Report of Independent Auditors

To the Administrator of Xerox Corporation Retirement Income Guarantee Plan:

We have audited the accompanying financial statements of Xerox Corporation Retirement Income Guarantee Plan (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2016 and December 31, 2015, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2016 and changes therein for the year then ended and its financial status as of December 31, 2015, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

XEROX CORPORATION RETIREMENT INCOME GUARANTEE PLAN
NOTES TO FINANCIAL STATEMENTS
Year Ended December 31, 2016
(in thousands, except where otherwise noted)

Note 1 - Description of the Plan

The following description of the Xerox Corporation Retirement Income Guarantee Plan (the "Plan") provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

General

The Plan is a non-contributory defined benefit pension plan that provides benefits and covers substantially all full and part-time U.S. employees of Xerox Corporation (the "Company") and participating subsidiaries who were hired before January 1, 2005, except those covered by a collective bargaining agreement unless that agreement calls for participation in the Plan. The Plan was last amended on November 29, 2016.

As discussed in Note 2 - Summary of Significant Accounting Policies and Note 7 - Master Trust, plan assets are held in The Xerox Trust Agreement to Fund Retirement Plans (the "Master Trust").

The Plan received a favorable IRS determination letter dated April 18, 2014.

Plan Benefits

The Plan provides participants who commenced employment with the Company prior to January 1, 2003 with the greater of the following benefits:

(i) 1.4% Retirement Income Guarantee Plan ("RIGP") Formula - This is a monthly benefit determined by multiplying 0.117% (1.4% annual benefit divided by twelve) times the average pay for the five highest calendar years of eligible compensation, multiplied by the number of full and fractional years of participation, up to thirty years, less: (a) the vested accrued monthly benefit which would be payable as a Life Annuity from Company contributions under Equitable Group Annuity Contract No. AC-158 assuming commencement of such benefit at the same time as the commencement of benefits under the Plan; (b) the vested accrued monthly benefit which would be payable as a Life Annuity under any TIAA-CREF Policy to which the Company or any of its predecessors made contributions assuming commencement of such benefit at the same time as the commencement of benefits under the Plan; (c) the vested accrued monthly benefit which would be payable as a Life Annuity under the Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards assuming commencement of such benefit at the same time as the commencement of benefits under the Plan to the extent that assets have not been transferred from the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards plan to the Plan; and (d) the vested accrued monthly benefit which would be payable as a Life Annuity from the respective central pension funds maintained by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, the International Printing and Graphics Communications Union, the Columbus Typographical Union and the Graphic Arts International Union and 50% of the vested accrued monthly benefit which would be payable as a Life Annuity from the central pension funds maintained by the International Union of Operating Engineering.

(ii) 1.0% RIGP Formula - This is a monthly benefit determined by multiplying 0.083% (1.0% annual benefit divided by twelve) times the average pay for the five highest calendar years of compensation, multiplied by the member's full and fractional years of participation, less: (a) the vested accrued monthly benefit which would be payable as a Life Annuity from Company contributions under Equitable Group Annuity Contract No. AC-158 assuming commencement of such benefit at the same time as the commencement of benefits under the Plan; (b) the vested accrued monthly benefit which would be payable as a Life Annuity under any TIAA-CREF Policy to which the Company or any of its predecessors made contributions assuming commencement of such benefit at the same time as the commencement of benefits under the Plan; (c) the vested accrued monthly benefit which would be payable as a Life Annuity under the Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards assuming commencement of such benefit at the same time as the commencement of benefits under the Plan to the extent that assets have not been transferred from the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards plan to the Plan; and (d) the vested accrued

monthly benefit which would be payable as a Life Annuity from the respective central pension funds maintained by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, the International Printing and Graphics Communications Union, the Columbus Typographical Union and the Graphic Arts International Union and 50% of the vested accrued monthly benefit which would be payable as a Life Annuity from the central pension funds maintained by the International Union of Operating Engineering.

Participants with fewer than forty-two years of service as of January 1, 2009, with respect to benefits accrued after November 30, 2009, will not accrue any further benefits under the 1.0% RIGP Formula.

(iii) Transitional Retirement Account ("TRA") - Effective January 1, 1990, the active employees' retirement accounts under the Xerox Corporation Profit Sharing Retirement and Savings Plan, renamed in 2001 to the Xerox Corporation Savings Plan, were transferred to the Plan and renamed TRAs. The TRA balances change based upon subsequent investment results of the funds in which they are invested. As further described in Note 4 - Assets Available to Pay Accumulated Plan Benefits in Excess of Employees' TRAs, the TRAs are fully funded by assets that have been specifically allocated for this purpose ("TRA assets").

(iv) Cash Balance Retirement Account ("CBRA") - Effective January 1, 1990, CBRA accounts were established and credited with a notational amount equal to the employee's retirement account balance under the Xerox Corporation Profit Sharing Retirement and Savings Plan, renamed in 2001 to the Xerox Corporation Savings Plan. The notational value of the CBRA account grows by crediting the account daily with interest earned at a fixed annual rate. This annual crediting rate, which is determined before the beginning of the year and varies from year to year, is based upon the average effective yield of the one-year Constant Maturity Treasury as of the first business day of each of the twelve months of the preceding calendar year (as published by the Federal Reserve Board), plus 1%. The CBRAs are not funded by assets specifically designated for this benefit.

Participants who commenced employment with the Company between January 1, 2003 and December 31, 2004 are eligible for the CBRA benefit only. Individuals who commenced employment with the Company on or after January 1, 2005 are not eligible to participate in the Plan. Employees who are rehired by the Company and who begin employment on or after January 1, 2007 are not eligible to participate in the Plan.

Effective January 1, 2013, the RIGP formula benefit as described in subsections (i) and (ii) and CBRA pay credits described in subsection (iv) were frozen. For active plan participants whose terms of employment are governed by a collective bargaining agreement (i.e. union employees), new CBRA accounts (the "New CBRAs") were established as of January 1, 2013 with an opening balance of zero. The New CBRAs are credited annually with: (a) an amount equal to 4% of the participant's eligible compensation, as defined in the Plan; and (b) daily interest earned at a fixed annual crediting rate. This annual crediting rate, which is determined before the beginning of the year and varies from year to year, is based upon the average effective yield of the one-year Constant Maturity Treasury as of the first business day of each of the twelve months of the preceding year (as published by the Federal Reserve Board), plus 1%. The new CBRAs are not funded by assets specifically designated for this benefit.

