Report of Independent Auditors

To the Advisory Committee
ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan

Report on Financial Statements

We were engaged to audit the accompanying financial statements of ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2018 and 2017, and the related statement of changes in net assets available for benefits for the year ended December 31, 2018, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL's) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, as amended (ERISA), the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 8, which was certified by Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2018 and 2017, and for the year ended December 31, 2018, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance with DOL Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Pilots Minimum Monthly Retirement Income Plan

Notes to Financial Statements

Note 1 – Description of Plan

The following description of ABX Air, Inc. Pilots Minimum Monthly Retirement Income Plan (the Plan) provides only general information. Participants should refer to the plan document, as amended, for a more complete description of the Plan's provisions.

General

The Plan was established January 1, 1981 by ABX Air, Inc. (the Company). The Plan is a trustee, noncontributory defined benefit pension plan and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). Plan benefits are coordinated with benefits available from the ABX Air, Inc. Profit Sharing Plan (PSP) to ensure a meaningful level of retirement income to participants.

Effective April 6, 2010 (the Freeze Date), the Board of Directors of the Company elected to freeze all benefit and service accruals in the Plan. For participants who were employed on the Freeze Date, the calculation of retirement benefits does not include years of credited service, average monthly compensation, or changes in profit sharing account balances during employment after the Freeze Date. In addition, otherwise eligible employees are not allowed to enter the Plan on or after the Freeze Date.

Eligibility

Prior to the Freeze Date, each employee, who was covered by the collective bargaining agreement negotiated under Title II of the Railway Labor Act and who was not a leased employee or special project worker, was eligible to participate in the Plan subsequent to the completion of a consecutive 12 month period of service during which the employee worked at least 400 hours. No employees may become participants in the Plan on or following the Freeze Date.

Vesting

Participants' interests do not vest until the participant has five years of service, at which time they become 100% vested.

Benefit Payments

The normal retirement date for pilots is the participant's 60th birthday. Normal retirement date for flight engineers is the participant's 65th birthday. The normal retirement benefit payable may be in the form of a single life annuity, qualified joint and survivor annuity, or any optional annuity form as described in the plan document.

Participants are eligible to receive a retirement benefit based on the highest five years of annual compensation received in the past ten years of employment, known as average monthly compensation. Average monthly compensation is multiplied by 2%, multiplied by the potential years of service up to a maximum of 25 years, and then multiplied by the actual years of service divided by the potential years of service. These benefits are reduced by the participant's profit sharing plan annuity benefit and any other retirement income plan to which the Company contributes on behalf of the employee, exclusive of 401(k) plan benefits. Each participant's accrued benefit was determined and frozen as of the Freeze Date. No years of credited service or compensation earned after the Freeze Date is used in determining a participant's accrued benefit.

ABX Air, Inc.
Pilots Minimum Monthly Retirement Income Plan
Notes to Financial Statements

Note 1 – Description of Plan (continued)

A participant may continue in the employment of the Company beyond his or her normal retirement date. No payment of benefits is made until a participant actually retires, separates from service, or reaches the maximum age required by law.

A participant who has attained age 55 and completed at least ten years of service is eligible for early retirement. If an employee retires before his or her normal retirement date, the retirement benefit is reduced by 6% for each year of early retirement.

The Plan also provides for various levels of death benefits to spouses of participants. If a participant becomes disabled, his or her benefit is the same as if he had been able to elect to retire at that time. The benefit is reduced actuarially for early commencement.

Funding

Company contributions are funded in amounts actuarially determined to provide the defined benefits to participants. The contributions are subject to Internal Revenue Service (IRS) limitations. The Plan met the minimum funding requirements for the year ended December 31, 2018.

