AMETEK, Inc. Selected Defined Benefit Pension Plans

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of each of the AMETEK, Inc. Selected Defined Benefit Pension Plans, which comprise the statements of net assets available for benefits listed on pages 3 and 4, as of December 31, 2017 and 2016, and the related statements of changes in net assets available for benefits, listed on pages 5 and 6, for the years then ended, and the statements of accumulated plan benefits, listed on page 7, as of December 31, 2016, and the related statements of changes in accumulated plan benefits, listed on page 8, for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the certified investment information described in Note 5, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the entity that certified the investment information meets the requirements of 29 CFR 2520.103-8. The plan administrator has obtained certifications as of

December 31, 2017 and 2016, and for the years ended December 31, 2017 and 2016, stating that the investment information provided to the plan administrator is complete and accurate.

Disclaimer of Opinion on Financial Statements

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Compliance of Form and Content with Department of Labor's Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the certified investment information, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Contributions

AMETEK's contributions, which are determined annually on an actuarial basis, along with net appreciation (depreciation) in the fair value of the investments, are designed to sufficiently fund the benefits to be paid to the Plans' participants. The contributions of AMETEK are calculated using the assumptions and methods prescribed by ERISA and the IRC, as amended by the Pension Protection Act of 2006, and applicable regulations. Generally, the minimum required contribution is each Plan's target normal cost (the value of benefits to be earned during the year) and seven-year amortization of any funding shortfall (the excess of the funding target over assets). The Plans have met the ERISA minimum funding requirements.

Benefits

Plan	Normal Retirement Benefits	Early Retirement Benefits	Pre-Retirement Death Benefits	Post-Retirement Death Benefits
Retirement	<p>Depending upon the predecessor plan in which eligible employees participated, benefits are based on either (1) a percentage of final average compensation, (2) monthly average annual compensation, (3) average compensation, (4) career earnings or career average earnings, or (5) specific dollar amount (i.e., rate) multiplied by years of credited service or months or service. Percentages and rates vary based on covered compensation limits, credited years of service limits and/or employment service periods.</p> <p>Certain participant account balances are credited with contribution credits at the end of each calendar month that relates to their age, service and interest credits, compounded daily, equal to the average monthly yield on 10 year U.S. Treasury securities preceding each calendar year quarter but in no event to be less than 2.25%.</p>	<p>Range from age 50 to age 60 and require 10 or 15 or more years of service. Certain plans also require the sum of age and service to meet certain minimums. Reductions in the normal form of benefit range from 4% to 6.667% per year prior to normal retirement date. Haveg participants – reduced 1/10th per year for pre normal retirement date commencement, unreduced if retire before normal retirement date but on or after age 62 with 15 years of accrual service, or age 63 with 14 years of accrual service, or age 64 with 12 years of accrual service.</p>	<p>In addition to providing the statutory qualified surviving spouse annuity, certain participants are eligible for a death benefit equal to 60 times the accrued monthly pension at date of death and reduced for early commencement.</p>	<p>Benefits for certain participants depending upon the predecessor plan in which they participated range from \$1,000 to \$5,000. Haveg participants - \$10,500; all others - \$1,000.</p>
Wapakoneta	<p>Benefits range from \$22 to \$56 per month per year of credited service. See plan amendments section of footnote 1.</p>	<p>Age 60 with 10 or more years of service. Effective December 12, 2017 all Plans were amended to reduce the mandatory distribution threshold from \$5,000 to \$1,000 and provide that no distributions from the Plan are subject to the automatic rollover provision.

Plan Termination

Although it has not expressed an intention to do so, the Company reserves the right under the Plans to discontinue its contributions at any time and to terminate the Plans subject to the provisions of ERISA. Upon termination, the net assets of the Plans will be allocated for payment to the participants in an order of priority as prescribed by ERISA and its related regulations and the plan documents.

Should the Plans terminate at some future time, their assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

2. Summary of Significant Accounting Policies

Basis of presentation

The accompanying financial statements have been prepared on the accrual basis of accounting.