The RIGP Unallocated portion of the Plan is comprised of assets in excess of those specifically allocated to fund the TRA accounts. This portion of the Plan funds the benefits described in subsections (i), (ii) and (iv) above.

Plan Termination

Although it has not expressed any intention to do so, the Company expressly reserves the right under the Plan to terminate the Plan at any time. In the event the Plan terminates, the TRA assets are reserved to fully fund the TRAs. The remaining net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated: (i) vested benefits insured by the Pension Benefit Guaranty Corporation (the "PBGC") up to the applicable limitations (discussed below); (ii) vested benefits not insured by the PBGC; and (iii) all non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are insured by the PBGC at the level in effect on the date of the Plan's termination. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Vesting

Prior to January 1, 2008, participants in the Plan became 100% vested in their calculated retirement benefits upon completing five years of service or attaining age sixty-five. Participants in the Plan are fully vested in their RIGP benefits if they are in Company employment on or after January 1, 2008.

Administration

The Plan administrator is a committee whose members are appointed by the Vice President of Human Resources of the Company. The trustee of the Plan is State Street Bank and Trust Company (the "Trustee"). The Plan's record keeper is Conduent Human Resources Services (formerly operating as Xerox HR Solutions, LLC).

Benefit Payments

Benefit payments are paid directly by the Plan and include payments relating to the TRA and the RIGP Unallocated portion of the Plan. The CBRA benefits are paid from the RIGP Unallocated portion of the Plan. See Note 4 - Assets Available to Pay Accumulated Plan Benefits in Excess of Employees' TRAs for further information on TRA payments.

Administrative Expenses

Certain administrative expenses, such as Trustee, record keeping, and investment manager fees are paid by the Master Trust and are netted against Master Trust investment income (loss). The Plan pays legal and audit fees, PBGC premiums and actuarial fees, as well as administrative expenses: (i) related to salaries of Company employees responsible for Plan administration; (ii) paid to the Trustee; and (iii) paid to certain funds managed by an affiliate of the Trustee and the investment manager. Certain other administrative expenses are paid by the Company and are not included in these financial statements.

Audits

The Plan is subject to routine audits by government agencies, including the U.S. Department of Labor (the "DOL"). The Plan is currently under examination by the DOL, and the Company does not expect the results of this audit to have a material impact on the Plan's financial statements. Refer to Note 6 - Tax Status for information regarding audits by taxing jurisdictions.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Benefit Payments

Benefit payments are recorded when paid.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect: (i) the reported amounts of assets, liabilities and accumulated benefits, changes therein, and disclosure of contingent assets and liabilities as of the date of the financial statements; and (ii) the reported amounts of revenue and expenses during the reporting period. Accordingly, actual results could differ from these estimates.

Basis of Presentation

The assets of the Plan are held in the Master Trust. The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust, plus contributions and allocated investment income (loss), less distributions and allocated administrative expenses. For financial reporting purposes, income or loss on Master Trust assets, any realized or unrealized gains or losses on such assets, and expenses in the Master Trust are allocated to the Plan based on the Plan's balances.

The Master Trust holds assets for other Company-sponsored plans, some of which may be defined benefit plans and some defined contribution plans. Because the Plan's interest in the Master Trust is not based on participant investment options, such as those offered by the defined contribution plans, there are certain Master Trust investments in which the Plan does not participate.

Valuation of Investments and Income Recognition

The Plan's investment in the Master Trust is recorded at an amount equal to the Plan's interest in the underlying investments of the Master Trust. Investments of the Master Trust are stated at fair value. Shares of registered investment company funds are valued at the net asset value as reported by the fund managers at year-end. Common and preferred stock are stated at fair value based on published market closing prices. Fixed income investments are valued on the basis of valuations furnished by Company-approved independent pricing services. These services determine valuations for normal institutional-size trading units of such securities using valuation models or matrix pricing, which incorporates yield and/or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and quotations from security dealers to determine current value. If these valuations are deemed to be either not reliable or not readily available, the fair value will be determined in good faith by the Company. The fair value of the common and collective trust funds are valued at the net asset value on the last business day of the year. Limited partnerships, including real estate trusts, are valued at estimated fair value based on fair value as reported in their audited financial statements, as well as information received from the investment adviser. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Risks and Uncertainties

Investments are exposed to various risks, such as interest rate and market risk. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in value of investments in the near term could materially affect the amounts reported in the Statement of Net Assets Available for Benefits and the Statement of Changes in Net Assets Available for Benefits.

The Master Trust invests a portion of its assets in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage-backed securities. The value, liquidity, and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies and/or defaults and may be adversely affected by shifts in the market's perception of the issuers, including the issuers' creditworthiness. Early repayment of principal on some mortgage-related securities may expose the Plan to a lower rate of return upon reinvestment of the principal.

The Master Trust also invests in foreign securities. Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

New Accounting Standards

In May 2015, the Financial Accounting Standards Board (FASB) issued ASU 2015-07, *Fair Value Measurement (Topic 820) Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. ASU 2015-07 removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. This standard impacts supplementary disclosures only, and therefore does not materially impact the Plan's financial statements. ASU 2015-07 is effective for the fiscal year ending December 31, 2016, thus the notes to the Plan's financial statements reflect the adoption and retrospective application of this standard.

In February 2017, the FASB issued ASU 2017-06, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting (a consensus of the Emerging Issues Task Force)*. ASU 2017-06 requires a plan's interest in master trust balances and activities to be presented on the face of the plan's financial statements, and requires additional disclosures related to master trust assets, liabilities, and investments. ASU 2017-06 is effective for the fiscal year ending December 31, 2019, and the Company is currently evaluating the impact of this ASU on the Plan's financial statements.

Note 3 - Actuarial Present Value of Accumulated Plan Benefits in Excess of Employees' TRAs

Accumulated plan benefits are estimated future benefit payments attributable to service rendered to date in excess of an employee's TRA assets. Such accumulated benefits arise when an employee's RIGP formula or CBRA benefit exceeds the employee's TRA. Accumulated plan benefits include benefits expected to be paid to: (i) retired or terminated employees or their beneficiaries; (ii) beneficiaries of employees who have died; and (iii) current employees upon termination or retirement, or their beneficiaries upon the employee's death.