Plan Termination

Although it has not expressed any intention to do so, the Company has the right to terminate the Plan and discontinue its contributions at any time subject to the collective bargaining process. In the event the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in order of priority determined in accordance with ERISA, applicable regulations thereunder and the plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2018, that ceiling is \$3,645 per month for those pensioners who elect to receive their benefits in the form of a single-life annuity and are 60 years old at the time of retirement or plan termination (whichever comes later). For older annuitants or for those who elect to receive their benefits in some form other than a single-life annuity, the corresponding ceilings are actuarially adjusted upward or downward, as applicable.

Whether all participants receive their benefits, should the Plan be terminated at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Note 1 – Description of Plan (continued)

Interplan Transfers

Assets transferred to the Plan and reported on the financial statements as interplan transfers are attributable to employees who have changed employment status during the year and have transferred individual account balances from other plans sponsored by the Company.

Note 2 – Summary of Significant Accounting Policies

Basis of Accounting

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America, using the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation

Investments are reported at fair value. The Plan's trustee, Northern Trust Company (the Trustee), certifies the fair value of all investments. If available, quoted market prices are used to value investments.

Fair value is the price that would be received to sell an asset or paid to transfer a liability (the "exit price") in an orderly transaction between market participants at the measurement date. See Note 6 for discussion of fair value measurements.

Income Recognition

Purchases and sales of securities are recorded on a trade-date basis. Plan interest in Master Trust's investment loss consists of both the realized gains or losses and unrealized appreciation and depreciation of those investments.

Payment of Benefits

Benefits are recorded when paid.

Administrative Expenses

Certain expenses of maintaining the Plan are paid directly by the Company and are excluded from these financial statements.

Note 2 – Summary of Significant Accounting Policies (continued)

New Accounting Standard

During 2018, the Plan adopted Accounting Standards Update (ASU) No. 2017-06, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - Employee Benefit Plan Master Trust Reporting*. As a result of the adoption of ASU No. 2017-06 additional disclosures related to the Plan's interest in the master trust have been made. This standard was adopted retrospectively and had no impact on the Plan's net assets or changes in net assets.

During 2018, the Plan early adopted Accounting Standards Update (ASU) No. 2018-13, *Fair Value Measurement—Disclosure Framework (Topic 820)*. As a result of the adoption of ASU No. 2018-13 certain fair value disclosure requirements have been removed or modified, and certain fair value disclosure requirements have been added. This standard was adopted retrospectively and had no impact on the Plan's net assets or changes in net assets.

Subsequent Events

The Plan has evaluated subsequent events through October 10, 2019, which is the date the financial statements were available to be issued.

Note 3 – Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries; (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on their average compensation during the five highest years of compensation during the last ten years of employment as of the Freeze Date. Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included to the extent that they are deemed attributable to employee service rendered to the valuation date. Each participant's accrued benefit was determined and frozen as of the Freeze Date. No years of credited service or compensation earned after the Freeze Date is used in determining a participant's accrued benefit.

An independent actuary determines the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The unit credit cost method is used for funding purposes for the Plan.

Note 3 – Actuarial Present Value of Accumulated Plan Benefits (continued)

The actuarial present value of accumulated plan benefits, as determined by the Plan's actuary, consists of the following:

	December 31,	
	2018	2017
Vested benefits		
Retirees and beneficiaries currently receiving payments	\$ 251,759,753	\$ 240,843,412
Other participants	130,110,906	135,418,463
Actuarial present value of accumulated plan benefits	<u>\$ 381,870,659</u>	<u>\$ 376,261,875</u>

The changes in actuarial present value of accumulated plan benefits consist of the following for the year ended December 31, 2018:

Actuarial present value of accumulated plan benefits at beginning of year	<u>\$ 376,261,875</u>
Increase (decrease) during the year attributable to:	
Interest due to the decrease in the discount period	22,851,236
Changes in actuarial assumptions	1,671,472
Actuarial gain	2,697,789
Benefits paid	(21,611,713)
Net increase	<u>5,608,784</u>
Actuarial present value of accumulated plan benefits at end of the year	<u>\$ 381,870,659</u>

Significant actuarial assumptions underlying the present value of accumulated plan benefits are as follows as of December 31, 2018 and 2017:

