Independent Auditor's Report

To the Plan Administrator of the
Selected Schlumberger Savings and Profit Sharing Plans
Houston, Texas

Report on the Financial Statements

We have audited the accompanying financial statements of the Schlumberger Technology Corporation Savings and Profit Sharing Plan, the Schlumberger Limited Savings and Profit Sharing Plan, the Schlumberger Savings and Profit Sharing Plan for U.S. Taxpayers Employed Abroad, and the Schlumberger Technology Corporation Profit Sharing Plan for Specified Drilling Group Employees (collectively, the "Plans"), which comprise the statements of net assets available for benefits as of December 31, 2017 and 2016, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plans as of December 31, 2017 and 2016, and the changes in net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental Schlumberger Technology Corporation Savings and Profit Sharing Plan: Schedule H, line 4i-Schedule of Assets (Held at End of Year) and Schlumberger Limited Savings and Profit Sharing Plan: Schedule H, line 4i-Schedule of Assets (Held at End of Year) as of December 31, 2017 are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plans' management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

1. Description of the Plans

The following brief description of the Schlumberger Technology Corporation Savings and Profit Sharing Plan, the Schlumberger Limited Savings and Profit Sharing Plan, the Schlumberger Savings and Profit Sharing Plan for U.S. Taxpayers Employed Abroad, and the Schlumberger Technology Corporation Profit Sharing Plan for Specified Drilling Group Employees (collectively, the "Plans") provides only general information. Participants should refer to the applicable Plan document for more complete information.

General

The Schlumberger Technology Corporation Savings and Profit Sharing Plan (the "Technology Plan") Plan is a defined contribution plan covering all full-time employees of Schlumberger Technology Corporation (the "Company") who have met certain requirements, including length of service.

The Schlumberger Limited Savings and Profit Sharing Plan (the "Limited Plan") is a defined contribution plan covering all full-time employees of Schlumberger Limited and Schlumberger Resources, Inc. (collectively, "Schlumberger Limited") who have met certain requirements, including length of service.

The Schlumberger Savings and Profit Sharing Plan for U.S. Taxpayers Employed Abroad (the "U.S. Abroad Plan") is a defined contribution plan covering full-time employees of Schlumberger Limited and other affiliated companies outside the U.S. on international employment status who work outside the U.S. and have met certain requirements, including U.S. citizenship or "green card" status and length of service.

The Schlumberger Technology Corporation Profit Sharing Plan for Specified Drilling Group Employees (the "Drilling Group Plan") is a defined contribution plan covering all full-time employees of the Company who are part of the Company's Drilling Tools and Remediation group and the Company's Smith Bits group and who were eligible to participate in the Smith International, Inc. 401(k) Retirement Plan (the "Smith Plan") and have met certain requirements, including length of service.

The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Plans have an allocable interest in the net assets of the Schlumberger Master Profit Sharing Trust (the "Trust"), a master trust arrangement which serves as the investing medium for the Plans.

The Plans are administered by an Administrative Committee, which is appointed by the Board of Directors of the Company. The Administrative Committee is responsible for general administration of the Plans.

The Finance Committee is appointed by the Board of Directors of Schlumberger Limited. The Finance Committee communicates to The Northern Trust Company (the "Trustee") the funding policies and methods which have been established to carry out the objectives of the Plans.

In the event of a Plan's withdrawal from the Trust, the Trustee shall set apart that portion or equitable share of the Trust allocated to participants in the Plan pursuant to a valuation and allocation of the Trust by the Trustee, subject to approval by the Finance Committee.

Effective March 31, 2016, the Greybull Retirement Plan (the "Greybull Plan") was merged into the Technology Plan. The net assets of the Greybull Plan transferred into the Technology Plan as of the date of the merger are as follows:

Investments, at fair value	$	4,646,345
Notes receivable from participants		644,976
Net assets transferred due to merger	$	5,291,321

Effective April 16, 2017, the Saxon Drilling 401(k) Plan (the "Saxon Plan") was merged into the Technology Plan. The net assets of the Saxon Plan transferred into the Technology Plan as of the date of the merger amount to $3,269,529.

The total of net assets transferred due to mergers for the years ended December 31, 2017 and 2016 are included in the net transfers from affiliated plans in the statement of changes in net assets available for benefits. See Note 10 regarding employment transfers.

All benefits accrued under the Greybull Plan and Saxon Plan were incorporated into the Technology Plan for use solely with respect to the funds transferred from the respective plan to the extent required by law.

Eligibility - Technology Plan

Each employee is eligible to become a participant in the Technology Plan and receive Company matching contributions on the first day of the month following date of hire. Employees are eligible to receive profit sharing contributions upon the completion of one year of eligible service (i.e., 1,000 hours in twelve consecutive months).

Effective October 1, 2004, any employee hired prior to this date received an enhanced benefit from the Technology Plan in lieu of continued participation in the Schlumberger Technology Corporation Pension Plan (the "Technology Pension Plan") if they irrevocably elected to cease participation in the Technology Pension Plan on or after January 1, 2005.

The Technology Plan provides for automatic 401(k) enrollment equal to 6% of admissible compensation, as defined in the Technology Plan document, to be deducted as soon as practicable following employment unless the participant elects otherwise.

Eligibility - Limited Plan

Each employee is eligible to become a participant in the Limited Plan and receive employer matching contributions on the first day of the month following date of hire. Employees are eligible to receive profit sharing contributions upon the completion of one year of eligible service (i.e., 1,000 hours in twelve consecutive months).

Effective October 1, 2004, any employee hired prior to this date received an enhanced benefit from the Limited Plan in lieu of continued participation in the Schlumberger Limited Pension Plan (the "Limited Pension Plan") if they irrevocably elected to cease participation in the Limited Pension Plan on or after January 1, 2005.

The Limited Plan provides for automatic 401(k) enrollment equal to 6% of admissible compensation, as defined in the Limited Plan document, to be deducted as soon as practicable following employment unless the participant elects otherwise.