With respect to the RIGP formula benefit, which is based on the highest average pay, the accumulated plan benefits for active employees are based upon the highest five-year average pay prior to the date the benefit information is presented.

Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included in accumulated plan benefits, to the extent that they are deemed attributable to employee service rendered as of the valuation date.

The actuarial present value of accumulated plan benefits in excess of employees' TRAs is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of death, disability or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2015 and 2014 were:

Mortality Rates: As of December 31, 2015: for lump sums payable before 2018, the applicable Section 417(e) (3) mortality projected with past improvements; for lump sums payable during 2018 and beyond, the unisex version of the RP-2014 base tables rolled back from 2014 (the base year of the table) to 2006 (the central year of the underlying SOA study) according to Scale MP-2014, and then projected forward from 2006 with future mortality improvements according to Scale MP-2016; and for non-lump sum mortality, the RP-2014 base tables rolled back from 2014 (the base year of the underlying SOA study) according to Scale MP-2014, and then projected forward from 2006 with future mortality improvements according to Scale MP-2016.

As of December 31, 2014: for lump sums payable before 2017, the applicable Section 417(e)(3) mortality projected with past improvements; for lump sums payable during 2017 and beyond, the aggregate RP-2014 Mortality, blended 50% male / 50% female, and projected with Scale MP-2015; and for non-lump sum mortality, the RP-2014 Mortality for Employees and Healthy Annuitants (with a fully generational projection using Scale MP-2015).

Retirement Age: The average retirement age for active participants is based on probability tables for participants with less than 30 years of service and participants with 30 or more years of service (probabilities are calculated for retirement ages ranging from 55 to 70). For terminated vested participants, 50% of participants are assumed to retire within one year of termination; all other participants are assumed to retire at age 63. As of December 31, 2015, the average retirement age ranges from 61.4 for retirements occurring in 2016 to 62.5 for retirements occurring in 2021 and beyond. As of December 31, 2014, the average was 62.9.

Interest Rate: 7.25% (net of assumed administrative expenses of 0.25%), as of December 31, 2015 and 2014.

Lump Sum Interest Rate: 6.0% as of December 31, 2015 and 2014.

Cash Balance Interest Crediting Rate: 4.25% as of December 31, 2015 and 2014.

Assumed Percentage Married: 70% of employees are assumed to be married as of December 31, 2015 and 2014. Males are assumed to be 3 years older than their spouses.

Assumed Percentage Electing Lump Sums: 85% as of December 31, 2015 and 2014.

The actuarial present value of accumulated plan benefits in excess of employees' TRAs as of December 31, 2015 is as follows:

Vested benefits:	
Current retirees	\$ 199,620
Participants with deferred benefits	—
Other participants	1,456,272

Beginning of year	1,625,504	1,686,300
End of year	\$ 2,283,772	\$ 1,625,504

Note 5 - Funding

The Plan is in compliance with the minimum funding standards of ERISA. There were contributions to the Plan of \$613,000 and \$120,900 for the years ended December 31, 2016 and 2015, respectively.

Note 6 - Tax Status

The Plan obtained its latest determination letter from the Internal Revenue Service (the "IRS") on April 18, 2014, indicating that the Plan, as designed, was in compliance with the applicable requirements of the Internal Revenue Code (the "IRC"). The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan, as currently designed and operated, is in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2016, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements.

The Plan is subject to routine audits by taxing jurisdictions, and is currently under examination by the IRS for its taxable year ended December 31, 2014. The Company does not expect the results of this audit to have a material impact on the Plan's financial statements or tax status. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2013.

Note 7 - Master Trust

As discussed in Note 2, the Plan participates in the Master Trust. The Trustee holds the Master Trust's investment assets, provides administrative functions for each of the Plans participating in the Master Trust, and executes investment transactions as directed by participants.

The following Xerox employee benefit plans represent the following percentages in the net assets of the Master Trust, for the year ended December 31 :

	2016	2015
Xerox Corporation Savings Plan	57.9%	57.6%
Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards	3.1%	3.1%
Xerox Corporation Retirement Income Guarantee Plan	36.3%	36.5%
Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards	2.7%	2.8%
	100.0%	100.0%

Investment Strategy Fiduciary

The named fiduciary with respect to the overall investment strategy for the Master Trust investments, along with all other day to day fiduciary investment responsibilities, is the Xerox Retirement Investment Committee (the "XRIC"). The Xerox Corporate Treasurer chairs the XRIC, which is composed of corporate members who oversee the management of the funds on a regular basis.

Securities Lending

The Master Trust is not restricted from lending securities to other qualified financial institutions, provided such loans are callable at any time and are at all times fully collateralized by cash (including U.S. and foreign currency), cash equivalents or securities issued or guaranteed by the U.S. government or its agencies and the sovereign debt of foreign countries. There were no securities loaned by the Master Trust during the years ended December 31, 2016 and 2015.

Note 8 - Fair Value Measurement

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a market-based framework hierarchy for measuring fair value, and expands disclosures about fair value measurements in the notes to the financial statements. ASC 820 is applicable whenever another accounting pronouncement requires or permits assets and liabilities to be measured at fair value.

In accordance with ASC 820, fair value is defined as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date in the principal or most advantageous market of the asset.

ASC 820 established a three-tier hierarchy based on transparency of inputs to the valuation of an asset or liability:

- Level 1: Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities.
- Level 2: Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in valuing a portfolio instrument. These may include quoted prices for similar securities, interest rates, foreign exchange rates, prepayment speeds, credit risk and others.
- Level 3: Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Plan administrator's own assumptions about the factors market participants would use in valuing a portfolio instrument, and would be based on the best information available.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Certain investments that are measured using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. Changes in valuation techniques may result in transfers in or out of an investment's assigned level within the hierarchy. Transfers between fair value hierarchy levels are recognized at the end of the period.

Level 3 assets are comprised of real estate funds and restricted stock securities. Real estate funds are valued at estimated fair value based on fair value as reported in their audited financial statements, as well as information received from the investment adviser. The valuation techniques and inputs for the Level 3 assets have been consistently applied for all periods presented.

The investment advisers are selected by the XRIC. The authority for monitoring the valuation process of all investments is delegated by the XRIC to the Chief Investment Officer to whom the Xerox Trust Investment group reports. The Trust Investment group meets with investment advisers and performs quarterly reviews of the funds' fair value measurements with investment advisers comparing those valuations to similar funds' valuations outside of the Master Trust. Any changes in the fair value measurements are followed up and brought to the XRIC's attention at their quarterly meetings.

