NOTES TO FINANCIAL STATEMENTS

Eaton Corporation Pension Plan for Eaton Corporation Employees

1 Description of Plan

The following description of The Eaton Corporation Pension Plan for Eaton Corporation Employees ("Plan") provides only general information. Participants should refer to the Plan document and summary plan descriptions, which are available from the Company's Human Resources Department upon request, for a complete description of the Plan's provisions.

General:

The Plan, which began January 1, 1944, is a defined benefit plan that covers many employees of Eaton Corporation's ("Company" or "Plan Sponsor") United States operations. The Company is a subsidiary of Eaton Corporation plc ("Eaton"). The Plan provides for retirement and death benefits. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective January 1, 2002, the Company amended the Plan to provide that the majority of non-bargaining employees hired subsequent to that date would participate in the Eaton Personal Pension Account (EPPA) Cash Balance Plan.

In addition, participants who elected the cash balance plan as a one-time choice provided on January 1, 2003, also participate in the EPPA plan. The remainder of the participants are covered under an Hourly or Traditional benefit structure.

The Plan was amended to exclude from participation certain employees who are classified on and after April 1, 2013 as new hires, rehires and/or certain transfers.

Effective January 1, 2016, the Plan was amended and restated to incorporate prior amendments into a single document and to reflect collective bargaining multiplier increases and other technical changes. The Plan was amended on December 14, 2016 and on December 12, 2017 to reflect changes negotiated for collective bargaining employees and to include clarifying provisions as well as to address various scenarios regarding rehired employees (2016) and to impute service and compensation for certain employment with the Eaton Cummins Automated Transmission Technologies joint venture (2017). The plan was further amended on June 14, 2018 to exclude from participation certain bargaining employees who are classified on and after June 1, 2018 as new hires, rehires or transfers. It is intended that the Plan, as amended, shall continue to qualify as a defined benefit plan under the Internal Revenue Code of 1986, including any later amendments to the Code.

Benefit multiplier increases occurring during the 2017 and 2016 Plan Years have been reflected.

In accordance with the Pension Protection Act of 2006 ("PPA"), if the funded status of the Plan falls below 80% but is above 60%, no more than 50% of a participant's pension benefit may be paid as a lump sum (including rollovers). The remaining 50% must be taken as an annuity. PPA requires that the funded status of the Plan be formally measured as of the first day of the Plan Year. There were no limitations on lump sum distributions during the 2017 and 2016 Plan Years.

1 Description of Plan, Continued

Funding Policy:

The Company makes contributions in amounts sufficient to maintain the Plan on a sound actuarial basis. The Plan has met the ERISA minimum funding requirements. The Company may also elect to make voluntary contributions to the Plan. The Company has the right to amend and/or terminate the Plan subject to the provisions of ERISA.

Certain Plan participants may elect to make contributions to the Plan each year based on a percentage of their compensation. Participants' accumulated contributions (including interest earned on those contributions) at December 31, 2017 and 2016 were \$4,383,078 and \$4,039,113, respectively, with interest rates on accumulated contributions ranging from 2.36% to 5.00% and 2.17% to 5.00%, respectively.

Pension Benefits:

Participants are vested in their benefits earned under various methods defined in the Plan. Normal retirement age is 65. Participants may be entitled to early retirement payments based on the Plan document. Forms of payment include lump sum options, and various annuity options depending on whether the participant has a spouse and what type of joint and survivor option the participant chooses.

2 Summary of Significant Accounting Policies

Basis of Accounting:

The Plan's transactions are reported on the accrual basis of accounting.

Investment Valuation:

The fair value of the Plan's interest in the Eaton Corporation Master Retirement Trust ("Master Retirement Trust") is based on the beginning of the year value of the Plan's interest in the Master Retirement Trust plus actual contributions and allocated investment income (loss) less actual distributions and allocated administrative expenses. Within the Master Retirement Trust, marketable securities are stated at fair value. Securities traded on a national securities exchange are valued at the closing price on the last business day of the Plan Year.

The fair value of participation units owned by the Master Retirement Trust in the collective trust funds is based on the closing price, as reported by the fund administrator on the last business day of the Plan's fiscal year. Fixed income securities consist of publicly traded United States and non-United States fixed interest obligations (principally corporate and government bonds and debentures). The fair value of corporate and government debt securities is determined through models that consider various assumptions, including time value, yield curves, credit ratings and current market prices. United States treasuries are valued at the closing price of each security.

