The Funding Target is the present value of accrued benefits based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected plan administrative expenses to be paid from plan assets during the year.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods

The following assumptions were selected by the plan's enrolled actuary. The asset valuation method was selected by the plan sponsor and is an acceptable method under PPA. The plan's experience is too small to form the basis of reliable assumptions for retirement rates, disability rates, and withdrawal rates; however, these assumptions remain appropriate given historic gain and loss experience of the plan.

Salary increase assumption

Salaries are assumed to increase at the rate of 2.0% per year based on prior and anticipated compensation practice of the plan sponsor.

Expenses

Expected plan related expenses of \$216,000 were included in the 2017 Target Normal Cost. Expected plan related expenses of \$166,000 were included in the 2016 Target Normal Cost. Current year expected plan related expenses are equal to prior year actual plan related expenses, rounded to the nearest \$1,000.

Frequency of optional payment forms

In accordance with actual experience, all participants are assumed to elect a single life annuity.

Asset valuation method

The Actuarial Value of Assets is market value as of the valuation date, including discounted receivable contributions, reduced by 2/3 and 1/3 of the gain/(loss) in the prior 2 years, respectively. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

The actuary's expected rate of return is based on the plan's asset allocation and forward-looking expected rates of return by asset category provided by the plan's investment consultant.

	Actuary's Assumption	Third Segment Rate	Reflecting PPA Limit
2017 Expected Return	6.50%	6.48%	6.48%
2016 Expected Return	7.75%	6.65%	6.65%
2015 Expected Return	7.75%	6.81%	6.81%

Future Actuarial Measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Summary of Changes from the January 1, 2016 Valuation

- The funding interest rates were updated for the current year as required by PPA and HATFA. This change increased the Funding Target by approximately \$2,616,000.
- The funding mortality table was updated for the current year as required by PPA. This change increased the Funding Target by approximately \$164,000.
- Expected plan related expenses were increased from \$166,000 for the prior year to \$216,000 for the current year. This reflects the increase in actual plan related expenses for the prior year.
- The actuary's expected rate of return on plan assets was changed from 7.75% during 2016 to 6.50% during 2017 as a result of changes in forward-looking expected rates of return by asset category. This change will not affect the determination of Valuation Assets for plan year 2018 since the actuary's expected rate of return on plan assets before and after the change is greater than the PPA required maximum expected rate of return equal to the applicable third segment rate of 6.48% for 2017.

Thomas Steel Strip Corporation Pension Plan

NOTES TO FINANCIAL STATEMENTS

December 31, 2017 and 2016

NOTE A – DESCRIPTION OF PLAN

The following description of Thomas Steel Strip Corporation Pension Plan (the “Plan”) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan’s provisions.

General

The Plan is a defined benefit pension plan covering substantially all hourly employees of Thomas Steel Strip Corporation (the “Company”). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

An employee becomes eligible on the first day of the month coincident with or next following the date on which the employee attains age 21 and completes one year of service. There are specifications for participation after re-employment as documented in the Plan document.

A participant who has at least five uncanceled years of service shall have a non-forfeitable right to receive retirement income. Upon attaining the normal retirement date, a participant is eligible to retire and receive payment of retirement income. There are also situations where employees are eligible for partial retirement. A retired employee is entitled to regular retirement income and a special payment as described and as calculated in accordance with the Plan document. After December 22, 2008, no new participants may enter the Plan.

Contributions

Costs of benefits are determined annually by an actuarial consultant and related contributions are funded currently by the Company utilizing the unit credit actuarial cost method. The funding target is the present value of accrued benefits and based on compensation and service to date. The target normal cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected expenses to be paid from plan assets during the year.

The Plan met the minimum funding requirements of ERISA for the 2017 plan year.

Plan Termination

The Plan can be terminated by the Company in certain limited situations. If the Plan is terminated, the net assets of the Plan will be distributed to the participants in an order of priority determined in accordance with ERISA and its applicable regulations, and with the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested, normal-age retirement benefits, early retirement benefits and certain disability and survivor’s pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan’s termination, subject to a statutory ceiling on the amount of the individual’s monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan’s net assets to provide these benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared using the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and accumulated plan benefits at the date of the financial statements and the reported amounts of changes in net assets and accumulated plan benefits during the reporting period. Actual results could differ from these estimates.