Eligibility - U.S. Abroad Plan

Each employee is eligible to become a participant in the U.S. Abroad Plan and share in any profit sharing contributions on the first day of the month following completion of twelve months of active service. An employee who is (a) covered by a collective bargaining agreement which does not provide for participation in U.S. Abroad Plan and under which retirement benefits were the subject of good faith bargaining, (b) a non-resident alien who receives no earned income from the employer which constitutes income from sources within the United States, (c) a leased employee providing services for the employer, or (d) designated, compensated or otherwise classified or treated as an independent contractor or leased employee by the employer or any affiliate, shall not be eligible to participate in the U.S. Abroad Plan.

Each employee is eligible to become a participant in the U.S. Abroad Plan and share in the Company basic and matching contributions on the first day on IS status or IM status payroll. The U.S. Abroad Plan provides for automatic enrollment for anyone eligible for the matching contribution equal to 3% of admissible compensation, as defined in the U.S. Abroad Plan document, to be deducted as soon as practicable unless the participant elects otherwise.

Eligibility - Drilling Group Plan

Each employee is eligible to become a participant in the Drilling Group Plan and receive Company profit sharing contributions on the first day of the month following the completion of one year of eligible service (i.e., 1,000 hours in twelve consecutive months).

Contributions

Employees may contribute to the Technology Plan and the Limited Plan, in any whole percentage of their admissible compensation on a per payroll basis, up to an amount equal to the maximum contribution limit as set forth in the Internal Revenue Code ("IRC").

For employees participating in the Technology Plan who were hired prior to October 1, 2004 and who did not elect to cease participation in the Technology Pension Plan on or after January 1, 2005, the Company provides a matching contribution equal to 50% of the first 6% of employee pre-tax contributions in profitable years. For employees hired on or after October 1, 2004, the Company provides a matching contribution equal to 100% of the first 3% of employee pre-tax contributions; and, in profitable years, provides an additional matching contribution equal to 100% of the next 3% of employee pre-tax contributions. In years the Company is not profitable, the matching contribution that is made subject to profitability is limited to $1,000. The Company also may make an additional discretionary contribution for all eligible employees. Company contributions that are discretionary and/or subject to profitability are funded in the year following the year to which they relate.

Effective January 1, 2016, employees participating in the Technology Plan may also make Roth contributions to the Technology Plan, for which the Company provides matching contributions, as described above.

For employees participating in the Limited Plan who were hired prior to October 1, 2004 and who did not elect to cease participation in the Pension Plan on or after January 1, 2005, Schlumberger Limited provides a matching contribution equal to 50% of the first 6% of employee pre-tax contributions in profitable years. For employees hired on or after October 1, 2004, Schlumberger Limited provides a matching contribution equal to 100% of the first 3% of employee pre-tax contributions; and, in profitable years, provides an additional matching contribution equal to 100% of the next 3% of employee pre-tax contributions. In years Schlumberger Limited is not profitable, the matching contribution that is made subject to profitability is limited to $1,000. Schlumberger Limited also may make an additional discretionary contribution for all eligible employees. Contributions that are discretionary and/or subject to profitability are funded in the year following the year to which they relate.

Effective January 1, 2016, employees participating in the Limited Plan may also make Roth contributions to the Limited Plan, for which Schlumberger Limited provides matching contributions, as described above.

The U.S. Abroad Plan provides for employer profit sharing contributions, employee voluntary contributions, employer basic contributions and employer matching contributions. The basic contribution and matching contribution applies to any U.S. taxpayer who is working abroad on International status ("IS status") or International mobile status ("IM status") on or after October 1, 2014, provided they have never participated in the Schlumberger Pension Plan for U.S. Taxpayers Employed Abroad ("U.S. Abroad Pension Plan") or the International Staff Pension Plan.

The basic contribution and matching contribution also applies to U.S. taxpayers on GeoMobile or Europe Mobile status with no prior U.S. Abroad Pension Plan or International Staff Pension Plan participation, but does not include employees who have been seconded from the U.S. to either the United Kingdom or France.

Employees participating in the U.S. Abroad Plan may contribute, in any whole percentage of their admissible compensation on a per payroll basis, from a minimum of 3% to a maximum of 20%, up to an amount equal to the maximum contribution limit as set forth in the Internal Revenue Code ("IRC").

For participating in the U.S. Abroad Plan employees who are eligible for the basic and matching contributions, Schlumberger Limited provides a basic contribution equal to 6% of admissible compensation and a matching contribution equal to 100% of the first 6% of employee pre-tax contributions.

For the Drilling Group Plan years ending December 31, 2017 and 2016, the Company contributed profit sharing contributions equal to two percent (2%) of each Drilling Group Plan participant's Admissible Compensation for the plan year.

Profit sharing contributions to the Plans are discretionary, and, when added together with any applicable matching and supplemental matching contributions, may not exceed 15% of admissible compensation of the participating employees. Employees age 50 and older may elect to contribute a catch-up contribution subject to the limit set by the Internal Revenue Service ("IRS") for catch-up contributions as discussed above.

Vesting

Participants of the Technology Plan and the Limited Plan are immediately vested in their voluntary contributions plus actual earnings thereon. Vesting in employer contributions plus actual earnings thereon is based on years of active service, as defined in the applicable Plan document. With respect to employer contributions to the Technology Plan and the Limited Plan, a participant is vested 33⅓% after two years, 66⅔% after three years, and 100% after four years of active service.

Participants in the U.S. Abroad Plan are immediately vested in both voluntary and profit sharing contributions, plus actual earning thereon.

Age-weighted and profit sharing contributions made to the Drilling Group Plan prior to January 1, 2013 vest according to the following schedule:

Years of Service	*Vested Interest*
Less than 1 year	0%
1 or more year but less than 2 years	20%
2 or more years but less than 3 years	40%
3 or more years but less than 4 years	60%
4 or more years but less than 5 years	80%
5 or more years	100%

Profit sharing contributions made to the Drilling Group Plan after January 1, 2013 vest according to the following schedule:

Years of Service	*Vested Interest*
Less than 2 years	0%
2 or more years but less than 3 years	33⅓%
3 or more years but less than 4 years	66⅔%
4 or more years	100%

Participants in the Drilling Group Plan who reach retirement age, become disabled, or die become vested immediately in all employer contributions.

Vesting in employer basic contributions to the U.S. Abroad Plan is 100% at the attainment of age 60 or completion of six years of active service, whichever occurs first.

