Independent Auditors' Report

To the Retirement Committee of
Case Western Reserve University
Employees' Retirement Plan B
Cleveland, Ohio

We have audited the accompanying financial statements of Case Western Reserve University Employees' Retirement Plan B (the "Plan"), which comprise the statements of net assets available for benefits as of June 30, 2018 and 2017, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of June 30, 2018 and 2017, and the changes in its net assets available for benefits for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of assets (held at end of year) as of June 30, 2018 and reportable transactions for the year ended June 30, 2018 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

CASE WESTERN RESERVE UNIVERSITY EMPLOYEES' RETIREMENT PLAN B

NOTES TO FINANCIAL STATEMENTS

Note 1. Description of Plan

Information about the Case Western Reserve University Employees' Retirement Plan B (the "Plan") including present and future benefits, vesting, and the Pension Benefit Guaranty Corporation's ("PBGC") benefit guarantee provisions is contained in the Summary Plan Description. Copies of this pamphlet are available from the Retirement Oversight Committee.

General – The Plan is a defined benefit plan covering substantially all hourly and certain salaried employees of Case Western Reserve University (the "University"), which provides pension and disability benefits for such employees and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Plan was amended to close the Plan to new entrants effective July 1, 2015. Employees hired prior to July 1, 2015 will continue to accrue benefits in accordance with the Plan. Effective July 1, 1992, the Plan was amended and redesigned as a cash balance defined benefit plan whereby the University credits 7% of a participant's annual compensation to the participant's account. The balance maintained in that account also earns an annual interest credit. Participants active prior to July 1, 1992 are entitled to a benefit that is calculated based upon years of service multiplied by a factor, which is determined by the years of active participation.

Participants are generally eligible for normal retirement benefit payments upon reaching age 65. The amount of individual pension benefits is based upon one or more factors including compensation, years of service, and age, as defined by the Plan. The Plan also provides for the payment of early retirement and deferred vested retirement benefits as well as the optional payment of benefits to the surviving spouse or beneficiary of a participant.

Participants will generally receive benefits under an annuity arrangement or a lump-sum option. Participants who are entitled to a cash balance benefit may also elect to receive such benefit in a lump-sum.

Funding – The University has agreed to voluntarily contribute such amounts as necessary to provide assets sufficient to meet the benefits to be paid to Plan participants. The University contributes amounts sufficient to annually fund the Plan's current service cost and the initial past service cost plus interest thereon over a period of 5 to 40 years, plus such amounts as the University may determine to be appropriate and to meet the ERISA minimum funding requirements.

In February 2016, the Board approved certain derisking efforts by the University related to the Plan in which certain eligible participants were offered one-time lump-sum payouts. These eligible participants, who were non-current employees with lump-sum values of their Plan accrued benefits below a certain dollar threshold, received the distribution by June 30, 2016. Total lump-sum payouts under this election totaled approximately \$9 million.

Plan Termination – The University has the right under the Plan to discontinue contributions at any time and to terminate the Plan. Should the Plan terminate at some future time, its net assets may not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of these benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC's benefit guarantee; other benefits may not be provided for at all.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Note 2. Significant Accounting Policies

Basis of Accounting – The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("GAAP").

New Accounting Pronouncement – In May 2015, the FASB issued the disclosure changes required by ASU 2015-07: *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. Investments that are measured using net asset value will no longer be categorized in the fair value hierarchy. This standard is intended to reduce the diversity in practice that currently exists with respect to the categorization of these investments. The Plan implemented the standard during the year ended June 30, 2018 and, accordingly, applied the new guidance retrospectively to the fiscal year ended June 30, 2017.

Use of Estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts of assets, liabilities, and changes therein; disclosures of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition – Plan investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's management determines the Plan's valuation policies utilizing information provided by TIAA-CREF (the "Custodian"). See Note 5 for a discussion of fair value measurements.

Purchases and sales of investments are recorded on a trade-date basis. The cost of securities sold is determined by the average cost method. Interest is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Risks and Uncertainties – The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Contributions to the Plan and the actuarial present value of accumulated plan benefits are determined based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions could occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

Payment of Benefits – Benefit payments to participants are recorded upon distribution.

Administrative Expenses – Actuarial and other fees are charged directly to the Plan as administrative expenses. Other administrative expenses are paid by the University or the Plan at the discretion of the University.

Subsequent Events – The Plan has evaluated subsequent events and transactions for potential recognition and presentation through the date the financial statements were available to be issued, April 1, 2019.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Note 3. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provision to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are accumulated based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of annual benefit accruals as of the benefit information date. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was estimated by the Plan's independent actuaries. This amount results from applying certain actuarial assumptions to plan participant data to determine the accumulated plan benefits earned to date by the participants. The present value reflects the time value of money, through discounts for interest, and the probability of payment recognizing decrements such as for death, disability, withdrawal, or retirement between the valuation date and the expected dates of payment.

