Note 1 - Plan Description

The following description of Anderson Concrete Corp. Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering all full-time employees of Anderson Concrete Corp. (the "Company") hired prior to December 31, 2005. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective December 31, 2005, participation in the Plan was frozen. Effective December 31, 2010, benefits under the Plan were frozen. No additional participants will be enrolled in the Plan, and no additional benefits will be accrued.

In June, 2017, the Company proceeded to annuitize all participant benefits with a monthly payment of less than \$750 a month, or approximately 48 percent of participants in the Plan. On December 14, 2017, the Company resolved to terminate the Plan in 2018. See Note 5 for additional information. The following is a description of the Plan prior to termination.

Plan Operations

The Company is the sponsor of the Plan. The administrative committee, as provided in the plan agreement, is the plan administrator and has responsibility for the administration of the Plan.

Under a trust agreement, Matrix Trust Company (the "Trustee") was appointed trustee of the Plan. In accordance with the powers and duties of the Trustee, as designated by the Company, the Trustee administers the Plan in accordance with the orders of the plan committee and invests the Plan's assets and the income therefrom, as directed by the Plan's investment manager. Certain administrative fees incurred in administering the Plan are paid from the assets of the Plan.

Pension Benefits

The Plan provides for payment of normal retirement, early retirement, disability retirement, and death benefits to its participants. Normal retirement benefits commence at age 62. Participants may elect to retire early following the attainment of age 57.

The normal retirement pension for nonunion employees is a monthly life annuity composed of 1/12 of the following: for services through December 31, 1989, 0.9 percent of final average compensation as of December 31, 1989, plus 0.5 percent of excess of the December 31, 1989 final average compensation over the 1989 Social Security-covered compensation, both multiplied by the credited service through December 31, 1989; plus, for each year after January 1, 1990, 1.0 percent of each year's compensation, plus (up to 35 years of total service) 0.5 percent of the excess of each year's compensation over that year's covered compensation.

The normal retirement pension for union employees is a monthly life annuity equal to the following: \$45 multiplied by the participant's number of years of benefit service to 25 years. Effective May 16, 2002, for any participant who accrues an hour of service on or after such date, \$50 multiplied by the participant's number of years of benefit service plus \$20 multiplied by the participant's number of years of benefit service in excess of 25 years, but no more than 30 years, minus the monthly benefit actually payable under a related plan.

Each former participant or beneficiary of a former participant who is receiving benefits and each participant who is eligible to receive a monthly normal retirement benefit under the Plan as of September 1, 1987 or March 1, 1989 shall have his or her monthly benefit amount increased by 10 percent, effective for such monthly benefit payments on and after September 1, 1987 or March 1, 1989, respectively.

December 31, 2017 and 2016

Note 1 - Plan Description (Continued)

Nonunion and union employees may elect to receive their monthly pension benefits in one of the following forms:

Nonunion

- Straight-life annuity
- Joint and survivor annuity (50 percent, 66-2/3 percent, or 100 percent)
- Certain and life annuity over a 120-month period
- Lump sum as long, as the present value of the accrued benefit exceeds \$5,000, but is not greater than \$15,000

Union

- Straight-life annuity
- Joint and survivor annuity (50 percent)
- Lump sum as long, as the present value of the accrued benefit exceeds \$5,000, but is not greater than \$15,000

Death and Disability Benefits

Death benefits are paid to a union and nonunion vested participant's beneficiary in accordance with the benefit option chosen if a joint and survivor or certain annuity option is elected. A union participant who becomes totally and permanently disabled after completing 10 years of vesting service and who has not previously commenced receipt of benefits from the Plan or the Central States Plan at any time may retire and receive a monthly disability retirement benefit of \$250 less the benefit actually payable from the Central States Plan. The disability benefit shall cease at the end of the month in which the participant reaches age 62, dies, or recovers from total and permanent disability, whichever comes first. In lieu of the monthly disability retirement benefit, a union participant who has completed 10 years of vesting service and who has attained at least age 45 at the time of disability may elect to receive one lump-sum cash payment of \$3,000 less the benefit actually payable from the Central States Plan.

Funding

Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

As discussed in 5 to the financial statements, on December 14, 2017 the plan sponsor resolved to terminate the Plan in 2018. As a result, the Plan changed its basis of accounting for periods subsequent to December 31, 2016 from the going-concern basis to the liquidation basis.

Under the liquidation basis of accounting, assets are measured to reflect the estimated amount of cash expected to be collected in settling or disposing of the assets during the liquidation process, and liabilities are measured using the accrual basis of accounting and would include any expected costs of the disposal of assets and other costs expected to be incurred during the liquidation process.

Investment Valuation

The Plan's investments are stated at fair value.

December 31, 2017 and 2016**Note 2 - Summary of Significant Accounting Policies (Continued)**

The common collective trust fund is valued at net asset value per share or its equivalent of the fund, which is based on the fair value of the fund's underlying assets. There are no redemption restrictions or unfunded commitments on this investment. The money market fund is valued at fair value based on its outstanding balance. All other investments are valued based on quoted market prices reported in active markets. See Note 7 for additional information.

