Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

The supplemental schedules to the Plan's Form 5500 are not required for the Plan's assets that are held in a Master Trust. Accordingly, the Plan Administrator must file detailed financial information for the Master Trust, including the supplemental schedules, separately with the Department of Labor.

Certain supplemental schedules related to Plan assets that are held outside of the Master Trust that are required by the Employee Retirement Income Security Act of 1974 (ERISA) have been omitted because they are not applicable.

Report of Independent Auditors

To the Administrator of Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

We have audited the accompanying financial statements of Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2018 and December 31, 2017, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2018 and changes therein for the year then ended and its financial status as of December 31, 2017, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets (held at end of year) as of December 31, 2018 is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

1. Plan Description

The following description of the Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees (the "Plan") is for general information purposes only. Participants should refer to the Summary Plan Description or the Plan Document for a complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit plan covering former salaried employees of Raytheon Aircraft Credit Corporation and former salaried employees of Raytheon Engineers & Constructors, Inc ("RE&C"). On July 7, 2000 (the "Closing Date"), the stock of RE&C and its subsidiaries was sold to Morrison Knudsen Corporation. In addition, on the Closing Date, the following occurred: (1) the name of the Plan was changed to the Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees, (2) the sponsorship of the Plan was assumed by Raytheon Aircraft Credit Corporation, a subsidiary of Raytheon Company (the "Company"), (3) the Plan was frozen with respect to the employees of RE&C, and (4) the portion of the Raytheon Aircraft Company Retirement Income Plan for Salaried Employees that covered the active employees of Raytheon Aircraft Credit Corporation on the Closing Date, was spun off and merged into the Plan.

A majority of the investments are held in the Raytheon Master Pension Trust ("Master Trust"). The remaining funds are invested in insurance contracts with John Hancock Life Insurance Company, Aetna Life Insurance Company, and Voya Retirement Insurance and Annuity Company (the "Insurance Companies"). The Plan is administered by the Plan Administrator appointed by the Company's Vice President of Human Resources and is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Benefits Eligibility and Vesting

Salaried employees of the Raytheon Aircraft Credit Corporation were eligible to participate in the Plan if they had completed one year of eligibility service, as defined in the Plan, and had attained age 21. A participant will be fully vested in his or her accrued benefit upon the first to occur of the following events; a) attainment of age 65 and completion of 5 years; (b) completion of 5 years of vesting service; c) total and permanent disability as a result of a non-work related injury or illness; or d) complete or partial termination of the Plan. Former employees of RE&C are vested if they have completed five years of vesting service or were eligible employees as of the Closing Date.

Effective January 1, 2007, employees who are either hired or rehired (after the expiration of any salary continuation payments) are not eligible to participate in the Plan. In addition, former employees who are rehired on or after March 1, 2007, and who have received or are receiving payments from a Company-sponsored pension plan are not eligible to participate in the Plan.

Effective January 1, 2014, no further benefits shall accrue under the Plan.

Purchase of Annuity Contracts

In July 2018, the Company entered into a definitive agreement with an insurance company to purchase a group annuity contract to transfer outstanding pension benefit obligations related to certain retirees and beneficiaries of the Plan. The transaction was funded by the Plan's assets and is included in the Statement of Changes in Net Assets Available for Benefits under "Purchase of annuity contracts."

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

Contributions

The Company makes contributions to the Plan to ensure assets are sufficient to pay the benefits of the Plan. The Plan does not require contributions by participants.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition

The Plan's interest in the Master Trust is stated at fair value. Net investment income (loss) from the Master Trust is allocated proportionately on a monthly basis based on the Plan's interest in the Master Trust. See Note 5 for additional information.

The Plan also invests in insurance contracts with the Insurance Companies. The contracts consist of both general account and separate account components. The general accounts are valued at contract value (which represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses) which approximates fair value. The separate account is valued at the fair value of the net assets of the accounts as reported by Voya Retirement Insurance and Annuity Company.

Insurance contracts distribute to the Plan the income earned by the investment accounts referred to above based on the ratio of the Plan's monies invested to total monies invested in the account.

Contributions

Employer contributions are funded and recorded as determined by actuarial computation. See Note 4 for additional information.

Benefit Payments

Benefit payments to participants are recorded when paid.