Assumed rate of return on investments	2018: 6.20%
	2017: 6.25%
Normal retirement age	
Pilots	60
Flight engineers	65
Mortality table	RP2006 Projected Using

ABX Air, Inc.
Pilots Minimum Monthly Retirement Income Plan
Notes to Financial Statements

Note 3 – Actuarial Present Value of Accumulated Plan Benefits (continued)

Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year). Assumed rates of retirement are as follows as of December 31, 2018 and 2017:

<u>Age</u>	<u>Pilots</u>	<u>Flight Engineers</u>
55	10%	10%
56-58	5%	5%
59	10%	5%
60	75%	5%
61	40%	10%
62	40%	25%
63-64	40%	15%
65	100%	50%
66	100%	90%
67	100%	100%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 4 – Tax Status

The IRS has determined and informed the Company by a letter dated March 14, 2016, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

In accordance with guidance on accounting for uncertainty in income taxes, the plan administrator has evaluated the Plan's tax positions and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Note 5 – ABX Air, Inc. Defined Benefit Master Trust

The ABX Air, Inc. Defined Benefit Master Trust (the Master Trust) holds the assets of the Plan, the PSP and the ABX Air, Inc. Retirement Income Plan (the RIP). The assets of the Master Trust are held by the Trustee.

The accompanying statements of net assets available for benefits reflect the Plan's apportioned share of the underlying plan assets and liabilities of the Master Trust. Allocations of net income from the Master Trust are based on the Plan's net assets at the beginning of the year with adjustments for contributions and benefit payments made during the year.

Note 6 – Fair Value Measurements

The framework for measuring fair value provides a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The three levels of the fair value hierarchy are described as follows:

- Level 1** Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.
- Level 2** Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3** Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

ABX Air, Inc.
Pilots Minimum Monthly Retirement Income Plan
Notes to Financial Statements

Note 6 – Fair Value Measurements (continued)

Following is a description of the valuation methodologies used for the Master Trust's assets measured at fair value. There have been no changes in the methodologies used at December 31, 2018 and 2017.

Mutual Funds – Shares of mutual funds are valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to public their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Collective Trusts – Units held in collective trusts (CT) are valued using the NAV practical expedient of the CT as reported by the CT managers. The NAV practical expedient is based on the fair value of the underlying assets owned by the CT, minus its liabilities, and then divided by the number of units outstanding. The NAV practical expedient of a CT is calculated based on compilation of primarily observable market information.

Common Stocks – Common stocks are valued at the closing price reported on the active markets on which the individual securities are traded.

Corporate and Government Obligations – Investments in U.S. Treasury obligations are valued at closing prices as quoted on active markets. Quoted market prices are generally not available for corporate, municipal, government agency, and mortgage-backed securities. These investments are valued using pricing models maximizing the use of observable inputs for similar securities which includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, those corporate bonds are valued under a discounted cash flow approach that maximizes observable inputs such as current yields or similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Fund of Hedge Funds – Shares held in the K2 Overseas Long Short Fund, Ltd. (K2 Fund) are valued using the NAV of the fund as reported by the fund administrator at estimated fair value. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The values of the fund's underlying assets are estimated using available quoted market values, formal appraisals, liquidation values, and comparisons with the performance of other holdings with similar investment strategies. The number of units of the fund that are outstanding on the calculation date is derived from observable purchase and redemption activity in the fund. Shares in the K2 Fund may generally be redeemed as of the last business day of each quarter with at least 91 days' prior notice.

Private Equity Limited Partnership – The NB Crossroads Fund XVIII – Plan Asset Allocation LP (Crossroads LP) is a limited partnership formed July 21, 2006 for the purpose of acquiring, holding, selling, and exchanging interests in limited partnerships or other pooled investment vehicles that make investments in buyouts, special situations, and venture capital investment funds, as well as securities.