Participant Accounts

Each participant's account is credited with the participant's contributions (as applicable) and an allocation of employer contributions, Plan earnings, and forfeitures of terminated participants' nonvested accounts (if applicable). Participant accounts are charged with withdrawals, allocations of plan losses, if any, and an allocation of administrative expenses related to participant directed transactions. Allocations are based on specific participant transactions, admissible compensation, or account balances, as defined in the applicable Plan document. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Notes Receivable from Participants

Participants in the Technology Plan and the Limited Plan may obtain loans from the respective Plan, which are secured by the vested balance in their account, limited to one outstanding loan per participant at any time. Loans may not exceed five years. The minimum loan is $1,000 and the maximum is the lower of $50,000 or 50% of a participant's vested account balance, subject to IRS required limitations. Interest rates applicable to loans are based on the prime lending rate. Changes in the prime lending rate are effective on the first business day of the month subsequent to the change. Generally, principal and interest are paid ratably through payroll deductions.

The U.S. Abroad Plan and the Drilling Group Plan do not allow participants to obtain loans from the respective Plans.

Distributions

Distributions to deceased, retired or terminated participants are made based upon the participants' account balances and their vested interest therein at the time of withdrawal from the Plans.

Forfeitures

Forfeited non-vested amounts are first used to restore forfeited amounts into participant's accounts. The remaining forfeiture amounts may be used to reduce future employer contributions to the applicable Plan, pay administrative expenses of the Plans, or will be reallocated among the respective Plan participants who are entitled to share in the profit sharing contribution for the Plan year in a ratio as specified in the applicable Plan document.

With respect to the Technology Plan, forfeited accounts for the years ended December 31, 2017 and 2016 amounted to $11,832,052 and $13,238,239, respectively. During the years ended December 31, 2017 and 2016, no forfeitures were used to restore Technology Plan participant's accounts, and $15,474,500 and $18,701,581, respectively, were used to reduce the employer contribution.

With respect to the Limited Plan, there were no forfeited accounts for the years ended December 31, 2017 and 2016.

With respect to the Drilling Group Plan, forfeited accounts for the years ended December 31, 2017 and 2016 amounted to $935,472 and $730,328, respectively. During the years ended December 31, 2017 and 2016, $146,660 and $58,485, respectively, were used to reduce the employer contribution. Forfeitures exceeded employer contributions this year; therefore, the plan recorded a negative $69,270 in employer contributions at the plan year ended December 31, 2017.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plans are prepared under the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plans' management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein and disclosure of contingent assets and liabilities in the Plans' financial statements. Accordingly, actual results could differ from those estimates.

Valuation of Investments and Income Recognition

The Plans' interest in the Trust is stated at fair value, and consist of an allocation of the Trust's net assets that is based upon cumulative employer and employee contributions, net of benefits paid to terminated and retired participants, and allocations of the Trust's investment income.

The Plans follow the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820, "Fair Value Measurement." Under ASC 820, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). The Director of Trust Investments determines the Plans' valuation policies utilizing information provided by the investment managers and the Trustee.

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are as described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Plans. Unobservable inputs are inputs that reflect the Plans' own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

Changes in economic conditions or valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. Plan management evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. There were no significant transfers in or out of levels 1, 2 or 3 for the years ended December 31, 2017 and 2016. See Notes 5 and 6 for the disclosures required by ASC 820 with regard to the Plans' investments.

A fair value measurement is for a particular asset or liability. The unit of account determines what is being measured by reference to the level at which the asset or liability is aggregated (or disaggregated) for purposes of applying other accounting pronouncements. Accordingly, because the Plans do not hold shares of the Trust, the disclosures required by ASC 820 are required for the individual assets and liabilities under the Trust and are not required for the Plans' total interest in the Trust. In the same manner, the disclosures required by ASC 820 are required for the individual investments included in the self-directed investments. Similarly, since the Trust does not hold shares of the Schlumberger Group Trust (the "Group Trust"), the disclosures required by ASC 820 are required

for the individual assets and liabilities under the Group Trust and are not required for the Trust's total interest in the Group Trust. Likewise, since the Group Trust does not own shares of the different investment pools which are disclosed in Note 6, the disclosures required by ASC 820 are required for the individual assets and liabilities under each investment pool and are not required for the Group Trust's total interest in each of the investment pools.

In determining the fair value of assets and liabilities underlying the Trust, Group Trust and the investment pools owned by the Group Trust, the Trust and Group Trust use various inputs and valuation methodologies which are described in Notes 5 and 6. There have been no significant changes in the inputs or valuation methodologies used at December 31, 2017 and 2016.

Investment income relating to the Trust is allocated to the Plans based upon the average monthly balance invested by each Plan.

Notes Receivable from Participants

Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Interest income is recorded on the accrual basis. No allowance for credit losses has been recorded as of December 31, 2017 and 2016. Delinquent participant loans are reclassified as distributions based upon the terms of the written loan policy, which is promulgated by the Administrative Committee in accordance with applicable governmental regulations.

Expenses

Certain expenses of maintaining the Plans are paid directly by the Company or Schlumberger Limited and are excluded from these financial statements. Fees related to the administration of notes receivable from participants are deducted from the loan disbursed to the participant. Self-directed brokerage account fees and managed account fees are assessed quarterly and are deducted directly from the participant's account and are included in Plan interest in the Schlumberger Master Profit Sharing Trust investment income in the statements of changes in net assets available for benefits. Expenses relating to securities transactions are included in net appreciation (depreciation) in fair value of investments in the statements of changes in net assets available for benefits of the Trust and Group Trust.

Benefit Payments

Benefits are recorded when paid.

Relevant Accounting Developments

In February 2017, the FASB issued Accounting Standards Update ("ASU") No. 2017-06. ASU 2017-06 requires an employee benefit plan within the scope of Topics 960, 962, or 965 to present its interest in a master trust and the change in its interest in the master trust as single line items in the statement of net assets available for benefits and the statement of changes in net assets available for benefits, respectively. In addition, the amendments update and align the disclosure requirements for an interest in a master trust across Topics 960, 962, or 965. The amendments are effective for fiscal years beginning after December 15, 2018. Early adoption is permitted. Plan management is currently evaluating the impact of the adoption of ASU No. 2017-06 on the Plans' financial statements.