Administrative Expenses

All expenses of the Plan, which primarily consist of professional and administrative fees, are paid by the Plan. Expenses specifically related to the Plan are included in the Statements of Changes in Net Assets Available for Benefits under "Administrative expenses." Additionally, expenses paid directly by the Master Trust, which primarily consist of investment and performance management fees, are allocated proportionally on a monthly basis based on the Plan's interest in the Master Trust and are included in the Statements of Changes in Net Assets Available for Benefits under "Raytheon Master Pension Trust investment income (loss)."

Use of Estimates

The Plan's financial statements have been prepared in conformity with U.S. Generally Accepted Accounting Principles ("GAAP"). This requires the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits at the date of the financial statements, the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for benefits during the reporting period, and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from the estimates included in the financial statements.

New Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2018-13, *Fair Value Measurement: Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement* ("Topic 820"), which eliminates the disclosure requirement of the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy and modifies certain disclosure requirements related to Level 3 recurring and nonrecurring fair value measurements. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. The adoption of this standard is not expected to have a significant impact on the Plan's financial statements or disclosures.

In February 2017, FASB issued ASU 2017-06, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - Employee Benefit Plan Master Trust Reporting*. ASU 2017-06 amends the master trust disclosure to require additional disclosures related to the Plan's interest in the Master Trust. This ASU is effective for fiscal years beginning after December 15, 2018, and is required to be applied retrospectively for all comparative periods presented. The adoption of this standard is not expected to have a significant impact on the Plan's financial statements or disclosures.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) beneficiaries of deceased employees. Benefits are based on employees' credited service and the benefit rate in effect at the time of retirement unless subsequently amended. Benefits payable under all circumstances (such as retirement, death, disability, and termination of employment) are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary, Mercer, and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for retirement, death, disability, or withdrawal) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2017 and 2016, are as follows:

Assumed rate of return on investments 7.5%
for accumulated benefits (discount rate)

Mortality basis

As of December 31, 2017:
Modified version of the RP-2014 employee/retiree no collar tables, which has the projection scale backed off to 2006 and projected future generational mortality improvement based on a modified version of the MP-2014 scale, which reflects a 10-year downgrade period for given ages, but a 15-year downgrade for birth cohorts, and an ultimate improvement rate of 1.20% at age 64 to 0% at age 115.

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

As of December 31, 2016:
Modified version of the RP-2014 employee/retiree no collar tables, which has the projection scale backed off to 2007 and projected future generational mortality improvement based on a modified version of the MP-2014 scale, which reflects a 10-year downgrade period and an ultimate improvement rate of 0.75%

Retirement

Various rates, varying by age from 62 to 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Assumption Changes

The changes in actuarial assumptions since the prior valuation of the Plan are as follows:

- The projection scale used in the mortality assumption was updated as noted above to better reflect anticipated future experience.

As of December 31, 2017, the most recent valuation date, the actuarial present value of accumulated plan benefits is as follows:

Vested Benefits	
Participants receiving benefits	\$ 383,503,130
Participants with deferred benefits	111,783,960
Total actuarial present value of accumulated plan benefits	<u>\$ 495,287,090</u>

The following is an analysis of changes in the present value of accumulated benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2016	\$ 509,490,779
Benefits accumulated and non-investment (gains) losses	541,658
Increase for interest due to decrease in discount period	36,337,812
Benefits paid	(46,129,154)
Change in actuarial assumptions	(4,954,005)
Actuarial present value of accumulated plan benefits as of December 31, 2017	<u>\$ 495,287,090</u>

The Plan includes assets of \$776,984 and \$754,231 at December 31, 2018 and 2017, respectively, which are funds that were voluntarily contributed by employees of the Badger division, a former division of the Company, to provide for a supplemental pension benefit. These funds were contributed prior to the merger of the Badger Plan into the Plan. Participants are always vested in their contributions. Benefits for these employees are paid from these contributed funds, and are not included in the total actuarial value of accumulated plan benefits above. There were no benefit payments during 2018 and 2017 from the voluntary contributions of the participants.

4. Funding Policy

The employer's contributions are actuarially determined to generally fund any existing unfunded liability on account of qualified service prior to the valuation date in accordance with the amortization schedules prescribed by ERISA minimum funding requirements (as amended by the Pension Protection Act of 2006). At the Company's discretion, and to the extent allowable under

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

maximum tax deductibility regulations, contributions above the ERISA minimum funding requirements may be made to the Plan. Contributions for the years ended December 31, 2018 and 2017, met the minimum funding requirements of ERISA.

