016, respectively. Limited provision exists for the redemption of

these interests by the general partners that invest these funds until the end of the term of the partnerships, typically ranging between 10 and 15 years from the date of inception. An active secondary market exists for similar partnership interests, although no particular value (discount or premium) can be guaranteed. At December 31, 2017 and 2016, unfunded commitments to such limited partnerships totaling approximately \$2,546 million and \$1,908 million, respectively, are expected to be contributed over the remaining investment period, typically ranging between three and six years.

The Master Trust held certain investments in limited partnership interests in various fixed income funds as of December 31, 2017 and 2016. No unfunded commitments existed with respect to fixed income funds as of December 31, 2017 and 2016.

As of December 31, 2017 and 2016, approximately \$2,922 million and \$2,708 million of the Master Trust investments are held in 19 and 20 hedge funds, respectively, that pursue multiple strategies to diversify risk and reduce volatility. Most of the funds require between two and three months' notice and allow redemptions either quarterly or semiannually while some allow for redemption after only a brief notification period with no restriction on redemption frequency. At December 31, 2017 and 2016, unfunded commitments to such hedge funds totaling approximately \$0 million and \$5 million, respectively, are expected to be contributed over the remaining investment period, typically ranging between two and four years.

As of December 31, 2017 and 2016, none of the Master Trust's investments represented 5% or more of total Master Trust net assets available for benefits.

As of December 31, 2017 and 2016, approximately \$651 million and \$45 million, respectively, of Plan assets were held outside of the Master Trust. These amounts are held in interest-bearing cash.

7. FAIR VALUE MEASUREMENTS

ASC 820, Fair Value Measurements and Disclosures, provides a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value as follows: Level 1, which refers to securities valued using unadjusted quoted prices from active markets for identical assets; Level 2, which refers to securities not traded on an active market, but for which observable market inputs are readily available; and Level 3, which refers to securities valued based on significant unobservable inputs. Assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Certain investments that are measured at fair value using the NAV per share (or its equivalent) practical expedient have not been classified as Levels 1, 2 or 3 in the below fair value hierarchy, but are included in the total.

The following table sets forth by level, within the fair value hierarchy, a summary of the Master Trust investment assets at fair value (in millions) at December 31, 2017.

- ² The Investment Committee of the Master Trust has established and instituted the Investment Policy Statement (IPS) to implement and monitor investment strategies and/or guidelines across asset classes. The Master Trust's IPS addresses the below items such as establishing appropriate governance provisions; defining investment objectives; determining strategic asset allocation; monitoring and reporting the investments on a regular basis; appointing/dismissing investment managers, custodians, consultants, advisors; risk management (including various measures used to evaluate risk tolerance); determining/defining the mandates for investment managers; rebalancing of assets; and determining investment restrictions/prohibited investments.

Pension assets are invested in accordance with applicable laws and regulations. The primary long-term investment objectives for pension assets are to: (1) provide for a reasonable amount of long-term growth of capital given prudent levels of risk exposure while minimizing permanent loss of capital; (2) generate investment results that meet or exceed the long-term rate of return assumption for the Plan; and (3) match the duration of the liabilities and assets of the Plan to reduce the need for large employer contributions in the future. The Master Trust meets these objectives by employing investment managers who are engaged to actively manage assets within the guidelines and strategies set forth by the Investment Committee of the Master Trust. Active managers are monitored regularly and their performance is compared to applicable benchmarks.

The following table presents a roll-forward from the beginning to ending balances of the fair value measurements using significant unobservable inputs (Level 3) (in millions) for the years ended December 31, 2017 and 2016:

The valuation methods as described in Note 6 may produce a fair value estimate that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other

market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Master Trust is subject to master netting agreements, or netting arrangements, with certain counterparties. These agreements govern the terms of certain transactions, and reduce the counterparty risk associated with relevant transactions by specifying offsetting mechanisms and collateral posting arrangements at prearranged exposure levels. Since different types of transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different master netting arrangement possibly resulting in the need for multiple agreements with a single counterparty. Master netting agreements are specific to each different asset type; therefore, they allow the Master Trust to close out and net its total exposure to a specified counterparty in the event of a default with respect to any and all the transactions governed under a single agreement with the counterparty.

The following is a summary by counterparty of the Master Trust's net exposure to derivative assets and liabilities, by financial instrument type, available for offset and net of collateral under master agreements at December 31, 2017 (in millions):

At December 31, 2016, the Master Trust held \$5 million in collateral under derivative instruments and \$208 million in collateral under securities lending agreements. The Master Trust pledged collateral of \$10 million under derivative contracts at December 31, 2016.

8. FEDERAL INCOME TAX STATUS

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated April 14, 2016, that the Plan and related trust were designed in accordance with the applicable regulations of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter; however, the Company and Plan management believe that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, and the Plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2017, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2014.

9. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

All Plan and Master Trust investments are managed by Bank of New York Mellon. Bank of New York Mellon is the trustee as defined by the Plan, and therefore, these transactions qualify as exempt party-in-interest transactions. Fees paid by the Plan for investment management and associated trustee/custodian services incurred to the trustee were \$0.4 million and \$0.2 million for the years ended December 31, 2017 and 2016, respectively.

The Plan Sponsor provides accounting and administrative services to the Plan; therefore, these transactions qualify as exempt party-in-interest transactions. Fees paid by the Plan for administrative services were \$0.3 million and \$0.2 million for the years ended December 31, 2017 and 2016, respectively.

10. RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500

A reconciliation of amounts reported in the Plan's financial statements to amounts reported in the Form 5500 is required by ERISA. The Plan's statements of net assets available for benefits and changes in net assets available for benefits agree to the Form 5500 for the years ended December 31, 2017 and 2016.

11. SUBSEQUENT EVENTS

As of December 31, 2017, we had approximately 280,000 employees, employed under a national master agreement and various supplemental agreements with local unions affiliated with the Teamsters. The agreements ran through July 31, 2018. Some of these employees are covered by the Plan.

On June 21, 2018 and on July 13, 2018, respectively, we reached tentative agreements with the Teamsters on two new five-year national master agreements in the U.S. Domestic Package and UPS Freight business units which, if ratified, would be retroactively effective as of August 1, 2018.

On October 5, 2018, after a twenty-one (21) day voting period, electronic ballots were counted and the results announced for UPS Teamster-represented employees in the U.S. Domestic Package business unit. Under terms contained in the Teamsters Constitution, the Teamsters declared that the tentative national master agreement is now considered ratified. It will be implemented as soon as the five remaining local and supplemental agreements are renegotiated and ratified. Separately, the UPS Freight National Master Agreement did not receive sufficient votes to be ratified. That new agreement will be implemented as soon as it is renegotiated and ratified.