Allocation of the Master Retirement Trust

At December 31, 2017 and 2016, the assets of the Plans were held by The Bank of New York Mellon/BNY Mellon, N.A. ("Trustee") as trustee of the Trust.

Assets attributable to the individual plans participating in the Trust are equitable shares, which are based on each plan's proportionate share of total net assets of the Trust as of the end of each month, excluding unpaid contributions. Contributions received, benefits paid and direct administrative expenses are accounted for as direct cash flows designated to the individual plans during the period. The Trustee allocates earned income, realized gains and losses and unrealized gains and losses and Trust expenses to individual plans based on each plan's pro rata share of the fair value of the Trust's net assets at the end of the reporting period.

Investment valuation and Income Recognition

The Plans' investments are stated at fair value. See Note 5 for further discussion and disclosures related to fair value measurements.

Portfolio managers of the Trust may enter into certain types of futures and option contracts in order to enhance liquidity or protect the total return of the Trust's portfolio from market volatility. Realized and unrealized gains and losses from these contracts are included in investment income.

Purchases and sales of securities are reflected on the trade dates. Gains and losses on sales of securities are based on the average cost of securities. Dividend income is recorded on the ex-dividend date. Income from other investments is recorded as earned.

Actuarial plan benefits valuation

Accumulated plan benefits represent the actuarial present value of estimated future periodic payments, including lump-sum distributions that are attributable under the Plans' provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included, to the extent they are deemed attributable to employee services rendered to the valuation date.

The actuarial present value of accumulated plan benefits under the Plans was calculated by the consulting actuaries, based on the latest available data as of December 31, 2016. The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

2. Summary of Significant Accounting Policies (continued)

Administrative expenses

Administrative expenses of all Plans are paid by the Trust and are charged to the respective Plans.

Payments of benefits

Benefits are recorded when paid.

Use of estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates and assumptions.

Risks and uncertainties

The Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Subsequent Events

Management evaluated subsequent events for the Plans through October 4, 2018, the date the financial statements were available to be issued. Based on this evaluation, no disclosures were required to be made to the financial statements as of December 31, 2017.

3. Recent Accounting Pronouncements

In February 2017, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No 2017-06, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting ("ASU 2017-06")*. ASU 2017-06 requires a plan's interest in a master trust and change in the value of that interest to be presented in separate line items in the statement of net assets available for benefits and in the statement of changes in net assets available for benefits. The new guidance removes the requirement to disclose the percentage interest in the master trust for those plans with divided interests and instead requires disclosure of the dollar amount of interest in each investment type. ASU 2017-06 is effective for interim and annual reporting periods beginning after December 15, 2018. The new guidance will be applied on a retrospective basis and early adoption is permitted. Management is currently evaluating the impact of adopting ASU 2017-06 on the Plans' financial statements.

December 31, 2017 and 2016

4. Accumulated plan benefits

Significant assumptions underlying the actuarial valuation are as follows:

Assumed rate of return on investments

The assumed rate of return on investments is 7.50% at December 31, 2016 compounded annually, net of investment expenses. This was a reduction from the December 31, 2015 rate of return on investments of 7.75%, which caused an increase in the accumulated plan benefits for the year ended December 31, 2016.

Mortality basis

At December 31, 2016, mortality is based on the RP-2014 gender-specific mortality table (with MP-2014 projected improvements after 2006 removed) projected from 2006 with Scale BB-2 dimensional and blue collar adjustment (no collar adjustment for Retirement).

Retirement rates

Retirement under the various Plans is assumed to take place based on retirement rates which generally result in assumed retirement at ages ranging from 62 to 65.

