INDEPENDENT AUDITORS' REPORT

To the Plan Administrator, Participants and Beneficiaries
of the Foster Wheeler Inc. Salaried Employees Pension Plan

Report on the Financial Statements

We have audited the accompanying financial statements of the Foster Wheeler Inc. Salaried Employees Pension Plan (the "Plan"), which comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 2017 and 2016, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 2017, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements, in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of the Plan as of December 31, 2017 and 2016, and the changes in its financial status for the year ended December 31, 2017, in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As further discussed in Note 11 to the financial statements, the Fiduciary Committee of the Plan approved a resolution to spin off a portion of the Plan into a newly created plan effective January 1, 2018. Our opinion is not modified with respect to this matter.

Report on Supplemental Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets (held at end of year) as of December 31, 2017 and the supplemental schedule of reportable transactions for the year ended December 31, 2017, are presented for the purpose of additional analysis and are not a required part of the financial statements, but are supplemental information required by the U.S. Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Salaried Employees Pension Plan
Notes to Financial Statements
December 31, 2017 and 2016

1. Description of the Plan

The Foster Wheeler Inc. (the “Company”) Salaried Employees Pension Plan (the “Plan”) is a noncontributory defined benefit pension plan. The Company was a wholly-owned subsidiary of Foster Wheeler AG until Amec plc’s acquisition of Foster Wheeler AG in November 2014. The combined company was renamed Amec Foster Wheeler plc (“Amec Foster Wheeler”). Amec Foster Wheeler completed the acquisition of Foster Wheeler AG in January 2015 by effecting a squeeze-out merger under Swiss law. On October 9, 2017, John Wood Group PLC acquired Amec Foster Wheeler. The Company is now a wholly-owned subsidiary of John Wood Group PLC.

The following brief description of the Plan is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

Eligible employees of the Plan consist of substantially all salaried employees of many domestic subsidiaries of the Company hired prior to June 2003. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

The plan administrator is the Amec Foster Wheeler Fiduciary Committee (“AFWFC”), which determines the appropriateness of the investments including the allocation of Plan funds among various investment institutions and securities. Those investment institutions are responsible for determining the underlying investments, in accordance with guidelines set forth by the plan administrator.

The Plan provides benefits under a final pay feature (“FPF”). The FPF benefit is calculated as 1.2% of final average monthly earnings multiplied by service earned subsequent to April 1, 1976 and through May 31, 2003. Final average monthly earnings represent the average of the monthly earnings during the highest 60 consecutive months during the last 120 months prior to retirement or termination of employment.

Effective May 31, 2003, the Plan was frozen and Plan participants do not earn any future benefits under the terms of the Plan after that date. However, service will continue to be credited for purposes of determining eligibility for early retirement and vesting.

Effective January 1, 1999, the Company amended the Plan to provide for a cash balance formula for all employees who became eligible to participate in the Plan by virtue of a hire date after December 31, 1998. Furthermore, all active participants as of January 1, 1999 had a one-time irrevocable election to either participate under the existing FPF benefit formula or be covered under the new cash balance formula for benefit accruals after December 31, 1998. For those employees who elected the cash balance formula, the accrued benefit that they have earned through December 31, 1998, under the Plan, if any, will be preserved and paid from the Plan in accordance with the applicable Plan provisions. The balances of those participants who did not elect the cash balance formula were maintained under the existing FPF benefit formula.

Foster Wheeler Inc.
Salaried Employees Pension Plan
Notes to Financial Statements
December 31, 2017 and 2016

The cash balance formula provides a notional cash account which is increased each year by a contribution credit and an interest credit. For participants covered by the cash balance option, the contribution credit was equal to a percentage of the participant's earnings, as defined in the amended Plan, in accordance with stratified schedules based on the participant's age. Participants under the cash balance formula were not credited with contribution credits after May 31, 2003. The interest credit for the Plan year is equal to the 12 month average of the 30 Year Treasury Bond rate as declared by the Federal Reserve Board for the preceding calendar year, but in no event will the interest be credited at a rate less than 4.5%. The cash balance credit rate was 5.0% as of the most recent and prior year's actuarial valuations.

