OF CANTON DROP FORGE, INC.

NOTES TO FINANCIAL STATEMENTS

1. Description of the Plan

The following brief description of the Pension Plan for Certain Hourly-Rated Employees of Canton Drop Forge, Inc. is provided for general information purposes only. Participants should refer to the plan agreement for more complete information.

The Pension Plan for Certain Hourly-Rated Employees of Canton Drop Forge, Inc. (Plan) is a defined benefit pension plan established to provide for retirement, death and disability benefits for hourly employees of Canton Drop Forge, Inc. (Company) who were hired before February 27, 2005.

During 2016, the Plan changed Trustees from JPMorgan Chase Bank, N.A. to Huntington National Bank.

The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to Plan participants. The Company's present intention is to make contributions in amounts sufficient to annually fund the Plan's current service cost and the prior service costs over a period not to exceed forty years. The Plan has met the Employee Retirement Income Security Act (ERISA) minimum funding requirements.

Should the Plan terminate at some future time, its net assets will generally not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC's benefit guarantee while other benefits may not be provided for at all.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 8 for a discussion of fair value measurements.

2. Summary of Significant Accounting Policies (continued)

Investment Valuation and Income Recognition (continued)

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Benefit Payments

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to present and terminated employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on their years of credited service.

An independent actuary from Findley Davies estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of January 1, 2017 and 2016, are as follows:

- | | | |
|----|------------|---|
| a. | Mortality: | RP-2014 Blue Collar Mortality adjusted backwards to 2006 using MP-2014 and projected using MP-2016 for the January 1, 2017 valuation and MP-2015 for the January 1, 2016 valuation. |
|----|------------|---|

OF CANTON DROP FORGE, INC.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

2. Summary of Significant Accounting Policies (continued)

Actuarial Present Value of Accumulated Plan Benefits (continued)

- b. Interest rate for present value of vested and accumulated benefits is 7.5% for the January 1, 2017 and January 1, 2016 valuations.
- c. Normal retirement: Attainment of age 65 or age 55 with 30 years of credited service or age 60 with 25 years of credited service.
- d. Early retirement: Attainment of age 60 with 15 years of credited service.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. In addition, certain investment related expenses are included in the net appreciation of fair value of investments presented in the accompanying statements of changes in net assets available for benefits.

Subsequent Events

The Plan has evaluated subsequent events through October 12, 2018, which is the date the financial statements were available to be issued.

As of January 31, 2018, the plan sponsor was purchased by another corporation. At time of issuance of the report, the corporation has taken no formal action with respect to this plan.

3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits for each plan year determined as of January 1 is as follows:

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

The changes in the actuarial present value of accumulated plan benefits during the years ended January 1 are as follows:

4. Unaudited Information

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustees have certified to the completeness and accuracy of all investments reflected on the Statements of Net Assets Available for Benefits as of December 31, 2017 and 2016, the Schedule of Assets (Held at End of Year), the related investment activity reflected in the Statements of Changes in Net Assets Available for Benefits and the Schedule of Reportable Transactions for the years ended December 31, 2017 and 2016 and the investment related information in the accompanying notes to the financial statements. This information is unaudited by independent accountants.

5. Income Tax Status

The Internal Revenue Service has determined that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC; therefore, no provision for income taxes has been included in the financial statements.

The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2017, there are no uncertain positions taken or expected to be taken that would require such recognition or disclosure in the financial statements.

6. Party-in-Interest Transactions

Plan investments held at December 31, 2017 and 2016 included an investment fund offered by Harris Associates. Harris Associates is an investment manager for the Plan. Fees paid or accrued by the Plan for these management services amounted to \$30,980 and \$21,290 for the years ended December 31, 2017 and 2016, respectively.

