The following description of Engineered Profiles, LLC Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering employees of Engineered Profiles, LLC (the "Company") who were employees of Crane Plastics LLC (the "Prior Employer") and participated in the Crane Group Retirement Plan (the "Prior Plan") immediately prior to becoming an employee of the Company on June 1, 2009 pursuant to the sale by the Prior Employer. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Employees become participants in the Plan following completion of the eligibility requirements, as described in the plan agreement, and are fully vested for normal retirement benefits after five years of service. A participant receives one year of vesting service for each plan year in which he or she has credit for 1,000 or more hours of service. Although the Plan was frozen effective August 1, 2009, service after this date will continue to count for purposes of vesting.

Pension Benefits

Eligible employees with five or more years of service are entitled to normal annual pension benefits beginning at the participant's normal retirement age of 65, as described in the Plan. The individual pension benefit is equal to a percentage, as specified in the Plan, of the employee's final average monthly compensation multiplied by the employee's credited service, not to exceed 30 years. Special provisions for retirement at other than the normal retirement age are described in the plan and union agreements, if applicable. Employees with at least 15 years of service may elect early retirement and receive the accrued normal retirement benefits at age 55 or a reduced monthly retirement benefit payable immediately in accordance with the plan agreement. Employees may elect to receive the value of their accumulated plan benefits as a lump-sum distribution upon retirement or termination, or they may elect to receive their benefits as a life annuity payable monthly from retirement.

Contributions

All contributions to the Plan are made by the Company. The Company contributes such amounts, as determined on an actuarial basis, to provide the Plan with assets sufficient to meet the projected benefits to be paid to plan participants and to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA. No participant contributions are permitted.

Payment of Benefits

Distributions are payable upon the retirement, death, disability, or termination of employment in the form of a lump-sum amount equal to the vested value of the participant's accumulated plan benefits, if less than \$5,000, or in various installment annuities.

Administration

The Company is the sponsor of the Plan. The investment committee, as provided in the plan agreement, is the plan administrator and has responsibility for the administration of the Plan. Fifth Third Bank functions as trustee and investment manager. Investment management fees and trustee fees are paid by the Plan in accordance with the plan agreement. Various administrative costs are paid by the Company.

Note 1 - Plan Description (Continued)

Party-in-interest Transactions

Certain plan assets are in investment funds managed by Fifth Third Bank or its affiliates. Fifth Third Bank is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions, as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation

The Plan's investments are stated at fair value.

The U.S. government securities and corporate debt securities are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve, as well as other relevant economic measures. All other investments are valued based on quoted market prices reported in active markets. See Note 6 for additional information.

Benefit Payments

Benefits are recorded when paid.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to:

- (a) Retired or terminated employees or their beneficiaries
- (b) Beneficiaries of employees who have died
- (c) Present employees or their beneficiaries

Benefits are calculated based on active employees' credited years of service multiplied by a specified percentage of their average monthly compensation plus a specified percentage of their average monthly compensation in excess of the Social Security Integration Level.

Benefits provided via annuity contracts are deducted from plan assets and from accumulated plan benefits.

Actuarial Assumptions

The actuarial present value of accumulated plan benefits is determined by an actuary from CBIZ Retirement Plan Services and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at June 30, 2018 are summarized as follows:

Actuarial cost method	Projected unit credit
Assumed rate of return	7.25 percent per annum
Mortality basis	RP-2014 generational mortality table using projection scale MP-2017
Retirement age	65

Engineered Profiles, LLC Retirement Plan

Notes to Financial Statements

June 30, 2018 and 2017

Note 2 - Summary of Significant Accounting Policies (Continued)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Actuarial Assumption Change Since Prior Valuation

The mortality assumption was changed from RP-2014 generational mortality table using projection scale MP-2016 to RP-2014 generational mortality table using projection scale MP-2017.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties

Contributions to the Plan and the accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the financial statements.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including December 4, 2018, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Information

Fifth Third Bank (the "Trustee") holds the Plan's investments and executes all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements, supplemental schedule of assets held at end of year, and supplemental schedule of reportable transactions are based solely on information certified by the Trustee.

