Assumptions Made In Valuing Spouse's Benefit

Eighty-five percent of the male and fifty percent of the female employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Provision for Expenses

The expected administrative (i.e. non-investment) expenses are assumed to equal actual expenses paid from plan assets during the prior year, if any. These were included in the Target Normal Cost for minimum contribution purposes.

Appendix B (Continued)

<i>Standing Elections</i>	The client has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.
<i>Asset Method</i>	Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
<i>Employees Valued</i>	All eligible active employees of the company as of the valuation date were valued as well as the inactive participants of the plan.
<i>Selection of Assumptions</i>	<p>The segment rates and mortality table used to determine minimum funding and funded ratios were based on methodology mandated by Internal Revenue Code and rates published by the Internal Revenue Service to affect it.</p> <p>The actuary reviews the assumptions each year for continued reasonability with the plan's actual experience.</p>
<i>Changes in Assumptions and Methods since the Last Actuarial Valuation</i>	<p>The segmented interest rates used for determining the funding target were 4.43%, 5.91% and 6.65%. The Funding Target is calculated using the segmented rates as required under PPA '06 and is in the allowable range for the current plan year and also reflect BBA.</p> <p>The mortality table for the funding target was changed as required under PPA '06.</p>
<i>Justification for Changes in Actuarial Assumptions</i>	The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