These actuarial assumptions are based on the presumption that the Plans will continue. Were the Plans to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

A summary of the investment income on investments held by the Trust for the years ended December 31, 2017 and 2016 was as follows:

	<u>2017</u>	<u>2016</u>
Net appreciation (depreciation) at fair value	\$ 85,153,873	\$ 28,723,014
Dividends and interest	<u>10,542,430</u>	<u>10,104,941</u>
Total investment income	<u>\$ 95,696,303</u>	<u>\$ 38,827,955</u>

The Plans utilize a valuation hierarchy for disclosure of the inputs to the valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on the Plans' own assumptions used to measure assets and liabilities at fair value. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

5. Investment and Master Trust Information (continued)

The following is a description of the valuation methodologies used for assets at fair value. There have been no changes in the methodologies used at December 31, 2017 and 2016.

Level 1 investments are unadjusted, observable inputs from active markets. Investments such as common stocks traded on exchanges are valued at the last reported sale prices on the last business day of the year or, if not available, the last reported bid prices. Registered investment companies are valued at quoted market prices which represent the net asset values of shares held by the Plans at year-end.

Level 2 investments are equity funds and fixed income funds that are valued by the vendor using observable market inputs. Fixed income securities such as certain government, municipal and corporate obligations are primarily measured using a market approach pricing methodology, where observable prices are obtained by market transactions involving identical or comparable securities of issuers with similar credit ratings. Corporate obligations are all investment grade quality.

Alternative investments are considered level 3 investments as their values are determined by the sponsor using unobservable market data. The Plans' investment policy, developed by the Pension Investment Committee, limits the amount the Plans may invest in investments that are difficult to value. Valuation of these investments is determined by the management of the Plan Sponsor on an annual basis at the reporting date. The valuation procedures include, but are not limited to, the review of periodic due diligence materials provided by the third party investment consultants and investment staff of the Plan Sponsor, as well as the investments' annual audited financial statements. As of December 31, 2017 and 2016, the Plans hold no alternative investments.

Temporary cash investments are stated at cost, which approximates fair value. Common collective trusts are valued based on the Plan's unit of ownership and net asset value of the investment entity's pooled investments. These investments have no unfunded commitments and no limits as to the frequency of redemptions. However, the investments have various redemption terms and notice periods.

5. Investment and Master Trust Information (continued)

The objectives of the Plans' investment strategy are to maximize the Plans' funded status and minimize Company contributions and plan expense. Because the goal is to optimize returns over the long term, an investment policy that favors equity holdings has been established. Since there may be periods of time where both equity and fixed-income markets provide poor returns, an allocation to alternative assets may be made to improve the overall portfolio's diversification and return potential. The Pension Investment Committee periodically reviews the Trust's asset allocation, taking into consideration plan liabilities, plan benefit payment streams and the investment strategy of the pension plans. The actual asset allocation is monitored frequently relative to the established targets and ranges and is rebalanced when necessary.

The equity portfolio is diversified by market capitalization and style. The equity portfolio also includes an international component.

The objective of the fixed-income portion of the pension assets is to provide interest rate sensitivity for a portion of the assets and to provide diversification. The fixed-income portfolio is diversified within certain quality and maturity guidelines in an attempt to minimize the adverse effects of interest rate fluctuations.

Other than investments in certain alternative investment collective trusts and pooled investments funds, certain investments are prohibited. Prohibited investments include venture capital, private placements, unregistered or restricted stock, margin trading, commodities, short selling and rights and warrants. Foreign currency futures, options and forward contracts may be used to manage foreign currency exposure.

6. Income Tax Status

The Plans have received determination letters from the IRS dated as follows:

Employees' Retirement Plan of AMETEK, Inc. (001)	January 21, 2016
Chemical Products (Wapakoneta, Ohio Plant) Division of AMETEK, Inc. Hourly Employees' Pension Plan (012)	October 19, 2015
Chemical Products (Nesquehoning, Pennsylvania Plant) Division of AMETEK, Inc. Hourly Employees' Pension Plan (032)	January 21, 2016
AMETEK, Inc. Aerospace Division Pension Plan for Union Represented Employees (043)	October 27, 2015
AMETEK, Inc. Monthly Formula Pension Plan (035)	January 21, 2016

The determination letters state that each of the Plans qualifies under Section 401(a) of the IRC and, therefore, the related trust is exempt from taxation. Subsequent to the issuance of the determination letters, all of the Plans were amended. Once qualified, the Plans are required to operate in conformity with the IRC to maintain their qualification. The Plan Sponsor believes the Plans are being operated in compliance with the applicable requirements of the IRC and therefore believes the Plans, as amended and restated, are qualified and the related trusts are tax-exempt.

