EMPLOYEES' RETIREMENT PLAN OF GAYLORD HOSPITAL, INC.
NOTES TO THE FINANCIAL STATEMENTS
December 31, 2017 and 2016

NOTE 1 - DESCRIPTION OF THE PLAN

The following description of Employees' Retirement Plan of Gaylord Hospital, Inc. (the Plan) is provided for only general information. Participants should refer to the Plan agreement for a more complete information.

General: The Plan is a frozen noncontributory defined benefit plan covering substantially all employees of Gaylord Hospital, Inc. (the Hospital) who completed one year of service and attained the age of 21 prior to October 31, 2004. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

In 2004, the Board of Directors of the Hospital approved an amendment to the Plan, which froze benefits earned under the Plan effective October 31, 2004. No employees are eligible or can commence participation in the Plan after October 31, 2004 and no additional benefits will be earned or accrued after October 31, 2004.

Pension Benefits: Employees with five or more years of service are entitled to annual pension benefits beginning at normal retirement age (65) equal to 1.6% of average annual compensation times years of service (not to exceed 30), plus 0.4% of average annual compensation in excess of \$21,875 times years of service (not to exceed 30). No compensation earned by a participant for service rendered after October 31, 2004 is included in a participant's average annual compensation utilized to calculate pension benefits. The Plan permits early retirement for participants with at least ten years of service at ages 55 to 64. If employees terminates before rendering five years of service, they forfeit the right to receive a portion of their accumulated plan benefits attributable to the Hospital's contributions. Employees may elect to receive the value of their accumulated plan benefits as a lump-sum distribution upon retirement or termination, or they may elect to receive their benefits as a joint and survivor annuity payable monthly from retirement.

Death and Disability Benefits: Death benefits are provided for a surviving spouse or beneficiary upon death of an active or terminated participant who dies after attaining eligibility and prior to receiving retirement benefits. Participants retiring from service with the Hospital on account of permanent disability, after having been credited with at least ten years of service and remaining disabled until normal retirement date, are fully vested and entitled to receive a monthly pension benefit payable immediately. The disability benefit shall be an amount equal to the participant's accrued benefit as of his or her disability date.

Administrative Expenses: The Plan's recordkeeping and custodial fees are paid by the Plan and are reflected in the financial statements as administrative expenses of the Plan. Investment management fees are charged to the Plan as a reduction of investment return and included in the net appreciation (depreciation) in fair value of investments reported by the Plan. All other expenses of the Plan are paid by the Hospital.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting: The accompanying financial statements are prepared on the accrual basis of accounting.

Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures, and actual results may differ from these estimates.

(Continued)

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2017 and 2016

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Investment Valuation and Income Recognition: The Plan's investments are reported at fair value. Fair value is the price that would be received by the Plan for an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Benefit Payments: Benefit are recorded when paid.

Risks and Uncertainties: Investments are exposed to various risks such as interest rate, market, liquidity, and credit risks. Due to the level of risk associated with certain Plan investments, it is at least reasonably possible that changes in the values of certain Plan investments will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE 3 - UNAUDITED INFORMATION - CERTIFIED INVESTMENTS

Substantially all information pertaining to the Plan's investments included in the financial statements, including the associated investment income (loss), was obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by State Street Bank and Trust Company (State Street), the trustee of the Plan. This information has not been audited by independent accountants.

NOTE 4 - FAIR VALUE MEASUREMENTS

Fair value measurements are determined by maximizing the use of observable inputs and minimizing the use of unobservable inputs. The hierarchy places the highest priority on unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1 measurements) and gives the lowest priority to unobservable inputs (Level 3 measurements). The three levels of inputs within the fair value hierarchy are defined as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Plan has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect the Plan's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2017 and 2016

NOTE 4 - FAIR VALUE MEASUREMENTS (Continued)

In some cases, a valuation technique used to measure fair value may include inputs from multiple levels of the fair value hierarchy. The lowest level of significant input determines the placement of the entire fair value measurement in the hierarchy.

