Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Siemens Healthcare Diagnostics Inc. Puerto Rico Pension Plan, which comprise the statements of net assets available for benefits as of December 31, 2017 and 2016, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the certified investment information described in Note 7, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the entities that certified the investment information meet the requirements of 29 CFR 2520.103-8. The plan administrator has obtained certifications as of December 31, 2017 and 2016, and for the years then ended, that the information provided to the plan administrator is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Compliance of Form and Content With Department of Labor's Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the certified investment information have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, is presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Siemens Healthcare Diagnostics Inc.
Puerto Rico Pension Plan

Notes to Financial Statements

December 31, 2017

1. Description of Plan

The following description of the Siemens Healthcare Diagnostics Inc. Puerto Rico Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a non-contributory, defined benefit plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). For the years ended December 31, 2017 and 2016, the assets of the Plan were held in trust by Banco Popular de Puerto Rico (Banco Popular or Trustee). Pursuant to a sub-trustee agreement, the Trustee, as directed by the Investment Committee, has invested the Plan's assets in the Master Trust for Siemens Pension Plans (Master Trust), for which JP Morgan Chase Bank N.A. (JPM or Sub-Trustee) was the trustee. As such, JPM became the sub-trustee of the assets of the Plan.

The Plan was frozen as of December 31, 1995, and any further benefit accruals after that date ceased. Effective January 31, 2011, liabilities and associated assets related to frozen pension benefits for certain current and former employees of Siemens Medical Solutions USA, Inc. were transferred to the Plan from the Siemens Pension Plan. Effective January 1, 2018, the sponsor of the Plan was changed from Siemens Corporation to Siemens Medical Solutions USA, Inc.

Administration

The Administrative Committee of Siemens is responsible for administering the Plan's operations and the Investment Committee of Siemens is responsible for selecting and monitoring investments held by the Plan, all of whom are appointed by the Board of Directors of Siemens.

Pension Benefits

Benefits are provided at normal, early, and deferred retirement and upon total and permanent disability, subject to certain limitations. Participants who attain five years of service (at least 1,000 hours in a calendar year) or who terminated employment after reaching the age of 65 earn the right to a fully vested benefit. Benefits accrued prior to December 31, 1995, are generally computed according to a two step formula that takes into account a participant's years of benefit service, final average pay and estimated social security benefits, each through December 31, 1995. Step one of the formula is to compute 1.75% times a participant's projected years of benefit service

Siemens Healthcare Diagnostics Inc.
Puerto Rico Pension Plan

Notes to Financial Statements (continued)

1. Description of Plan (continued)

to age 65 multiplied by his or her final average pay, less 1.75% times the participant's projected years of benefit service to age 65 multiplied by his or her estimated social security benefit. Step two is to multiply the difference computed in step one by a fraction, the numerator of which is the participant's actual years of service through December 31, 1995, and the denominator of which was the participant's projected benefit service through normal retirement age. All accrued benefits have been frozen. Alternate benefit formulas apply to certain participants who have accrued pension benefits that were transferred to the Plan from other defined benefit plans.

The benefit commencement date for normal retirement is the first day of the month coincident with or next following the date of an employee's 65th birthday. Benefits are payable beginning after the normal retirement date is reached. The benefit commencement date for a reduced early retirement benefit is the first day of any month after the early retirement date, which is the date an employee terminated employment after he has attained age 55 and completed ten or more years of vesting service. The benefit commencement date for deferred retirement is the first day of the month coincident with or next following the termination of employment after the normal retirement date. An eligible employee who incurs a disability after completing at least ten years of vesting service shall be entitled to his accrued benefit at normal retirement age or a reduced benefit as early as the month following the participant's attainment of age 55.

Funding Policy

The Plan is funded solely by contributions made by the Company.

Contributions for years ending December 31, 2017 and 2016, were determined annually based on actuarial valuations of the Plan by Willis Towers Watson, an independent consulting actuary. Willis Towers Watson determined the maximum amount permitted by law or regulation as a Federal income tax deduction and the minimum amount necessary during any plan year to avoid an accumulated funding deficiency as defined by ERISA.