According to the hierarchy, each security was assigned a level 1, 2 or 3, based on the policy established by the Company.

⁽¹⁾ There were no material transfers between any of the fair value hierarchy levels during the year.

⁽²⁾ Certain assets that are measured at fair value using the NAV per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy.

⁽³⁾ Includes cumulative appreciation (depreciation) of futures contracts. Only current day's variation margin is reported within the Statement of Net Assets of the Master Trust.

⁽⁴⁾ An investment of \$13,235 in a Common and collective trust fund was previously classified as a Registered investment company at December 31, 2015, and has been categorized as a Common and collective trust fund to properly disclose the holding in accordance with the Company's policy and accounting principles generally accepted in the United States of America.

Level 3 Investment Assets

The classification of an investment within level 3 is based upon the significance of the unobservable inputs to the overall fair value measurement. Level 3 investment assets represent approximately 0.1% of the total Master Trust investments and are comprised of real estate funds and restricted stock.

The table below sets forth a summary of changes in the fair value of the Master Trust's level 3 investment assets for the years ended December 31, 2016 and 2015.

⁽¹⁾ Unless otherwise noted, this category represents investments in common and collective trust funds that invest in the indicated types of securities. All of these funds: (i) have daily liquidity (pending market conditions); (ii) are not subject to any redemption restrictions at the measurement date; (iii) have trade to settlement terms varying from one to three days; and (iv) have no required notice period. As of December 31, 2016, there are thirty four such funds (Multiple Strategies includes: (a) ten funds that each invest in a mix of domestic equity, international equity, and fixed income securities; (b) one fund that invests in a mix of commodities and fixed income securities; and (c) two funds that invest in domestic and international public real estate equity securities).

⁽²⁾ This category includes investments in common and collective trust funds that invest in emerging market debt. All of these funds: (i) allow for weekly redemptions; (ii) have trade to settlement terms varying from one to three days; and (iii) have a required notice period of five days prior to the redemption date. As of December 31, 2016, there are no longer any funds in this category.

⁽³⁾ This category includes partnership funds that invest in international equity. All of these funds: (i) allow for monthly redemptions and contributions on the first of each month; (ii) have trade to settlement terms varying from one to three days; and (iii) have a required notice period for redemptions and contributions, in which the fund manager must be notified by the fifteenth of the preceding month (i.e. fifteen days prior to the redemption date). As of December 31, 2016 there is one such fund.

⁽⁴⁾ This category includes partnership funds that invest in private equity or private debt, both domestically and internationally. These investments can not be redeemed during the life of the funds. Instead, distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next one to fifteen years. As of December 31, 2016, there are thirteen such funds, and unfunded commitments of \$76.6 million remain in nine of the funds.

⁽⁵⁾ This category includes partnership funds invested in domestic and international real estate funds. The fair value of these investments is estimated using the NAV of the Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third party appraisals and/or discounted cash flow models. These investments can not be redeemed during the life of the funds. Instead, distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next one to five years. As of December 31, 2016, there are nine such funds, and unfunded commitments of \$0.1 million remain in two of the funds.

⁽⁶⁾ This category includes partnership funds that invest in a mix of commodities and fixed income, domestic equity, and international equity securities. All of these funds: (i) allow for monthly redemptions and contributions on the first of each month; (ii) have trade to settlement terms varying from one to three days; and (iii) have a required notice period for redemptions and contributions, in which the fund manager must be notified by the fifteenth of the preceding month (i.e. fifteen days prior to the redemption date). As of December 31, 2016, there are two such funds.

Note 9 - Derivatives Policy

The Master Trust may enter into contractual arrangements (derivatives) in carrying out its investment strategy, and is limited to the use of derivatives as allowed by the Investment Policy Statement - i.e. principally to: (i) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (ii) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (iii) reduce the cost of structuring the portfolio or capture value disparities between financial instruments. The Master Trust may utilize both exchange traded investment instruments such as equity and fixed income futures and options on fixed income futures, forward currency contracts, interest rate swaps, credit default swaps, swaptions and options.

When engaging in forward currency contracts and any other over-the-counter derivatives, there is exposure to credit risk in the event of non-performance by the counterparties to these transactions. The Master Trust manages this exposure through credit approvals and limited monitoring procedures. Procedures are in place to regularly monitor and report market and counterparty credit risks associated with these instruments. This counterparty risk is further mitigated through the netting provisions of various agreements with certain counterparties that permit net settlement under specific conditions and, for certain counterparties, by providing collateral. These netting provisions may be part of an International Swap and Derivative Association agreement ("ISDA") or other types of agreements. Such netting provisions govern the ability to offset amounts the Master Trust owes a counterparty against amounts the counterparty owes the Master Trust (net settlement). The agreements are specific to an individual counterparty within a particular investment account and generally allow net settlement in the event of contract termination.

Furthermore, these agreements generally permit termination by either party prior to maturity upon the occurrence of certain stated events, such as failure to pay or bankruptcy. ISDAs also specify other events, the occurrence of which would allow one of the parties to terminate. Collateral requirements are determined based on the net aggregate unrealized gain or loss on all bilateral derivatives with each counterparty, subject to minimum transfer amounts. Any additional collateral required due to changes in securities values is transferred the next business day.

The Master Trust discloses all derivatives in the Statement of Net Assets of the Master Trust (refer to Note 7 - Master Trust) on a gross basis. During the years ended December 31, 2016 and 2015, derivatives were used only in the defined benefit plans participating in the Master Trust - the following notes include a summary of (i) the significant accounting policies associated with the Master Trust's use of derivatives, and (ii) financial information, including any pledged and received collateral amounts, for derivative contracts open as of the measurement date.

Forward Foreign Currency Exchange Contracts

Forward currency contracts are generally utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are generally marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward currency contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract. As of December 31, 2016 and 2015, the unrealized gain/loss of forward currency contracts represents less than 1% of total investments.

As of December 31, 2016 and 2015, the Master Trust had pledged cash collateral of \$0 and \$58 respectively to counterparties in forward currency contracts.

