INDEPENDENT AUDITORS' REPORT

Administrator and Plan Participants
Nissin Brake Ohio, Inc. Pension Plan

We have audited the accompanying financial statements of the Nissin Brake Ohio, Inc. Pension Plan, which comprise the statements of net assets available for benefits as of December 31, 2018 and 2017, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Nissin Brake Ohio, Inc. Pension Plan at December 31, 2018 and 2017, and the changes therein for the years then ended and its financial status as of December 31, 2017 and the changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Report on Supplemental Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules listed in the foregoing table of contents, together referred to as "supplemental information", are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplemental information required by the Department of Labor's Rules and Regulations for Report and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting or other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

A – DESCRIPTION OF PLAN

The following brief description of the Nissin Brake Ohio, Inc. Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

General - The Plan is a defined benefit pension plan covering substantially all employees of Nissin Brake Ohio, Inc. (Company). The Plan, formerly known as the Findlex Corporation Pension Plan, changed its name during 2007 to reflect the employer's name change. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan was adopted in November 1998 and was effective as of April 1, 1998. A participant's years of credited service include years (measured from January 1 through December) prior to the effective date of the Plan, if the participant would have been a covered employee and participant but for the fact that the Plan was not yet in existence. Effective December 31, 2006, the Plan was frozen for both new entrants and benefit accrual.

Pension Benefits - Employees attaining the later of age 65 or 5 years from the first day of the Plan year in which Entry Date occurred are eligible for monthly pension benefits. The monthly pension benefit is based on years of credited service multiplied by \$17 but not to exceed \$510 per month. The \$17 rate is gradually reduced for years of credited service in which an employee works less than 1,800 hours but more than 1,000 hours during the year. The rate is \$0 for less than 1,000 hours worked during the year. The Plan permits early retirement at ages 55 - 64. If employees terminate before rendering five (5) years of service, they forfeit the right to receive their nonvested accrued benefit. Employees will receive their pension benefits in the form of a straight life annuity or a qualified joint and survivor annuity payable monthly from retirement. Employees may elect to receive their pension benefits in various optional forms of an annuity. Upon retirement or termination, employees will receive the value of their accumulated plan benefits as a lump-sum distribution provided that the value of their nonforfeitable benefit is equal to or less than \$5,000.

Death Benefits - If a participant dies after becoming vested and before benefits commence, a death benefit equal to the value of the participant's accumulated pension benefits is paid to the participant's beneficiary in the form of an annuity for the life of the beneficiary, one of the optional forms of benefit or a lump-sum distribution.

B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

THE NISSIN BRAKE OHIO, INC.
PENSION PLAN
Notes to Financial Statements
December 31, 2018 and 2017

B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' years of credited service multiplied by the contractual dollar rate. Benefits payable under all circumstances – retirement, death, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from Principal Financial Services and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (the SOA Adjusted RP-2014 Blue Collar Mortality with Scale MP-2017 was used), (b) retirement age assumptions (100% at Normal Retirement Age - age 65), and (c) the assumed average investment rate of return was 6.0%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Payment of Benefits - Benefit payments to participants are recorded upon distribution.

Use of Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Risks and Uncertainties: The Plan utilizes various investment instruments. Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

PENSION PLAN
Notes to Financial Statements
December 31, 2018 and 2017

B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Investment Valuation and Income Recognition: Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note H for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

Subsequent Events: The Plan has evaluated subsequent events through October 7, 2019, the date which the financial statements were available to be issued.

C – FUNDING POLICY

The amount and time of employer contributions shall be determined based on actuarial valuations and recommendations as to the amounts required to fund benefits under this Plan. The amount of employer contributions shall meet or exceed the minimum funding standards of ERISA and the Internal Revenue Code, and the contributions exceeded these minimum amounts. The plan was frozen for both new entrants and benefit accrual effective December 31, 2006.