Siemens Healthcare Diagnostics Inc.
Puerto Rico Pension Plan

Notes to Financial Statements (continued)

1. Description of Plan (continued)

The Plan met the minimum funding requirements of ERISA for both years.

As of January 1, 2012, the Company adopted with respect to determining liabilities for funding purposes of the Plan, the federal act known as “Moving Ahead for Progress in the 21st Century” (MAP-21), in 2014 the federal act known as the “Highway and Transportation Funding Act of 2014”, and in 2015 the “Bipartisan Budget Act”.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plan have been prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The fair value of the Plan’s interest in the Master Trust is based on the beginning of year value of the Plan’s interest in the Master Trust, plus contributions, asset transfers in, and allocated investment income (losses) less actual distributions, allocated investment loss, asset transfers out and allocated administrative expenses.

As further discussed in Note 8, certain investments in securities held by the Master Trust are valued using quoted market prices. The last reported sales price on the valuation date is used when no other value is obtainable from the Sub-Trustee. The amounts reported by the Master Trust for securities that have no quoted market price represent estimated fair value as determined by the Sub-Trustee. The investment manager values investments in private placement bonds and high-yield bonds (fixed income funds) when no other value is obtainable from the trustee. Investments in other funds are valued based on the net assets value (NAV), as determined by the funds administrators, and will consider the liquidity of the fund and any restrictions on redemptions.

2. Summary of Significant Accounting Policies (continued)

Purchases and sales by the Master Trust are recorded on a trade-date basis. Interest income is recorded by the Master Trust on the accrual basis. The Master Trust records dividends on the ex-dividend date.

Payment of Benefits

Benefit payments to participants are recorded when paid.

Plan Expenses

Certain expenses are paid by the Master Trust and charged to the Plan based upon the Plan's proportionate interest in the net assets of the Master Trust. Expenses attributed to a specific plan are charged to that plan only.

Risks and Uncertainties

The Plan may invest in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the statement of net assets available for benefits.

The Investment Committee has diversified the net assets of the Master Trust with the intention of appropriately addressing significant concentrations of risk. The Master Trust's net assets were managed by 17 investment managers as of December 31, 2017 and 2016.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect amounts reported and disclosed in the financial statements.

New Accounting Pronouncements

In February 2017, the FASB issued Accounting Standards Update (ASU) 2017-06, *Employee Benefit Plan Master Trust Reporting*. For each master trust in which a plan holds an interest, ASU 2017-06 requires a plan's interest in that master trust and any change in that interest to be presented in separate line items in the statement of net assets available for benefits and in the statement of changes in net assets available for benefits, respectively. Further, ASU 2017-06 removes the requirement to disclose the percentage interest in the master trust for plans with divided interests and requires that all plans disclose the dollar amount of their interest in each of the master trust's general types of investments, which supplements the existing requirement to disclose the master trust's balances in each general type of investments. ASU 2017-06 also requires plans to disclose (1) their master trust's other asset and liability balances and (2) the dollar amount of the plan's interest in each of those balances. ASU 2017-06 is effective for entities for fiscal years beginning after December 15, 2018, with retrospective application to all periods presented. Early application is permitted. Management has not adopted the new pronouncement and is in the process of evaluating its impact.

In July 2018, the FASB issued ASU 2018-09, Codification Improvements, which, among other things, amends an illustrative example of a fair value hierarchy disclosure to indicate that a certain type of investment should not always be considered to be eligible to use the net asset value per share practical expedient. Also, it further clarifies that an entity should evaluate whether a readily determinable fair value exists or whether its investments qualify for net asset value per share practical expedient in accordance with ASC 820, Fair Value Measurement. Adoption of the amended guidance, which is to be applied prospectively, affects the fair value disclosures, but does not change the fair value measurement of the investments. ASU 2018-09 is effective for entities for fiscal years beginning after December 15, 2019, with retrospective application to all periods presented. Early application is permitted. Management has not yet adopted the pronouncement and is in the process of evaluating the impact.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits represent the actuarial present value of estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions for employee services already rendered. Accumulated plan benefits include benefits expected to be paid to: (i) retired or terminated employees or their beneficiaries; (ii) beneficiaries of employees who have died and (iii) present employees or their beneficiaries. Benefits under the Plan are based on employees' highest five-year average compensation within the ten-year period immediately prior to the employee's termination. The accumulated plan benefits for active employees are based on their average compensation during the five years ending on the date as of which the benefit information is presented (the valuation date) or the total cash compensation during the year. Benefits payable under all circumstances – retirement, death, disability and termination of employment – are included, to the extent they are deemed attributable to employees' service rendered and compensation received up to the valuation date.