A summary of open forward currency contracts of the Master Trust at December 31, 2016 is presented below:

Futures Contracts

The Master Trust used equity index and fixed income futures contracts to manage exposure to the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held or hedge the fair value of other fund investments. The Master Trust does not employ leverage in its use of derivatives. Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount (initial margin) equal to a certain percentage of the nominal value of the contract. Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which are generally settled daily and are included in the unrealized gains (losses) on futures contracts. The Master Trust will record a variation margin receivable or payable in the Master Trust net assets for variation margins which have not yet been paid at the end of the year.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instruments or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a futures contract and the underlying index or security.

As of December 31, 2016 and 2015, the unrealized gain/loss of futures contracts represents less than 1% of total investments.

As of December 31, 2016 and 2015, cash balances of \$0 and \$371 respectively were pledged to cover margin requirements for open futures contracts.

A summary of open fixed income futures of the Master Trust is presented below for the year ended:

Interest Rate Swap Contracts

The Master Trust may invest in interest rate swap contracts. The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts typically represent the exchange between the Master Trust and a counterparty of respective commitments to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts have a term coincident with the maturity date of the Master Trust, with settlement scheduled for the termination date of the contract.

During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Swaps are marked-to-market daily based upon values from third party vendors or quotations from market makers to the extent available and the change in value, if any, is recorded as an unrealized gain or loss on the Statement of Net Assets Available for Benefits. Periodic cash settlements on interest rate swaps are recorded as realized gains or losses. Interest rate swap contracts may include extended effective dates.

Entering into a swap contract involves, to varying degrees, elements of credit, market and/or interest rate risk in excess of the amounts reported in the Statement of Net Assets of the Master Trust. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contracts. Accordingly, credit risk is limited to any amounts receivable from the counterparty.

To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Company. The Master Trust bears the market risk arising from any change in index or security values or interest rates. Under certain circumstances, the Master Trust may be required to pledge collateral to or may receive collateral from swap counterparties. Initial upfront payments received or made upon entering into a swap contract are included in the fair value of the swap.

Credit Default Swap Contracts

Credit default swap ("CDS") contracts are agreements in which one party pays fixed periodic payments to a counterparty in consideration for a guarantee from the counterparty to make a specific payment should specified negative credit event(s) take place. The Master Trust entered into CDS contracts to hedge the Master Trust's exposure on a debt security that it owns or in lieu of selling such debt security.

As the purchaser of a CDS contract, the Master Trust purchases protection by paying a periodic interest rate on the notional amount to the counterparty. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized loss upon payment. If a credit event as specified in the contract occurs, the Master Trust may have the option to either deliver the reference obligation to the seller in exchange for a cash payment of its par amount, or to receive a net cash settlement equal to the par amount less an agreed-upon value of the reference obligation as of the date of the credit event. The difference between the value of the obligation or cash delivered and the notional amount received will be recorded as a realized gain (loss).

As the seller of a CDS contract, the Master Trust sells protection to a buyer and will generally receive a periodic interest rate on the notional amount. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized gain upon receipt of the payment. If a credit event as specified in the contract occurs, the Master Trust may either be required to accept the reference obligation from the buyer in exchange for a cash payment of its notional amount, or to pay the buyer a net cash settlement equal to the notional amount less an agreed-upon value of the reference obligation as of the date of the credit event. The difference between the value of the obligation or cash received and the notional amount paid will be recorded as a realized gain (loss). The maximum potential amount of undiscounted future payments the Master Trust could be required to make as the seller of protection under a CDS contract is equal to the notional amount of the reference obligation.

As a protection seller, the Master Trust bears the risk of loss from the credit events specified in the contract. Although specified events are contract specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. For CDS contracts on credit indices, quoted market prices and resulting market values serve as an indicator of the current status of the payment/performance risk. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the reference entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the contract. CDS contracts are valued daily, and the change in value is recorded as unrealized appreciation (depreciation) until the termination of the swap, at which time a realized gain (loss) is recorded.

CDS contracts are subject to counterparty credit risk, leverage risk, hedging risk, correlation risk, liquidity risk and general market risk. The Master Trust will enter into CDS transactions only with counterparties that meet certain standards of creditworthiness.

As of December 31, 2016 and 2015, the Master Trust had pledged cash collateral of \$0 and \$10,517 respectively to swap counterparties.

There were no CDS contracts open as of December 31, 2016.

Interest Rate Swaption Contracts

The Master Trust may write or purchase interest rate swaption contracts which are options to enter into a pre-defined swap agreement by some specified date in the future. The writer of the swaption becomes a counterparty to the swap if the buyer exercises. The interest rate swaption contract will specify whether the buyer of the swaption will be a fixed rate receiver or a fixed rate payer upon exercise. Options on swap contracts are considered over-the-counter financial derivative instruments that derive their value from underlying asset prices, indices, reference rates, and other inputs, or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or by pricing service providers.

In 2016 and 2015, total premiums received for written swaption contracts were \$0 and \$3,314 respectively.

As of both December 31, 2016 and 2015, the Master Trust was in receipt of \$0 cash collateral from the broker for swaption contracts.

There were no swaption contracts open as of December 31, 2016.

The following swaption contracts were open as of December 31, 2015:

Options Contracts

The Master Trust may purchase and sell put and call options on securities. The Master Trust uses options contracts to manage against changes in the market value of the Master Trust's investments, mitigate exposure to fluctuations in currency values or interest rates, or protect the Master Trust's unrealized gains. In addition, the Master Trust may use options contracts to facilitate investment transactions by protecting the Master Trust against a change in the market price of the investment, enhance potential gains, or as a substitute for the purchase or sale of securities or currency.

Exchange-traded options are valued using the National Best Bid and Offer ("NBBO") close price. If the NBBO close price is not available, the NBBO bid (for long positions) or NBBO ask (for short positions) will be used to value the options. Options traded over-the-counter are valued using a broker quotation or an internal valuation using an options pricing model such as Black-Scholes.

When the Master Trust writes an option, the premium received is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the Master Trust on the expiration date as realized gains from written options. The difference between the premium and the amount paid for a closing purchase, including brokerage commissions, is also recorded as a realized gain/(loss). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of an instrument acquired or deducted from (or added to) the proceeds of the instrument sold.

Writing puts and buying calls may increase the Master Trust's exposure to changes in the value of the underlying instrument. Buying puts and writing calls may decrease the Master Trust's exposure to such changes. Losses may arise when buying and selling options if there is an illiquid secondary market for the options, which may cause a party to receive less than would be received in a liquid market, or if the counterparties do not perform under the term of the options contract(s).