Real estate and equity securities consist of direct investments in the stock of publicly traded companies. Real estate also includes investments in pooled funds that invest directly in real estate. The publicly traded companies are valued based on the closing price reported in an active market on which the individual securities are traded. The pooled funds rely on appraisal based valuations. Investments in limited partnerships are valued at the last quarterly valuation received by the trustee, adjusted for cash flows. Swaps and over-the-counter option contracts are valued based on the closing prices of futures contracts or indices as available on Bloomberg or similar service and, additionally for options, the implied volatility of similar exchange-traded options.

Bank Loans consist of senior secured term loans of publically traded and privately held United States and non-United States floating rate obligations. The fair value is determined through third-party pricing models that primarily utilize dealer quoted current market prices. Hedge funds consist of direct investments in hedge funds through limited partnership interests. Values are based on the estimated fair value of the ownership interest in the investment as determined by the General Partner. Exchange traded funds are valued at the closing price of the exchange traded fund's shares.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

NOTES TO FINANCIAL STATEMENTS

Eaton Corporation Pension Plan for Eaton Corporation Employees

2 Summary of Significant Accounting Policies, Continued

Actuarial Present Value of Accumulated Plan Benefits:

Accumulated Plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits for most hourly employees under the Plan are based on employees' years of credited service multiplied by a monthly factor. The benefits for salaried employees in traditional plans are based on final average pay multiplied by a predetermined percentage and the employees' years of credited service. The benefits for employees in cash balance plans are based on the current value of the account balance.

Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated Plan benefits.

Administrative Fees:

All administrative costs, management fees and expenses of the Plan are paid by the trustee from the Master Retirement Trust unless such costs, fees and expenses are paid by the Company. The Company elected to pay certain administrative costs during 2017 and 2016, on behalf of the Plan. The administrative costs paid by the Plan are accounted for in setting the assumed rate of return on investments.

Payment of Benefits:

Benefit payments to participants are recorded upon distribution.

Plan Termination:

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. Benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC). In the event that the Plan terminates, the net assets of the Plan shall be allocated among the participants and beneficiaries in accordance with the priorities mandated by ERISA. Whether a particular participant's accumulated Plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty, while other benefits may not be provided for at all. A full description of the defined benefit Plan termination priorities is available in the Plan document.

NOTES TO FINANCIAL STATEMENTS

2 Summary of Significant Accounting Policies, Continued

Risks and Uncertainties:

The Plan's investments are exposed to varying degrees of risk, such as interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Subsequent Events:

Management evaluates events occurring subsequent to the date of the financial statements in determining the accounting for and disclosure of transactions and events that affect the financial statements.

Subsequent events have been evaluated through October 12, 2018, which is the date the financial statements were available to be issued.

New Accounting Pronouncements:

In February 2017, the FASB issued Accounting Standards Update No. 2017-06, Plan Accounting (Topics 960, 962, and 965): Employee Benefit Plan Master Trust Reporting (ASU 2017-06). ASU 2017-06 requires the Plan's interest in the master trust and any change in that interest to be presented as separate line items in the statement of net assets available for benefits and in the statement of changes in net assets available for benefits, respectively. The amendment also requires all plans to disclose their master trust's other asset and liability balances and the dollar amount of the plan's interest in each of those balances. In addition, the amendment eliminates the requirement to disclose the percentage interest in the master trust for plans with dividend interest and requires that all plans disclose the dollar amount of their interest in each general type of investment. ASU 2017-06 is effective for fiscal years beginning after December 15, 2018 with early adoption permitted. Plan management is currently evaluating the effect of this pronouncement on the Plan's financial statements and disclosures.

3 Investment in the Master Retirement Trust

All investment information disclosed in the accompanying financial statements at the Plan and Master Retirement Trust level, including investments held at December 31, 2017 and 2016, and net appreciation or depreciation in fair value of investments, net investment gain or loss, and interest and dividends for the years then ended, were obtained or derived from information supplied to the Plan Administrator and certified as complete and accurate by Bank of New York Mellon, the trustee.

The Plan's investments are in the Master Retirement Trust. The trustee is the custodian of the Master Retirement Trust's assets and records and buys and sells such assets in accordance with guidelines established by the Company. Each participating retirement plan has an undivided interest in the Master Retirement Trust. Certain administrative expenses are recorded in amounts directly expended by the Plan.

