All participants are fully vested. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits

Normal retirement age is 65. The retirement benefit represents the applicable benefit rate, as defined, multiplied by the participant's years of credited service, as defined.

Generally, early retirement age is 55, provided the participant has accrued 10 years of credited service, and retirement due to disability requires 15 years of vesting service. Benefits are paid to the retirees in the form of a monthly annuity payment. If the actuarial present value of a participant's monthly benefit does not exceed \$1,000, the participant's entire interest in the Plan will be paid to them in a single lump sum.

Plan Termination

While it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA. In the event of termination of the Plan, the net assets of the Plan shall be used and applied first for the benefit of retired employees and employees who have reached their normal retirement date and second for the benefit of all other employees based on their accrued retirement benefits at the date of termination of the Plan in amounts proportionate to the actuarially determined present value of their retirement benefits at the date of termination of the Plan. Any balance remaining after satisfaction of all liabilities of

1. Description of the Plan (continued)

the Plan shall be returned to the Company. If the Plan is terminated, certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC). Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions.

The PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, relating to the maximum amount of an individual's monthly benefit that the PBGC guarantees. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting.

Payment of Benefits

Benefits are recorded when paid.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and other assets which are highly liquid, have an original maturity of 90 days or less, have high credit quality and are diversified. Cash equivalents represent an investment in the BIF Money Fund. The fair value of this investment is based on net asset value (NAV) which reflects the value of the underlying assets owned by the BIF Money Fund, minus liabilities, and then divided by the number of shares outstanding.

2. Summary of Significant Accounting Policies (continued)

Investment Valuation and Income Recognition

The mutual funds held are Merrill Lynch, Pierce, Fenner & Smith (Merrill Lynch) publicly listed investment funds. The fair value is based upon each fund's net asset value (NAV) and is quoted in a market that is active. Merrill Lynch determines the published NAV which is based on the value of the underlying assets owned by the funds, minus liabilities, and then divided by the number of shares outstanding. These investments included both equity and commingled funds securities and may incorporate the use of options, futures, and other financial instruments. There are no restrictions on redemption of these assets.

All investment transactions, including cash equivalents, are recorded by the State Street Corporation (the Trustee) on a trade-date basis. Realized gains and losses on the sale of investments are determined for accounting purposes on a moving average cost basis. Net appreciation and depreciation of investments include both realized and unrealized gains and losses on investments.

Purchases and sales transactions are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date.

Tax Status

The Plan is relying on the determination letter from the Internal Revenue Service (the IRS) dated January 4, 2017, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualified status. Subsequent to this determination by the IRS, the Plan has been amended. The plan administrator believes the Plan, as amended, is currently being operated in compliance with the applicable requirements of the Code and therefore believes the Plan is qualified and the related trust is tax-exempt. In addition, the plan administrator has indicated that it will take the necessary steps, if any, to bring the Plan's operations into compliance with the Code, if necessary.

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax

2. Summary of Significant Accounting Policies (continued)

position taken by the Plan, and has concluded that as of December 31, 2018, there are no uncertain tax positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions, however, there are currently no audits for any tax periods in progress.

Funding Policy

The Company makes contributions to the Plan sufficient to meet the actuarially determined funding requirements of ERISA and the Pension Protection Act of 2006. The Plan has met such requirements for 2018 and 2017.

The Highway and Transportation Funding Act (HATFA) was enacted on August 8, 2014, potentially lowering the minimum funding requirements for defined benefit plans. In September 2014, the plan sponsor used the HATFA segmented interest rates for benefit restriction and minimum funding calculations for the plan year beginning January 1, 2014. The plan continues to use HATFA rates in 2018 and 2017.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States requires the plan administrator to make estimates and assumptions that affect the amounts reported in the financial statements, and accompanying notes and supplemental schedules. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Retirement Plan for Hourly Paid Employees of Specialty Granules LLC

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Administrative Expenses

As provided by the Plan, expenses of the Plan are paid by either the Plan or the Company. In 2018 and 2017, expenses were paid by both the Plan and the Company. Expenses paid directly by the Company are not included in the Statement of Changes in Net Assets for Benefits of the Plan.

Fair Value Measurements

The accounting guidance on fair value measurements and disclosures establishes a valuation hierarchy that prioritizes the inputs used to measure fair value based on three defined levels or criteria. The hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the reporting entity's market assumptions. The three levels of inputs that may be used to measure fair value are as follows:

- **Level 1** – Quoted prices for identical instruments in active markets;
- **Level 2** – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose significant inputs are observable; and
- **Level 3** – Instruments whose significant inputs are unobservable and for which estimates of fair value are determined using related market data.