During the years ended December 31, 2016 and 2015, the Master Trust used purchased and written options to protect the portfolio from adverse movements in securities prices and enhance return. There were no purchased or written options contracts outstanding as of December 31, 2016.

As of December 31, 2015, the Master Trust had: (i) purchased foreign currency options outstanding in the notional amount of \$(4,170) with a value of \$(51); and (ii) written foreign currency options outstanding in the notional amount of \$1,200 with a value of \$34. These options expired in 2016.

Master Netting Agreements

The funds the Master Trust participates in may enter into master netting agreements with their counterparties for derivative instruments, which provide the right, in the event of default (including bankruptcy or insolvency), for the non-defaulting party to liquidate the collateral and calculate the net exposure to the defaulting party or request additional collateral. For financial reporting purposes, the Plan does not offset financial assets and financial liabilities that are subject to master netting agreements in the Statement of Net Assets of the Master Trust.

The tables below set forth the Master Trust's open derivatives that are subject to master netting agreements, as of December 31, 2016:

Derivative	Net Amount of Assets Presented in the Statement of Net Assets	Gross Amounts Not Offset in the Statement of Net Assets		Net Amount
		Non-cash Collateral Received	Cash Collateral Received	
Foreign exchange contracts	\$ 6,202	\$ —	\$ —	\$ 6,202
Swap contracts	6,182	—	—	6,182

⁽¹⁾ In conformance with disclosure requirements of accounting principles generally accepted in the United States of America, the table above does not include additional non-cash collateral pledged to counterparties of \$40,110.

Note 10 - Related Party Transactions and Parties-in-Interest Transactions

The Plan pays the administrative expenses detailed in Note 1 - Description of the Plan, and these transactions qualify as party-in-interest transactions.

The Plan also allows rollovers to an affiliated plan, the Xerox Corporation Savings Plan, which amounted to \$15,619 and \$25,115 for the years ended December 31, 2016 and 2015, respectively. These transactions qualify as party-in-interest transactions.

Personnel and facilities of the Company have been used to perform administrative functions for the Plan, and the Plan pays fees to Conduent Human Resources Services (formerly operating as Xerox HR Solutions, LLC) as record keeper of the Plan. These transactions qualify as party-in-interest transactions.

Note 11 - Commitments and Contingencies

In the normal course of business, the Plan enters into agreements that contain a variety of representations and warranties which provide general indemnifications. The Plan's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Plan that have not yet occurred. However, based on experience, the Plan expects the risk of loss to be remote.

As of December 31, 2016, the Master Trust is committed to invest \$871,124 in certain private equity and real estate funds, of which \$794,392 has already been contributed.

Note 12 - Legal Matters

From time to time, the Plan, the Company and their affiliates are involved in litigation and various industry-related and other regulatory, government, and law enforcement inquiries and subpoenas that arise in the ordinary course of business. The Company has reviewed these matters in connection with the Plan financial statements, with material litigation discussed below, and determined that no accrual or loss contingency related to such matters is required to be included in the Plan financial statements.

Frommert et al. v. RIGP et al.

This is an ERISA litigation matter involving the treatment of prior lump-sum distributions from RIGP for employees that had left the Company and then were subsequently re-hired. The matter focuses on the offset done by RIGP from the employees' second distribution to account for the amount previously distributed to them. The 2nd Circuit Court of Appeals ruled against RIGP both with respect to liability and the appropriate calculation of benefits. RIGP filed a petition for certiorari with the United States Supreme Court with respect to the calculation of benefits issue and simultaneously moved the District Court (the court that this matter was originally filed in) for a stay of the payment of additional benefits pending the Supreme Court's decision on the petition for certiorari. In 2009, the District Court denied the motion to stay and approved a payment schedule regarding the additional benefits due the plaintiffs. The U.S. Supreme Court eventually granted RIGP's petition for certiorari and the District Court then stayed additional payments. Prior to the stay, approximately \$4,600 was paid out in 2009.

On April 21, 2010, the United States Supreme Court ruled in RIGP's favor and reversed the ruling of the 2nd Circuit. Specifically, it held that the lower court erred in not giving the proper deference to the Plan administrator's interpretation of RIGP. It remanded the matter for further proceedings consistent with its opinion.

On November 17, 2011, on remand the District Court ruled in RIGP's favor and adopted the Plan administrator's proposed damages calculation. It entered final judgment with respect to the foregoing ruling on December 14, 2011.

and the plaintiffs filed a notice of appeal of the judgment with the 2nd Circuit on January 3, 2012. Pursuant to the District Court's ruling with respect to damages, RIGP paid out an additional \$800 in 2013.

On December 23, 2013, the Second Circuit reversed the lower court's decision, holding that the Plan Administrator's calculation was unreasonable and violated ERISA's notice provisions. It again remanded the matter to the lower court to determine an appropriate remedy.

On January 5, 2016, the District Court issued a decision and order on remedies (the "Order"). The Court held that plaintiffs were entitled to an equitable remedy that would, in no event, result in plaintiffs receiving less benefits than if they were newly-hired by Xerox at the time of their second or subsequent period of employment. The Court ordered the Plan administrator to recalculate and pay benefits based on the recalculated amounts within the time set out in the Order, at least with respect to those plaintiffs who had elected to take their retirement distributions from the Company. Such recalculations were made and produced to plaintiffs. To the extent that a plaintiff applied for a distribution of benefits not previously received, such distributions were paid. As a result of the Order, RIGP paid out an additional \$7,427 in 2016.

The Court requested additional briefing on whether to award attorneys' fees and interest. The Parties filed such motions, and plaintiffs have also filed a motion for summary judgment which, in essence, seeks to re-argue their position that they are entitled to benefits based upon an offset formula referred to as the Layaou Offset approach or the Actual Annuity Offset, both of which were previously rejected by the District Court.

On November 3, 2016, the District Court awarded prejudgment interest to each plaintiff that took a distribution of benefits and received less than the distribution amount calculated under the Order. RIGP paid each affected plaintiff as indicated in the award, which aggregately amounted to \$757 in 2016 and \$176 in 2017.

