The weighted average retirement age is equal to the normal retirement age of 68 .

List the rate of retirement at each age and describe the methodology used to compute the weighted average retirement age, including a description of the weight applied at each potential retirement age.
The Normal Retirement Age (NRA) is defined in the Plan Provisions as the later of age 65 and 5 years of participation.

The assumed probability of retirement at the older of NRA or attained age at the end of the plan year, is 100%, and 0% at all other ages.

The Average Retirement Age is the mean of the NRAs for all plan participants.