The actuarial present value of accumulated benefits for the Plan was determined by Aon Hewitt and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The more significant actuarial assumptions used in the December 31, 2016 and 2015, valuations were:

1. Life expectancy of participants – RP-2016 mortality table for employees and healthy annuitants with a fully generational projection using scale MP-2016 per §1.430(h)(3)-1(d). In the prior year, the RP-2014 mortality tables for employees and healthy annuitants with a fully generational projection using scale MP-2015 was used.
2. Accrued benefit interest rate – 6.05% as of December 31, 2016 and 2015.
3. Weighted-average retirement age – 65.94 in 2016 and 65.12 in 2015

The valuation at December 31, 2016, is based on the actuarial valuation as of January 1, 2017. Had the valuation been performed on December 31, 2016, there would be no material differences.

Notes to Financial Statements (continued)

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue even though the benefits are frozen. If the Plan was to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of December 31, 2016, is as follows:

Vested benefits:	
Active employees	\$ 413,496
Participants with deferred benefits	1,599,564
Participants receiving benefits	3,457,421
Nonvested benefits	<u>1,611</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$ 5,472,092</u></u>

The changes in the actuarial present value of accumulated plan benefits during the year ended December 31, 2016, is as follows:

Actuarial present value of accumulated plan benefits at beginning of year	\$ 5,533,646
Increase (decrease) during the year attributable to:	
Actuarial (gain) loss	(27,071)
Decrease in discount period	325,836
Actual benefits paid	(300,270)
Assumption changes	<u>(60,049)</u>
Net increase(decrease)	<u>(61,554)</u>
Total actuarial present value of accumulated plan benefits at end of year	<u><u>\$ 5,472,092</u></u>

The Plan's experience and assumptions reflect changes due to retirement experience, turnover and mortality, as well as the impact of the interest rate change.

4. Plan Termination

Even though the Plan is frozen, the Company intends to continue the Plan indefinitely without interruption, but reserves the right to discontinue it at anytime. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (a) Benefits attributable to employee contributions, taking into account those paid out before termination.
- (b) Annuity benefits that former participants or their beneficiaries have been receiving for at least three years, or that participants eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan's provisions in effect at any time during the five years preceding the Plan's termination.
- (c) All other vested benefits.
- (d) All non-vested benefits.

In a letter dated August 19, 2016, the PBGC has recently determined that the Plan is not covered by Title IV of ERISA since it is only qualified in Puerto Rico. PBGC subsequently refunded the premiums paid from year 2010 to 2015 totaling \$98,297 and the refund was deposited in the trust on Sept 13, 2017.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan's sponsor.

5. Tax Status

The Plan has received a determination letter from the Commonwealth of Puerto Rico's Department of Treasury (Department of Treasury) dated October 19, 2011, stating that the Plan is qualified under the Puerto Rico Internal Revenue Code, and therefore, the related trust is exempt from taxation. Subsequent to this determination by the Treasury, the Plan was amended on November 28, 2011 and October 1, 2012, and received letters from the Department of Treasury, dated May 31, 2012 and May 2, 2013, that state that the amendments do not affect the determination issued October 19, 2011. Once qualified, the Plan is required to operate in conformity with the Puerto Rico Code to maintain its qualification. The plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Puerto

Rico Code and therefore believes that the Plan, as amended remains qualified and the related trust remains tax-exempt.

