Colfax Corporation Consolidated Retirement Plan

Notes to Financial Statements

1. Description of Plan

The following description of the Colfax Corporation Consolidated Retirement Plan (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit pension plan under Internal Revenue Code Section 401(a), which covers certain employees and their beneficiaries of Colfax Corporation and its subsidiaries (collectively, the "Employer"). The Plan provides for certain protected rights, benefits and features applicable only to certain identifiable participant groups resulting from past mergers of affiliated plans. Participation and accrual of benefits under the Plan were frozen effective January 31, 1999.

Effective January 1, 2017, the Plan document was amended and restated to consolidate Plan amendments executed since the previous restatement effective January 1, 2013.

Effective January 1, 2017, the Plan changed trustees from the Bank of New York Mellon/BNY Mellon N.A. ("BNY Mellon") to The Northern Trust Company ("Northern Trust").

Effective December 11, 2017, a portion of the Plan's assets and related obligations were spun off as part of a sale of certain subsidiaries of the Employer and transfer of related employees. See Note 2.

Benefit Payments

The Plan generally provides for normal retirement benefits at age 65, early retirement benefits at age 55 and 10 years of service, disability benefits and survivor benefits. A vested participant who terminates for any reason other than retirement, disability, or death is entitled to the monthly vested termination benefit beginning on his or her normal retirement date in the amount of his or her accrued benefit.

Participants may elect to receive their distributions, subject to certain Plan provisions, in the form of various annuity payment options. If the participant's actuarial equivalent of the accrued benefit payable at their normal retirement date is less than \$1,000, the participant is paid a lump-sum payment as soon as practicable after his or her termination date. If the participant's actuarial equivalent of the accrued benefit payable at their normal retirement date is less than \$5,000 but greater than \$1,000, the lump-sum payment will be made as a direct rollover to an eligible retirement plan specified by the participant or to an individual retirement plan account.

During 2016, the Plan was amended to permit certain terminated deferred vested participants to make a one-time election to receive their accrued benefits in the form of an immediate single lump sum payment or an immediate annuity. This benefit payment option was available for election by the applicable participants during a 90-day window beginning on July 1, 2016 with elected benefits to be paid on or after November 1, 2016. No lump sum window was offered during the 2017 Plan year.

Notes to Financial Statements

Vesting

Participants become 100 percent vested at the earlier of completion of five years of vesting service, or attainment of normal retirement age of 65.

Administrative Expenses

The Plan pays certain administrative expenses including actuary, trustee, record-keeping, audit and consulting fees, and Pension Benefit Guaranty Corporation ("PBGC") premiums. All other administrative expenses of the Plan are paid by the Employer and excluded from these financial statements.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plan are prepared under the accrual basis of accounting.

Investment Valuation and Income Recognition

The investments of the Plan are reported at fair value. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (the exit price). The Plan's investment committee determines the Plan's valuation policies utilizing information provided by investment advisors, the trustee and custodians. See Note 4 for discussion of fair value measurements.

Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/depreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Funding Policy

The Employer makes contributions in amounts sufficient to comply with the funding requirements of ERISA. The Employer's policy is to fund the normal cost currently and the amortization of the estimated unfunded past service liabilities generally over the maximum period permitted by ERISA. Subject to any contractual obligations or obligations between the Employer and the Plan participants, the Employer may reduce, discontinue or suspend contributions to the Plan at any time. For the year ended December 31, 2017, \$5,941,000 was contributed by the Employer to meet the minimum funding requirements of ERISA. For the year ended December 31, 2016, no Employer contributions were contributed or necessary to meet the minimum funding requirements of ERISA.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated Plan benefits at the date of the financial statements, and changes herein. Actual results could differ from those estimates.

Payment of Benefits

Benefit payments are recorded when paid.

Due to CIRCOR International Pension Plan

On September 24, 2017, Colfax Corporation and CIRCOR International, Inc. ("CIRCOR") entered into a definitive purchase agreement, pursuant to which CIRCOR agreed to purchase certain subsidiaries and assets comprising Colfax's fluid handling business, including the transfer of employees and related pension assets and liabilities. The sale closed on December 11, 2017; this date was also considered the effective date of the pension plan transfer. Custody of the pension assets for the legacy Colfax fluid handling business remained with the Plan until May 2018, when approximately \$178.9 million in plan assets were transferred from the Plan to the CIRCOR International Pension Plan. The value of transferred assets represents the present value of annuities calculated under Employee Retirement Income Security Act ("ERISA") Section 4044 by the Plan actuary as of December 10, 2017. The "Transfer to CIRCOR International Pension Plan" on the accompanying statement of changes in net assets available for benefits for the year ended December 31, 2017 represents the deduction resulting from the disposition. Similarly, the Plan recorded and presented this obligation to the CIRCOR plan as "Due to CIRCOR International Pension Plan" on the accompanying statement of net assets available for benefits as of December 31, 2017 totaling approximately \$176 million with an approximate offset of \$2.8 million to Employer contributions receivable for amounts due to the CIRCOR plan not yet remitted to the Plan as of December 31, 2017.