Benefit Payments

Benefits are recorded when paid.

Administrative Expenses

Various administrative costs are paid by the Company. Administrative expenses directly related to the investments of the Plan are paid by the Plan, except to the extent paid directly by the Company.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to:

- (a) Retired or terminated employees or their beneficiaries
- (b) Beneficiaries of employees who have died
- (c) Present employees or their beneficiaries

Benefits are calculated based on active employees' credited years of service for union employees and employees' final average compensation multiplied by years of benefit service for nonunion employees. Benefits payable under all circumstances (retirement, death, disability, and termination) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Benefits provided via annuity contracts are deducted from plan assets and from accumulated plan benefits.

As discussed in Note 5, the plan sponsor has submitted an application for IRS approval of the Plan termination in 2018. The effect of the termination is not reflected in the December 31, 2017 valuation.

Actuarial Assumptions

The actuarial present value of accumulated plan benefits is determined by an actuary from Findley Davies Consultants and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at December 31, 2017 and 2016 are summarized as follows:

Investment return	8.00 percent per year, compounded annually for December 31, 2017 and 2016
Mortality	The RP-2014 Mortality Tables projected back to 2007 using the MP-2014 projection scale, then projected forward generationally using a modification of the MP-2014 scale. The long-term improvement scale percentages are 0.8 percent for all ages until age 85, then grade linearly to 0.0 percent at age 105. The select period uses the MP-2014 scale for 2007 and converges linearly to the long-term scale over 10 years, reaching the ultimate scale in 2017
Withdrawal	The Actuary's Pension Handbook, Table T-3 without GA51 mortality

December 31, 2017 and 2016**Note 2 - Summary of Significant Accounting Policies (Continued)**

As described in Note 5, the Plan was approved for termination on December 14, 2017. The foregoing actuarial assumptions herein have not been updated to reflect the effects of the termination. As such, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Risks and Uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including October 5, 2018, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Information

Matrix Trust Company (the "Trustee") holds the Plan's investments and executes all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements, supplemental schedule of assets held at end of year in liquidation, and schedule of reportable transactions in liquidation are based solely on information certified by the Trustee.

Note 4 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries. The calculations of the postretirement benefit obligation attributable to participants in the Plan, which were made as of and for the years ended December 31, 2017 and 2016, the most recent actuarial valuations, are as follows:

	Year Ended December 31	
	2017	2016
	(In Liquidation)	(Ongoing)
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Active and terminated vested participants	\$ 4,599,634	\$ 4,288,477
Retired participants and beneficiaries	7,838,981	12,729,002
Total vested benefits	12,438,615	17,017,479
Nonvested benefits	41,692	39,165
Total actuarial present value of accumulated plan benefits	\$ 12,480,307	\$ 17,056,644

December 31, 2017 and 2016

Note 4 - Accumulated Plan Benefits (Continued)

	Year Ended December 31	
	2017	2016
	(In Liquidation)	(Ongoing)
Actuarial present value of accumulated plan benefits - Beginning of year	\$ 17,056,644	\$ 17,542,212
Increase (decrease) during the year attributable to:		
Benefits accumulated	1,794,923	342,849
Increase for interest due to the decrease in the discount period	1,072,612	1,319,128
Benefits paid	(1,332,761)	(2,147,545)
Purchase of annuity contracts	(6,111,111)	-
Net decrease	(4,576,337)	(485,568)
Total benefit obligations at end of year	\$ 12,480,307	\$ 17,056,644

In June, 2017, the Company proceeded to annuitize all participant benefits with a monthly payment of less than \$750 a month. The Company signed a Nonparticipating Single-Premium Group Annuity Contract with a third-party insurance provider. Under the contract, the third-party insurance provider will take over the liability assumption for 115 of the 242 participants beginning on June 22, 2017. The premium for this was \$6,111,111, which is reported in the accompanying statement of changes in net assets in liquidation.

The effect of the termination outlined within Note 5 is not reflected in the December 31, 2017 actuarial valuation.

Note 5 - Termination

On December 14, 2017, the Company resolved to terminate the Plan in 2018 in accordance with the PBGC provisions and reporting requirements. The net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations. As of the effective date of the termination, participants are 100 percent vested in plan benefits.

On March 23, 2018, the Company filed an application for approval from the IRS for termination of the Plan. As of the report date, IRS approval of the termination has not been obtained.

During 2018, the Company performed lump-sum buyouts or purchased annuity contracts for its remaining participants. The premium of the contract is approximately \$11,600,000. The remaining liability for the annuities transfers effective October 1, 2018.

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, management believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Note 7 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

December 31, 2017 and 2016

Note 7 - Fair Value Measurements (Continued)

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2017 and 2016.

Level 1

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels of the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

***Assumptions Made In
Valuing Spouse's
Benefit***

100% of the employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband

***Optional Form
Election***

All employees are assumed to elect the normal form of benefit.

Provision for Expenses

Administrative expenses will be paid by the employer.

Standing Elections

The client has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.

Asset Method

Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