Accounting principles generally accepted in the United States requires the management of the Company to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits to be sustained upon examination by the Puerto Rico Department of the Treasury. The management of the Company has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2017, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

6. Parties-in-Interest

The Sub-Trustees of the Master Trust and custodian of the Plan's assets also serves as an investment manager with respect to one of the funds in which the Plan's assets were invested as of and for the year ended December 31, 2017 and 2016. In addition, the Sub-Trustees served as the custodian for certain funds managed by INVESCO in which the Plans participated.

7. Information Certified by the Sub-Trustee and the Trustee

The Plan administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to the following information certified by the Sub-Trustee and the Trustee, as complete and accurate, except for comparing such information certified by the Sub-Trustee and the Trustee to information included in the Plan's financial statements.

The accuracy and completeness of the Plan's share of investments in the net assets of the Master Trust and the investment income are summarized below.

December 31, 2017:

Investment in net assets of the Master Trust	<u><u>\$ 5,960,989</u></u>

8. Investment in the Master Trust

The Plan has a proportionate interest in the Master Trust. The Master Trust's net assets and investment income (loss) are allocated to the individual pension plans on a daily weighted-average basis. The Plan's proportionate interest in the Master Trust's net assets at December 31, 2017 and 2016, was 0.16% and 0.15%, respectively.

Total investment income of the Master Trust	<u>\$ 485,809,351</u>	<u>\$ 298,706,360</u>

The table above includes net appreciation in fair value of investments, interest and dividends of the 401(h) accounts of approximately \$1,139,000 and \$640,000, which are part of the total investment of the Master Trust for the years ended December 31, 2017 and 2016, respectively.

Fair Value Measurements

The Company defines fair value as the exchange price that would be received for an asset or paid for a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The Company utilizes a fair value hierarchy which requires the Plan to maximize the use of observable inputs and minimize unobservable inputs when determining fair value and also establishes three levels of classifications.

As such, the hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy in ASC 820 are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.

Siemens Healthcare Diagnostics Inc.
Puerto Rico Pension Plan

Notes to Financial Statements (continued)

8. Investment in the Master Trust (continued)

Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets and liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in markets that are not active
- Observable inputs other than quoted prices that are used in the valuation of the asset or liabilities (e.g., interest rate and yield curve quotes at commonly quoted intervals)
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity). Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measure in its entirety.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2017, as compared to December 31, 2016.

Equities: All assets in which the Master Trust holds a direct share have been classified as common stocks. These assets are valued at the closing price reported on the active market on which the individual securities are traded. Preferred securities are valued based on the closing price reported on the active market on which the individual securities are traded (Level 1) and the remaining investments are valued utilizing data furnished by an independent pricing service.

Siemens Healthcare Diagnostics Inc.
Puerto Rico Pension Plan

Notes to Financial Statements (continued)

8. Investment in the Master Trust (continued)

Registered Investment Funds: These investments are valued based on the closing price reported on the active market on which the individual securities are traded (Level 1). These assets have been classified as common stocks on the preceding Master Trust table based on the underlying assets of the funds which are common stocks.

Fixed Income Funds: Investments are valued utilizing data furnished by an independent pricing service (Level 2), incorporating various inputs such as benchmark curves, benchmarking of like securities, matrix pricing, model processes such as the Option Adjusted Spread model to assess interest rate impact of and develop prepayment scenarios. Both models and processes take into account market conventions.

Limited Partnership: Limited partnership is valued based on the information provided by the manager. Quarterly data is usually received one to three months after quarter end. This creates a “lag” as the data is updated when it is received. There is no material impact as a result of this lag as of December 31, 2017 or 2016.

Commingled Funds: These investments own shares of pooled investment vehicles which, in turn, own various underlying assets (equity, fixed income, etc.). Each funds’ performance will be the result of the underlying assets. The fund calculates a net asset value (NAV) based on the underlying securities’ value at market close, less any applicable expenses, divided by the shares outstanding. NAVs may be calculated on daily/weekly/monthly basis (as determined by the fund).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies and assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets for determining minimum required contributions	The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.
Benefits not valued	Willis Towers Watson has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any other significant benefits required to be valued that were not.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the August immediately preceding the plan year, but with a minimum interest credit rate of 4.06%. The long term estimate of the 30-year Treasury rate, based on current conditions, future economic expectations and the minimum interest credit results in a final assumed interest credit rate of 4.06%.