Eligibility and Vesting Service

Employees, who were hired prior to December 31, 1998, became participants in the Plan on the first day of the plan year following their date of employment. Employees, who were hired subsequent to December 31, 1998, became participants in the Plan on the 1st day of the month following their date of hire. Effective May 31, 2003, the Plan was frozen and closed to new entrants. Participants in the Plan without cash balance accounts are vested after completing five years of vesting service. Effective January 1, 2008, participants with cash balance accounts became vested after three years of vesting service. A year of vesting service is defined as a plan year during which at least 1,000 hours of service is credited. Participants who terminated before becoming fully vested forfeited the right to receive their accumulated benefits.

Pension, Disability and Death Benefits

The Plan permits early retirement at ages 55 to 64 with ten years of credited service. The early retirement benefit may begin at the date of early retirement, reduced by 3% for each of the first five years and 5% for each additional year by which the early retirement date precedes the normal retirement date. All participants may elect to receive their pension benefits in the form of a joint and survivor annuity or a life annuity payable monthly from the date of retirement. If any vested participant dies prior to the date their pension payments commence, the surviving spouse of that deceased vested participant receives benefits at least equal to the amount which would have been payable to the spouse under a 50% joint and survivor annuity. Under the life annuity, there are no continuing payments after the death of the retiree.

Vested participants, who have completed ten or more years of credited service and whose employment has terminated due to a permanent disability shall be entitled to an immediate retirement benefit commencing as of the first day of the following month in an amount equal to 50% of the normal retirement benefits they have accumulated under the Plan as of the time they became disabled. If these participants are terminated before rendering five years of service, they forfeit the right to receive their accumulated benefits. Disability benefits are paid until normal retirement age, at which time disabled participants begin receiving normal retirement benefits under the Plan.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis in conformity with accounting principles generally accepted in the United States of America.

Foster Wheeler Inc.
Salaried Employees Pension Plan
Notes to Financial Statements
December 31, 2017 and 2016

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The AFWFC determines the Plan's valuation policies utilizing information provided by its custodians, investment advisors and investment managers. See Note 5 for a discussion of fair value measurement.

Purchases and sales of securities are recorded on a trade-date basis. Interest and other income are recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in the value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the Plan document. Expenses that are paid directly by the Company are excluded from the Plan's financial statements. Certain expenses incurred in connection with the general administration of the Plan such as actuarial, investment management, custodial, auditing, and Pension Benefit Guaranty Corp. ("PBGC") fees are paid by the Plan and are recorded as deductions in the accompanying Statement of Changes in Net Assets Available for Benefits. In addition, certain investment related expenses are included in net depreciation of fair value of investments presented in the accompanying Statement of Changes in Net Assets Available for Benefits.

Benefit Payments

Benefits payments are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make significant actuarial estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and when applicable, disclosures of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Subsequent Events

The Company evaluated subsequent events through October 12, 2018, which is the date the financial statements were available to be issued.

3. Risk and Uncertainties

Investments are exposed to various risks, such as interest rate, market and credit risks. Due to the level of uncertainty related to certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are prepared based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimates and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Notes to Financial Statements
December 31, 2017 and 2016

Volatility in the financial markets may significantly impact the subsequent valuation of the Plan's investments. Accordingly, the valuation of investments at December 31, 2017 may not necessarily be indicative of amounts that could be realized in a current market exchange.

4. Contributions and Benefits

Funding Policy

The Company's funding policy is to comply with the minimum funding requirements defined by ERISA. The Company has met the minimum funding requirement defined by ERISA for the plan year ended December 31, 2017.

A carryover amount totaling \$8,486,754 was applied to the minimum required contribution for the plan year ended December 31, 2017.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service which participants have rendered to date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability or termination of employment – are included to the extent they are deemed attributable to participant service rendered to the valuation date. The actuarial present value of accumulated plan benefits is determined by the Plan's credentialed independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected dates of payment.

For participants who elected the cash balance formula, the accumulated plan benefit for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date.

The significant actuarial assumptions used in the valuations for the plan years ending December 31, 2017 and 2016 were as follows

Mortality Basis	Adjusted Generational RP-2014 Separate Annuitant and Non-Annuitant Mortality Tables, projected with Scale MMP-2016 for the plan year ended December 31, 2017
	Adjusted Generational RP-2014 Separate Annuitant and Non-Annuitant Mortality Tables, projected with Scale MMP-2016 for the plan year ended December 31, 2016
Discount Rate	4.6% and 5.7% for the years ended December 31, 2017 and 2016, respectively.
Retirement	Stratified between the ages of 55 and 70

The foregoing actuarial assumptions are based on the presumption that the Plan will not terminate. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The computation of the actuarial present value of accumulated plan benefits were made as of December 31, 2017 for the 2017 Plan year. The computation of the actuarial present value of accumulated plan benefits were made as of January 1, 2017 for the 2016 Plan year. Had the valuation been performed as of December 31, 2016 there would be no material difference.