5. Master Trust

Summary Financial Information

The Plan's assets are held in the Master Trust, which was established for the investment of assets of the Plan and several other Company sponsored retirement plans. The assets of the Master Trust are held by the Bank of New York Mellon ("BNY Mellon", the "Trustee"). The Investment Committee, appointed by the Chairman and CEO of the Company, regularly reviews the asset allocation and performance of the investments held in the Master Trust. The investment policy, as approved by the Investment Committee, permits asset diversification to include a combination of cash and cash equivalents, publicly traded U.S. and international equity securities, private equity funds, fixed-income securities, private real estate funds, real assets, and other investments such as commingled funds, insurance contracts and derivatives.

Investment securities are exposed to various risks, such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur and such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Fair Value Measurements

The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required:

- Level 1:** Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2:** Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs which are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
- Level 3:** Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. See valuation policy section for further information.

Notes to Financial Statements

As of December 31, 2018 and 2017

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

For the years ended December 31, 2018 and December 31, 2017, there were no material transfers in or out of Levels 1, 2, or 3.

The following tables summarize the fair value of investment assets and liabilities as of December 31, 2018:

(1) Corporate debt instruments and other fixed income securities includes \$30,701,828 of asset backed securities and \$104,437,599 of term loans.

(2) Real asset investments include funds and \$89,707,350 of publicly traded master limited partnership securities, all of which invest in physical and permanent assets, including infrastructure.

(3) In accordance with Accounting Standards Codification ("ASC") Subtopic 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Statement of Net Assets for the Master Trust.

Level 3 Investments

Level 3 investments consist mainly of unallocated insurance contracts. Unallocated insurance contracts represent less than 1% of the Master Trust assets and are valued at their contract price which approximates fair value.

A reconciliation of investments with significant unobservable inputs (Level 3) has not been provided as the amounts are immaterial.

Valuation Policy

The Plan's interest in the Master Trust is stated at fair value. The Trustee values Master Trust investments as follows:

Cash and cash equivalents, are valued at amortized cost, which approximates fair value.

Investments in equity securities (common and preferred) and equity securities sold short, if any, are valued at the exchange traded closing price if available.

Investments in fixed income securities (U.S. Government, domestic and foreign bonds, asset backed securities, and term loans) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

generally recognized by institutional traders, or at fair value as determined in good faith by the Trustee of the Master Trust and management.

Investments denominated in foreign currencies are translated into U.S. Dollars using the last reported exchange rate.

Investments in registered investment companies are valued at their last reported net asset value.

Investments in commingled funds, private equity funds, private real estate funds, and real asset funds are estimated at fair market value, which primarily utilizes net asset values reported by the investment manager or fund administrator. Management reviews additional valuation and pricing information from fund managers, including audited financial statements, to evaluate the net asset values.

Unallocated insurance contracts are valued at their contract price which approximates fair value.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value.

Valuation policies for derivative investments are disclosed in the Derivatives Policy paragraph.

Investment Income (Loss)

The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) and net appreciation (depreciation) in the fair value of investments of the Master Trust is included in the Statements of Changes in Net Assets Available for Benefits as Raytheon Master Pension Trust investment income (loss). The net appreciation (depreciation) in the fair value of investments consists of the realized gains (losses) and the change in unrealized appreciation (depreciation) on those investments.

Under the Master Trust Agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation. All Master Trust income or loss results in a change in unit value.

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Gains or losses on sales of securities are based on average cost.

Derivatives Policy

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) hedge a portion of the Master Trust's portfolio against exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust may utilize both exchange traded derivatives such as equity and fixed income futures and option contracts and over-the-counter ("OTC") derivatives such as forward contracts and swaps. Select major financial institutions are used in derivatives transactions. When engaging in OTC derivatives and forward foreign currency exchange contracts ("forward currency contracts"), there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. As needed for material exposures, the Master Trust manages these exposures

Notes to Financial Statements

As of December 31, 2018 and 2017

through credit approvals, limits, monitoring procedures, and, to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. The Master Trust does not anticipate nonperformance by counterparties to these contracts.

