Notes to Financial Statements For the year ended December 31, 2017 and 2016

Note 1 - **Description of Plan**

The description of the Plan presented here is general information. To obtain a more complete description of the Plan's provisions, refer to the Plan Document. The Plan is subject to ERISA.

Vorys, Sater, Seymour and Pease, LLP ("Vorys") has established the Vorys, Sater, Seymour and Pease LLP Cash Balance Pension Plan (the "Plan") for the benefit of its eligible participants, effective on and after January 1, 2013. The Plan involved covers all Partners and is a defined benefit plan.

A Partner will commence participation in the Plan on the first day of the applicable Plan Year. However, an individual who becomes a Partner after the first day of a calendar year will be eligible to participate in the Plan on the first day that he or she becomes a Partner.

Vorys credits each Partner's Cash Balance Account with Employer Credits at the end of each Determination Period during which the Partner completes 1,000 hours of service. For purposes of determining whether the Partner has satisfied this service requirement, they will be credited with one hundred ninety (190) hours of service for each month or partial month of service with Vorys. The amount of the Employer Credits will be determined separately for each Partner.

Prior to August 1, 2015, each Cash Balance Account was credited at the end of each Determination Period with an Interest Credit, at an annualized interest rate of 2.25%. Each Interest Credit was calculated by multiplying the balance of each Cash Balance Account as of the first day of the Determination Period by the interest rate of 2.25% for the Determination Period. Effective, August 1, 2015, the Interest Rate credit was amended to be the rate of return on Plan assets not to exceed 7% per annum. Upon distribution from the Plan, the cumulative Interest Credit will not be less than 0%.

Interest Credits will cease to be credited to any Cash Balance Account to the extent that it has been paid to the Partner or converted into an annuity. If an amendment changes the interest rate used for Interest Credits from an "old rate" to a "new rate," the old rate is generally a minimum rate for Employer Credits that have already accrued as of the amendment date.

Cash Balance Accounts are 100% vested and non-forfeitable at all times.

Note 1 - **Description of Plan (Continued)**

The Custodians hold the assets of the Plan for the benefit of plan participants, and direct the investment of the plan assets in accordance with the Trust Agreement. The Custodians may employ one or more investment managers to assist it in the performance of its duties. The assets of the trust will be valued as of December 31 of each Plan Year, and at such other dates as determined by the Plan Administrator.

Vorys may amend, terminate or merge the Plan at any time. However, no such action may permit any part of Plan assets to be used for any purpose other than the exclusive benefit of participants and beneficiaries and to defray the reasonable expenses of the Plan.

Upon complete termination of the Plan, the Plan Administrator will pay benefits to participants and their beneficiaries in the priorities and according to the categories required by applicable law. Any assets remaining in the Trust Fund after distributing the funds to participants will revert to Vorys.

Participants are eligible for annual pension benefits once they have attained the normal retirement age of 62. The annual pension benefit is the actuarial equivalent of the participant's Cash Balance Account as of the benefit commencement date, but not to exceed the maximum pension benefit payable under Internal Revenue Code Section 415.

The normal form of benefit is a single life annuity for participants who are not married, and a qualified joint and 50% survivor annuity for married participants. Under the single life annuity, the participant receives the aforementioned annual benefits for their lifetime, ceasing upon death. Under the qualified joint and 50% survivor annuity, the participant receives the aforementioned annual benefits for their lifetime. Upon death of the participant, the surviving beneficiary receives 50% of the participant's benefit for their lifetime, ceasing upon the surviving beneficiary's death. The participant may also elect other optional forms of benefit including a joint and survivor annuity (naming any other dependent or related person as beneficiary, rather than the spouse) or lump sum distribution.

If a vested participant dies prior to receiving retirement benefits, a death benefit equal to the value of the participant's accumulated pension benefits is paid to the employee's surviving spouse or beneficiary.