Notes to Financial Statements
December 31, 2018 and 2017

D – PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Vested benefits insured by the Pension Benefit Guarantee Corporation (PBGC) (a U.S. governmental agency) up to the applicable limitations.
- b. All other vested benefits (that is, vested benefits not insured by the PBGC).
- c. All nonvested benefits.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

E – INVESTMENTS

During 2018, the Plan's investments (including interest, dividends gains and losses on investments, bought and sold, as well as held during the year) appreciated (depreciated) in value as follows: Pooled separate accounts \$(302,969), Money funds \$1,199, for a total of \$(301,770). The Plan transferred \$6,113,076 to Principal Financial Services on December 29, 2017 which was held in a money fund pending investment at December 31, 2017.

F – INCOME TAX

The Plan obtained its latest determination letter on October 28, 2013, in which the Internal Revenue Service stated the Plan, as designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. The Company believes the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, that the Plan is qualified, and the related trust is tax exempt. Plan management believes there are no uncertain tax positions that would require recognition of a liability or disclosure in the financial statements. The Plan's returns are subject to examination by the Internal Revenue Service, generally for three years after the date the return is filed.

H – FAIR VALUE MEASUREMENTS

Accounting standards establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described as follows:

- Level 1** Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.
- Level 2** Inputs to the valuation methodology include
- quoted prices for similar assets or liabilities in active markets;
 - quoted prices for identical or similar assets or liabilities in inactive markets;
 - inputs other than quoted prices that are observable for the asset or liability;
 - inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3** Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2018 and 2017.

H – FAIR VALUE MEASUREMENTS (continued)

Pooled Separate Accounts (PSA's), Money Funds: Measured at fair value on a recurring basis. Valued at Principal Life Insurance Company's daily computed market value as reported by the fund. Principal calculates and publishes the PSA's daily net asset value (NAV). All PSA transactions are at that day's computed NAV. These funds are deemed to be actively traded with a readily determinable fair value and are classified within Level 1 of the valuation hierarchy.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2018 and 2017:

	Level 1	Level 2	Level 3	Total
Assets at Fair Value at December 31, 2018

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
Nissin Brake Ohio, Inc. Pension Plan
EIN 31-1252372 Plan No. 003

Assumptions prescribed by law

Mortality	During benefit payment period IRS Prescribed Mortality - Static Annuitant, male and female. Before benefit payment period IRS Prescribed Mortality - Static Non-annuitant, male and female. At the plan sponsor's direction, we are delaying the use of the Notice 2017-60 mortality table to 2019. The mortality tables are determined using the methodology in §1.430(h)(3)-1 prior to its amendment by T.D. 9826.
------------------	--

Assumptions selected by actuary

Inflation	2.00% increase per year. See Long-Term Capital Market Assumptions link.
Asset return	6.50% for the current plan year. The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.
Expected expense	The expected expense included in target normal cost is an estimate based on the upcoming year's expenses.
Retirement	Active and inactive participants are assumed to retire at normal retirement age as defined in <u>Plan provisions</u> . This is based on the assumption selected by your prior actuary. We believe this assumption is reasonable with the plan's design and we will continue to monitor and make appropriate adjustments
Disability	None. This is based on the assumption selected by your prior actuary. We believe this assumption is reasonable with the plan's design and we will continue to monitor and make appropriate adjustments.
Marriage	100% married; husbands are 0 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.

Withdrawal

Table T-3 from the Actuary's Pension Handbook.

Selected rates of withdrawal are shown below:

Age	Rate of withdrawal
25	5.35%
40	4.04%
54	1.46%

This is based on the assumption selected by your prior actuary. We believe this assumption is reasonable with the plan's design and we will continue to monitor and make appropriate adjustments.

Form of benefit

Participants are assumed to receive their benefits on the normal form at the assumed retirement age.

This is based on the assumption selected by your prior actuary. We believe this assumption is reasonable with the plan's design and we will continue to monitor and make appropriate adjustments.

Methods prescribed by law

Liability measure

Funding target is the present value of the benefits accrued on the valuation date.

Target normal cost includes an estimate of plan expenses for the year.

Benefit accrual

All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target.

The portion based on the plan's definition of accrued benefit.

The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement.