The impact of this spin-off is not reflected in the actuarial information presented in Note 9, as that computation was made as of January 1, 2017.

Due From/To Brokers

Due from broker and due to broker as of December 31, 2016 includes amounts for the settlement of securities purchase and sale transactions. Investments totaling approximately \$317.6 million which were issued by BNY Mellon were sold with a trade date prior to December 31, 2016, but a settlement date in January 2017. Concurrently, purchases of investments issued by Northern Trust totaling approximately \$301.7 million were traded prior to December 31, 2016, but settled in January 2017. The trades were conducted in preparation of the change in trustees from BNY Mellon to Northern Trust in January 2017. No allowance for losses on amounts due from broker was recorded at December 31, 2016.

3. Investment Information Certified by the Trustee and Custodians

The plan administrator has elected the alternative method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, The Northern Trust Company ("Trustee"), The Bank of New York Mellon/BNY Mellon, N.A. (former trustee as of and for the year ended December 31, 2016), Transamerica Life Insurance Company, and Aetna Life Insurance Company, (collectively the "custodians") have certified the following data as of December 31, 2017 and 2016 and for the years then ended in the accompanying financial statements and supplemental schedules.

4. Fair Value Measurements

Accounting Standards Codification ("ASC") 820, *Fair Value Measurements*, provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

There have been no changes in the valuation methodologies used at December 31, 2017 and 2016. Following is a description of the valuation methodologies used for assets measured at fair value:

Colfax Corporation Consolidated Retirement Plan

Notes to Financial Statements

Common/Collective Trusts: Common/ collective trusts ("CCTs") represent investments with various investment managers. Units held in CCTs are valued at the net asset value ("NAV"). The NAV, as provided by the Trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund, that are traded in an active market, less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

Guaranteed Investment Contracts: The Plan holds two annuity contracts, the Fixed Dollar Account Fund with Transamerica Life Insurance Company ("Transamerica") and the Fixed Income Regular Account Fund with Aetna Life Insurance Company ("Aetna"). Transamerica maintains the assets of this investment in an allocated fund which was credited with an interest rate of 1.5 percent during each of the years ended December 31, 2017 and 2016. Interest rates are declared annually. The total yield for the Transamerica contract was 2.7 percent and 3.2 percent for 2017 and 2016, respectively. Aetna maintains the assets of this investment in both allocated and unallocated funds with crediting rates averaging 4.22 percent and 4.48 percent for 2017 and 2016, respectively. The total yield for the Aetna contract was 4.11 percent and 4.37 percent for 2017 and 2016, respectively. Fair value of the guaranteed investment contracts is determined by discounting the related cash flows based on observable, current yields of similar instruments with comparable durations considering the credit worthiness of the issuer.

Employer Common Stock: The common stock of the Employer is traded on the New York Stock Exchange and is valued at the closing price on the last day of the Plan year.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Fair Value of Investments that Calculate Net Asset Value

The following table presents the unfunded commitments, redemption frequencies, and redemption notice periods as of December 31, 2017 and 2016 for those assets, summarized by category, whose fair value is estimated using the NAV per share or its equivalent:

Investment	Fair Value at December 31,		Unfunded Commitment	Redemption Frequency	Notice Period	Other Restrictions
	2017	2016				
Equity	\$ 200,969,197	\$ 190,327,182	\$ -	Daily	None	None

The following tables summarize, by level within the fair value hierarchy, the Plan's investments stated at fair value at December 31, 2017 and 2016:

Total	\$ 313,990,051	\$ 12,115,596	\$ 1,822,361	\$ -	\$ 327,928,008

⁽¹⁾In accordance with Accounting Standards Update No. 2015-07, *Fair Value Measurement (Topic 820) - Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)* ("NAV"), certain investments that are measured at fair value using the NAV practical expedient have not been classified in the fair value hierarchy. These investments, consisting of common collective trusts, are valued using the NAV provided by the Trustee.

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

The Plan administrator evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2017 and 2016, there were no significant transfers in or out of levels 1, 2 or 3.

5. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits. As of December 31, 2017 and 2016, three investments represented approximately 79 percent of total investments at fair value.

Colfax Corporation Consolidated Retirement Plan

Notes to Financial Statements

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

6. Fully Allocated Investment Contracts

Prior to 1993, a plan that merged into the Plan on December 31, 2012 had purchased guaranteed annuity contracts from John Hancock Mutual Life Insurance Company ("Hancock") to fulfill the benefit obligations of individual participants. The payments under the annuities are guaranteed to be paid at a future date, usually on the participant's retirement date, and for the life of the participant. The guaranteed annuities are fully allocated investment contracts and therefore are excluded from Plan assets. The guaranteed annuity contracts provide for dividend payments at Hancock's discretion based on the experience under the contracts compared to the assumptions upon purchase of the annuity contracts. Total dividends received by the Plan from fully allocated annuity contracts were \$48,845 and \$48,803 during 2017 and 2016, respectively.

7. Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Plan administrator by letter dated August 26, 2013, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). Although the Plan has been amended and restated since receiving the opinion letter, the Plan administrator believes that the Plan, as currently designed, is being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements. Additionally, the Plan administrator received a letter from the IRS dated March 20, 2018, that the Plan and related trust are designed in accordance with the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by a plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions. In March 2015, the Employer received a notification from the IRS to inform it of an examination of the Plan under IRC 401(a) for the plan year ended December 31, 2012. The Plan responded to the IRS in November 2017 with a formal letter and closing agreement which was accepted by the IRS in January 2018. There was no material impact to the Plan based on the results of that audit.

8. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Benefits attributable to employee contributions, taking into account those paid out before termination.

Colfax Corporation Consolidated Retirement Plan

Notes to Financial Statements

2. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had returned with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
3. Other vested benefits insured by the PBGC (a U.S. government agency) up to the applicable limitations (discussed subsequently).
4. All other vested benefits (not insured by the PBGC).
5. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

9. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries, and c) present employees or their beneficiaries. Benefits under the Plan are based on employees' highest average compensation during any consecutive 60-months period of credited service or based on years of service, as defined by the Plan. The accumulated plan benefits for active employees are based on their average compensation and years of service as of the date the Plan was frozen. Benefits payable under all circumstances, (retirement, death, disability, and termination of employment) are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits as determined by the actuary is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants before the Plan was frozen to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for events such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Colfax Corporation Consolidated Retirement Plan

Notes to Financial Statements

The computations of the actuarial present value of accumulated plan benefits were made using the beginning of year method. The significant actuarial assumptions used in the valuation as of December 31, 2016 were (a) life expectancy of participants (the RP-2014 Generational Mortality Table with Mortality Improvement Scale MP-2017), (b) retirement age assumptions (the assumed average retirement age for the Plan ranged from age 55 to 65, as defined by the Plan for specific employees), (c) investment return (6.25 percent), and (d) expenses (which were assumed to be \$5,000,000 per year).

A summary of the most recent actuarial present value of accumulated plan benefits is shown below:

<i>December 31,</i>	2016
Vested benefits:	
Participants currently receiving benefits	\$ 284,312,577
Other participants	63,788,113
Total vested benefits	348,100,690
Nonvested benefits	473,370
Total actuarial present value of accumulated plan benefits	\$ 348,574,060

The change in the actuarial present value of accumulated plan benefits is as follows:

Actuarial present value of accumulated plan benefits, December 31, 2015	\$ 357,880,433
Net increase in actuarial present value of accumulated plan benefits attributed to:	
Increase for interest	\$ 22,662,479
Benefits paid to participants	(44,381,347)
Benefits accumulated	1,536,786
Change of assumptions ⁽¹⁾	10,875,709
Net decrease	(9,306,373)
Total actuarial present value of accumulated plan benefits, December 31, 2016	\$ 348,574,060

⁽¹⁾ The changes in assumptions since the prior valuation include an update to the Mortality Improvement Scale MP-2017, as well as a change in discount rate from 6.75 percent to 6.25 percent.

Colfax Corporation Consolidated Retirement Plan

Notes to Financial Statements

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2017 and January 1, 2016. Refer to Note 2, "Due to CIRCOR International Pension Plan," for discussion of plan spin-off that occurred after the January 1, 2017 valuation date.