Investment Valuation

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note E for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Benefits

Benefits are recorded when paid.

Actuarial Present Value of Accumulated Plan Benefits

The significant actuarial assumptions used in the January 1, 2017 valuations were as follows: (a) the life expectancy of participants was determined using mortality tables mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1, applied on a static basis, projected 7 years from the valuation date for annuitants and 15 years for non-annuitants. For ASC 960, the RP-2014 Blue Collar Employee and Healthy Annuitant Mortality Tables rolled back to 2006 and projected with Mortality Improvement Scale MP-2016 was used; (b) the retirement age used for the valuations was age 65 and completion of 5 years of service, or the employee's present age; (c) the interest basis for computing funding liabilities was the segment rates with a four month lookback: 4.16% for the first segment rate, 5.72% for the second segment rate, 6.48% for the third segment rate, and an effective interest rate of 5.80%; (d) the ASC 960 interest rate was 6.50% per annum.

The significant actuarial assumptions used in the January 1, 2016 valuations were as follows: (a) the life expectancy of participants was determined using mortality tables mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1, applied on a static basis, projected 7 years from the valuation date for annuitants and 15 years for non-annuitants. For ASC 960, the RP-2014 Blue Collar Employee and Healthy Annuitant Mortality Tables projected with Mortality Improvement Scale MP-2015 was used; (b) the retirement age used for the valuations was age 65 and completion of 5 years of service, or the employee's present age; (c) the interest basis for computing funding liabilities was the segment rates with a four month lookback: 4.43% for the first segment rate, 5.91% for the second segment rate, 6.65% for the third segment rate, and an effective interest rate of 6.00%; (d) the ASC 960 interest rate was 7.75% per annum.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Administrative Expenses

Expenses incurred in connection with investment transactions are paid for by the Plan. Professional and administrative fees and other expenses of the Plan are paid by the Plan. Personnel and facilities of the Company are used by the Plan for its accounting and other activities at no charge to the Plan. The audit fee is paid by the Company. The Company, at any time, may elect to have all such expenses paid by the Plan. Expenses paid by the Plan amounted to \$159,168 and \$215,915 for the years ended December 31, 2017 and 2016, respectively.

NOTE C – INFORMATION CERTIFIED BY THE PLAN'S TRUSTEE

Certification

All investment information disclosed in the accompanying financial statements and supplemental schedules, including investments held at December 31, 2017 and 2016 and net change in investment income and expenses for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the Plan's trustee.

NOTE D – ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

The actuarial present value of accumulated plan benefits of the Plan consists of the following:

	January 1,	
	2017	2016
Vested benefits:		
Participants currently receiving benefits	\$49,846,280	\$46,714,492
Other vested benefits	21,868,790	18,469,647
Nonvested benefits	824,025	680,265
Total actuarial present value of accumulated plan benefits	<u>\$72,539,095</u>	<u>\$65,864,404</u>

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the services employees have rendered. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees or their beneficiaries; (b) beneficiaries of employees who have died; and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on their average monthly earnings during the 60 consecutive highest earning months out of the last 120 months before retirement ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of the accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Actuarial present value of accumulated plan benefits at end of year	\$72,539,095	\$65,864,404

NOTE E – FAIR VALUE MEASUREMENTS

Financial accounting standards establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 fair values are based on unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 fair values are based on inputs other than quoted prices within Level 1 that are observable for the asset, either directly or indirectly.

Level 3 fair values are based on at least one significant unobservable input for the asset.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2017 and 2016.

Money market accounts: Valued at the net asset value (NAV) of shares held by the Plan at year end.