The following table presents the net assets for the Master Retirement Trust at December 31:

	<u>2017</u>	<u>2016</u>
Common collective trusts	\$ 1,988,038,757	\$ 1,831,356,324

3 Investment in the Master Retirement Trust, Continued

The net increase in the Master Retirement Trust for the year ended December 31 is as follows:

	<u>2017</u>	<u>2016</u>
Interest, dividends, and other income	\$ 42,927,328	\$ 37,863,092
Net appreciation in fair value of investments	516,587,013	209,742,134
Fees and expenses	(4,338,363)	(4,356,369)
Net transfers in (out)	<u>69,103,326</u>	<u>(207,304,925)</u>
Net Increase	<u>\$ 624,279,304</u>	<u>\$ 35,943,932</u>

Investment gain (loss) and administrative expenses related to the Master Retirement Trust were allocated to the individual plans based upon average monthly balances invested by each Plan.

4 Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated March 22, 2016, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Sponsor believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken uncertain tax positions that more-likely-than-not would not be sustained upon examination by applicable taxing authorities. The Plan administrator has analyzed tax positions taken by the Plan and has concluded that, as of December 31, 2017 there are no uncertain tax positions taken, or expected to be taken, that would require recognition of a liability or that would require disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions. However, currently no audits for any tax periods are in progress.

5 Accumulated Plan Benefits

The Plan's actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated Plan benefit information as of the beginning of the Plan Year is as follows:

	<u>January 1, 2017</u>
Actuarial present value of accumulated Plan benefits:	
Vested benefits:	
Participants currently receiving payments	\$ 740,136,044
Other participants	<u>1,451,403,582</u>
	2,191,539,626
Non-vested benefits	<u>27,089,371</u>
Total	<u>\$ 2,218,628,997</u>

The changes in actuarial present value of accumulated Plan benefits are as follows:

Balance as of January 1, 2016	\$ 2,130,735,807
Benefits accumulated	85,681,324
Interest	170,684,101
Benefits paid	(250,483,004)
Plan amendments	158,755
Assumption changes	<u>81,852,014</u>
Balance as of January 1, 2017	<u>\$ 2,218,628,997</u>

NOTES TO FINANCIAL STATEMENTS

Eaton Corporation Pension Plan for Eaton Corporation Employees

5 Accumulated Plan Benefits, Continued

Significant assumptions underlying the actuarial computations are:

Actuarial cost method	Projected unit credit
Assumed rate of return on investments	7.90% (2017); 8.50% (2016)
Salary increase	3.00% (2017 and 2016)
Lump Sum mortality table	IRS Applicable Table in effect at the date lump sums are assumed to be paid based on the projection described in IRS Regulation 1.430(h)(3)-1

In addition, the following changes in assumptions were made since the last valuation:

Mortality basis	Mortality tables are based on the RP-2014 mortality tables published by the Society of Actuaries rolled back to 2006 and projected with a modified generational improvement scale. The modified generational improvement scale has been changed from the Conduent modified version of the MP-2015 Improvement Scale in 2016 to the Conduent modified version of the MP-2016 Improvement Scale in 2017.
Retirement rates	Retirement rates for deferred vested participants and for participants terminating from the cash balance plan were updated to better reflect actual plan experience.
Cash Balance interest crediting rate	The interest crediting rates changed from 2.80% for EPPA and 2.30% for A&S in 2016 to 2.60% for EPPA and 2.10% for A&S in 2017.
Lump Sum interest rate	The interest rate used to calculate lump sums and to convert participant cash balance accounts to annuities decreased from 5.10% in 2016 to 4.70% in 2017.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

6 Party-in-Interest Transactions

During 2017 and 2016, internal costs attributed to certain accounting, treasury and legal services and external fees for certain professional services were paid by the Company on behalf of the Plan, while the Plan paid fees for PBGC premiums, trustee, actuarial, investment management and other professional services.

7 Fair Value Measurements

ASC 820, which applies to financial assets and liabilities, establishes a framework for measuring fair value, establishes a fair value hierarchy based on inputs used to measure fair value, and expands disclosure about fair value measurements. Adopting this statement has not had an effect on the Plan's net assets available for benefits or changes in those net assets.