10. Related Party and Party-In-Interest Transactions

Certain plan investments are managed by affiliates of Northern Trust, BNY Mellon, Aetna, and Transamerica, which are the trustee and custodians of the Plan. The Plan pays fees to these service providers for administrative, trustee, and investment management services which are recorded within administrative expenses on the accompanying statements of changes in net assets available for benefits. During 2017 and 2016, the Plan paid approximately \$293,000 and \$1,317,000, respectively, for these services. The Plan also invests in Employer common stock. During 2017 and 2016, the Plan paid for actuarial and audit services. These transactions qualify as exempt party-in-interest transactions.

11. Subsequent Events

The Plan has evaluated subsequent events from the date of the statement of net assets available for benefits through October 9, 2018, the date the financial statements were available to be issued. During this period, no material recognizable subsequent events were identified, except for the transfer of assets to the CIRCOR International Pension Plan as discussed in Note 2 to the financial statements.

Changes since the Prior Valuation:

The funding target interest rates for minimum funding changed as follows: from 4.43% to 4.16% for the first five years, from 5.91% to 5.72% for the next 15 years, and from 6.65% to 6.48% for all years thereafter.

ACTUARIAL ASSUMPTIONS AND METHODS

Rationale for Selection of Significant Actuarial Assumptions

IRS and PBGC mortality and interest rates

The interest rate and mortality assumptions used to value the Target Liability for determining the minimum and maximum contributions, PBGC premiums, and lump sum distributions are prescribed by law and based on elections made by the Plan Sponsor.

Retirement from active employment

Because the employer does not have enough data to do a fully credible experience analysis with respect to retirement from active employment, the current assumption has been selected based on observations of recent retirements from active employment, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Retirement from terminated vested status

Because the employer does not have enough data to do a fully credible experience analysis with respect to retirement from terminated vested status, the current assumption has been selected based on observations of recent retirements from term vested status, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Termination of employment

Because the employer does not have enough data to do a fully credible experience analysis with respect to termination from active employment, the current assumption has been selected based on observations of recent terminations from active employment, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Disability during employment

Because the employer does not have enough data to do a fully credible experience analysis with respect to disability during active employment, the current assumption has been selected based on observations of recent disabilities during active employment, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Plan expenses

Expenses paid from the plan trust are estimated by reviewing historical fees paid from the trust and adjusting for PBGC premiums and other expenditures expected to be paid in this Plan Year.

Assumed rate of return for actuarial value of assets

The assumed rate of return used for determination of the actuarial value of assets was selected taking into consideration input from the Plan's investment advisor and publicly available survey information on expected returns by asset class.

Schedule SB, line 35 - Balances elected for use to offset funding requirement

Effective December 11, 2017, nearly half of the plan's liabilities and assets were spun off to another plan. As part of the spinoff, the carryover balance and prefunding balance were divided between the current plan and the spun-off plan. This division was done in accordance with the provisions of ERISA Section 4044, in the same manner as the determination of assets to be spun off from the Plan. The resulting carryover balance and prefunding balance for each plan as of the beginning of the Plan Year are below.

	<u>Total</u>	<u>Spun Off</u>	<u>Remaining</u>
Carryover balance as of January 1, 2017	74,566	35,855	38,711
Prefunding balance as of January 1, 2017	581,395	279,563	301,832

The Plan Sponsor elected to offset the funding requirement with the entire Remaining amounts above, as indicated on Line 35.

ACTUARIAL ASSUMPTIONS AND METHODS

Rationale for Selection of Significant Actuarial Assumptions

IRS and PBGC mortality and interest rates

The interest rate and mortality assumptions used to value the Target Liability for determining the minimum and maximum contributions, PBGC premiums, and lump sum distributions are prescribed by law and based on elections made by the Plan Sponsor.

Retirement from active employment

Because the employer does not have enough data to do a fully credible experience analysis with respect to retirement from active employment, the current assumption has been selected based on observations of recent retirements from active employment, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Retirement from terminated vested status

Because the employer does not have enough data to do a fully credible experience analysis with respect to retirement from terminated vested status, the current assumption has been selected based on observations of recent retirements from term vested status, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Termination of employment

Because the employer does not have enough data to do a fully credible experience analysis with respect to termination from active employment, the current assumption has been selected based on observations of recent terminations from active employment, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Disability during employment

Because the employer does not have enough data to do a fully credible experience analysis with respect to disability during active employment, the current assumption has been selected based on observations of recent disabilities during active employment, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Plan expenses

Expenses paid from the plan trust are estimated by reviewing historical fees paid from the trust and adjusting for PBGC premiums and other expenditures expected to be paid in this Plan Year.

Assumed rate of return for actuarial value of assets

The assumed rate of return used for determination of the actuarial value of assets was selected taking into consideration input from the Plan's investment advisor and publicly available survey information on expected returns by asset class.