The following presents the valuation methods and assumptions used by the Plan to estimate the fair values of investments.

Mutual Funds: The fair values of mutual fund investments are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs).

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2017 and 2016:

<u>2017</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Mutual funds	<u>\$ 24,054,089</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 24,054,089</u>
<u>2016</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Mutual funds	<u>\$ 22,368,816</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 22,368,816</u>

NOTE 5 - FUNDING POLICY

Employer contributions to the Plan are made in amounts approved by the Hospital's Board of Directors. Such contribution amounts must adhere to or exceed the minimum funding requirements under ERISA, as determined by the Plan's actuary. The Hospital's contributions to the Plan for the years ended December 31, 2017 and 2016 satisfied the minimum funding requirements of ERISA. Participant contributions are not permitted under the Plan.

NOTE 6 - PLAN TERMINATION

Although it has not expressed any intention to do so, the Hospital has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA and its related regulations. In the event the Plan terminates, the net assets of the Plan will be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

NOTE 7 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during their last five years of credited service. The accumulated plan benefits for active employees are based on their average compensation during the five years ending on the date as of which the benefit information is presented (valuation date). Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from the Transamerica Retirement Solutions Company and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2016 were as follows:

Mortality: RP-2014 mortality tables for males and females with generational improvements adjusted using the RP-2014 Employee and Health Annuitant Tables projected with Scale MP-2016.

Retirement age: Graded from age 58 to 65

Investment return: The 2016 valuation included assumed an average rate of return of 6.0%.

For the year ended December 31, 2016, the significant change in actuarial assumptions is the impact of the updated mortality assumption to the RP-2014 mortality table, projected with Scale MP-2016. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE 8 - PLAN TAX STATUS

The Internal Revenue Service has determined and informed the Hospital by a letter dated July 24, 2015 that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). Plan management believes that the Plan is designed and being operated in compliance with the applicable requirements of the IRC. Therefore, they believe that the Plan was qualified and the related trust was tax-exempt as of the financial statement date.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2017 and 2016, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2014.

NOTE 10 - PARTY-IN-INTEREST TRANSACTIONS

Parties-in-interest are defined under DOL regulations as any fiduciary of the plan, any party rendering service to the plan, the employer, and certain others. Amounts paid by the Plan to parties in interest included fees paid for recordkeeping and custodial services. Certain professional fees for the administration and audit of the Plan were paid by the Hospital. Various administrative functions are performed by officers or employees of the Hospital. No such officer or employee receives compensation from the Plan.

A ACTUARIAL COST METHOD

The actuarial cost method used to determine the target normal cost, target liability and required contribution amounts for the plan is the Traditional Unit Credit Actuarial Cost Method. Under this method, both the target normal cost and target liability are based on the annual accrual of benefits as accruals occur each year.

The target liability for each active plan participant is equal to the actuarial present value of the participant's accrued benefit as of the valuation date. The total target liability of the plan is equal to the sum of such liabilities as determined for each active participant plus the actuarial present value of benefits being paid, or due to be paid, to retirees, beneficiaries and former participants with deferred vested benefits.

The target normal cost for each active participant is equal to the actuarial present value of the benefit expected to be earned during the year starting on the valuation date. The total target normal cost of the plan is the sum of the target normal costs for each active plan participant.

All employees who are plan participants on a valuation date are included in the actuarial valuation.

B ASSET VALUATION METHOD

The actuarial value of assets is equal to the market value of assets on the valuation date reduced by the sum of:

1. 66.67% of gains and losses of the prior year;
2. 33.33% of gains and losses of the second prior year.

Investment gains and losses are determined by the excess or deficiency of the expected return over the actual return on the market value (including employer contributions receivable for any given year. However, the expected return on assets may be limited by certain statutory interest rates.