In September 2018, the FASB issued ASU No. 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement. ASU 2018-13 amends the disclosure requirements for recurring and nonrecurring fair value measurements by removing, modifying and adding certain disclosures. ASU 2018-13 removes the following disclosures: the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy; the

policy for timing of transfers; the valuation process for Level 3 fair value measurements; and changes in the unrealized gains and losses for the period included in earnings for recurring Level 3 fair value measurements held at the end of the reporting period. The ASU modifies the following disclosure requirements: transfers in and out of Level 3 and purchases and issues of Level 3 assets and liabilities; for investments in certain entities that calculate net asset value, the timing of liquidation of an investee's assets and the date when restrictions from redemption might lapse if timing has been communicated or announced publicly; and clarifies that the measurement uncertainty disclosure is to communicate information about the uncertainty in measurement as of the reporting date. The additional disclosures required under ASU 2018-13 are applicable only for public entities. The ASU is effective for fiscal years beginning after December 15, 2019, with early adoption permitted. Certain amendments of the ASU may be applied prospectively while others should be applied retrospectively to all periods presented upon the effective date. It is permissible to early adopt any removed or modified disclosures and delay adoption of the additional disclosures, if applicable, until the effective date. Plan management is currently evaluating the impact that the ASU will have on the plan financial statements.

3. Risks and Uncertainties

Due to various risks (i.e., interest rate, market and credit risk) associated with certain investments of the Trust and Group Trust, and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in the values of the investments of the Trust and Group Trust will occur in the near term, and this could materially affect participants' account balances as well as the value of the Plans' interest in the Trust and the corresponding investment income reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits, respectively.

The Trust and Group Trust invest in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage-backed securities. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

4. Plan Termination

Although it has not expressed any intent to do so, the respective Plan sponsor has the right under the Plans to discontinue its contributions at any time and to terminate the Plans subject to the terms of ERISA. In the event of Plan termination, participants will become 100% vested in their accounts.

5. Interest in the Schlumberger Master Profit Sharing Trust

The Plans' investments during the years ended December 31, 2017 and 2016 were entirely in the Trust. The Trust was established for the investment of assets of the Plans. Each participating Plan has an allocable interest in the Trust. The assets of the Trust are held by the Trustee.

At December 31, 2017 and 2016, the Plans' interest in the net assets, net of receivables and accrued expenses of the individual Plans, of the Trust was as follows:

December 31,	2017		2016	
Technology Plan	**95.40%**	**($ 5.4 billion)**	95.31%	($ 4.8 billion)
Limited Plan	**1.66%**	**($ 93.7 million)**	1.69%	($ 84.9 million)
U.S. Abroad Plan	**2.66%**	**($ 149.8 million)**	2.72%	($ 136.9 million)
Drilling Group Plan	**0.28%**	**($ 15.5 million)**	0.28%	($ 14.3 million)

Investment income and securities transaction expenses relating to the Trust are allocated to the individual Plans based upon average monthly balances invested by each Plan. The Plans' balances reflect transfers to and from the individual Plans as well as the Plans' share of investment income.

Valuation of investments

The Trust interest in the Group Trust is stated at fair value, and consists of an allocation of the Group Trust's net assets that is based on amounts contributed by the Trust, and a certain other trust and plan of Schlumberger Limited and its affiliates, net of distributions, that are invested by the Group Trust, and on a respective allocation of investment income and certain administrative expenses.

Cash and cash equivalents are stated at fair value. Cash equivalents include highly liquid investments that are within three months of maturity when acquired, money market funds, and short-term investment funds. Money market funds are valued at fair value based on quoted prices in active markets. Short-term investment funds are stated using a constant price (or amortized cost) of $1 per unit of participation, which approximates fair value. Other cash equivalents are valued on the basis of a bid evaluation or at amortized cost, which approximates fair value.

Common stocks and most of other equities are stated at fair value, as determined by closing quoted market prices in active markets in which the securities are traded. Certain other equity investments are valued at fair value based on bid or mid prices (i.e., the average of the bid and ask prices).

Mutual funds and other registered investment companies are stated at fair value. Mutual funds are valued at quoted market prices (available to institutions and retail clients) which represent the net asset value of shares owned by the Trust at year-end. Certain other registered investment companies are valued based on the net asset value of the units owned by the Trust at year-end as determined by the investment manager of the other registered investment companies based on the fair value of the underlying investments of the other registered investment companies. Exchange traded funds, also considered to be other registered investment companies, are valued at quoted market prices, which may not represent the net asset value of the units owned by the Trust at year-end. The mutual funds and other registered investment companies are deemed to be actively traded.

Corporate bonds and other fixed income obligations consist primarily of investment grade bonds from diversified industries. Corporate bonds and other fixed income obligations are stated at fair value. Certain corporate bonds and other fixed income obligations are valued based on a bid evaluation while others are valued based on mid and bid prices (i.e., a bid price represents a price a dealer is ready to pay for a security). Oftentimes, bid evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government bonds and other related obligations are comprised primarily of inflation protected U.S. treasuries, and to a lesser extent, other government-related securities (e.g., government agency obligations, and municipal and provincial bonds). Government bonds and other related obligations are stated at fair value. Government bonds and other related obligations, other than for those which have quoted market prices available, are valued based on a bid evaluation (i.e., an estimated price at which a dealer would pay for a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Other short-term securities are valued based on a bid evaluation or at amortized cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The disclosures required by ASC 820 are not required for due from brokers for securities sold, due to brokers for securities purchased, and accrued income.

Investment Transactions and Investment Income

Net appreciation or depreciation in fair value of investments includes realized and unrealized gains or losses on investments bought, sold, as well as held during the year.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

6. Interest in the Schlumberger Group Trust

A portion of the Trust's investments are invested in the Group Trust. The Group Trust serves as the investing medium for the Trust and a certain other trust and plan of Schlumberger Limited and its affiliates. Each participating trust and plan has an allocable interest in the Group Trust. The assets of the Group Trust are held by the Trustee. At December 31, 2017 and 2016, the Trust's interest in the net assets of the Group Trust was approximately 55.18% ($5.5 billion) and 55.28% ($4.866 billion), respectively. Investment income and certain administrative expenses relating to the Group Trust are allocated to the individual trusts and plan based upon average monthly balances invested by each trust and plan in the underlying pooled investments of the Group Trust. Other administrative expenses are allocated to each trust and plan based on the specific services provided to them. The trusts' and plan's balances reflect transfers to and from the individual trusts and plan as well as the trusts' and plan's share of investment income.

