Note 1 - Plan Description

The following description of Century Aluminum Employees Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

Effective December 31, 2017, the Plan was merged into Century Aluminum Consolidated Retirement Plan (formerly known as Century Aluminum of West Virginia, Inc. Hourly Employees Pension Plan). Accordingly, all of the Plan's assets and accumulated plan benefits were transferred to Century Aluminum Consolidated Retirement Plan as of December 31, 2017.

The Plan was a noncontributory defined benefit plan covering substantially all salaried employees of Century Aluminum Company and Century Aluminum of West Virginia, Inc.; all salaried employees and nonunion employees of Century Aluminum of Kentucky General Partnership as of April 1, 2001; all salaried employees of Century Aluminum Sebree LLC as of June 1, 2013; and all salaried employees of Century Aluminum of South Carolina, Inc. as of August 31, 2015 (collectively, the "Company"). The Plan was established on February 7, 1989, as required by the asset purchase agreement between Century Aluminum of West Virginia, Inc. and Kaiser Aluminum and Chemical Corporation (KACC). Any employee hired after February 7, 1989 automatically becomes a participant on the earlier of January 1 or July 1 after completion of one year of service. Under the terms of this agreement, the Company is not liable for any benefits earned while an individual was an employee of KACC; however, service earned under the former plan is included for purposes of eligibility, vesting, and determination of benefit accruals under the Plan. Similar terms govern employees of Century Aluminum of Kentucky General Partnership, who, prior to April 1, 2001, were employees of Southwire Company. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective January 1, 2015, benefits were frozen for participants who were under 50 years of age, and participation was frozen for all subsequent new and rehired employees.

Contributions

All contributions to the Plan were made by the Company. The Company contributed such amounts, as determined on an actuarial basis, to provide the Plan with assets sufficient to meet the projected benefits to be paid to plan participants. No participant contributions were permitted.

Funding

The Company's policy was to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Pension Benefits

All employees who were not covered by a collective bargaining agreement and who had attained the age of 62 were eligible for benefits under the Plan. The amount of the monthly pension benefit was based upon calculated final average salary and years of service times 1.5 percent divided by 12 or, if higher, a fixed multiplier times years of service, as defined in the Plan. The Plan permitted early retirement for employees that had attained age 55 and had completed 10 years of service, or the sum of their age and years of service total at least 70. The Plan provided for disability benefits. Participants became vested following the completion of five years of service.

Upon the merger of the Century Aluminum of South Carolina, Inc. Employees Retirement Plan (the "SC Plan") into the Plan, the Plan was amended to incorporate the terms and provisions of the SC Plan as it existed immediately prior to the merger date. As a result, all participants of the SC Plan were entitled to the benefits earned prior to the merger, which continued to accrue under the rules of the merged plan. Benefits under the SC Plan were calculated based on a percentage of final average salary multiplied by years of service.

Note 1 - Plan Description (Continued)

Party-in-interest Transactions

Certain plan assets were in investment funds managed by SEI Private Trust Company or its affiliates. SEI Private Trust Company was the custodian of the Plan; therefore, these transactions qualify as party-in-interest transactions, as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation

The Plan's investments are stated at fair value, based on quoted market values.

See Note 3 for additional information.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to the following:

- (a) Retired or terminated employees or their beneficiaries
- (b) Beneficiaries of employees who have died
- (c) Present employees or their beneficiaries

Actuarial Assumptions

The actuarial present value of accumulated plan benefits was determined by an actuary and was the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The actuarial valuation was completed using the beginning-of-the-year method.

The significant actuarial assumptions used in the valuation of the Plan at August 31, 2017 are summarized as follows:

Actuarial cost method	Unit credit actuarial cost method
Assumed rate of return	7.25 percent per annum at August 31, 2017
Mortality basis	RP-2014 Mortality Table adjusted to 2006, projected on a fully generational basis using the Social Security Administration (SSA) Improvement Scale for 2017. A blue collar adjustment is used for the South Carolina hourly participants.
Incident of retirement	Retirement age of 60, with 20 percent retirement per annum from age 60 through age 64 or immediate retirement if participant is age 65 or older. For South Carolina participants, a retirement age of 50 through age 69 at less than 40 percent per annum; or immediate retirement if participant is age 70 or older. Retirement and withdrawal rates vary for hourly and salaried employees based on hire date and years of service for ages between 50 and 70.