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plans. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan Sponsor has analyzed the tax positions taken by the Plans, and has concluded that as of December 31, 2017, there are no uncertain positions taken or expected to be taken. The Plans have recognized no interest or penalties related to uncertain tax positions. The Plans are subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Valuation pay Base pay for the year preceding the valuation date plus the average of the bonuses accrued for the two years preceding the valuation date, adjusted to the valuation year using the assumed salary increase rate.

Covered pay Base pay for the year preceding the valuation date plus the average of the bonuses accrued for the two years preceding the valuation date, adjusted to the valuation year using the assumed salary increase rate.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date First day of plan year.

Funding target Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year as required by regulations under IRC §430.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.65% (with such expected earnings limited as described in IRS Notice 2009-22) . must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2016 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA).

These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years.

However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

Certain plans pay small benefits with a present value up to \$5,000 in a single lump sum payment. Such lumps sums are not explicitly valued as such; rather such participants benefits are valued using the benefit choice assumptions described above.

Willis Towers Watson has reviewed the plan provisions with AMETEK, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Data Sources

The plan sponsor furnished participant data as of 1/1/2017. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale – Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

- **Compensation** Assumed compensation increases are based on plan sponsor expectations for near-term years and the effect that the assumed long-term CPI and NAW will have on compensation increases over the longer term.
- **National average wages (NAW) (e.g., Social Security wage bases)** The assumed NAW is based on assumed CPI as shown below, plus assumed increases in real wages (the portion of GDP increases that becomes part of wages). Such assumed future increases in real wages based on a combination of recent rates and an expectation that the future rates will be lower (higher) than current conditions.
- **Increases in statutory limits (CPI)** The assumed CPI is based on a combination of current conditions, and future forecasts by economists. The final assumption represents a composite of current rates and long term expected rates.
- **Cash balance interest crediting rate** Based on the greater of the average monthly yield on 10-year constant Treasury securities for the 2nd month preceding each calendar quarter, and 2.25%.
- **Assumed return for asset smoothing** The assumed return used for asset smoothing is the lesser of the 3rd segment rate and the expected return on assets assumption chosen by the client for the current plan year under U.S. GAAP. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client's best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Plan-related expenses

Plan-related expenses are assumed to be the actual plan-related expenses paid for the prior rounded up to the nearest ten-thousand dollars. As required by regulations, plan-related expenses should estimate the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Assumptions Rationale – Significant Demographic Assumptions

Healthy Mortality	Assumptions for accounting purposes were selected by the plan sponsor and, as required by U.S. GAAP, represents a best estimate of future experience. Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used are for accounting purposes were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience. Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by termination patterns different than assumed.
Disability	Disability rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by disability patterns different than assumed.
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.
Benefit commencement date for deferred benefits:	
<ul style="list-style-type: none">• Preretirement death benefit	Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available.
<ul style="list-style-type: none">• Deferred vested benefit	Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement.

Form of Payment	The percentage of retiring participants assumed to take plan specific forms of payment is based on the plan sponsor's expectations for the future with periodic monitoring of changes caused by patterns different than assumed.
Percentage married	The assumed percentage married is based on plan experience, as well as general population statistics on the marital status of individuals of retirement age.
Spouse age	The assumed age difference for spouses is based on plan experience, as well as general population statistics of the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.
Accounting methods	The methods used for accounting purposes as described in Appendix A, including the method of determining the market-related value of plan assets, are "prescribed methods set by another party", as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.

Change in assumptions and methods since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of January 2016 to January 2017.