PENSION PLAN FOR CERTAIN HOURLY-RATED EMPLOYEES
OF CANTON DROP FORGE, INC.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

6. Party-in-Interest Transactions (continued)

Certain Plan investments held at January 1, 2016 and through a portion of 2016 were equity shares of JPMorgan Chase Bank, N.A. (JPMorgan) and money market funds and mutual funds offered by JPMorgan, the Trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for the Trustee amounted to \$8,784 for the year ended December 31, 2016.

7. Plan Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. Fair Value Measurements

The Plan estimates the fair value of financial instruments using available market information and other generally accepted valuation methodologies. The inputs used to measure fair value are classified into three levels:

- Level 1 – Quoted market prices in active markets for identical assets and liabilities
- Level 2 – Observable market-based inputs or unobservable inputs that are corroborated by market data
- Level 3 – Unobservable inputs in which little or no market data exist

The following is a description of the valuation methodologies used for plan assets measured at fair value:

- Equities and fixed income obligations: Valued at the closing price reported on the active market on which the individual securities are traded. These investments are considered to be Level 1 assets.

PENSION PLAN FOR CERTAIN HOURLY-RATED EMPLOYEES
OF CANTON DROP FORGE, INC.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

8. Fair Value Measurements (continued)

- Money market funds: The money market funds are valued by Huntington National Bank at the underlying investments of short-term U.S. Treasury and government securities which have an observable market. These investments are considered to be Level 2.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. There have been no changes in the methodologies used from 2016 to 2017. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2017:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Money market funds	\$ -	\$ 918,149	\$ -	\$ 918,149

9. Purchase of Annuity Contract

During 2016, the Plan purchased an annuity contract for \$34,700 to pay monthly benefits of a retiree. This is related to the changes in the Plan started in 2015 to remove retirees from the Plan as of June 1, 2015. The retiree receives the same monthly benefit under the contract as he was receiving from the Plan.

	Before HAFTA/ MAP-21	Reflecting HAFTA/ MAP-21
a. First Rate, Years 1-5	1.57%	4.16%

Mortality

Funding: Healthy: RP-2000 static, non-generational Mortality Table as described in Regulation 1.430(h)(3) projected by Scale AA, male and female, with different rates for annuitants and nonannuitants.

Disabled: Disabled tables per Revenue Ruling 96-7 (male and female) and distinct for pre- and post- 1995 disablements. These are applied conditionally as specified in 96-7 which means that healthy mortality rates will be used for disableds unless the disabled retiree i) receives Social Security Disability Income and ii) receives extra benefits beyond those they could have elected without being disabled. 100% of retirees entitled to current and future disability benefits are assumed to be entitled to Social Security Disability Income. Employees projected to become disabled beyond age 65 are subject to the "healthy" mortality rates due to not receiving extra benefits due to disablement.

***Assumptions Made In
Valuing Spouse's
Benefit***

Sixty percent of the male and forty percent of the female employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

***Optional Form
Election***

All employees are assumed to elect the life annuity benefit.

Provision for Expenses

The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual administrative expenses during the prior year plus PBGC premiums for the current year, were included in the Target Normal Cost for minimum contribution purposes. Expenses were subtracted from the Expected Return on Assets for ASC 715-30 expense purposes.

Standing Elections

The client has signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.

Asset Method

Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.

Employees Valued

Only participants as of the valuation date were valued.

Selection of Assumptions

Information used in the analysis of selecting assumptions include: expected return on assets – review of historical and expected returns on various asset categories held by the plan as well as information provided by the plan's investment advisor.

The segment rates and mortality table used to determine minimum funding and funded ratios were based on methodology mandated by Internal Revenue Code and rates published by the Internal Revenue Service to affect it.

We monitor the gains and losses annually to ensure the assumptions are still reasonable.

Changes in Assumptions and Methods since the Last Actuarial Valuation

The segmented interest rates used for determining the funding target were 4.43%, 5.91% and 6.65%.

The mortality table for the funding target was changed as required under PPA '06.

Justification for Changes in Actuarial Assumptions

The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