The benefits included in target normal cost are calculated similarly, by splitting the benefits. The target normal cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.

HCE benefit payment restrictions A ratio of the plan assets and accrued liability is used to determine if restrictions apply. Assets and accrued liability are as of the valuation date and are reduced by:

- any retiree benefit index or floor
- amounts for HCEs who were previously restricted
- an amount for the retiring HCE

The estimated HCE ratio illustrated in this report is based on the market value of plan assets (excluding late deposits) and funding target as of the valuation date. The funding target uses the non-stabilized interest rates as defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods could be used.

Methods selected by plan sponsor

Asset method Market value

Segment rates 24-month average with no weighting to prior law basis. Use rates where December is the last month included in the average.

PBGC premium basis Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method.

Segment 1	Segment 2	Segment 3
years 0-5	years 5-20	years 20+
2.33%	3.55%	4.11%

Methods elected by actuary

Retirees Assets and liabilities for current and future retirees are included.

Vested benefits A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.

The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)
With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality

Rates

Adjusted RP-2014 blue collar mortality (baseline mortality table as of 2006 based on experience study data for private pension plans underlying RP-2014).

Mortality improvement (MI)

MP-2017

During benefit payment period

Above table with generational MI, annuitant, male and female

Before benefit payment period

Above table with generational MI, non-annuitant, male and female

The Society of Actuaries is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. This table and improvement scale is based on the most current data available published by the SOA in October 2017.

(The mortality used in the prior year was not collar adjusted.)

Interest rate used to value liabilities

6.00%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

	1,400 – 1,499 hours	\$13
	1,300 – 1,399 hours	\$12
	1,200 – 1,299 hours	\$11
	1,100 – 1,199 hours	\$10
	1,000 – 1,099 hours	\$9
	Less than 1,000	\$0
Benefit freeze	Effective 12/31/2006 the accrued benefit is frozen and no additional benefits shall accrue on and after such date.	

Early retirement benefit

Age	Attained age 55.
Service	Completed 10 years of service or
Age	Attained age 60
Service	Completed 5 years of service.
Form	Same as normal retirement benefit.
Amount	Accrued benefit reduced by 5% per plan year, prorated per month, for each calendar month preceding normal retirement date.

Schedule SB, Part V - Summary of Plan Provisions
Nissin Brake Ohio, Inc. Pension Plan
EIN 31-1252372 Plan No. 003

Late retirement benefit

Age	No maximum age.
Form	Same as normal retirement benefit.
Amount	Greater of the actuarial equivalent of the retirement benefit as of the close of the prior plan year or accrued benefit at the close of the current plan year.

Termination benefit

Vesting percentage	100% after five years of vesting service.
Form	Same as normal retirement benefit.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

Survivor annuity death benefit (a vested benefit)

Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly annuity payable to spouse immediately.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a 50% qualified joint and survivor annuity in effect, then died the next day.

Death benefit (a nonvested benefit)

Eligibility	Participant's spouse or non-spouse named beneficiary.
Form	Monthly annuity payable to spouse or lump sum to non-spouse named beneficiary (optional forms available).
Amount	Actuarial Equivalent of the accrued benefit but cannot be less than the survivor annuity death benefit.

Definitions

Optional forms of benefit payments

The optional forms of benefit payments are:

- Monthly annuity payable for 5, 10 or 15 years certain and life.
- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75 or 100.

The optional form conversion basis is 7% interest and the mortality table in 1983 Group Annuity for payments other than lump sums.

The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the third calendar month preceding the first day of the stability period which is the plan year.

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.

Nissin Brake Ohio, Inc. Pension Plan
EIN 31-1252372 Plan No. 003

The Employee Retirement Income Security Act of 1974, Section 103(c)(4), requires the plan administrator to furnish an explanation of a change in the enrolled actuary as part of the annual report. There was a change in enrolled actuaries since last year. The actuarial valuation work continues to be done by Principal Life Insurance Company. However, the individual involved with this plan as the enrolled actuary has changed due to a change in the plan assignment among enrolled actuaries at Principal Life Insurance Company.