The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Benefit

Non-union: An account balance is established for each participant. The account shall be increased as of the last day of each calendar month of employment with a percentage of compensation in accordance with the age plus service points schedule below, where age and service is the sum of the whole and fractional years of age and service:

<u>Age plus Service Points</u>	<u>Percentage of Compensation</u>
Less than 30	4.0%
30 but less than 40	5.0%
40 but less than 55	6.0%
55 and greater	7.0%

The account shall be increased each day of employment with interest credits. Interest on the account balance is calculated as the greater of:

(i) average monthly yield on 10-year US Treasury securities at constant maturity for the second month preceding each calendar year quarter, and

(ii) 2.25%.

Interest is credited prior to the addition of compensation credits on applicable dates.

Account balances revert back to zero if a participant terminates employment prior to attaining 5 years of service and returns to service after a period of 5 or more breaks-in-service.

Union: Accrued benefit payable monthly as a life annuity is determined by multiplying the participant's total credited service and the multiplier in effect during the time of termination, based on the schedule below:

<u>Date of Termination</u>	<u>Benefit Multiplier</u>	
	<u>Service accumulated prior to January 1, 2007</u>	<u>Service accumulated after January 1, 2007*</u>

Ancillary Early

Retirement Benefit Union: \$75 per month payable in any month where the retired participant is not eligible for Social Security Benefits.

Disability Retirement Non-union: Account balance as of the date of disability is increased with interest and compensation credits until the earlier of the end of total disability, the benefit commencement date, or normal retirement date. Compensation credits are determined using the base rate of compensation for the month preceding the date of disability.

Union: The greater of \$150 monthly and the accrued monthly benefit (unreduced) at date of disability. An additional \$100 per month is payable for each month a disabled participant is not eligible for Social Security Benefits, unless the participant is receiving an accrued benefit under the prior plan, The Superior Group, Inc. Retirement Plan. Benefits end with the cessation of total disability, the benefit commencement date, or normal retirement date.

Vested Termination Non-union: Distribution of entire vested interest in the account balance or actuarially equivalent life annuity benefit as of the date of commencement.

Union: Distribution of accrued benefit at commencement. If at least age 55, a reduced benefit may be elected, reduced by 0.5% for each month that commencement precedes NRD.

Postponed Retirement Non-union: Distribution of entire vested interest in the account balance or actuarially equivalent life annuity benefit as of the date of commencement.

Union: Greater of the accrued monthly benefit at actual retirement date or the actuarially equivalent value as of NRD.

Preretirement Death Non-union: Distribution of entire vested interest in the account balance or actuarially equivalent life annuity benefit as of the date of commencement made payable to the surviving beneficiary.

Union: Distribution of actuarially equivalent 50% joint and survivor annuity benefit as of the date of participant's earliest retirement date made payable to the surviving beneficiary. An additional death benefit may be awarded to the surviving beneficiary:

If the participant was actively employed and had attained age 50 and 10 years of vesting service at time of death, an additional monthly benefit is payable until the beneficiary attains age 65, and is equal to the greater of:

1. \$100 plus the prior plan benefit, and
2. A percentage of the participant's accrued benefit following the age schedule below

<u>Participant's Age at Time of Death</u>	<u>Percentage</u>
55 and over	50%
54	48%
53	46%
52	44%
51	42%
50	40%

The additional benefit is reduced by 0.5% for each year that the beneficiary's age is less than 50 at the time of the participant's death.

Once the beneficiary reaches age 62, the additional benefit is reduced by 65% of the benefit the beneficiary is entitled to under Social Security (the additional benefit may not go below \$25, however).

The additional benefit is not awarded if the participant and beneficiary had not attained 55 and 45 years of age, respectively, at the time of death.

Postretirement Death

All participants: Distribution of the remaining vested benefit to the surviving beneficiary in the form chosen by the participant.

Union: If a participant dies between the ages of 55 and 65 after commencing under early or disabled retirement, the beneficiary is entitled to similar additional benefits as described under preretirement death, given that the beneficiary is the spouse of the participant.
