Cooper Tire & Rubber Company
Hourly Employees' Retirement Plan – Texarkana
Notes to Financial Statements
December 31, 2017 and 2016

1. Description of Plan

The Cooper Tire & Rubber Company Hourly Employees' Retirement Plan – Texarkana (the “Plan”), along with several other plans (the “Plans”) (see below), is included in the Employees' Retirement Trust (the “Trust”). The following brief description of the Plan provides only general information. Participants should refer to their specific plan agreement for a more complete description of the Plan's provisions.

General

The Trust funding the Plans includes the assets of Cooper Tire & Rubber Company's (the “Company” or “Plan Sponsor”) Hourly Employees' Retirement Plans as follows: Retirement Plan – Clarksdale, Retirement Plan – Findlay, and Retirement Plan – Texarkana, all here-in after referred to as the Plans and associated investments of. The Plans are defined benefit pension plans covering substantially all employees of the Company. The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

The Plan entered a trust agreement with Northern Trust Company (the “Current Trustee”) as of June 1, 2017 to act as trustee of the Plan's assets. Prior to June 1, 2017, the Plan had a trust agreement with the Delaware Charter Guarantee & Trust Company d/b/a Principal Trust Company (the “Former Trustee”). Upon change in trustees, the Former Trustee continued to act as a custodian for certain plan assets. The Trustees administer and invest the Plan's assets and income for the benefit of the Plan's participants.

The Plan's participants may be eligible for unreduced monthly pension benefits upon attainment of 30 years of continuous credited service. Participants also may retire earlier than the normal retirement age. Pension benefits for participants with less than 30 years continuous credited service are subject to a reduction based upon the time by which the retirement precedes the participant's attainment of age 62.

The amount of any pension benefit otherwise available may be reduced by certain disability payments (but not payments under the Federal Insurance Contribution Act). The Plan provides certain survivor and disability benefits, and various optional forms of payment, some actuarially reduced.

Eligibility

All employees subject to the collective bargaining agreements between the Company and Local Union #752 of the United Steelworkers of America are eligible for participation in the Plan. The current collective bargaining agreement is effective until January 20, 2019.

1. Description of Plan (continued)

Funding Policy/Contributions

The Plan is funded entirely through contributions made by the Company. The Company contributes such amounts as are deemed necessary on an actuarial basis to provide the Trust with assets sufficient to meet the benefits to be paid to the Plan's participants. The contributions are designed to fund current service costs and to fund prior service costs over periods of ten to twenty years. The Company's contributions for 2017 and 2016 met the minimum funding requirements of ERISA.

Vesting

Participants are vested after five years of continuous credited service. If participants are hired after age 60, they may receive a monthly pension benefit if they later become vested.

Pension Benefits

Participants are entitled to monthly pension benefits equal to the amount specified in the plan agreement multiplied by the years of continuous credited service at time of termination or retirement. If termination occurs prior to eligibility for an immediate pension benefit, vested participants may elect to receive a lump sum distribution in lieu of a deferred pension benefit.

Termination of the Plan

While the Company has not expressed any intent to terminate the Plan or its contributions thereto, it has the right to do so at any time, subject to the provisions of ERISA. In the event of partial or total termination of the Plan, participants' benefits become non-forfeitable.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits, and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC).

Notes to Financial Statements (continued)
December 31, 2017 and 2016

1. Description of Plan (continued)

Termination of the Plan (continued)

In the event the Plan terminates, its available net assets will be allocated to benefits as prescribed by ERISA, generally in the following order:

- a. Certain annuity benefits that former employees or their beneficiaries are receiving or that employees eligible for retirement would have been receiving had they retired.
- b. Other vested benefits insured by the PBGC as discussed below.
- c. All other vested benefits.
- d. All non-vested benefits.