Note 4 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries, CBIZ Retirement Plan Services. The calculation of the actuarial present value of accumulated plan benefits attributable to participants in the Plan, which was made as of and for the year ended June 30, 2018, the most recent actuarial valuation, is as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:

Participants currently receiving benefit payments
Other vested participants

\$ 1,771,156
5,197,722

Total vested benefits

6,968,878

Nonvested benefits

Total benefit obligations

\$ 7,012,426

Engineered Profiles, LLC Retirement Plan

Notes to Financial Statements

June 30, 2018 and 2017

Note 4 - Accumulated Plan Benefits (Continued)

A summary of significant changes in the actuarial present value of accumulated plan benefits during the year ended June 30, 2018 is as follows:

Actuarial present value of accumulated plan benefits - Beginning of year	\$ 7,629,339
Increase (decrease) during the year attributable to:	
Interest due to the decrease in the discount period	497,651
Benefits paid	(1,530,369)
Changes in actuarial assumptions	43,206
Other actuarial gains and losses	372,599
Net decrease	(616,913)
Actuarial present value of accumulated plan benefits - End of year	\$ 7,012,426

Note 5 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at June 30, 2018 and 2017.

Level 1

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

ACTUARIAL ASSUMPTIONS

Funding Discount Rates

IRS-Prescribed Three-Segment Rates, for the fourth month prior to the valuation date (Mar).

	Non-Stabilized	Limited to 25-Year Corridor
Segment I:	1.62%	4.16%
Segment II:	3.80%	5.72%
Segment III:	4.75%	6.48%

The "Limited to 25 Year Corridor" rates are adjusted by the applicable maximum and applicable minimum percentages of the 25-year average segment rates, as set forth in the Highway and Transportation Funding Act of 2014 ('HATFA-14') for use in Minimum Required Contribution calculations. The IRS Maximum Deductible Limit Calculations use the rates from the "Non-Stabilized" column above.

Effective Interest Rate

The Effective Interest Rate (EIR) for the 2017 Plan Year was 5.93%. For the prior Plan year, the EIR was 6.12%.

The EIR is the single rate of interest which, if used to determine the Funding Target, would equal the Funding Target determined using the plan sponsor's above elected discount rates. The EIR is used to discount contributions for minimum funding requirements and to accumulate excess contributions to the end of the year.

PBGC Variable Premium Discount Rates

The segment rates used to calculate the PBGC Variable Rate Premiums with the Standard Premium Funding Target and/or Alternative Premium Funding Target are as follows:

	Standard	Alternative
Segment I:	1.96%	1.62%
Segment II:	3.60%	3.80%
Segment III:	4.39%	4.75%

The Standard Premium Funding Target rates are based on rates for the month prior to the valuation, and the Alternative Premium Funding Target rates are based on non-stabilized funding discount rates for the current valuation.

Healthy Participant Mortality

IRS Section 1.430(h)(3)-1 prescribed separate static annuitant and non-annuitant mortality tables. These tables are based on the RP-2000 mortality tables projected with mortality improvement to the valuation year plus 7 years for annuitants and plus 15 years for non-annuitants.

Expected Return on Assets

The Expected Return on Assets (EROA) used in the calculation of the Actuarial Value of Assets is the lesser of a) or b), below:

a) The plan sponsor's expected long-term rate of return on assets based on policy trust allocations; or

b) The third segment rate in the IRS-prescribed three-segment rate assumption, based on the elections made by the Plan Sponsor for minimum funding purposes.

ACTUARIAL METHODS

Minimum Funding Cost Method

The actuarial cost method used to determine the liabilities for minimum funding calculations is the Traditional Unit Credit method. The objective under this method is to fund each participant's benefits under the plan as they accrue. Under this cost method, the actuarial accrued liability is the sum of the individual accrued liabilities for all participants and the normal cost is the sum of the individual normal costs for each participant. The individual accrued liability for a participant is the present value of the accrued benefit as of the valuation date taking into account service and/or pay as of the valuation date. The individual normal cost for a participant is the present value of the benefit expected to accrue in the plan year being valued.

If a plan is frozen, there is no normal cost attributable to benefit accruals.

Maximum deductible contribution method

The actuarial cost method used to determine the liabilities for maximum deductible calculations is the Projected Unit Credit method. The objective under this method is to fund each participant's benefits under the plan as they accrue, taking into consideration expected future compensation increases. Under this cost method, the actuarial accrued liability is the sum of the individual accrued liabilities for all participants and the normal cost is the sum of the individual normal costs for all participant. The individual accrued liability for a participant is the sum of 1) the present value of the accrued benefit earned as of the valuation date taking into account service and/or pay as of the valuation date; plus 2) the present value of the accrued benefit expected to be earned because of any expected future compensation increases.

The individual normal cost for a participant is the sum of the present value of the benefit expected to accrue in the plan year being valued taking into account any expected future compensation increases.

Asset Method

We used financial data submitted by the trustee as of the valuation date without further audit. This information was not be verified by a plan's actuary. We have reviewed the information for internal consistency, and we have no reason to doubt is substantial accuracy.

Changes in methods since the prior valuation

None.