At December 31, 2017 and 2016, the Trust's interest in the Group Trust investments was approximately as follows:

	2017	2016
U.S. Equity Index	**68.17%**	66.75%
Other Equity Index	**100.00%**	100.00%
Fixed Income - Short Term	**88.79%**	90.98%
Fixed Income - Long Term	**100.00%**	100.00%
Treasury Inflation Protected Securities ("TIPS")	**20.30%**	22.37%
Liability-Driven Investing ("LDI")	**2.81%**	2.45%
Large Cap Equity	**78.17%**	68.53%
Mid Cap Equity	**70.40%**	70.99%
Small Cap Equity	**36.48%**	32.19%
Low Volatility Equity	**34.10%**	37.80%
Bank Loans	**100.00%**	100.00%
High Yield	**100.00%**	100.00%
Real Estate	**31.71%**	30.06%
Emerging Markets	**70.00%**	64.82%
Developed International	**60.44%**	57.68%

The following table presents the investment assets and liabilities of the Group Trust as of December 31, 2017 and 2016, based on long-term strategic asset allocation:

(a) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been categorized in the fair value hierarchy. The fair value amounts presented in these tables are intended to and permit reconciliation of the fair value hierarchy to the amounts presented in the statements of net assets available for benefits of the Group Trust.

The following tables set forth a summary of changes in the fair value of the Group Trust's Level 3 assets for the years ended December 31, 2017 and 2016:

For the years ended December 31, 2017 and 2016, realized gains and unrealized gains (losses) from Level 3 assets and liabilities are reported in net appreciation (depreciation) in fair value of investments in the statements of changes in net assets of the Group Trust.

The following table represents the Group Trust's Level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments as of December 31, 2017 and 2016, and the significant unobservable inputs and the ranges of values for those inputs:

Instrument	Fair Value (in thousands) at December 31, 2017	Fair Value (in thousands) at December 31, 2016	Principal Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Common stocks and other equities	$ 74	$ 1	Market Approach	Price adjustments based on comparable securities and other market assumptions	0.0001%
Total	$ 74	$ 1			

In estimating fair value of the investments in Level 3, the Group Trust may use third-party pricing sources. In substantiating the reasonableness of the pricing data provided by third parties, plan management evaluates a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, price movements of comparable securities, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

The following table sets forth a summary of investments held by the Group Trust reported at net asset value as a practical expedient as of December 31, 2017 and 2016.

Valuation of Investments and Financial Liabilities

Cash and cash equivalents are stated at fair value. Foreign currency included in cash is translated using closing spot rates of exchange. Cash equivalents include repurchase agreements, U.S. Treasury bills and other highly liquid investments that are within three months of maturity when acquired, and short-term investment funds. Repurchase agreements are valued at amortized cost, which approximates fair value. U.S. government securities and government agency obligations included in cash equivalents are stated at fair value based on a bid evaluation. Short-term investment funds are stated using a constant price (or amortized cost) of $1 per unit of participation, which approximates fair value. Other cash equivalents are valued on the basis of a bid evaluation or at amortized cost, which approximates fair value.

Equity securities include U.S. and international equity securities. U.S. equities include companies that are well diversified by industry sector and equity style (i.e., growth and value strategies). Active and passive management strategies are employed. Investments are primarily in large capitalization stocks and, to a lesser extent, mid-and small-cap stocks. International equities are invested in companies that are traded on exchanges outside the U.S. and are well diversified by industry sector, country and equity style. Active and passive strategies are employed. The vast majority of the investments are made in companies in developed markets with a small percentage in emerging markets.

For common stocks and other equities, corporate bonds and other fixed income obligations, government and other related bonds, and other short-term securities, the Group Trust valuation is similar to the Trust valuation (see Note 5).

Mutual funds and other registered investment companies are stated at fair value. Mutual funds are valued at quoted market prices (available to institutions and retail clients) which represent the net asset value of shares owned by the Group Trust at year-end. Certain other registered investment companies are valued based on the net asset value of the units owned by the Group Trust at year-end as determined by the investment manager of the other registered investment companies based on the fair value of the underlying investments of the other registered investment companies. Exchange traded funds, also considered to be other registered investment companies, are valued at quoted market prices, which may not represent the net asset value of the units owned by the Group Trust at year-end. Other registered investment companies include an open-end interval management investment fund that offers its shareholders the opportunity to purchase and redeem shares on a periodic basis. The mutual funds and other registered investment companies are deemed to be actively traded.

Collective and other trusts are stated at fair value, represented by the net asset value of the units of participation owned by the Group Trust at year end as determined by the trustees of the collective and other trusts based on the fair value of the underlying investments of the collective and other trusts. The net asset value is used as a practical expedient for measuring fair value.

Corporate bonds and other fixed income obligations consist primarily of investment grade bonds from diversified industries. Corporate bonds and other fixed income obligations are stated at fair value. Certain corporate bonds and other fixed income obligations are valued based on a bid evaluation while others are valued based on mid and bid prices (i.e., a bid price represents a price a dealer is ready to pay for a security). Oftentimes, bid evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government and other related bonds are comprised primarily of inflation protected U.S. treasuries, and to a lesser extent, other government-related securities (e.g., government agency obligations, and municipal and provincial bonds). Government and other related bonds are stated at fair value. Government and other related bonds, other than for those which have quoted market prices available, are valued based on a bid evaluation (i.e., an estimated price at which a dealer would pay for a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government mortgage-backed securities and other collateralized obligations are debt obligations that represent claims to the cash flows from pools of credit cards, auto loans and mortgage loans which are purchased from banks, mortgage companies, and other originators and then assembled into pools by governmental, quasi-governmental and private entities. Government mortgage-backed securities and other collateralized obligations are stated at fair value. Government mortgage-backed securities and other collateralized obligations are valued based on a bid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such

as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Bank loans consist of term bank loans and revolving bank loans which are traded in the secondary market. Bank loans are stated at fair value. Bank loans are based on bid evaluations. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Asset derivatives include options, rights, warrants, swaps, swaptions and pending foreign exchange purchases. Derivatives are stated at fair value. Exchange traded options and rights are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange purchases are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued based on a bid price or a mid evaluation (i.e., the average of the estimated prices at which a dealer would pay for and sell a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Short-term securities under security lending agreement represent short-term investments purchased with proceeds from cash collateral received from borrowers of the Group Trust's securities. Short-term securities under the security lending agreement are valued at cost, which approximates fair value.