The foregoing actuarial assumptions were based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. As described in Note 1, the Plan merged into another plan on December 31, 2017 and continues to operate within that plan subsequent to that date.

December 31, 2017 and August 31, 2017

Note 2 - Summary of Significant Accounting Policies (Continued)

Benefit Payments

Benefits were recorded when paid.

Administrative Expenses

Certain administrative costs, including custodial, retirement services, and Pension Benefit Guaranty Corporation (PBGC) fees and expenses were paid by the Plan. All other administrative costs were paid by the Company.

Risks and Uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including October 4, 2018, which is the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets or liabilities that the Plan has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, and inputs other than quoted prices that are observable for the asset or liability.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset or liability.

In instances whereby inputs used to measure fair value fall into different levels of the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability.

Notes to Financial Statements

December 31, 2017 and August 31, 2017

Note 3 - Fair Value Measurements (Continued)

The Plan measured mutual funds at fair value on a recurring basis. The fair value of mutual funds were based primarily on Level 1 inputs, as described above.

Note 4 - Unaudited Information

SEI Private Trust Company (the "Custodian") held the Plan's investments and executed all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements and supplemental schedule of reportable transactions are based solely on information certified by the Custodian.

Note 5 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits was determined by consulting actuaries from PricewaterhouseCoopers LLP. The calculations of the estimated present value of accumulated plan benefits attributable to participants in the Plan, which were made as of and for the year ended August 31, 2017, the most recent actuarial valuation, are as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:

Participants currently receiving benefit payments	\$ 65,069,825
Participants entitled to deferred benefits	13,235,761
Other vested participants	<u>30,472,602</u>

Total vested benefits 108,778,188

Nonvested benefits 3,691,306

Total actuarial present value of accumulated plan benefits \$ 112,469,494

A summary of significant changes in the actuarial present value of accumulated plan benefits during the year ended August 31, 2017 is as follows:

Actuarial present value of accumulated plan benefits - Beginning of year	\$ 110,601,463
Increase (decrease) during the year attributable to:	
Benefits accumulated (including actuarial gains and losses)	3,394,474
Increase for interest due to the decrease in the discount period	7,678,501
Benefits paid	(9,549,291)
Changes in actuarial assumptions	<u>344,347</u>
Net increase	<u>1,868,031</u>
Actuarial present value of accumulated plan benefits - End of year (1)	<u>\$ 112,469,494</u>

(1) Effective December 31, 2017, as a result of the merger, the accumulated plan benefits were transferred to the Century Aluminum Consolidated Retirement Plan.

Changes in actuarial assumptions from August 31, 2016 to August 31, 2017 include the following:

The RP-2014 Mortality Table (adjusted to 2006), with blue collar adjustment for hourly participants, projected on a fully generational basis using Scale SSA 2017 was used as of August 31, 2017, whereas the RP-2014 Mortality Table (adjusted to 2006), with blue collar adjustment for hourly participants, projected on a fully generational basis using Scale SSA 2016 was used as of August 31, 2016.

The lump-sum mortality assumption was updated from the 417(e) lump-sum mortality table for 2016 to the 417(e) lump-sum mortality table for 2017.

December 31, 2017 and August 31, 2017

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Accordingly, no provision for income taxes has been made in the accompanying financial statements.

Note 7 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

Actuarial Methods for Funding Purposes

1. Actuarial Cost Method

The actuarial cost method is the Unit Credit Actuarial Cost Method.

Under this cost method, the target liability is defined as the present value of the accrued benefits on the valuation date. The funding shortfall is the excess, if any, of the amount by which the target liability exceeds the actuarial value of Plan Assets.

The target normal cost, determined on the valuation date, is the amount required to fund the benefit expected to be earned in the current year plus expected expenses.

2. Asset Valuation Method

Smoothed Method:

Smoothed value method. Under this method the Plan Assets is equal to the average of the fair market value on the valuation date and the adjusted fair market value on each of the preceding two valuation dates, but not less than 90% nor more than 110% of the Fair Value of Assets. The adjusted fair market value as of any preceding valuation date is equal to the fair market value as of such date increased for contributions reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, decreased for benefits payments and expenses reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, and adjusted for expected earnings (not in excess of the third segment rate, with no phase-in, applicable to the corresponding valuation date).