The following tables present the values of derivatives (not accounted for as hedging instruments) carried on the Statement of Net Assets for the Master Trust and Summary of Investment Earnings as of and for the year ended December 31, 2018:

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Currency Contracts

A forward currency contract is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies, and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) on the Statement of Net Assets for the Master Trust. When the forward exchange contract is settled, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was entered into and the value at the time it was settled or offset. Sales and

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

As of December 31, 2018 and 2017, the total aggregate face value of open forward currency contracts in the Master Trust was (\$12,243,177) and \$2,802,732, respectively.

Futures Contracts

A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange.

The Master Trust may use equity index, fixed income, interest rate, and commodities futures contracts to manage exposure to the market. Buying futures contracts increases the Master Trust's exposure to the underlying instrument. Selling futures contracts decreases the Master Trust's exposure to the underlying instrument held or hedges the fair value of other investments held in the Master Trust.

Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. The accumulated balance of such receipts or payments is recorded within Cash held at broker due to variation margin on the Statement of Net Assets for the Master Trust. The Master Trust will also record an unrealized gain or loss on futures contracts, which is calculated as the difference between the notional cost and the notional market value of open futures contracts.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that the change in the value of the futures contract may not correlate exactly with the change in value of the securities hedged.

At December 31, 2018, U.S. Government Bonds with a par value of \$21,064,000 (fair value of \$21,283,081) were pledged as collateral for open futures contracts. These bonds are restricted from trading until the futures contracts for which they are pledged as collateral are settled. A cash balance of \$18,001,664 was pledged to cover margin requirements for open futures contracts.

At December 31, 2017, U.S. Government Bonds with a par value of \$9,925,000 (fair value of \$9,928,222) were pledged as collateral for open futures contracts. These bonds are restricted from trading until the futures contracts for which they are pledged as collateral are settled. A cash balance of \$5,235,127 was pledged to cover margin requirements for open futures contracts.

Option Contracts

The Master Trust may invest in option contracts. An option contract is a contract in which the writer of the option contract grants the buyer of the option contract the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain option contracts, including option contracts on indices, will require cash settlement by the Master Trust if the option contract is exercised. The Master Trust may enter into put or call option contracts in order to hedge against potential adverse price movements in the value of the portfolio assets, as a temporary substitute for selling selected investments, to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments, and/or to enhance potential gain.

When the Master Trust purchases or writes an option contract, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option contract purchased or written. Option contracts purchased or written are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and ask prices or at the most recent ask price (bid for purchased option contracts) if no bid and ask price are available. OTC purchased or written option contracts are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is settled.

If the Master Trust writes a covered call option contract, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option contract period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option contract, it accepts the risk of a decline in the value of the underlying security below the exercise price. OTC option contracts have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased option contracts is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

and a change in value of the option contract may not correlate exactly with changes in the value of the underlying security.

As of December 31, 2018, the Master Trust was not invested in any option contracts.

As of December 31, 2017, the Master Trust had open purchased equity index option contracts with total fair value of \$106,386 (390 contracts) included within Investments at fair market value on the Statement of Net Assets for the Master Trust. The premiums paid on open contracts as of December 31, 2017 were \$1,198,096.

Sales	(71,030)
Transfers in (out) of level 3	-
Balance, end of year	11,369,039

For the years ended December 31, 2018 and 2017, there were no transfers in to or out of Levels 1, 2, and 3.

Unallocated insurance contracts consist of both general account and separate account components. The general accounts are valued at contract value (which represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses) which approximates fair value. The separate account is valued at the fair value of the net assets of the accounts as reported by Voya Retirement Insurance and Annuity Company. Annually, Company management reviews the reported contract values for reasonability.

7. Termination Policies

The Company has not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

- a) The assets comprising the Plan, including the net income (loss) of the Plan, shall be revalued at market by the Trustee.
- b) The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.
- c) To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (the "PBGC") to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefit obligations, and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Company may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the Plan Document for more information.

8. Certain Transactions Involving Related Parties and Parties-in-Interest

BNY Mellon, as the Trustee and Custodian of the Plan, incurs expenses in connection with these services to the Plan and Master Trust, and is therefore a party-in-interest with respect to the Plan. Certain investments within the Master Trust were advised by or affiliated with BNY Mellon. The

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

Plan Sponsor, Raytheon Company, is a party-in-interest with respect to the Plan and incurs expenses in connection with the administration of the Plan and the Master Trust.