Retirement Plan for Hourly Paid Employees of Specialty Granules LLC

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. There have been no changes in the valuation methodologies used for assets measured at fair value at December 31, 2018 and 2017, as described above (see Investment Valuation and Income Recognition).

The methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

As of December 31, 2018, and 2017, the Plan held no investments classified as Level 2 or Level 3.

The following table provides the fair value hierarchy of the Plan's investments as of December 31, 2018:

	<u>Level 1</u>
Mutual funds:	
Equity funds	\$ 4,088,434
Commingled funds	1,190,563
Investments in the fair value hierarchy	5,278,997

Total investments	<u>\$ 5,334,991</u>

The following table provides the fair value hierarchy of the Plan's investments as of December 31, 2017:

Equity funds	\$ 4,482,127
Commingled funds	1,284,378

New Accounting Pronouncements

In July 2018, the FASB issued ASU 2018-09, *Codification Improvements*, which, among other things, amends an illustrative example of a fair value hierarchy disclosure to indicate that a certain type of investment should not always be considered to be eligible to use the net asset value per share practical expedient. Also, it further clarifies that an entity should evaluate whether a readily determinable fair value exists or whether its investments qualify for net asset value per share practical expedient in accordance with Accounting Standards Codification 820, *Fair Value Measurement*. Adoption of the amended guidance, which is to be applied prospectively, affects the fair value disclosures, but does not change the fair value measurement of the investments. Management is currently determining the effect on the Plan of adopting ASU 2018-09. ASU 2018-09 is effective for entities for fiscal years beginning after December 15, 2019, with retrospective application to all periods presented. Early application is permitted.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments calculated based upon the provisions of the Plan. Benefits payable under all circumstances are included to the extent that they are deemed attributable to employee services rendered to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) current employees or their beneficiaries.

The actuarial present value of accumulated plan benefits is determined by Milliman, Inc., a consulting actuarial firm, by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the date as of which the benefit information is computed and the expected date of payment.

Notes to Financial Statements (continued)

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

The actuarial present value of accumulated plan benefits for the Company as of December 31, 2017, and the changes therein for the year then ended, are as follows:

	December 31, 2017
Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Participants currently receiving payments	\$ 2,164,415
Other participants	3,791,199
Total vested benefits	5,955,614
Non-vested benefits	36,100
Total accumulated plan benefits	<u>\$ 5,991,714</u>
	Year Ended December 31, 2017
Changes in the actuarial present value of accumulated plan benefits:	
Actuarial present value of accumulated plan benefits at beginning of year	\$ 6,013,635
Increase (decrease) during the period attributable to:	
Benefits paid to participants	(399,205)
Change in average discount period	349,016
Changes in actuarial assumptions (mortality improvement)	(17,248)
Additional benefits accumulated, including gains and losses	45,516
Actuarial present value of accumulated plan benefits at end of year	<u>\$ 5,991,714</u>

The value at December 31, 2017 is based on an actuarial valuation as of January 1, 2018. Had the valuation been performed on December 31, 2017, there would be no material differences. The significant actuarial assumptions used in the valuation as of January 1, 2018, were (a) the life expectancy of participants was determined through the use of the RP 2014 Mortality Table with blue collar adjustment backed out to 2006 with Scale MP-2014 and projected forward with the MP 2018 Mortality Improvement Table for males and females, (b) retirement age assumptions (the assumed average retirement age is 62), and (c) a liability discount rate of 6%. For the plan year

Notes to Financial Statements (continued)

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

ended December 31, 2017, life expectancy was determined using the RP 2014 Mortality Tables with blue collar adjustment backed out to 2006 and projected with the MP – 2018 projection scale for males and females.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Information Certified by the Trustee

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Certain information related to investments for the Plan disclosed in the accompanying financial statements and supplemental schedules including investments held at December 31, 2018 and 2017, and net (depreciation) appreciation in fair value of investments and dividend income for the years ended December 31, 2018 and 2017, was obtained or derived from information provided to the plan administrator and certified as complete and accurate by State Street Bank and Trust, the trustee of the Plan.

5. Subsequent Events

Management evaluated subsequent events for the Plan through September 23, 2019, the date the financial statements were available to be issued.

**Retirement Plan for Hourly Paid Employees of Specialty Granules Inc.
2018 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods
EIN/PN: 22-3807370 / 003**

Appendix A – Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. A plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that a plan will be adequately and systematically funded and accounted for. Annual contributions and accounting expense are also affected by a plan's "asset valuation method" (as well as plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements and the FASB ASC Topic 960 values is the Unit Credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's normal cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's benefits.