Other short-term securities are valued based on a bid evaluation or at amortized cost, which approximates fair value.

Liability derivatives (which include options, swaps, and pending foreign exchange sales) and other liabilities are stated at fair value. Exchange traded options are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange sales are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued on the basis of a mid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks. Other liabilities are valued at cost, which approximates fair value.

The obligation under security lending agreement represents amounts due to borrowers of the Group Trust's securities for the cash collateral received from them. The amount due approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Group Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The disclosures required by FASB ASC 820 are not required for due from brokers for securities sold, due to brokers for securities purchased, accrued income, other assets and other liabilities.

Investment Transactions and Investment Income

Net appreciation or depreciation in fair value of investments includes realized gains or losses on investments sold and unrealized gains or losses on investments held. Realized gains or losses on securities transactions are recorded as the difference between proceeds received and cost, with cost determined on the moving average basis. Unrealized gains or losses on investments represent the change in the difference between the cost and fair value of investments at the end of the year and at the beginning of the year.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

Derivative Financial Instruments

The Group Trust enters into various derivative financial instruments in carrying out its investment strategy, principally to: (1) hedge a portion of the Group Trust's portfolio to limit or minimize exposure to certain risks such as foreign exchange risk, interest rate risk, credit risk, and equity risk, (2) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or by capturing value disparities between financial instruments.

Forward foreign exchange contracts are used to protect the Group Trust against the exchange risk associated with the Group Trust's investment in common stock and fixed income obligations denominated in foreign currency because the Group Trust is able to secure an exchange rate in the present for settlement at a future date. The terms of these contracts generally do not exceed one year. Risks in forward foreign exchange contracts arise from the possible inability of counterparties to meet the contract's terms and from movements in currency values.

The Group Trust reflects the fair value of all forward contracts as an asset (forward contracts to purchase foreign currency) or liability (forward contracts to sell foreign currency) in the Group Trust's statements of net assets. The change in value of these forward exchange contracts is included as unrealized gains or losses in the changes in Group Trust net assets. When the forward exchange contract is closed, the Group Trust transfers the unrealized appreciation or depreciation to a realized gain or loss equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Unrealized and realized gains and losses are included in net appreciation (depreciation) in the Group Trust's statements of changes in net assets.

Interest rate contracts such as fixed income futures, interest rate swaps, and option premiums are used to manage the interest rate risk.

The Group Trust enters into fixed-income futures contracts in the normal course of its investment activities to reduce the interest rate risk associated with its fixed-income investments, to replicate government bond positions, and as a duration management tool to enhance portfolio returns.

Upon entering into a fixed-income futures contract, the Group Trust is required to pledge to the broker an amount of cash and/or liquid securities equal to the minimum "initial margin" requirements of the exchange. Pursuant to the futures contract, the Group Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which is settled daily and is included in net appreciation (depreciation) in the changes in Group Trust net assets. The Group Trust records a variation margin receivable or payable in the Group Trust's statements of net assets for valuation margins which have not been received or paid at the end of the year. Fixed-income futures contracts are not included in the Group Trust's statements of net assets as cash settlements are made daily.

The risk of counterparty non-performance associated with the use of fixed-income futures is considered to be modest as performance is assured by the futures exchanges, which provide multiple layers of protection, such as the collection of variation margin on a daily basis and the use of standardized contracts to facilitate liquidity.

Interest rate swaps are used to adjust interest rate and yield curve exposures and as a substitute for physical securities. Swap agreements involve the exchange by the Group Trust with a counterparty of the respective commitments to pay or receive interest with respect to a notional amount of principal. Market risk of loss is limited to changes in the fair value from December 31 of each year presented through the applicable expiration date. Long swap positions increase exposure to long-term interest rates while short positions decrease exposure. The Group Trust is subject to the risk of the counterparty to an interest rate swap agreement being unable or unwilling to make timely interest payments, or to otherwise honor its obligations.

The Group Trust reflects the fair value of all interest rate swaps as an asset or liability in the Group Trust's statements of net assets. Gains or losses on interest rate swaps are accounted in net appreciation (depreciation) in the Group Trust's statements of changes in net assets.

The Group Trust may buy or write put and call options through listed exchanges and in the over-the-counter ("OTC") market. When the Group Trust buys or writes an option, an amount equal to the premium paid or received by the Group Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. The premiums paid or received from buying or writing options are recorded as realized gains or losses upon the expiration of the options. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction also is treated as a realized gain or loss. If an option is exercised, the premium paid or received is recorded as a realized gain or loss if sold or an adjustment to cost if acquired. The Group Trust, as a writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and as a result bears the market risk of an unfavorable change in the price of the security underlying the written option. Options to purchase and sell fixed income securities and swaptions are used to manage interest rate and volatility exposure, while credit spreads are used to manage credit risk. Options will become worthless at expiration if the underlying instrument does not reach the strike price of the option.

The Group Trust may use derivatives including stock rights and warrants as a substitute for investment in equity and fixed-income securities or to reduce the effect of fluctuating foreign currencies on foreign currency denominated investments.

Rights are the right, but not the obligation, to purchase newly issued equity shares, often in proportion to the number of shares currently owned, in a specified company, at a pre-established price on or within a pre-determined date. Rights are privately transacted in OTC markets. Rights are subject to general market risk and liquidity risk.

A warrant provides the holder the right, but not the obligation, to purchase securities from the issuing entity at a specific price and within a certain time period. Warrants are privately transacted in OTC markets. The Group Trust may purchase or receive warrants from its investment in the debt or equity of a company. The warrants provide the Group Trust with exposure and potential gains upon equity appreciation of the company's share price.