On November 28, 2016, the plaintiffs filed a motion for reconsideration of the prejudgment interest ruling and on March 4, 2017, the District Court ordered the Plan administrator to recalculate interest from the time plaintiffs separated from the Company as opposed to from the time of benefit distribution. The recalculation resulted in \$127 of additional payments in June 2017 to plaintiffs who had been underpaid under the November 3, 2016 decision. Thirteen plaintiffs were found to have been overpaid under the November 3, 2016 decision, which aggregately amounted to \$323. It was deemed to be in the best interest of the Plan not to pursue recoupment of overpayments based on the likelihood of success and associated attorney's fees and costs to do so. On August 15, 2017, the plaintiffs appealed to the 2nd Circuit the interest rate set forth by the District Court; the defendants' reply is due in November 2017.

On December 12, 2016, the District Court granted plaintiffs' motion for attorney's fees and costs in the aggregate amount of approximately \$4,900. On December 21, 2016, plaintiffs filed a motion for reconsideration of attorney's fees, arguing that approximately \$64 in fees were overlooked; on March 4, 2017 the Court awarded an additional \$64 in attorney's fees to plaintiffs. RIGP paid out \$4,886 in January 2017 and \$64 in June 2017 for such awarded attorney's fees and costs.

Plaintiffs' counsel in the Frommert action subsequently filed a second action entitled Kunsman et al. v RIGP, which raises similar claims for 86 additional plaintiffs. It is currently pending in the same court. The District Court requested briefings from the parties as to whether the Frommert ruling should be applied to the Kunsman case, and such briefs have been submitted. The Court has not issued a decision regarding the applicability of the Frommert decision to Kunsman.

Note 13 - Subsequent Events

The Plan has evaluated subsequent events through October 13, 2017, the date the financial statements were available to be issued. All subsequent events requiring recognition have been incorporated into these financial statements, and the accompany notes, as applicable.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year. The weighted average retirement age was determined using a multi-year select period and ultimate rates beginning in 2021.

For presentation of the weighted average retirement age, each of the six different tables used has been weighted equally. **This results in a final weighted average retirement age of 61.94.**

The retirement rates for employees with 30 years of service are 150% of the retirement rates for employees with fewer than 30 years of service. The average age upon which employees would have 30 years of service is between ages 58 and 59. Therefore, for purposes of the information presented above, we have included the retirement rates for employees with fewer than 30 years of service at ages 58 and younger and retirement rates for employees with 30 years of service at ages 59 to 65.

Mortality Rates

Healthy and Disabled

2016 Static Mortality Table for Annuitants and Non-Annuitants per §1.430(h)(3)-1.

Withdrawal Rates

See Table B.

Disability Rates

None.

Surviving Spouse Benefit

It is assumed that 70% of employees have an eligible spouse, and that males are three years older than their spouses.

Valuation Compensation

2015 pensionable earnings rolled forward one year with the salary increase assumption for those IUOE members who continue to accrue benefits after 2015.

Benefit and Compensation Limits

Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$210,000 and the IRC section 401(a)(17) compensation limit of \$265,000.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

Plan Expenses

Average of prior two year's plan administrative expenses paid (without PBGC premiums), increased by 3%, plus expected PBGC premiums for the current year rounded to the next \$100,000.

Actuarial Method

Standard unit credit cost method.

Valuation Date

January 1, 2016.

Schedule SB, Part V—Summary of Plan Provisions

Effective Date	January 1, 1978, as amended through January 1, 2015.
Eligibility	All employees of the Company, ColorGrafX or any subsidiary, who are not covered by a collective bargaining agreement and the plan is adopted for the employee population (or are covered and the agreement requires participation), are not non-resident aliens without United States income, are not employed pursuant to a cooperative agreement, are not temporarily working less than 1,000 hours per year, become members on their respective dates of hire. IAM and IUOE union employees also participate. Effective January 1, 2005, RIGP was closed to new hires. Effective January 1, 2007, RIGP was closed to rehires
Retirement Dates	
Normal Retirement	Age 65.
Early Retirement	Age 55 and 10 years of service.
Deferred Vested	Immediate for current employees as of January 1, 2008.
Disability	Any age and receiving disability benefits under the U.S. Social Security Act.
Preretirement Death	5 years of service and an eligible spouse to receive in excess of the greater of CBRA or TRA.
Retirement Benefits	
Normal Retirement	<p>The larger of (a), (b), (c), or (d) below if hired prior to January 1, 2003 or (c) below if hired after 2002:</p> <p>(a) 1.4% of average monthly compensation, times years of participation up to 30, but not beyond December 31, 2012;</p> <p>(b) 1% of average monthly compensation, times years of participation, but not beyond December 31, 2012;</p>

Normal Retirement
(continued)

- (c) The benefit that can be provided by the participant's Cash Balance Retirement Account converted at the applicable rates. The annual cash balance credit was 4% of compensation prior to 2013 (was 5% prior to 2003) plus interest, or;
- (d) The benefit that could be provided by the participant's Transitional Retirement Account converted at the applicable rates.

The minimum benefit provided to an employee who was covered by the XDS Retirement Plan and became covered by this Plan is his accrued benefit earned in that plan, plus the greater of (c) or (d).

Effective November 30, 2009, the formula under (b) above will only apply to those participants with 42 years of service as of January 1, 2009. Others will be entitled to the benefits accrued under this formula to November 30, 2009 as a minimum benefit. No pay based credits apply to (c) above after 2012.

In addition to the benefits described above, IUOE participants will accumulate a separate, additional benefit provided by a new Cash Balance Retirement Account which is initially \$0 as of January 1, 2013 converted at the applicable rates. The annual cash balance credit is 4% of compensation plus interest for 2013 and later periods.

Early Retirement

The normal retirement benefit based on years of participation and average monthly compensation on the date of termination. If benefit payments are to commence prior to age 65, the benefit determined under (a) or (b) above will be reduced $1/240^{\text{th}}$ for each month by which the commencement of benefits precedes age 65, or age 62 if the employee had 30 or more Years of Service at retirement.

The Cash Balance Retirement Account and the Transitional Retirement Account will be converted based on an immediate annuity factor at early retirement age.