In accordance with ASC 820, the Plan categorized its financial instruments, based on the degree of subjectivity inherent in the valuation technique, into a fair value hierarchy of three levels, as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2017 and 2016.

Common collective trusts: Valued at the net unit value of units held by the trust at year end. The unit value is determined by the total value of fund assets divided by the total number of units of the fund owned. The equity investments in collective trusts are predominantly in index funds for which the underlying securities are actively traded in public markets based upon readily measurable prices. The investments in other trusts are predominantly in exchange traded funds for which the underlying securities are actively traded in public markets based upon readily measurable prices. Common collective and other trusts measured at fair value using the net asset value per share practical expedient have not been categorized in the fair value hierarchy and are being presented in the tables to permit a reconciliation of the fair value hierarchy to the Plan's total assets.

Fixed income securities: These securities consist of publicly traded United States and non-United States fixed interest obligations (principally corporate and government bonds and debentures). The fair value of corporate and government debt securities is determined through third-party pricing models that consider various assumptions, including time value, yield curves, credit ratings, and current market prices. The Company verifies the results of trustees or custodians and evaluates the pricing classification of these securities by performing analyses using other third-party sources.

NOTES TO FINANCIAL STATEMENTS

United States treasuries: Valued at the closing price of each security.

Bank loans: These securities consist of senior secured term loans of publicly traded and privately held United States and non-United States floating rate obligations (principally corporations of non-investment grade rating). The fair value is determined through third-party pricing models that primarily utilize dealer quoted current market prices. The Company verifies the results of trustees or custodians and evaluates the pricing classification of these securities by performing analyses using other third-party sources.

Equity securities: These securities consist of direct investments in the stock of publicly traded companies. Such investments are valued based on the closing price reported in an active market on which the individual securities are traded. As such, the direct investments are classified as Level 1.

Real estate: Consists of direct investments in the stock of publicly traded companies and investments in pooled funds that invest directly in real estate. The publicly traded companies are valued based on the closing price reported in an active market on which the individual securities are traded and as such are classified as Level 1. The pooled funds rely on appraisal based valuations and as such are classified as Level 3.

Cash equivalents: Primarily certificates of deposit, commercial paper, and repurchase agreements.

Exchange traded funds: Valued at the closing price of the exchange traded fund's shares.

Hedge funds: Consists of direct investments in hedge funds through limited partnership interests. Net asset values are based on the estimated fair value of the ownership interest in the investment as determined by the General Partner. The majority of the holdings of the hedge funds are in equity securities traded on public exchanges. The investment terms of the hedge funds allow capital to be redeemed quarterly given prior notice with certain limitations. Hedge funds measured at fair value using the net asset value per share practical expedient have not been categorized in the fair value hierarchy and are being presented in the tables to permit a reconciliation of the fair value hierarchy to the Plan's total assets.

Other: Primarily limited partner interests in private equity investments.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following assumptions were selected by the plan's enrolled actuary. The asset valuation method was selected by the plan sponsor with the actuary's advice and is an acceptable method under PPA.

Plan Expenses

Expected plan related expenses are equal to a 5 year average of expenses paid from the Plan outside of PBGC premiums plus the estimated PBGC premiums for the current year rounded up to the nearest thousand. For 2017 the estimated plan related expenses included in the Target Normal Cost are \$15,503,000.

Salary increase assumption

Wages and salaries are assumed to increase by 3.00% per annum. This assumption is based on guidance from Eaton Corporation's expectations for the coming year.

Inflation

The annual inflation increase is 3.00%. This assumption is based on 25-year historical data excluding the period after the 2008 financial crisis, but including expected future inflation.

Social Security

The annual increase in maximum wage base is 3.50%. This assumption is based on the expected inflation plus 0.5% for expected increases due to productivity for the U.S. population.

Cash Balance interest crediting rate

The interest crediting rate for Appendix CB is assumed to be equal to the most recent average 30-Year Treasury Constant Maturity effective at the end of the most recent 12-month period available as of the end of the fiscal year for the previous valuation year (i.e. the period ending November 30, 2016) as published in the U.S. Department of the Treasury Resource Center. The interest crediting rate for Appendix ASD is assumed to be 0.5% less than the interest crediting rate for Appendix CB, which reflects the assumed 0.5% spread between 30-Year and 5-Year Treasury Constant Maturities. For the 2017 valuation, the rates for Appendix CB and ASD were 2.60% and 2.10% per annum, respectively.