The accumulated plan benefit information as of July 1, 2017 and 2016 is as follows:

	<u>2017</u>	<u>2016</u>
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving payments	\$ 26,816,960	\$ 25,547,509
Other participants	<u>147,387,466</u>	<u>134,551,433</u>
	174,204,426	160,098,942
Nonvested benefits	<u>1,037,504</u>	<u>1,241,517</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 175,241,930</u>	<u>\$ 161,340,459</u>

Changes in the accumulated plan benefits for the year ended June 30, 2017 are as follows:

Actuarial present value of accumulated plan benefits at beginning of year	\$ 161,340,459
Changes during the year due to:	
Benefits earned	4,668,567
Actuarial losses	4,855,259

Note 3. Accumulated Plan Benefits (Continued)

The significant assumptions underlying the actuarial computations are as follows:

Rate of return on investments	July 1, 2017: 7.5% July 1, 2016: 7.5%
Discount rate for benefit obligations	July 1, 2017: 4.1% July 1, 2016: 3.9%
Interest credit	The greater of 6.00% per annum or the 5-year treasury bill rate at the end of the prior plan year
Mortality table	July 1, 2017: RP-2014 Employee Mortality with MP-2016 generational projection July 1, 2016: RP-2014 Employee Mortality with MP-2015 generational projection
Retirement	Graded scale - the Plan uses age-graded rates ranging from 1% at ages 55-60 to 100% at age 79
Form of payment	Life annuity for pre-July 1, 1992 accruals and the greater of lump-sum or cash balance with 50% lump sum and 50% life annuity for post-July 1, 1992 accruals

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 4. Investments

Investments classified as alternative investments represent holdings of investment "feeder" funds. These funds themselves invest in offshore investment funds which hold underlying equity interests and various derivative instruments. Alternative investments comprise approximately 30% and 32% of the Plan's total investments at June 30, 2018 and 2017, respectively.

These investment strategies often result in holdings that are not generally liquid, require a notice period for withdrawal, and are valued at fair value from reports provided by investment managers. Because of the inherent uncertainty of the valuations, the fair values may differ significantly from values that would have been used had a ready market for these investments existed, and the differences could be material.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Note 5. Fair Value Measurements

The Plan estimates the fair value of financial instruments using available market information and other generally accepted valuation methodologies. The inputs used to measure fair value are classified into three levels:

Level 1 – Quoted market prices in active markets for identical assets and liabilities

Level 2 – Observable market-based inputs or unobservable inputs that are corroborated by market data

Level 3 – Unobservable inputs in which little or no market data exists

The following is a description of the valuation methodology used for investments of the Plan measured at fair value at June 30, 2018 and 2017:

- Money market and mutual funds – Except for the TIAA-CREF Inflation Linked Bond, money market and mutual funds are valued at the quoted net asset values of shares held by the Plan at the end of the year, which are considered to be Level 1 inputs. The TIAA-CREF Inflation Linked Bond is reported at estimated fair value. While they are not available for sale on any securities exchange, the underlying investments consist of fixed income instruments. These are considered to be Level 2 inputs.
- Insurance company pooled separate account – The TIAA Real Estate Account's value is principally derived from the market value appraisals of the underlying real estate holdings or other real estate-related investments. This account is valued at fair value using the net asset value ("NAV") per share (or its equivalent), therefore, it has not been classified in the fair value hierarchy.
- Guaranteed investment contract – The investment in the guaranteed investment contract is reported at fair value as determined by TIAA-CREF. This value represents contributions made under the contracts, plus earnings, less participant withdrawals and administrative expenses and is determined to be fair value as it is the transfer price that would be used in an orderly transaction between market participants at the measurement date. It is classified as Level 3 as there are no quoted prices or other observable inputs for pricing. Accordingly, the Plan does not use separate quantitative information to value the contract. In determining the reasonableness of the value, the plan administrator evaluates a variety of factors including review of existing contracts, economic conditions, and overall credit ratings.
- Alternative investments – The Plan has interests in investment funds structured as limited partnerships. These accounts are valued at fair value using the NAV per share (or its equivalent), therefore, they have not been classified in the fair value hierarchy.

Note 5. Fair Value Measurements (Continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. There have been no changes in the methodologies used from 2017 to 2018. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy as determined by Plan management, the Plan's investments at fair value as of June 30, 2018 and 2017:

Assets at Fair Value as of June 30, 2018

Note 5. Fair Value Measurements (Continued)

The table below sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the years ended June 30, 2018 and 2017:

	2018	2017
	Guaranteed Investment Contract	Guaranteed Investment Contract
Balance, beginning of year	\$ 3,693,181	\$ 3,736,024
Interest	100,691	95,202
Purchases, net of fees	6,500,000	6,000,000
Sales	(6,998,127)	(6,138,045)
Balance, end of year	<u>\$ 3,295,745</u>	<u>\$ 3,693,181</u>

The Plan values its alternative investments and the real estate account at amounts reported by the investment manager and as validated through consideration of the audited financial statements of the investments. Accordingly, the Plan does not use separate quantitative information to value the investments.