Other Benefits	The IAP settlement provides an annuity benefit for a class of employees meeting certain requirements between January 1, 1982 and November 17, 1982. The IAP benefit is a non-cumulative increasing annuity with an initial benefit of .96% of the accrued normal retirement benefit as of November 17, 1982, increasing by the initial amount each year.
Deferred Vested	The normal retirement benefit based on years of participation and average monthly compensation on the date of termination. This benefit is payable in full beginning at age 65 or in an actuarially reduced form as of any earlier age.
Disability	A member continues to accrue years of service and cash balance credits until the earlier of when he ceases to be disabled, becomes an inactive participant, or becomes eligible for a normal retirement benefit.
Preretirement Death	A benefit of 50% of the excess of the benefit [greater of (a) or (b) for the Normal Retirement Benefit] the member would have received if he had survived to his earliest retirement age and retired the day before his death, over the annuity value of the greater of the Cash Balance Retirement Account or the Transitional Retirement Account, and is payable for the life of the participant's spouse. In addition, the greater of the Cash Balance Retirement Account or Transitional Retirement Account is payable in any event upon the participant's death.
Normal Form of Payment	Life annuity. A member who is married at the time he retires shall have his unreduced form of benefit paid on a 50% joint and survivor basis unless he elects to the contrary. A terminated employee who later reaches retirement age will receive an actuarially reduced benefit payable as a 50% joint and survivor unless he elects to the contrary.
Optional Forms of Payment	5, 10, 15, 20 Year Certain & Life; 50%, 66 2/3%, 75%, 100% Joint & Survivor; Lump Sum. All options available with or without cash refund.

Years of Service

All periods of employment measured on an elapsed time basis. ERISA break-in-service rules apply except that periods of employment which terminated before January 1, 1976 shall be excluded. Salaried employees of XES, Inc. receive credit for all past years of service (prior to 1993) as determined for the XES, Inc. Employee Retirement Plan. The XES, Inc. salaried population ceased benefit accrual under RIGP effective December 31, 1998. Employees of PARC, Inc. ceased benefit accrual under RIGP effective January 31, 2002.

Years of Participation

All periods of employment subject to the following adjustments:

- (1) Part-time service shall be adjusted to a proportion of full-time service;
- (2) Periods while on disability leave shall be included;
- (3) Periods of employment which terminated before January 1, 1976 shall be excluded;
- (4) Periods of employment rendered while not in the eligible group shall be excluded;
- (5) Certain periods for which a lump sum payment has been made shall be excluded; and
- (6) Periods while on leave of absence shall be included.

Salaried employees of XES, Inc. receive credit for years of participation as of January 1, 1993 equal to their prior years of service under the XES, Inc. Employee Retirement Plan.

Average Monthly
Compensation

The highest 5 calendar years of compensation divided by 60. Compensation is W-2 pay excluding non-cash or reimbursement items and payments from other plans plus amounts under any before-tax savings or medical plan. Salaried employees of XES, Inc. will be treated as having compensation in all years prior to 1993, for benefit calculation purposes which is equal to their 1992 compensation reflected by their prior plan. Compensation after 2012 will not be considered.

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

The actuarial valuation was conducted on an ongoing (not termination) basis using personnel data furnished as of January 1, 2016 by Xerox Corporation. Asset information and the dates and amounts of contributions are based on information supplied by Xerox Corporation.

The number of active participants as of January 1, 2016 includes 181 disabled participants not yet receiving pension payments. The distribution of active participants as of January 1, 2016 by pay, age, and service shown on the Schedule of Active Participant Data (attachment to Line 26) excludes these 181 disabled participants who have no current pay but continue to accrue pension benefits.

Due to software limitations with the electronic filing process, information filed electronically cannot be controlled by the Enrolled Actuary. The values on the signed Schedule SB will govern to the extent there are any differences in the entries filed electronically and the actual data contained on the signed Schedule SB.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year. The weighted average retirement age was determined using a multi-year select period and ultimate rates beginning in 2021.

For presentation of the weighted average retirement age, each of the six different tables used has been weighted equally. **This results in a final weighted average retirement age of 61.94.**

The retirement rates for employees with 30 years of service are 150% of the retirement rates for employees with fewer than 30 years of service. The average age upon which employees would have 30 years of service is between ages 58 and 59. Therefore, for purposes of the information presented above, we have included the retirement rates for employees with fewer than 30 years of service at ages 58 and younger and retirement rates for employees with 30 years of service at ages 59 to 65.

Years of Service

All periods of employment measured on an elapsed time basis. ERISA break-in-service rules apply except that periods of employment which terminated before January 1, 1976 shall be excluded. Salaried employees of XES, Inc. receive credit for all past years of service (prior to 1993) as determined for the XES, Inc. Employee Retirement Plan. The XES, Inc. salaried population ceased benefit accrual under RIGP effective December 31, 1998. Employees of PARC, Inc. ceased benefit accrual under RIGP effective January 31, 2002.

Years of Participation

All periods of employment subject to the following adjustments:

- (1) Part-time service shall be adjusted to a proportion of full-time service;
- (2) Periods while on disability leave shall be included;
- (3) Periods of employment which terminated before January 1, 1976 shall be excluded;
- (4) Periods of employment rendered while not in the eligible group shall be excluded;
- (5) Certain periods for which a lump sum payment has been made shall be excluded; and
- (6) Periods while on leave of absence shall be included.

Salaried employees of XES, Inc. receive credit for years of participation as of January 1, 1993 equal to their prior years of service under the XES, Inc. Employee Retirement Plan.

Average Monthly
Compensation

The highest 5 calendar years of compensation divided by 60. Compensation is W-2 pay excluding non-cash or reimbursement items and payments from other plans plus amounts under any before-tax savings or medical plan. Salaried employees of XES, Inc. will be treated as having compensation in all years prior to 1993, for benefit calculation purposes which is equal to their 1992 compensation reflected by their prior plan. Compensation after 2012 will not be considered.

Conversion Factors

The applicable interest rate permitted by IRC Section 417(e) in effect for the prior August along with the applicable mortality table are used to convert the Transitional Retirement Account and Cash Balance Retirement Account to annuities. Conversion for a married retiring member is on a 50% contingent annuitant basis while a single member, or married member who is not retirement eligible, will have his accounts converted on a life annuity basis.

Plan Year

January 1 to December 31.

Contributions

The plan is paid for by the Company. No employee contributions are required or allowed.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following assumption change:

- A change in the retirement age assumption to better reflect anticipated future experience.

This change was made to more precisely reflect the anticipated plan experience. This change did not require approval under Internal Revenue code Section 430(h)(5) since the thresholds in that section were not exceeded.