Effective January 1, 2018, the Foster Wheeler Inc. Pension Plan for Certain Employees ("Certain Plan") was created by spinning out certain participants from the Foster Wheeler Inc. Salaried Employees Pension Plan ("Salaried Plan"). See Note 11 for further details.

5. Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for investment assets measured at fair value. There have been no changes in the methodologies used at December 31, 2017 and 2016.

Notes to Financial Statements
December 31, 2017 and 2016

U.S. Treasury Notes/Bonds. The Plan invests in publicly traded U.S. government treasury notes and bonds. The value of the U.S. treasury notes and bonds incorporates observable market data and considers the coupon rate and time to maturity.

Mutual Funds. The Plan invests in mutual funds that invest in equity securities. Mutual funds are valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-ended mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value ("NAV") and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Commingled Funds. The Plan invests in various commingled investment funds, representing assets in trusts and limited partnerships which are exempt from federal income taxation under the Internal Revenue Code, and are primarily designed for pension, profit sharing and other employee benefit plans. Shares or units in these funds are valued at their NAV. The NAV as provided by the investment manager or sponsor of the fund is used as a practical expedient to estimate the fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the Plan will sell the investment for an amount different than the reported NAV. Participant transactions (such as purchases and sales) may occur daily.

Hedge Funds. The Plan invests in hedge funds of derivative contracts and multi-strategy "fund-of-funds" formed to invest predominantly in limited partnerships and similar pooled investment vehicles. Shares or units in these funds are valued at their NAV. The NAV as provided by the investment manager or sponsor of the fund is used as a practical expedient to estimate the fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the Plan will sell the investment for an amount different than the reported NAV. Participant transactions (such as purchases and sales) may occur quarterly.

Futures Contracts. Futures contracts were valued at the quoted daily settlement price at the end of each day on the board of trade or when traded. Upon entering into a futures contract, the Plan was required to deposit in cash an amount equal to the initial margin requirements of the exchange. At December 31, 2016 \$3,683,800 was pledged to meet margin requirements. Pursuant to the futures contracts, the Plan received from or paid to the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments were settled daily and the Plan recognized a realized gain or loss when a contract was closed or expired.

Futures contracts involve, to varying degrees, credit and market risks. The Plan entered into futures contracts only on exchanges or boards of trade where the exchange or board of trade acts as the counterparty to the transaction. Thus, credit risk on such transactions was limited to the failure of the exchange or board of trade. Losses in value could have arisen from changes in the value of the underlying instruments or if there was an illiquid secondary market for the contracts. In addition, there was the risk that there may not have been an exact correlation between a futures contract and the underlying index or security.

Effective March 22, 2017 the notional value of all open future contracts in the plan was terminated. The plan does not hold any future contracts since March 22, 2017.

Foster Wheeler Inc.
Salaried Employees Pension Plan
Notes to Financial Statements
December 31, 2017 and 2016

As of December 31, 2016, the notional value of open futures contracts totaled \$83,062,910, with a fair value totaling \$82,437,155, and the Plan had an unrealized loss on these open stock index risk futures totaling \$625,755. The unrealized loss is included in the liability margin account for futures contracts. The futures contracts gain for the year 2016 was \$1,212,210.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's investment assets and liabilities at fair value as of December 31, 2017 and 2016, respectively:

Investment Assets at Fair Value as of December 31, 2017

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in the economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

The following table summarizes investments measured at fair value based on NAV per share as of December 31, 2017:

	<u>Fair Value</u>	<u>Unfunded Commitments</u>	<u>Redemption Frequency (if currently eligible)</u>	<u>Redemption Notice Period</u>
Commingled funds:

Hedge funds:				
Multi-strategy fund of funds ⁽³⁾	\$ 27,438,803	N/A	Quarterly – 2 Year lock-up with Semi Annual Redemption	65 - 105 Days