Investment contract: The guaranteed interest accounts are reported at fair value as determined by Principal Life. The accounts' fair value is the amount that would be received currently if funds were withdrawn from the Plan prior to their maturity for an event other than death, disability, termination, or retirement. This fair value presents guaranteed interest account valued adjusted to reflect current market interest rates only to the extent such market rates exceed contract crediting rates. This value represents contributions allocated to the guaranteed interest accounts, plus interest at the contractually guaranteed rate, less funds used to pay plan benefits and the insurance company's administrative fees.

Investment contracts issued by Principal are backed by a general account. Due to the nature of these contracts, they do not have specific underlying assets assigned. The guaranteed interest accounts cannot be sold to a third party, thus, the only option to exit the guaranteed interest accounts is to withdraw the funds prior to maturity. The fair value of the account is the value paid when funds are withdrawn prior to their maturity.

Thomas Steel Strip Corporation Pension Plan
NOTES TO FINANCIAL STATEMENTS
December 31, 2017 and 2016

NOTE E – FAIR VALUE MEASUREMENTS (continued)

If the applicable interest rate is greater than the interest rate on the account, the fair value is the contract value reduced by a percentage. This percentage is equal to the difference between the applicable interest rate and the interest rate on the account, multiplied by the number of years (including fractional parts of a year) until the maturity date.

Limited liability companies: Units held in limited liability companies (“LLCs”) are valued using the NAV of the shares held at year end. The NAV is based on the fair value of the underlying assets owned by the LLC, minus its liabilities, and then divided by the number of units outstanding.

Fair Value of Investments in Entities that Use Net Asset Value (NAV)

The estimated fair value of the LLCs and money market accounts is net asset value. The use of net asset value as fair value is deemed appropriate as these investments do not have finite lives, unfunded commitments relating to these types of investments, or significant restrictions on redemptions.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

In accordance with GAAP, investments measured at net asset value as a practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in the following tables are intended to permit reconciliation to the amounts presented in the Statements of Net Assets Available for Benefits.

The following tables set forth by level, within the fair value hierarchy, the Plan’s assets at fair value as of December 31, 2017 and 2016.

Assets Measured at Fair Value at December 31, 2017 on a Recurring Basis

Total				<u>\$ 62,536,341</u>

Investments in Entities that Calculate Net Asset Value per Share

Limited Liability Companies

Magnitude Institutional Limited Class A: The investment objective is to realize appreciation in value primarily through the allocation of capital directly and indirectly among investment funds and accounts. The Manager is responsible for the valuation of the Fund’s assets and liabilities under the supervision of the Directors.

NOTE E – FAIR VALUE MEASUREMENTS (continued)

Investments in Portfolio Funds are stated at fair value, based on information provided by the Portfolio Funds' manager or administrator, which reflects the Fund's share of the fair value of the net assets of each Portfolio Fund.

Generally, shareholders have the right to redeem any or all of their shares at the end of each calendar quarter by providing written notice to the Administrator at least 65 days prior to the end of that quarter, subject to certain restrictions. For example, if redemption requests for more than 15% of the net assets value of the fund's shares are received in any quarter, redemptions may be met on a pro-rata basis such that no more than 15% of the net asset value of the Fund's shares is redeemed on such date.

Summit Domestic Equity Series, Summit Global Equities Series, Summit Fixed Income Series, Summit Liquid Diversifiers Series and Summit Liquid Equity Surrogate Series: Securities in the Domestic Equities Series are equity positions in domestic corporations traded on any national exchange or NASDAQ. Investments in common stock, listed limited partnerships, preferred stock, ETFs, ETNs, securities convertible into common or preferred stock, bonds, American Depositary Receipts (ADR's), debentures and warrants are allowed. This series is also permitted to invest in mutual funds and other commingled investment vehicles that invest in the types of domestic securities identified above.

Securities in the Global Equities Series are equity positions in both US and non-U.S.-based corporations traded on any global exchange. Investments in common stock, listed limited partnerships, preferred stock, ETFs, ETNs, securities convertible into common or preferred stock, bonds, ADR's, debentures and warrants are allowed. Additionally, investment in Global Depositary Receipts (GDR's) and European Depositary Receipts (EDR's) are allowed. The series is also permitted to invest in mutual funds and other commingled investment vehicles that invest in the types of global securities identified above. The decision to hedge the currency exposure (inherent in international investments) is at the discretion of the underlying investment managers.