The following table summarizes the investment strategies of these investments as of June 30, 2018 and 2017:

Note 5. Fair Value Measurements (Continued)

(a) These funds invest in a variety of asset classes including currencies, fixed income securities, equities, pooled investment vehicles, and derivative instruments. Certain investments are valued based upon pricing in active markets. Other asset valuations, which are developed by the general partners that manage the partnerships, are based on proprietary appraisals, the application of public market multiples to private company cash flows, and the utilization of market transactions that provide valuation information for comparable companies and other methods and are developed by the general partners that manage the partnerships. Due to the private natures of these investments, pricing inputs are not readily observable and therefore, are valued using NAV.

(b) The TIAA Real Estate Account's value is principally derived from the market value appraisals of the underlying real estate holdings or other real-estate related investments. The TIAA general account provides this real estate fund with a liquidity guarantee to ensure there are funds to meet redemption, transfer or cash withdrawal requests.

Note 6. Guaranteed Investment Contract

The Plan has entered into a guarantee investment contract with TIAA-CREF. Contributions made under this contract are maintained by TIAA-CREF in an unallocated fund to which it adds interest at a guaranteed rate. At the direction of the Plan's administrator, a single premium to buy an annuity for a retiring participant is withdrawn by TIAA-CREF from the unallocated fund. Purchased annuities are contracts under which TIAA-CREF is obligated to pay benefits to named participants or their beneficiaries.

Funds under the guaranteed investment contract that have been allocated and applied to purchase annuities, which obligate TIAA-CREF to pay the related pension benefits, are excluded from plan assets.

Note 7. Party-in-Interest Transactions

The Plan has invested in shares of investments managed by TIAA-CREF, the Plan's Custodian, as well as investments managed by Bridgewater Associates, AQR Capital Management, Elliot Management Group, THL Credit, and Benefit Street Partners, the Plan's Investment Managers. These parties are fiduciaries as defined by the Plan and, therefore, these transactions qualify as party-in-interest. Fees paid by the Plan for trustee, custodial, and investment management services amounted to \$64,924 and \$60,191 for the years ended June 30, 2018 and 2017, respectively.

Note 8. Income Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Plan by a letter dated April 5, 2014, that the Plan is designed and in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since the IRS ruling; however, the plan administrator believes the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC.

Note 8. Income Tax Status (Continued)

Included in the Plan's underlying investments are units of limited partnerships. In any given year, certain of these partnerships may generate unrelated business income ("UBI") to the Plan. In turn, the Plan would be liable for any income tax resulting from these investments after offsetting any related expenses and/or investment loss carry-forward amounts. No UBI was generated from these investments in either of the years ended June 30, 2018 or 2017.

The plan administrator has analyzed tax positions taken by the Plan and has concluded that, as of June 30, 2018, there are no uncertain positions taken or expected to be taken that would require such recognition or disclosure in the financial statements.

Form of payment

Active Participants

Pre-July 1, 1992 benefit: Life annuity.

Prior plan benefit for service after July 1, 1992 is converted to a lump sum and compared to the cash balance account. The greater of the two benefits is then valued with 50% electing lump sum and 50% electing life annuity.

Participants with Deferred Benefit

Life annuity commencing at age 65. The post July 1, 1992 cash balance account is converted to an annuity by projecting to age 65 and dividing by 12.

Percent married

100%.

Spouse age

Wives are assumed to be three years younger than husband.

Covered pay

Base salary exclusive of overtime.

Administrative expenses

\$3,130,993.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets for determining minimum required contributions	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22).
Benefits not valued	Benefits for employees who have terminated without vested rights but may be rehired in time to have benefits restored were not valued.

Assumptions Rationale - Significant Economic Assumptions for Contributions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The plan credits interest to cash balance accounts using the 5-year Treasury rate, but no less than 6.00%. A rate of 6.00% was assumed, based on current conditions, and future economic expectations.
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate. This adjustment results in a fixed assumption of 5.25%, because the plan's fixed minimum conversion rate is expected to always produce the larger lump sum, even when the variability of IRC 417(e) assumptions is considered.
Rates of increase in:	
■ Compensation	Assumed increases were chosen by the plan sponsor and, as required by U.S. GAAP they represent an estimate of future experience.

SCHEDULE SB ATTACHMENTS

- National average wages (NAW) (e.g., Social Security wage bases) The assumed NAW is based on assumed CPI as shown below, plus assumed increases in real wages (the portion of GDP increases that becomes part of wages). Such assumed future increases in real wages are based on a combination of historical averages and an expectation that the future rates will be lower (higher) than historical averages.
- Increases in statutory limits (CPI) The assumed CPI is based on a combination of historical average CPI and current conditions. The final assumption represents a composite of current rates and long term expected rates.

Administrative expenses Administrative expenses are estimated by determining the expected actual expenses for the coming year, reflecting items like expected PBGC premiums and the actual expenses paid from the trust the preceding year.

Source of Prescribed Methods

Funding methods The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Accounting methods The methods used for accounting purposes as described in Appendix A, including the method of determining the market-related value of plan assets, are “prescribed methods set by another party”, as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