- (1) The funds invest in mortgage related securities, public and private high-yield non-investment grade and non-rated debt securities and collective investment funds. Additionally, an investment in distressed Asia Pacific debt and equity securities totaling \$935,224 as of December 31, 2017 is redeemable after the expiration of a 48-month lock-up period. Finally, an investment in senior secured loans to middle market companies or other issuers totaling \$1,330,011 as of December 31, 2017 has a further capital call totaling \$529,434 and this investment is redeemable after the expiration of a 36-month lock-up period.
- (2) The fund invests in obligations, issued or guaranteed by the U.S. government or its agencies or instrumentalities, in repurchase agreements collateralized by U.S. government securities and in money market mutual funds and other investment pools.
- (3) The fund invests in private investments (i.e., fund of funds invested in equities and fixed income markets) that employ a variety of investment techniques and strategies.

6. Tax Status

The Internal Revenue Service (“IRS”) has determined and informed the Company by a letter dated February 4, 2016 that the Plan is qualified under the Internal Revenue Code (“IRC”) and therefore the related trust is exempt from taxation. The Plan has been amended since receiving the tax determination letter. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and therefore, believes that the Plan is qualified, and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by a government authority. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2017 and 2016, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine examinations by taxing jurisdictions; however, there are currently no examinations for any tax periods in progress.

Several of the Plan’s investments are incorporated as either a Cayman Island exempted limited company or a Cayman Island exempted limited partnership. Plan management ensures compliance with the foreign tax filing requirements related to these investments.

7. Related Party and Party In Interest Transactions

For the year ended December 31, 2017, total fees of \$879,443 were paid by the Plan to parties in interest for trustee, advisory, investment management, actuarial, recordkeeping, and audit services.

8. Termination Priorities

Although it has not expressed any intent to do so, in the event of termination, the Plan provides that the net assets be allocated among the participants and beneficiaries of the Plan in the order provided for in ERISA and its related regulations and, to the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation to participants, up to specified limitations, as described in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding Plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation.
- c. All other vested benefits (that is, vested benefits not insured by the PBGC).
- d. All nonvested benefits.

Foster Wheeler Inc.
Salaried Employees Pension Plan
Notes to Financial Statements
December 31, 2017 and 2016

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. The maximum guarantee is set by law and it is updated each calendar year. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. A statutory ceiling exists, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2017, that ceiling is \$5,369 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). The amount is higher for those who retire later and lower for those that retire earlier or elect survivor benefits. Further limitations apply for plans created or amended to increase benefits within five years before the Plan's termination date. The PBGC guarantees the largest of 20% of the benefit increase or \$20 per month for each full year the benefit increase was in effect.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

9. Adjusted Funding Target Attainment Percentage ("AFTAP")

The Pension Protection Act (the "Act") of 2006 includes many provisions and numerous revisions to rules surrounding defined benefit plans that govern pension plan funding. The Act established new minimum funding standards for defined benefit plans and limits benefit increases and accruals for underfunded plans. Pursuant to the Act, each year actuaries are required to certify to a plan's funded percentage. The Plan received such certification for the 2017 Plan year for the AFTAP, which is one way of measuring the funded status of a plan using actuarial assumptions mandated by the IRS, and the actuary determined that the 2017 AFTAP for the Plan is 89.15%.

10. Mutual Fund Fees

Investments in mutual funds are subject to sales charges in the form of front-end loads, back-end loads or 12b-1 fees. 12b-1 fees, which are ongoing fees allowable under Section 12b-1 of the Investment Company Act of 1940, are annual fees deducted to pay for marketing and distribution costs of the funds. These fees are deducted prior to the allocation of the Plan's investment earnings activity, and thus not separately identifiable as an expense.

ACTUARIAL METHODS FOR FUNDING

Asset Methods

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

*Schedule SB, Part V — Summary of Plan Provisions***Benefits Included or Excluded**

Unless noted below, all benefits provided by the plan, as restated and amended, are included in this valuation.

- **Most recent plan amendments included:** All amendments included in the restatement effective as of January 1, 2014 are included.
- **Plan amendments excluded:** None.
- **Late retirement increases:**
 - *Active participants:* The plan provides suspension notices to participants who were younger than age 65 as of September 2006 and work beyond normal retirement. There are no active participants in the plan who were age 65 or older as of September 2006, so the valuation does not include late retirement actuarial increases.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Schedule SB, Part V — Summary of Plan Provisions

PLAN PROVISIONS SPECIFIC TO FUNDING

Additional Benefits Included or Excluded

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