Note 2 - Summary of Significant Accounting Policies

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions at the valuation date. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable are included to the extent they are deemed attributable to employee or beneficiary at the valuation date. Benefits payable under the Plan are calculated as described in Note 1.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2017 and 2016 were as follows:

- Life Expectancy – the IRS 2017 Small Plan Combined Statistic Mortality Table, as prescribed by Treasury regulation section 1.430(h)(3)-1(b) was used
- Retirement Age Assumptions – the weighted average retirement age for the population was calculated to be 65, while the Plan's Normal Retirement Age is 62. The economic value of the cash balance benefits is not materially affected by the timing of the benefit commencement. Therefore, no pre-retirement withdrawal or disability was assumed.
- Investment Return

The interest rates used to discount the obligation for 2017 and 2016 were 5.16% and 5.31%, respectively, which represent the Internal Revenue Service's published Funding Yield Curve Segment Rates, adjusted by the Highway and Transportation Funding Act of 2014. The foregoing actuarial assumptions are based on the assumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. For the years ended December 31, 2017 and 2016, the computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2018 and 2017, respectively. Had the valuations been performed at December 31, 2017 and 2016, there would be no material differences.

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Notes to Financial Statements (Continued)
For the year ended December 31, 2017 and 2016

Note 2 - Summary of Significant Accounting Policies (Continued)

Investments

Investments are stated at fair market value as determined by the custodian at the end of the year. Purchases and sales of securities are recorded on the settlement date. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures, and actual results may differ from those estimates. It is reasonably possible that a significant change may occur in the near term for the estimates of investment valuation and actuarial present value of accumulated plan benefits.

Note 3 – Funding Policy

Vorys' funding policy is to make annual contributions to the Plan in amounts that are sufficient to satisfy the minimum funding requirements of the Internal Revenue Code. Since the inception of the Plan, Vorys has made contributions to the Plan equal to the employer credits owed to a Participant under the Plan. Effective January 1, 2017, employer credits are calculated using a formula which multiplies a contribution amount by each Partner's target points and adjusts the product for age. Target points are determined by the Management Committee each year and are based on each Partner's hypothetical budgeted profits interest in the Firm for the Plan Year. Prior to January 1, 2017, employer credits were based on contribution amounts established by the Management Committee.

Note 4 – Tax Status

The Internal Revenue Service has determined and informed Vorys by a letter dated May 18, 2017, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code, IRC. The Plan administrator believes that the Plan continues to be operated in compliance with the applicable requirements of the IRC.

Note 5 – Investments

Accounting guidance establishes a fair value hierarchy that prioritizes the input used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy defined by accounting guidance are as follows:

- Level 1 Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those where transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 assets include equity securities, mutual funds and money market funds that are listed on active exchanges.
- Level 2 Pricing inputs are either directly or indirectly observable in the market as of the reporting date, other than quoted prices in active markets included in Level 1. Additionally, Level 2 includes those financial instruments that are valued using models or other valuation methodologies based on assumptions that are observable in the market place throughout the full term of the instrument, can be derived from observable data or are supported by observable levels at which transactions are executed in the market place. These models are primarily industry-standard models that consider various assumptions, including quoted forward prices for commodities, time value, volatility factors and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Assets in this category include investments in debt securities.
- Level 3 Pricing inputs include inputs that are generally less observable from objective sources. These inputs may be used with internally developed methodologies that results in management's best estimate of fair value in addition to the use of independent appraisers' estimates of fair value on a periodic basis typically determined quarterly, but no less than annually. Assets in this category include investments in hedge funds.

The December 31, 2017 financial statements and the accompanying schedule of assets were prepared entirely from information certified by the Custodians in accordance with 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The information certified includes total investments of \$19,178,159 and \$17,255,514 as of December 31, 2017 and 2016, respectively. The information certified also includes net investment-related gain of \$1,139,936 for the year ended December 31, 2017 and net investment-related gains of \$676,152 for the year ended December 31, 2016.

Note 7 – Plan Termination

Although it has not expressed any intention to do so, Vorys has the right under the Plan to discontinue its contributions and terminate the Plan, subject to the provisions of ERISA and its related regulations. In the event the Plan terminates, the net assets of the Plan will be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations.

Whether the participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

Note 8 – Contribution

In accordance with the stated funding policy, Vorys made commitments to contribute to the plan \$4,244,786 and \$5,184,950 in 2017 and 2016, respectively. Vorys made the 2017 and 2016 funding before December 31, and accordingly, no amounts are reported as receivable to the Plan at December 31, 2017 and 2016.

Note 9 – Reconciliation of Financial Statements to the Form 5500

There are no reconciling items between the net assets available for benefits or changes in net assets available for benefits as reported on the financial statements and the Form 5500 for the years ended December 31, 2017 and 2016.