The principal purpose of the Fixed Income Series is to provide relative protection of principal and a predictable source of income. Additionally, the series may invest in "extended" sectors of the fixed income market (high yield, non-dollar, and convertible securities). Each underlying manager will be responsible for investing in securities specific to the manager's mandate.

The strategy of the Liquid Diversifiers Series is intended to offset the volatility of a traditional stock and/or bond portfolio. The investment strategies utilized in this series are expected to have low correlations to global equities and can be used in an effort to protect against specific market environments, such as inflationary or deflationary markets. Investments may include, but are not limited to, U.S. Treasury securities, Non-U.S. Sovereign Debt Obligations, U.S. Treasury Inflation-Protected Securities (TIPS), Non-U.S. Inflation-Linked Bonds, commodities, and cash or cash equivalents. The series is permitted to invest in separate accounts, mutual funds and other commingled investment vehicles that invest in the types of investments identified above and that ordinarily provide liquidity within 60 days or less.

The strategy of the Liquid Equity Surrogates Series is intended to complement a traditional stock and/or bond portfolio for those investors who wish to increase portfolio diversification and lower volatility while maintaining a relatively high degree of liquidity. Investments may include, but are not limited to, Master Limited Partnerships (MLPs), risk parity strategies, global equities, frontier emerging market equities, emerging market bonds, and high yield bonds. Investments in this series are expected to have varying degrees of equity market risk exposure, with less-than- market beta and volatility. The series is permitted to invest in separate accounts, mutual funds and other commingled investment vehicles that invest in the types of securities identified above and that ordinarily provide liquidity within 90 days or less.

Thomas Steel Strip Corporation Pension Plan
NOTES TO FINANCIAL STATEMENTS
December 31, 2017 and 2016

NOTE E – FAIR VALUE MEASUREMENTS (continued)

Securities owned which are listed on a national securities exchange or quoted in the over-the-counter market, are valued at their last sales price on the day of determination. In the absence of readily determinable fair values, fair values of commingled funds have been estimated by management based on information provided by the portfolio managers or general partner which includes audited financial statements.

Derivative instruments, including equity options and futures, are valued at the mid-point between the bid and the ask price as of the close on the day of determination. Restricted securities or securities for which market quotations are not readily available are valued at fair value as determined by the manager.

A member may withdraw all or part of such member's interest in any series effective as of the fifteenth or last day of each month by giving irrevocable written notice to the manager (i) at least five business days prior to the effective date of the withdrawal in the case of a withdrawal of not more than ten percent of the capital account of such member with respect to such series, and (ii) at least thirty days prior to the effective date of the withdrawal in the case of a withdrawal of more than ten percent of the capital account of such member with respect to such series.

NOTE F – TAX STATUS

The Plan obtained its latest determination letter dated August 1, 2017, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The plan is subject to routine audits by taxing jurisdictions. The Plan administrator believes that the Plan is currently designed and being operated in compliance with applicable requirements of the Internal Revenue Code.

NOTE G – RELATED PARTY & PARTY-IN-INTEREST TRANSACTIONS

The Plan allows for transactions with certain parties who may perform services or have fiduciary responsibilities to the Plan, including the Company. Certain Plan investments are shares of various funds which are owned and managed by their respective investment managers. These transactions qualify as party-in-interest transactions. Fees paid by the Plan for the investment management services amounted to \$96,328 and \$91,489 for the years ended December 31, 2017 and 2016, respectively.

NOTE H – RISKS AND UNCERTAINTIES

The Plan provides various investment options which are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of the investments will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

NOTE I – SUBSEQUENT EVENTS

Management evaluates events occurring subsequent to the date of the financial statements in determining the accounting for and disclosure of transactions and events that affect the financial statements. Subsequent events have been evaluated through October 7, 2018, which is the date the financial statements were available to be issued.