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Benefit commencement date for deferred vested benefit:	Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not highly subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.
------------------------	--

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target was updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target was updated to include one additional year of projected mortality improvement, as required under IRC §430.

The cash balance interest crediting rate was decreased from 4.25% to 4.06%.

The assumed plan-related expenses included in the target normal cost were changed from \$65,000 for the prior valuation to \$48,000 for the current valuation to account for lower expected expenses to be paid from the trust.

Change in methods since prior valuation

There have been no changes in methods since the prior valuation.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets for determining minimum required contributions	The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.
Benefits not valued	Willis Towers Watson has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any other significant benefits required to be valued that were not.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the August immediately preceding the plan year, but with a minimum interest credit rate of 4.06%. The long term estimate of the 30-year Treasury rate, based on current conditions, future economic expectations and the minimum interest credit results in a final assumed interest credit rate of 4.06%.

Schedule SB, Part V – Summary of Plan Provisions

Plan Provisions

The pension plan became effective January 1, 1995. The plan was amended and restated June 1, 2010. The plan was frozen effective December 31, 1995. Effective January 31, 2011, some members of the Siemens Pension Plan were transferred to the Siemens Healthcare Diagnostics Inc. Puerto Rico Pension Plan. The provisions of the Siemens Pension Plan apply to these participants, therefore these participants are eligible for cash balance benefits. All remaining active participants in the Puerto Rico plan are former members of the Siemens Pension Plan.

The PBGC has informed Siemens that the Plan is not covered under Title IV of ERISA and as such is not subject to PBGC premiums.

Eligibility	No new entrants after December 31, 1995.

Definitions

Vesting service	Elapsed time from date of hire.
Benefit Service	Years and completed months from participation date. Benefit service is frozen as of December 31, 2010.
Normal retirement date (NRD)	The later of age 65 or completion of three years of Vesting Service.
Pension benefit	The account balance transferred from the Siemens Pension Plan is increased monthly with Interest Credits. Interest Credits are based on the 30-year Treasury rate for August immediately preceding the calendar year.

Eligibility for Benefits

Normal retirement	Retirement on NRD.
Early retirement	Vested cash balance benefits are immediately payable.
Postponed retirement	Retirement after NRD.
Deferred vested termination	100% vested with three years of Vesting Service.
Disability	Cash balance benefits, if not already vested, are vested after 12 months of disability.
Preretirement death benefit	Five years of Vesting Service. Cash balance benefits are immediately vested upon death of an active participant.

Benefits Paid Upon the Following Events

Normal retirement	The cash balance benefit.
Early retirement	For cash balance benefits, an actuarially equivalent annuity is payable.
Postponed retirement	The pension benefit determined as of the actual retirement date.
Deferred vested termination	The account balance or actuarially equivalent annuity.
Disablement	Account balance is fully vested after 12 months of disability. Interest Credits granted until the account is paid out or an annuity payment is elected.
Preretirement death	Return of accumulated employee contributions (if any); or account balance or actuarially equivalent annuity payable to beneficiary. Paid regardless of Vesting Service accrued by the participant.

Other Plan Provisions

Forms of payment	<p>Normal form: 50% Joint and Survivor, if married; Life Annuity, if single.</p> <p>Optional forms: 66 2/3% Joint and Survivor, 75% Joint and Survivor, 100% Joint and Survivor, 10 Year Certain and Life, and Lump Sum.</p> <p>Actuarial equivalence for forms of payments other than lump sums is based on 7.00% interest and UP 1984 mortality table.</p> <p>Lump sum actuarial equivalence is based on IRC Section 417(e) mortality table for applicable year and the 417(e) interest rates for August preceding the plan year.</p>
Pension Increases	None.
Plan participants' contributions	None.
Maximum limits on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code.

Future Plan Changes

Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Changes in Benefits Valued Since Prior Year

There have been no changes in benefits valued since the prior year.
