National Distributing Company, Inc. Pension Plan

Notes to Financial Statements

December 31, 2018 and 2017

1. Description of Plan

The following description of the National Distributing Company, Inc. Pension Plan (the Plan) provides only general information. Participants should refer to the Plan document, copies of which are available from the plan administrator, for a more complete description of the Plan's provisions.

General

The Plan is a non-contributory defined benefit pension plan covering substantially all of the employees of National Distributing Company, Inc. (the Company) who had completed at least six months of employment at the time the Plan was frozen. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective December 31, 2006 (Freeze Date), all benefits under the Plan were frozen. No additional employees were eligible after the Freeze Date.

Plan Termination

On February 21, 2019, the Board of Directors of National Distributing Company, Inc. approved the termination of the Plan effective April 30, 2019. All required filings with the DOL and the Pension Benefit Guaranty Corporation (PBGC) will be made and notice of intent to terminate the Plan were sent to all participants on February 25, 2019.

Contributions

Contributions to the Plan are made by the Company based upon actuarially determined annual funding amounts. As of December 31, 2018 and 2017, the Plan has met the minimum funding requirements of ERISA.

Benefit Payments

A participant's benefits are based on the sum of .65% of final average monthly earnings up to covered compensation, which varies based on age, and .55% of average monthly earnings in excess of covered compensation, multiplied by the years of service through December 31, 2006 (the date the Plan was frozen), limited to thirty years. Normal retirement age is 65. Participants are entitled to early retirement after attaining age 55 and completing ten years of service, at a reduced amount.

If the participant has 10 years of vesting service at termination, the benefit can be paid as early as age 55, with a benefit based on the frozen accrued normal retirement benefit.

National Distributing Company, Inc. Pension Plan

Notes to Financial Statements

December 31, 2018 and 2017

In 2007, as a result of the Plan being frozen, all active participants became fully vested in their frozen accrued normal retirement benefit calculated as of December 31, 2006. If a participant had not attained the service requirement eligibility for early retirement, then they would not be vested in the full early retirement benefit until the early retirement eligibility service requirement is met.

Accordingly, certain amounts of the accumulated benefit obligation would reflect these as non-vested.

Death and Disability Benefits

Death benefits are provided to participant's designated beneficiaries upon death of a participant in accordance with plan provisions, which may vary depending upon if death is prior to participant's retirement or after termination of employment and before pension payments commence. Forms of death benefit payments and amounts may vary, depending upon plan provisions. Amounts of death benefits may vary according to certain conditions noted above, but will be based on frozen accrued benefit calculated as of December 31, 2006.

Participants whose employment is terminated on account of disability, before death or retirement, are eligible for a disability retirement pension. Payment of disability retirement pension shall commence as of the participant's normal retirement date, subject to early retirement eligibility and reduced benefit. Accrued benefits for purposes of a disability payment will be based on the frozen accrued benefit calculated as of December 31, 2006.

Funding Policy

The Company's funding policy is to contribute at least the amount necessary to remain a qualified plan under the Internal Revenue Code. The Plan has complied with the minimum funding requirements of ERISA. Effective January 1, 1995, employee contributions were discontinued and interest has been credited thereon compounded annually at interest rates which vary from year to year. Interest rates of 2.62% and 2.36% was credited in 2018 and 2017, respectively. The accumulated contributions including cumulative interest was based on a valuation date of January 1, 2018 and 2017, respectively, and approximated \$890,000 and \$1,454,000 at December 31, 2018 and 2017, respectively.

Administrative Expenses

The Plan pays the custodian fees and other administrative expenses as permitted in the Plan document. Investment fees are included in net change in fair value of the investments.

Summary of Significant Accounting Policies

Basis of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities and the actuarial value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Valuation of Investments

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for a discussion of fair value measurements.

Net appreciation and depreciation in fair value of investments includes realized and unrealized gains and losses, interest and dividends on those investments.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits, as discussed in Note 5, are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on participants' average annual compensation, as defined, and the number of years of credited service. The accumulated plan benefits for active employees are based on their current compensation and credited service on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included in accumulated plan benefits to the extent they are deemed attributable to service rendered to the valuation date.

Payment of Benefits

Benefits are recorded when paid.

Notes to Financial Statements

December 31, 2018 and 2017

Subsequent Events

The Plan evaluates events occurring subsequent to the date of the financial statements in determining the accounting for and disclosure of transactions and events that affect the financial statements. Subsequent events have been evaluated through September 5, 2019, which is the date the financial statements were available to be issued.

2. Information Certified by the Custodian

All information in the accompanying financial statements and supplemental schedules, including investments held at December 31, 2018 and 2017, and net appreciation and depreciation in fair value of investments for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by State Street Bank and Trust Company (State Street), the Plan's custodian.

3. Investments

Investments are exposed to various risks, such as market, currency, interest rate, and credit risks. It is at least reasonably possible that change in their fair values will occur in the near term and that such changes could materially affect the funded status of the Plan.