The following table is a summary of the expenses paid to parties-in-interest for years ended December 31, 2018 and 2017:

	<u>Year Ended 2018</u>	<u>Year Ended 2017</u>
Expenses specifically related to the Plan	\$ 89,404	\$ 204,832
Plan's allocation of expenses paid directly by the Master Trust	39,197	238,112

The following table is a summary of accrued expenses that have not yet been paid as of December 31, 2018 and 2017:

	<u>As of December 31, 2018</u>	<u>As of December 31, 2017</u>
Accrued expenses (included in "Accrued administrative expenses" and "Other liabilities")	\$ -	\$ 129,010

For the years ended December 31, 2018 and 2017, \$57,261 and \$58,803, respectively, of insurance contract expenses specifically related to the Plan were incurred in addition to the expenses summarized in the table above. There were no insurance contract expenses accrued as of December 31, 2018 and 2017.

All of these transactions either fall outside the scope of or are exempt from ERISA's prohibited transaction rules.

9. Tax Status

The Internal Revenue Service (the "IRS") has determined and informed the Company by letter dated May 1, 2012, that the design of the Plan meets the requirements for qualification under Internal Revenue Code ("Code") section 401(a) on which the tax exemption of the Trust under Code section 501(a) is based. The Plan has been amended since receiving the determination letter. The Plan Administrator and the Company's benefits counsel believe that the current design and operation of the Plan are consistent with continued qualification of the Plan and exemption of the Trust in the context of applicable IRS procedures. The Company, on behalf of the Plan, applied for a new determination letter on January 29, 2016.

The Plan adopted the provisions of uncertain tax positions that provide criteria for the recognition, measurement, presentation, and disclosure of uncertain tax positions. The Plan may from time to time hold investments that give rise to certain tax liabilities. Based upon management's assessment, the Plan has not recognized any tax liabilities at December 31, 2018 and 2017. The Plan is subject to examinations by taxing jurisdictions; however, there are currently no audits for any tax period in progress. The Plan Administrator believes the Plan is no longer subject to federal tax examination for years prior to 2015.

10. Contracts with Insurance Companies

The Plan has entered into contracts with the Insurance Companies primarily for the purpose of distributing monthly pension payments on behalf of certain participants. Under the contracts, the Plan maintains a minimum balance in an unallocated account with each insurance company. The

Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

Notes to Financial Statements

As of December 31, 2018 and 2017

Insurance Companies pay annual interest which ranged from 3.00% to 4.39% and 3.00% to 3.97% in 2018 and 2017, respectively.

11. Risks and Uncertainties

The Plan financial statements are based on the application of GAAP, which require the Plan to make estimates and assumptions about future events that affect the amounts reported in financial statements and the accompanying notes.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. The investments of the Plan are exposed to various risks, such as interest rate, market, counterparty, and credit risks. See Note 5 for additional information with respect to investment risk.

12. Subsequent Events

The Plan has evaluated subsequent events and transactions subsequent to December 31, 2018 through the date the Plan's financial statements were available to be issued, September 10, 2019.

On June 9, 2019, Raytheon Company and United Technologies Corporation (UTC) entered into an agreement to combine in an all-stock merger of equals. The merger is expected to close in the first half of 2020, following completion by UTC of the previously announced separation of its Otis and Carrier commercial businesses, and subject to customary requirements including shareholder and regulatory approval. Upon the closing of the merger transaction, the combined company will be named Raytheon Technologies Corporation.

ACTUARIAL METHODS FOR FUNDING

Asset Methods

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** Conduent, Inc. provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
- **Insurance contracts:** The plan does have insurance contracts. Participating annuity contracts in the plan's IPG contract with John Hancock and Aetna are included in the valuation data.

*Schedule SB, Part V — Statement of Actuarial Assumptions/Methods***Minimum Funding Methods**

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

MISCELLANEOUS	
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2018, the limit is \$220,000.

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated effective January 16, 2015, are included in this valuation:

- **Most recent plan amendments included:** Not applicable.
- **Plan amendments excluded:** None
- **Late retirement increases:**
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued with retroactive payments from age 65.
- **IRC Section 415(b) benefit limitations:** The limitation of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

PLAN PROVISIONS SPECIFIC TO FUNDING

Additional Benefits Included or Excluded

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* N/A
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* N/A
 - *Scheduled benefit increases:* None.