For the year ended December 31, 2017 and 2016, the plan paid fees totaling \$141,456 and \$146,439, respectively, detailed as follows:

<u>Party</u>	<u>Position</u>	<u>2017</u>	<u>2016</u>
Charles Schwab	Custodian	\$7,636	\$6,630

As described in Note 1, The Sponsor may pay certain administrative fees on behalf of the Plan, however the Sponsor did not pay any fees on behalf of the plan for the years ended December 31, 2017 or 2016. Only fees that are paid directly by the Plan are included in management fees on the statements of changes in net assets available for benefits.

Plan Sponsor Elections

Yield curve election: The plan sponsor did not elect to use the full yield curve under IRC section 430(h)(2)(D)(ii).

Applicable month: The plan sponsor elected to base the segment rates on the rates published in the month containing the valuation date.

Economic Assumptions

First segment rate (years 0 to 4):	4.16%
Second segment rate (years 5 to 19):	5.72%
Third segment rate (years 20 and after):	6.48%
Effective interest rate (current year):	5.31%
First segment rate (years 0 to 4), without stabilization:	1.57%
Second segment rate (years 5 to 19), without stabilization:	3.77%
Third segment rate (years 20 and after), without stabilization:	4.73%
Effective interest rate, without stabilization (current year):	3.27%
Interest crediting rate:	3.00%

The interest rates listed above are compounded annually.

The cash balance interest crediting rate is equal to the rate of return on plan assets, subject to cumulative minimum and maximum interest crediting rates. Accordingly, the assets needed to provide future cash balance benefits are independent of interest rates and only dependent on the plan's asset allocation to the extent that the cumulative minimum or maximum interest rates affect the cash balance accounts. This plan provision is difficult to measure using traditional deterministic valuation procedures. To account for this plan provision, the interest crediting rate was selected from a reasonable range based on the plan's asset allocation that when combined with the segment interest rates produced a funding target that was as close as possible to the economic value of the cash balance accounts.

Demographic Assumptions

Retirement

Participants are assumed to retire in accordance with the rates in the table below, but not earlier than one year from the valuation date.

<u>Attained Age</u>	<u>Rates of Retirement</u>
<=61	0%
62-64	10%
65-67	50%
68	100%

Weighted average retirement age

The weighted average retirement age for the population during the current year, rounded to the nearest whole number, is 65.

Withdrawal

None.

Disability

None.

Rationale for retirement age, withdrawal and disability assumptions

The economic value of the cash balance benefits is not materially affected by the timing of benefit commencement. Therefore, no preretirement withdrawal or disability is assumed. The retirement rate assumption was set consistent with historical and anticipated plan experience.

Mortality and mortality improvement

The mortality follows the IRS 2017 Small Plan Combined Static Mortality Table, as prescribed by Treasury regulation section 1.430(h)(3)-1(b).

Decrement timing

Decrements are assumed to occur as of the beginning of the year.

Other Assumptions

Form of payment

All participants are assumed to elect a lump sum form of payment. The past experience of the plan has been that all participants have elected this form of payment.

Maximum earnings

The maximum compensation limit under IRC section 401(a)(17) is \$270,000 for 2017.

Maximum benefit

The maximum benefit payable under IRC section 415 is \$215,000 for 2017.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

Other Assumptions Continued

Expenses

Assumed expenses are \$135,000 for 2017, based on expected plan experience. In accordance with our understanding of the available guidance, the expense assumption reflects administrative expenses and does not include investment-related expenses or any other non-administrative expense.

Changes from Prior Year and Rationale for Changes

None.

Actuarial Methods

Valuation date

The valuation date is January 1, 2017.

Actuarial value of assets

The actuarial value of assets is equal to the market value of assets.

Minimum funding method

The funding target and target normal cost for minimum funding calculations are determined using the traditional unit credit cost method as prescribed by Treasury regulation section 1.430(d)-1. The liability under the unit credit cost method is the value of the accrued pension benefit using service and pay as of the valuation date. The sum of the present value of the accrued benefits for all participants is the ERISA funding target. The normal cost is the present value of the benefits earned during the year. The target normal cost is the sum of the normal costs for all participants and the assumed administrative expenses.

Changes in Method from Prior Year and Rationale for Changes

None.