The value of a warrant has two components: time value and intrinsic value. A warrant has a limited life and expires on a certain date. As the expiration date of a warrant approaches, the time value of a warrant will decline. In addition, if the stock underlying the warrant declines in price, the intrinsic value of an "in the money" warrant will decline. Further, if the price of the stock underlying the warrant does not exceed the strike price of the warrant on the expiration date, the warrant will expire worthless. As a result, there is the potential for the Group Trust to lose its entire investment in a warrant.

Credit default swaps ("CDS") are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure ("selling protection"), obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure ("buying protection"), providing the right to "put" bonds to the counterparty in the event of a default. CDS agreements involve one party making a stream of payments (referred to as the buyer of protection) to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Group Trust will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. Typical credit events include bankruptcy, dissolution or insolvency of the referenced entity, failure to pay and restructuring of the obligations of the referenced entity. As the seller, the Group Trust would effectively add leverage to its portfolio because, in addition to its total net assets, the Group Trust would be subject to investment exposure on the notional amount of the swap.

If the Group Trust is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Group Trust is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

The Group Trust may use credit default swaps on corporate issues, sovereign issues of an emerging country or U.S. municipal issues to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Group Trust owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default. The Group Trust also may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality. At December 31, 2017 and 2016, the Group Trust did not hold credit default swaps where the Group Trust was a seller of protection.

The maximum potential amount of future payments (undiscounted) that the Group Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Group Trust for the same referenced entity or entities. Securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate, sovereign, U.S. municipal or U.S. Treasury obligation issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The Group Trust reflects the fair value of all CDS as an asset or liability in the Group Trust's statements of net assets. Gains or losses on CDS are accounted in net appreciation (depreciation) in the Group Trust's statements of changes in net assets.

The Group Trust enters into equity futures contracts to manage the risk that the fair value or future cash flows of an equity financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument, or its issuer, or factors affecting all similar financial instruments traded in the market.

The objective of the S&P 500 Index futures contracts is to lock in the return of the S&P 500 Index and then use fixed income assets to add excess return over the benchmark. The risks involved with owning S&P 500 Index futures contracts are related to the volatility of the S&P 500 Index and that the performance of the Index and the futures may differ slightly. Changes in the contract values are settled daily and gains and losses are included in net appreciation (depreciation) in the fair value of investments in the Group Trust's statements of changes in net assets. S&P 500 Index futures contracts are not included in the Group Trust's statements of net assets as cash settlements are made daily.

U.S. Treasury Bills, U.S. Treasury Bonds, short-term investments, and cash with a fair value of $101,243,805 and $99,961,795 at December 31, 2017 and 2016, respectively, were posted by brokers and held by the Group Trust as collateral for derivative transactions. The notional amount of this collateral at December 31, 2017 and 2016 was $104,240,300 and $99,984,300, respectively.

Assets owned and included in the Group Trust's statements of net assets, with a fair value of $15,078,967 and $22,518,755 at December 31, 2017 and 2016, respectively, were held by the Group Trust's brokers as collateral for derivative transactions. The notional amount of this collateral at December 31, 2017 and 2016 was $14,575,000 and $22,391,000, respectively.

Certain of the Group Trust's derivative documents contain provisions, in addition to standard events of default, which if violated could cause a counterparty to declare a termination event and terminate the relevant agreement(s) with the Group Trust, which would result in a determination of the net amount due to or due from the counterparty and require immediate payment in accordance therewith. The aggregate fair value of all derivative instruments with credit-risk-related contingency features that are in a net liability position on December 31, 2017 and 2016 was $7,161,882 and $7,549,573, respectively. If the credit-risk-related contingency features underlying these agreements were triggered on December 31, 2017 and 2016 with respect to one or more counterparties and any of such counterparties declared a termination event, as of the effective date of termination all derivative positions would be valued in accordance with the valuation procedures set forth in the derivatives documentation and the net amount due to or due from the counterparty would be payable by or payable to the Group Trust, respectively.

The Group Trust is subject to various Master Agreements, which govern the terms of certain transactions with select counterparties. These Master Agreements reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Since different types of forward and OTC financial

derivative transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different Master Agreement, resulting in the need for multiple agreements with a single counterparty. As the Master Agreements are specific to unique operations of different asset types, they allow the Group Trust to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single agreement with that counterparty.

Master Agreements can also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under the Master Agreements, collateral is routinely transferred if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant master agreement with a counterparty in a given account exceeds a specified threshold, which typically ranges from zero to $250,000 depending on the counterparty and the type of Master Agreement. United States Treasury Bills and U.S. dollar cash are generally the preferred forms of collateral, although other forms of AAA rated paper may be used. The Group Trust's overall exposure to counterparty risk can change substantially within a short period, as it is affected by each transaction subject to the relevant Master Agreement.

Fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim or return cash collateral arising from derivative instruments recognized at fair value under master netting arrangements are presented on a gross basis in the Group Trust's statements of net assets. At December 31, 2017 and 2016, the Group Trust has the right to reclaim cash collateral under master netting arrangements of $5,413,637 and $5,737,997, respectively. At December 31, 2017 and 2016, the Group Trust has the obligation to return cash collateral under master netting arrangements of $8,384,332 and $7,879,663, respectively.

At December 31, 2017 and 2016, the notional values of derivative contracts were as follows:

As of December 31, 2017 and 2016, the Group Trust holds certain derivative instruments that are eligible for offset in the statements of net assets and are subject to the terms of master netting arrangements between the Group Trust and select counterparties. In the case of default, the master netting arrangement allows the Group Trust to close out and net its total exposure to a counterparty with respect to all the transactions governed under a single agreement with that counterparty. For financial reporting purposes, the Group Trust does not offset derivative assets and derivative liabilities that are subject to master netting agreements in the statements of net assets.