Asset Valuation Method

The Actuarial Value of Assets used for determining the Plan's ERISA funding requirements is equal to the Adjusted Market Value of Assets.

Changes in Actuarial Methods Since Prior Valuation

None.

2018 Schedule SB, Part V – Statement of Actuarial Assumptions/Methods
EIN/PN: 22-3807370 / 003**

Appendix B – Summary of Actuarial Assumptions

ECONOMIC ASSUMPTIONS

Interest Rates

The current funding interest rates are as follows. The funding interest rates are prescribed under IRS regulations based on the Plan Sponsor's interest rate election.

	Minimum Funding	Maximum Deductible
Segment 1 (0-5 years)	3.92%	1.75%
Segment 2 (5-20 years)	5.52%	3.76%
Segment 3 (20+ years)	6.29%	4.66%
Effective Interest Rate	5.58%	3.89%

ERISA minimum funding: 24-month average segment rates, using a four-month lookback period (adopted January 1, 2008), adjusted to reflect the applicable segment rate stabilization corridor.

This assumption is a prescribed assumption, set by the Internal Revenue Code Section 430. The sponsor has elected to utilize a 4-month look-back, with rates averaged over a 24-month period, limited to applicable minimum and maximum values in accordance with MAP-21 and HATFA. These rates are utilized for purposes of calculating the Plan's Funding Target and Target Normal Cost for minimum funding purposes under ERISA and related tax codes.

Maximum Deductible Contribution: 24-month average segment rates, using a four-month lookback period, but not adjusted to reflect segment rate stabilization.

This assumption is a prescribed assumption, set by the Internal Revenue Code Section 430. The sponsor has elected to utilize a 4-month look-back, with rates averaged over a 24-month period. These rates are utilized for purposes of calculating the Plan's Maximum Deductible Contribution.

FASB ASC Topic 960: Expected Return on Assets of 6.00%, compounded annually.

Rationale: Chosen by Plan Sponsor

Administrative Expenses

An allowance of \$180,000 for administrative expenses has been included in the Target Normal Cost, reflecting actual administrative expenses paid from the Plan's trust during the previous year, rounded to the next \$1,000.

Rationale: The expense assumption represents an estimate of future experience based on the prior year's actual expenses. We believe the expense assumption selected is reasonable for the contingency it is measuring and is not anticipated to produce significant cumulative actuarial gains or losses over the measurement period.

EIN/PN: 22-3807370 / 003**

DEMOGRAPHIC ASSUMPTIONS

We believe the demographic assumptions shown below are reasonable for the contingencies they are measuring and are not anticipated to produce significant cumulative actuarial gains or losses over the measurement period.

Mortality

ERISA minimum funding and Maximum Deductible Contribution: Statutory Static tables applicable for 2018.

Rationale: This assumption is based on statutory tables.

FASB ASC Topic 960: RP-2014 Blue Collar Mortality Tables adjusted backward to 2006 with Scale MP-2014 and projected forward with Scale MP-2017.

Rationale: The plan is not large enough to develop a credible mortality table based exclusively on plan experience. We have relied on the above-mentioned published mortality table in which credible mortality experience was analyzed.

Retirement

Rates for active and terminated vested participants are as follows:

Age	Rate
55 – 61	5%
62 – 63	25%

Vested terminated participants are assumed to elect to start receiving benefits at age 55 or current age, if later.

Multiplying each age by the overall probability of retiring at that age, and summing the products, results in a weighted average retirement age of 62.

Rationale: This assumption was developed based on the plan's historical experience. In addition, we have considered sponsor input, eligibility criteria for the benefits, our experience with similar populations and industries, eligibility criteria for social insurance programs, and economic conditions that might have influenced prior experience or may impact future experience.

Service	Rate
0	25.0%
1	15.0%
2	10.0%
3	0.0%

Rationale: This assumption was developed based on industry standard termination rates as well as the plan's historical experience.

25	0.1634%	0.0888%
40	0.4350%	0.3924%
50	1.0944%	0.9414%
55	1.9062%	1.5656%

Rationale: This assumption was developed based on industry standard termination rates as well as the plan's historical experience.

Marital Characteristics

For participants not in pay status: We have assumed 80% of participants are married with spouses of opposite gender and males three years older than females. This assumption represents an estimate of future experience.

EIN/PN: 22-3807370 / 003**

For participants in pay status: Actual birth dates of spouses are included in the census data, where relevant.

Rationale: This assumption was developed based on the plan's historical experience that the most participants are married at retirement.

Election of Optional Form of Benefit

100% of participants are assumed to elect the Single Life Annuity form of benefit at retirement.

Rationale: This assumption was developed based on the fact that all optional forms are actuarially equivalent.
