Change in Method

Changes in Assumptions and Methods

Change in methods since prior valuation

The method of determining Actuarial Value of Assets last year was to set the Actuarial Value of Assets equal to the Market Value of Assets. This year the method of determining Actuarial Value of Assets was updated to smooth gains and losses over two 12-month periods. Since a "fresh start" approach was elected as part of this method change, the current valuation sets Actuarial Value of Assets equal to Market Value of Assets phasing the 12-month smoothing in over the next two years.

The above change in method is deemed to be automatically approved in accordance with Revenue Procedure 2017-56.

Asset Method

Average of the fair market value of assets on the valuation date and the 12 and 24 months preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the plan year).

The asset method described above was first elected on January 1, 2018. The fresh-start approach was elected as part of the asset method and therefore the actuarial value of assets as of January 1, 2018 is equal to the market value of assets, including present value of receivables.