The Financial Accounting Standards Board established a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities, and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are described as follows:

Level 1 – Unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access

Level 2 – Other observable inputs, including quoted prices for identical assets in inactive markets

Level 3 – Unobservable inputs

Observable inputs are those based on market data obtained from sources independent of the Plan, and unobservable inputs reflect the Plan's own assumptions based on the best information available. The input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level but rather the degree of judgment used in determining those values.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2018 and 2017.

National Distributing Company, Inc. Pension Plan

Notes to Financial Statements

December 31, 2018 and 2017

Investments in mutual funds are based on quoted market prices for the identical security in an active market, and are considered Level 1 assets.

The following table summarizes the Plan's investments based on the inputs used to determine their fair values as of December 31, 2018 and 2017:

	Level 1	
	2018	2017
Mutual funds	\$ 60,026,319	\$ 65,621,488
Other	8,909	8,909
Total	\$ 60,035,228	\$ 65,630,397

4. Benefit Obligations

As of the beginning of the Plan year, the actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation of the Plan were (a) life expectancy of participants based upon the IRS applicable mortality, (b) retirement age assumptions, and (c) investment return assumed at an interest rate of 5.5% compounded annually. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of January 1, 2018 is as follows:

Vested benefits:	
Participants and beneficiaries currently receiving payments	\$ 41,810,656
Active participants	7,812,236
Terminated vested participants	12,333,407
	61,956,299
Nonvested benefits	4,216
Actuarial present value of accumulated	
Plan benefits as of January 1, 2018	\$ 61,960,515

National Distributing Company, Inc. Pension Plan

Notes to Financial Statements

December 31, 2018 and 2017

The change in the actuarial present value of accumulated plan benefits from January 1, 2017 to January 1, 2018 consists of the following:

Actuarial present value of accumulated plan benefits	
as of January 1, 2017	\$ 85,995,715
Changes due to:	
Interest accumulated	3,866,079
Benefits paid	(31,832,798)
Changes in assumptions	(495,223)
Benefits accrued and actuarial experience	4,426,742
Actuarial present value of accumulated Plan	
benefits as of January 1, 2018	\$ 61,960,515

The changes in assumptions relate to changes in the mortality table, increases in the interest rate on employee contributions and a decrease in expected administrative expenses for the Plan.

The Plan's Adjusted Funding Target Attainment Percentage (AFTAP), calculated under provisions of the Internal Revenue Code (IRC), was approximately 102% at January 1, 2018. Accordingly, there were no restrictions on distributions in 2018.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

5. Termination of the Plan

The Board of Directors elected to terminate the Plan on February 21, 2019 effective April 30, 2019. The net assets of the Plan will be allocated as prescribed by ERISA and its related regulations governing the priority order of participants' claims to the net asset of the Plan.

In general, the PBGC will guarantee the payment of most vested normal retirement age benefits and early retirement age benefits that employees were receiving or were entitled to receive as of the date the Plan terminated. Such benefits, however, are only guaranteed to the extent of the actuarial value of the vested benefits as of the date the Plan terminated, payable in the form of a straight-life annuity commencing at age 65. Additionally, the total amount of such guaranteed benefits is subject to an overall ceiling that is adjusted periodically by the PBGC.

6. Income Tax Status

The Plan obtained its latest determination letter on October 20, 2014, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the IRC. The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and accordingly has no income subject to unrelated business income tax. The Plan's income tax returns for the past three years are subject to examination by taxing authorities and may change upon examination.

A ACTUARIAL COST METHOD

The actuarial cost method used to determine the target normal cost, target liability and required contribution amounts for the plan is the Traditional Unit Credit Actuarial Cost Method. Under this method, both the target normal cost and target liability are based on the annual accrual of benefits as accruals occur each year.

The target liability for each active plan participant is equal to the actuarial present value of the participant's accrued benefit as of the valuation date. The total target liability of the plan is equal to the sum of such liabilities as determined for each active participant plus the actuarial present value of benefits being paid, or due to be paid, to retirees, beneficiaries and former participants with deferred vested benefits.

The target normal cost for each active participant is equal to the actuarial present value of the benefit expected to be earned during the year starting on the valuation date. The total target normal cost of the plan is the sum of the target normal costs for each active plan participant.

All employees who are plan participants on a valuation date are included in the actuarial valuation.

B ASSET VALUATION METHOD

The actuarial value of assets is equal to the market value of assets on the valuation date reduced by the sum of:

1. 66.67% of gains and losses of the prior year;
2. 33.33% of gains and losses of the second prior year.

Investment gains and losses are determined by the excess or deficiency of the expected return (at the valuation interest rate) over the actual return on the market value (including employer contributions receivable for any given year).

The actuarial valuation of assets is further constrained to be not less than 90% or more than 110% of market value (including employer contributions receivable).