Cash balance index credits

Opening account balances subject to indexing are assumed to increase 3.00% per annum (in addition to interest credits) during active employment. This is assumed to be the same as inflation, which is in line with the basis for actual index credits to participant accounts as outlined in the plan document.

Cost of Living Adjustment

Cost of living increase is assumed to be 3.00%, when applicable. This is assumed to be the same as inflation, which is line with the basis for actual cost of living adjustments to participant benefits as outlined in the plan document.

Rates of Retirement

It is assumed that normal and early retirement will occur in accordance with the following rates. Hourly benefit structures have been arranged into three groups as follows:

- Structure (1) For employees eligible for 30 year retirement under benefit structures MA, W, CO and Columbia City.
- Structure (2) For employees eligible for supplements other than as described in Structure (1).
- Structure (3) For employees eligible for subsidized benefits without supplement.

The retirement assumption was set based on an experience study performed during 2012. The rates are monitored annually with updates made as deemed necessary. The most recent update was made to retirement rates for participants benefitting under Appendix B based on the annual update to the experience study performed in 2015.

Withdrawal rates for active participants not eligible for retirement

A moderate rate of termination of employment is assumed. For Salaried employees, such rate varies by sex and length of employment during the first five years of employment and by sex and attained age thereafter. For Hourly employees, such rate varies by length of employment during the first five years of employment and by attained age thereafter. The termination assumption was set based on an experience study performed during 2012. The rates are monitored annually with updates made as deemed necessary. No updates to termination rates have been made since 2012. A sample of rates, showing the percentage of participants assumed to terminate in the next year, is as follows:

Asset valuation method

The Actuarial Value of Assets is determined using a method that spreads asset gains/(losses) over 24 months. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third Segment Rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

	Actuary's Assumption	Third Segment Rate	Reflecting PPA Limit
2017 Expected Return	7.90%	6.48%	6.48%
2016 Expected Return	8.50%	6.65%	6.65%
2015 Expected Return	8.50%	6.81%	6.81%

The expected asset return assumption was based on an analysis of long term expected returns for the asset classes in which the plan's assets were invested as of the measurement date.

Future actuarial measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Summary of Changes from the January 1, 2016 Valuation

- The mortality tables and interest rates for funding purposes and for purposes of valuing lump sums have been updated to the applicable rates for the current plan year in accordance with PPA.
- Cash balance interest crediting rates for funding calculations have been changed to 2.60% for Appendix CB and 2.10% for Appendix ASD in 2017 from 2.80% for Appendix CB and 2.30% for Appendix ASD in 2016.
- Based on recent experience, the retirement rates for current deferred vested participants in Appendix A and Appendix B were updated to those outlined above. The retirement rates for current deferred vested participants in Appendix CB have been updated from 100% at age 62 and older to 10% per year up to age 65 with 100% commencement at age 65 and older. Additionally, based on recent experience, the commencement assumption for terminating Appendix CB participants was changed from 100% immediate commencement to 50% immediate commencement and 50% deferred to age 62 commencement. For terminating Appendix CB participants over age 62, 100% immediate commencement was assumed.
- The assumption changes listed above increased the Funding Target by approximately \$68.8 million.
- The expected return on assets changed from 8.50% to 7.90% to better reflect the change in expectations of the future long term expected returns for the asset classes.
- Expected administrative expenses included in Target Normal Cost decreased from \$26,081,000 to \$15,503,000.

- To better align with what recent experience has been over the past several years, the retirement rates for current deferred vested participants in Appendix A and Appendix B were updated to those outlined above. The retirement rates for current deferred vested participants in Appendix CB have been updated from 100% at age 62 and older to 10% per year up to age 65 with 100% commencement at age 65 and older. Additionally, based on recent experience, the commencement assumption for terminating Appendix CB participants was changed from 100% immediate commencement to 50% immediate commencement and 50% deferred to age 62 commencement. For terminating Appendix CB participants over age 62, 100% immediate commencement was assumed. The impact does not exceed the threshold under IRC 430(h)(5).
- The expected return on assets changed from 8.50% to 7.90% to better reflect the change in expectations of the future long term expected returns for the asset classes.
- Expected administrative expenses included in Target Normal Cost decreased from \$26,081,000 to \$15,503,000. The change is mainly due to the lower expectation of the PBGC premium.