The following tables provide information relating to the potential effect of offsetting of recognized derivative assets and liabilities which are subject to an enforceable master netting arrangement, presented in the Group Trust's statements of net assets:

Security Lending

Pursuant to the investment objectives of the Group Trust, stock loan transactions are permitted with the objective of adding investment income to the Group Trust. The Group Trust may lend securities held to unaffiliated broker-dealers registered under the Securities Exchange Act of 1934, or banks organized in the United States of America through the Group Trust's participation in the Trustee's securities lending program. At all times, the borrower must maintain cash or equivalent collateral equal in value to at least 100 percent of the value of the securities loaned. The cash collateral generally is invested in short-term securities which generate income that is allocated between the security lending agent and the Group Trust at predetermined contractual rates. The primary risk in lending securities is that a third-party borrower may default during a sharp rise in the price of the security that was borrowed, resulting in a deficiency in the collateral posted by the third-party borrower. The Group Trust seeks to minimize this risk by requiring that the market value of the loaned securities is recomputed each day and that additional collateral is furnished daily, if necessary. The Group Trust records cash collateral received from the third-party borrower as an asset and also records a corresponding liability for the return of the cash collateral. The Group Trust bears the risk of loss with respect to the unfavorable change in fair value of the invested cash collateral. The fair value of the securities loaned in the Group Trust securities lending program amounted to $1,155,886,906 and $1,017,018,371 at December 31, 2017 and 2016, respectively, and is included in Investments in the Group Trust. The Group Trust recorded gross earnings from lending securities of $13,425,854 and $8,286,804 in 2017 and 2016, respectively, and net income of $4,113,208 and $4,867,607 in 2017 and 2016, respectively. Participating brokers received (paid) $8,514,367 and $2,409,221 for rebates in 2017 and 2016, respectively, and the Trustee received $798,279 and $1,009,976 in 2017 and 2016, respectively, for fees relating to security lending activity.

7. Tax Status

The Plans' and Trust are exempt from taxation under the applicable sections of the IRC. The Technology Plan and the Limited Plan obtained a favorable tax determination letters on October 9, 2012 from the IRS. The Technology and Limited Plans have since been amended, and received favorable determination letters dated March 16, 2018 and March 17, 2018, respectively. The U.S. Abroad Plan obtained a favorable determination letter on June 28, 2012 from the IRS. Plan management and tax counsel believe that the Technology Plan, the Limited Plan, and the U.S. Abroad Plan, as amended, continue to qualify and to operate as designed. The Drilling Group Plan has applied for a determination letter. Plan management and Plan's tax counsel believe that the Drilling Group Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Drilling Group Plan's financial statements.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plans are subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

8. Related Party and Party-In-Interest Transactions

The Trust holds common shares of Schlumberger Limited in the Schlumberger Common Stock Fund. The Schlumberger Common Stock Fund was closed to active investing on July 1, 1987. As described in Note 2, certain expenses of maintaining the Plans are paid directly by the Company. Notes receivable from participants qualify as exempt party-in-interest transactions. Through its interest in the Trust, certain investments held by the Plans are managed by the Trustee or an affiliate of the Trustee. Transactions in such investments qualify as party-in-interest transactions which are exempt from the prohibited

transactions rules under ERISA. As described in Note 2, the Plan paid certain expenses related to plan operations to various service providers. These transactions are party-in-interest transactions under ERISA.

9. Participation in the Trust and Investment Options

The Plans' interest in the Trust's net assets allocated by participant investment options at December 31, 2017 and 2016 was:

**During 2017 and 2016, the stock funds were not investment options of the Plans.*

The Short-Term Fixed Income Fund is primarily composed of high-quality fixed income instruments with an average maturity of less than 3 years.

The Intermediate Fixed Income Fund is primarily composed of a diversified mix of short, intermediate and long-term investments in U.S government, U.S. agency and investment grade corporate bonds and fixed income instruments.

The U.S. Equity Fund is invested in stocks of U.S. companies and seeks to track the performance of the broad U.S stock market. The Fund is allocated approximately 88% to large capitalization stocks and approximately 12% to small capitalization stocks. The Fund is well diversified by market capitalization (large, mid, and small companies), equity style (growth, value, and core) and investment management.

The Global Equity Fund maintains an asset mix of approximately 44% foreign stocks, 11% emerging markets stocks, and 45% U.S. stocks.

The Schlumberger Common Stock Fund is primarily composed of Schlumberger Limited common stock.

The Dow Common Stock Fund is primarily composed of DowDuPont Inc. common stock.

The Transocean Sedco Forex Stock Fund is primarily composed of Transocean Sedco Forex Company common stock.

The Self-Directed Account is primarily composed of U.S. and foreign equities, equity instruments (e.g., warrants, rights and options), mutual funds and short-term investments.

Schlumberger's Target Date Series is a suite of ten funds ("Target Date Funds") that are designed to simplify retirement investing with an all-in-one, professionally managed and diversified fund that evolves as a participant's career does. Each Target Date Fund has a target date in its name that corresponds to the approximate year when a participant expects to retire.

The Target Date Funds invest in a combination of actively and passively managed funds that cover multiple asset classes and fund families, to create diversified allocations for participants based on a participant's retirement date and risk profile. The Target Date Funds gradually adjust the asset allocation over time to become more conservative as the target year approaches. These asset class adjustments are referred to as a glide path.

Generally, the Target Date Fund's glide path will transition to certain target equity allocations on an annual basis. Once a Fund reaches its target date, the target asset allocation will be approximately 31% equity and 69% fixed income and will remain static thereafter. The actual percentage allocation of any asset class in each Target Date Fund at any given time will vary slightly due to market value fluctuations of underlying assets or tactical positioning within the Target Date Fund.

Each Target Date Fund is generally rebalanced to target weights on a monthly basis.

Company contributions may be invested in any of the Target Date Funds or the Short-Term Fixed Income Fund, Intermediate Fixed Income Fund, U.S. Equity Fund or the Global Equity Fund (collectively referred to as the "Core Funds"). Participants may allocate 1 to 100% of their balances attributable to Company contributions among any of these funds on a daily basis. Participants with an account balance in the Schlumberger Common Stock Fund, Transocean Sedco Forex Stock Fund and/or the Dow Common Stock Fund may elect to move 100% of their balance in these funds to any of the Core Funds.

10. Net Transfers to and from Affiliated Plans

Amounts reflected in the net transfers to and from affiliated plans include the totals from plan mergers, as discussed in Note 1, and employment transfers of individual participants between the various affiliated companies.

11. Subsequent Events

Effective July 9, 2018, the Cameron International Corporation Retirement Savings Plan (the "Cameron Plan") was merged into the Technology Plan.

For purposes of determining the effect of subsequent events on these financial statements, management has evaluated events through October 10, 2018, the date on which the financial statements were available to be issued.