The PBGC guarantees most, but not all, vested retirement benefits and certain disability and survivor's pensions. However, there is a statutory ceiling on the amount of any individual's monthly benefit that PBGC guarantees. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination, whichever comes later. For younger annuitants, or for those who elect to receive their benefits in some form other than a single-life annuity, the corresponding ceilings are actuarially adjusted.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Investments

The Plan's investments are stated at fair value, which equals the quoted net asset values thereof on the last business day of the Plan's year. Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded as of the ex-dividend date.

Administrative Expenses

The administrative expenses of the Plan are paid by the Company.

2. Summary of Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Estimates and assumptions are most significantly utilized in determining the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Subsequent Events

The Plan Sponsor has evaluated subsequent events through October 15, 2018, the date the financial statements were available to be issued.

New Accounting Pronouncements

In February 2017, the Financial Accounting Standards Board (FASB) issued ASU No. 2017-06, Plan Accounting: Defined Benefit Pension Plans (Topic 960); Defined Contribution Pension Plans (Topic 962); Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting (ASU 2017-06). ASU 2017-06 changes reporting and disclosure requirements for plans with a master trust and eliminates redundant disclosures for plans with 401(h) accounts. ASU 2017-06 is effective for the fiscal periods beginning after December 15, 2018 with early adoption permitted. Upon adoption ASU 2017-06 shall be applied retrospectively to all periods presented. Management is currently evaluating the impact this Update will have on the Plan's financial statements.

3. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB Accounting Standards Codification Topic, Fair Value Measurement, are described as follows:

Level 1. Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Cooper Tire & Rubber Company
Hourly Employees' Retirement Plan – Texarkana
Notes to Financial Statements (continued)
December 31, 2017 and 2016

3. Fair Value Measurements (continued)

Level 2. Inputs to the valuation methodology include:

- a. Quoted prices for similar assets or liabilities in active markets;
- b. Quoted prices for identical or similar assets or liabilities in inactive markets;
- c. Inputs other than quoted prices that are observable for the asset or liability;
- d. Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3. Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value in the Master Trust. There have been no changes in the methodologies used at December 31, 2017 and 2016.

Collective Trust Funds: The fair value of the investments in these categories have been estimated using the net asset value per share. The net asset value ("NAV") of these accounts is based on the market value of its underlying investments. The NAV is not a publicly quoted price in an active market.

Pooled Separate
Accounts:

Valued using the NAV per unit provided by the administrator of the fund. The NAV, as provided by the trustees, is used as a practical expedient to estimate fair value. The NAV is not a publicly quoted price in an active market.

Cooper Tire & Rubber Company
Hourly Employees' Retirement Plan – Texarkana
Notes to Financial Statements (continued)
December 31, 2017 and 2016

3. Fair Value Measurements (continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies and assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

In accordance with Subtopic 820-10, the collective trust funds and pooled separate accounts that were measured at the NAV per share (or its equivalent) are not classified in the fair value hierarchy. As a result there are no investments required to be classified in the fair value hierarchy at December 31, 2017 and 2016.

For investments in certain entities that calculate the NAV per share as the investment's fair value measurement, the following table provides an overview, by major classification, of the nature and risks associated with such investments as well as whether it is probable those investments being sold at amounts different from their reported net asset value per share based on redemption restrictions, if any. Total investments in the Master Trust that are direct filing entities and are not required to be disclosed in the following table are \$2,130,846 as of December 31, 2016. All investments in the Master Trust in 2017 are included in the table below.

Investment Category	2017 Fair Value	2016 Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Period Notice

5. Master Trust Information (continued)

Interest and dividends totaling \$2,273,758 and \$5,315,242 for the period from January 1, 2017 through May 31, 2017 and for the year ended December 31, 2016, respectively, are not certified by the Former Trustee.

6. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated May 8, 2017, stating that the written form at the underlying prototype document is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. Although amended since receiving the determination letter, the Plan Administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

7. Related Party Transactions

Certain Plan investments are managed by the Current and Former Trustees and the Current Custodian; therefore, these transactions qualify as party-in-interest transactions. There have been no known prohibited transactions with a party-in-interest.

8. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired employees or their beneficiaries, (b) terminated employees with vested benefits, (c) beneficiaries of employees who have died, and (d) present employees or their beneficiaries. Benefits for active employees under the Plan are based on the employees' years of credited service computed to the nearest completed 1/12 of a year multiplied by the pension amount in effect on the valuation date. Benefits payable under all circumstances are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

An actuary from Principal Financial Group estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Significant actuarial assumptions used in performing the valuations include: (1) interest rate of 6.25% and 6.5% for 2017 and 2016, respectively; (2) mortality based on the IRS Prescribed Mortality – Static Annuitant and IRS Prescribed Mortality – Static Non-annuitant in 2017 and 2016, respectively; (3) retirement age based on a schedule of rates dependent on age in 2017 and 2016; (4) employee turnover calculated based on 2003 Society of Actuaries Small Plan Age Table multiplied by 60% in 2017 and at an annual rate of 4% in 2016; (5) disability pension is based upon 100% of the rates from the 1985 Pension Disability Table in 2017 and 2016; and (6) 85% of the population was considered to be married in 2017 and 2016.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits (see Note 1).

Form of benefit and basis	100% of active participants who terminate before the earliest assumed retirement age are assumed to receive a single sum immediately. Participants who are already terminated on the valuation date are assumed to receive their benefit on the normal form at the assumed retirement age. The lump sum benefit is based on the applicable mortality projected to decrement and the plan's funding target using non-stabilized interest rates, as prescribed.
Methods prescribed by law	
Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target Normal Cost is based on benefits expected to accrue during the current plan year.
Benefit accrual	All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target. The portion based on the plan's definition of accrued benefit. The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement. The benefits included in target normal cost are calculated similarly, by splitting the benefits. The Target Normal Cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.
HCE benefit payment restrictions	A ratio of the plan assets and accrued liability is used to determine if restrictions apply. Assets and accrued liability are as of the valuation date and are reduced by: - any retiree benefit index or floor - amounts for HCEs who were previously restricted - an amount for the retiring HCE The estimated HCE ratio illustrated in this report is based on the market value of plan assets (excluding late deposits) and funding target as of the valuation date. The funding target uses the non-stabilized interest rates as defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods could be used.

RETIREMENT PLAN
EIN 34-4297750 Plan No. 007
Methods selected by plan sponsor

Asset method

The asset valuation method is prescribed by law for plans that elect to use a value other than market value.

For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.

The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.

When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.

Segment rates

24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.

PBGC premium basis

Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 01/01/2014 plan year and the method must be used for five years before a change can be made. Include if a small plan in 2014 or later (and now large).

Segment 1	Segment 2	Segment 3
years 0-5	years 5-20	years 20+
2.04%	4.03%	4.82%

Methods elected by actuary

Retirees

Assets and liabilities for current and future retirees are included.

Vested benefits

A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.

The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality Based on RP-2006 blue collar mortality table projected to future years with historical and assumed mortality improvement (MI) rates using the Principal Mortality Improvement Scale (PFG2012-10).

RP-2006 is a baseline mortality rates table underlying the SOA RP-2014 experience study as of central year of the experience data for 2004-2008 years. The Principal Mortality Improvement scale is based on the SOA MI model RPEC_2014_v2016 and Principal-selected assumption set published November 2016. For detailed rationale please see full [Mortality documentation](#).

Disability mortality based on disabled SOA table.

Interest rate used to value liabilities 6.50%

The expected long-term interest rate used to value ASC 960 liabilities is developed as a weighted average based on the target asset allocation of the plan.

Basis for Lump Sums

Interest rate - Based on the three segment yield curve: 4.15%/4.55%/5.45%.

The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high quality corporate bond yields. According to our most recent study, the long-term expected yields for short/intermediate/long corporate bonds are 4.15%/4.55%/5.45%. For details, see Long-Term Capital Market Assumptions link.

Mortality: We have selected the same mortality assumption for lump sum payments, but with a 50/50 blend of male and female mortality and improvement rates since lump sums are paid using unisex factors.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception - contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.
