Contribution credits for Hypothetical Account B for each plan year shall equal (1) six times compensation for the plan year in excess of \$100,000 for the President of the Company and (2) three times compensation for the plan year in excess of \$100,000 plus zero for plan years prior to 2015 and \$30,000 for plan years beginning on or after January 1, 2015 for the Secretary/Treasurer of the Company. The participant benefits commence on the date of retirement and are based on the Normal Retirement Age. If a participant with at least three years of service terminates employment prior to the Normal Retirement Age, the Plan provides deferred retirement benefits.

Payment Of Benefits

The normal form of benefits under the Plan consists of monthly payments during the life of the participant. If a participant is married, the normal form of benefit payment is a joint and survivor annuity, unless the participant elects and the spouse consents otherwise. If a participant dies on or after the Annuity Starting Date, the Beneficiary (if any) will be eligible to receive the retirement benefits.

Basis of Accounting

The financial statements of the Plan are prepared under the accrual basis of accounting, in conformity with generally accepted accounting principles.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator and management to make estimates and assumptions that affect certain reported amounts of assets, liabilities, and changes therein, and disclosure of contingent assets and liabilities. Accordingly, actual results may differ from those estimates.

Benefit Distributions

Benefit distributions are recorded when paid to participants.

Administrative Services

The expenses necessary to administer the Plan are paid by the Plan or Plan sponsor including, but not limited to, those involved in retaining necessary professional assistance from an attorney, an accountant, an actuary, or an investment adviser. Investment related expenses are included in net appreciation of fair value of investments.

Investments

Investments are reflected at fair market value as determined by the trustee. Corporate bonds are valued at observable inputs for similar securities at year end. This includes basing value on yields available on comparable securities of issuers with similar credit ratings. Non-interest bearing cash is valued at its carrying value.

NOTE 3 - ACTUARIAL ASSUMPTIONS AND PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

CBIZ Retirement Plan Services, an independent actuary, performed the actuarial valuations of the Plan as of January 1, 2017. The valuations used the following assumptions:

Actuarial Cost Method:	Unit Credit as required under the Pension Protection Act of 2006
Mortality:	The 2017 Plan Year Applicable Mortality Table specified under §417(e)(3), for the month that includes the valuation date.
Rate of Return on Plan Assets:	3.00% - 2017, 2.89% - 2016
Interest Rate for Life Annuities:	5.00%

NOTE 3 - ACTUARIAL ASSUMPTIONS AND PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (CONTINUED)

Annual Effective Interest Rate: 5.37% per year

Retirement Age: Normal Retirement Age

Accumulated plan benefits are determined by the Plan's actuary and are those future periodic payments for plan benefits that have accrued on the basis of each participant's service history as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present values of accumulated benefits are as follows:

Total actuarial present value of accumulated plan benefits	<u>\$ 3,040,233</u>	<u>\$ 2,467,144</u>

NOTE 4 - TAX STATUS

The Internal Revenue Service has determined that the Plan meets the requirements of Section 401(a) of the Internal Revenue Code and is exempt for federal income tax under Section 501(a) if the code.

The Plan obtained its latest determination letter on May 11, 2017, in which the Internal Revenue Service states that the plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2014.

NOTE 5 – FUNDING POLICIES

The Company has agreed to make sufficient contributions to provide the Plan with the assets required to pay retirement benefits to Plan participants. The Company's recorded contributions to the Plan for 2017 and 2016 are based on reports from a consulting actuary and meet the funding requirements of ERISA.

NOTE 6 - PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants will become 100% vested in their accounts, and the remaining assets in the Plan would be allocated to participants in accordance with the provisions of ERISA Section 4044.

NOTE 7 - INVESTMENTS

The plan uses PNC Investments as a third party custodian for its assets. Investment income totaled \$99,917 and \$75,572 for the years ended December 31, 2017 and December 31, 2016, respectively. Unrealized gains/(losses) on investments totaled a (\$47,727) and \$45,113 for the years ended December 31, 2017 and December 31, 2016, respectively.

NOTE 8 - FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board *Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for

NOTE 8 - FAIR VALUE MEASUREMENTS (CONTINUED)

identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the assets or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or by other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value:

Interest bearing cash: Valued at carrying value.

Corporate bonds: Valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2017:

Segment I:	1.57%	4.16%
Segment II:	3.77%	5.72%
Segment III:	4.73%	6.48%

The "Limited to 25 Year Corridor" rates are adjusted by the applicable maximum and applicable minimum percentages of the 25-year average segment rates, as set forth in the Highway and Transportation Funding Act of 2014 ('HATFA-14') for use in Minimum Required Contribution calculations. The IRS Maximum Deductible Limit Calculations use the rates from the "Non-Stabilized" column above.

Effective Interest Rate

The Effective Interest Rate (EIR) for the 2017 Plan Year was 5.37%. For the prior Plan year, the EIR was 5.58%.

The EIR is the single rate of interest which, if used to determine the Funding Target, would equal the Funding Target determined using the plan sponsor's above elected discount rates. The EIR is used to discount contributions for minimum funding requirements and to accumulate excess contributions to the end of the year.

ACTUARIAL METHODS

Minimum Funding Cost Method

The actuarial cost method used to determine the liabilities for minimum funding calculations is the Traditional Unit Credit method. The objective under this method is to fund each participant's benefits under the plan as they accrue. Under this cost method, the actuarial accrued liability is the sum of the individual accrued liabilities for all participants and the normal cost is the sum of the individual normal costs for each participant. The individual accrued liability for a participant is the present value of the accrued benefit as of the valuation date taking into account service and/or pay as of the valuation date. The individual normal cost for a participant is the present value of the benefit expected to accrue in the plan year being valued.

If a plan is frozen, there is no normal cost attributable to benefit accruals.

Maximum deductible contribution method

The actuarial cost method used to determine the liabilities for maximum deductible calculations is the Projected Unit Credit method. The objective under this method is to fund each participant's benefits under the plan as they accrue, taking into consideration expected future compensation increases. Under this cost method, the actuarial accrued liability is the sum of the individual accrued liabilities for all participants and the normal cost is the sum of the individual normal costs for all participant. The individual accrued liability for a participant is the sum of 1) the present value of the accrued benefit earned as of the valuation date taking into account service and/or pay as of the valuation date; plus 2) the present value of the accrued benefit expected to be earned because of any expected future compensation increases.

The individual normal cost for a participant is the sum of the present value of the benefit expected to accrue in the plan year being valued taking into account any expected future compensation increases.

Asset Method

We used financial data submitted by the trustee as of the valuation date without further audit. This information was not be verified by a plan's actuary. We have reviewed the information for internal consistency, and we have no reason to doubt is substantial accuracy.

Changes in methods since the prior valuation

None.