ABX Air, Inc.
Pilots Minimum Monthly Retirement Income Plan
Notes to Financial Statements

Note 6 – Fair Value Measurements (continued)

The interest in the Crossroads LP is valued using the Master Trust's proportionate share of the fair value of Crossroads LP's underlying investments and other assets. The fair value of Crossroads LP's investments are reported at fair value by the general partner based on quoted market values when available, cost of securities, prices of recent third party transactions, subsequent developments concerning the companies to which the securities relate, and financial data and projections provided to the general partner. The partnership interest for the Crossroads Fund is classified within level 3 of the valuation hierarchy and is allocated only to the PMMRIP and RIP.

The Master Trust has committed to make contributions to the Crossroads LP totaling \$11,211,665 with contributions made as requested by the general partner. As of December 31, 2018, the Master Trust has a remaining commitment of \$2,018,100. Except in certain limited circumstances, the Master Trust is not permitted to withdraw from the Crossroads LP or withdraw any portion of its capital account. Transfers of the Master Trust's partnership interest in the Crossroads LP may be made with written approval of the investment advisor.

The following tables disclose the investment hierarchy of the Master Trust's assets at fair value:

Notes to Financial Statements

Note 7 – Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based on assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Investment securities are exposed to various risks, such as interest rate, market volatility, and credit risks. It is reasonably possible, given the level of risk associated with investment securities, that changes in the values of the investments in the near term could materially affect the amounts reported in the financial statements.

Note 8 – Information Certified by the Trustee

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. The plan administrator has obtained a certification from the Trustee that the following information is complete and accurate:

- Plan interest in Master Trust in the statements of net assets available for benefits at December 31, 2018 and 2017.
- Plan interest in Master Trust investment loss included in the statement of changes in net assets available for benefits for the year ended December 31, 2018.

Appendix A – Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. The plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that the plan will be adequately and systematically funded and accounted for. Annual contributions and accounting expense are also affected by the "asset valuation method" (as well as the plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements and the FASB ASC Topic 960 values is the unit credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's normal cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's future benefits.

The actuarial cost method used for determining the Plan Sponsor's FASB ASC Topic 715 accounting requirements is the projected unit credit method. Under this method, a projected benefit is determined at each active participant's assumed retirement age assuming future compensation increases. The Plan's normal cost is the sum of the present value of the portion of each active participant's projected benefit attributable to the current year of service. The plan's accrued liability is the sum of (a) the present value of the portion of each active participant's projected benefit attributable to all prior years of service plus (b) the present value of each inactive participant's accrued benefits.

Asset Valuation Method

The asset valuation method determines the asset value used to calculate the funding requirements of the Plan. The resulting asset value is referred to as **plan assets**.

Plan assets are equal to the **market value** of assets as of the valuation date, plus the discounted value of employer contributions made after the valuation date. These contributions are discounted to the valuation date using the effective interest rate for the prior plan year.

The Market-Related Value of Plan Assets used for determining the plan sponsor's FASB ASC Topic 715 accounting requirements is equal to the Fair Value of Plan Assets (without inclusion of any contributions receivable).

Changes in Actuarial Methods Since Prior Valuation

None.

Appendix B – Summary of Actuarial Assumptions

Interest Rates

Funding: 24-month average segment rates, using a four-month lookback period, adjusted to reflect the applicable HATFA segment rates stabilization corridor (adopted January 1, 2014 and updated annually). The current rates are:

	Minimum Funding	Maximum Deductible
Segment 1 (0-5 years)	3.92%	1.75%
Segment 2 (5-20 years)	5.52%	3.76%
Segment 3 (20+ years)	6.29%	4.66%
Effective Interest Rate	5.63%	3.95%

The HATFA segment rate stabilization corridor applies for minimum funding purposes, but does not apply for maximum deductible, PBGC variable premium, and ERISA Section 4010 reporting purposes.

FASB ASC Topic 715: 4.00% per year (adopted December 31, 2017).

FASB ASC Topic 960: 6.25% per year (adopted December 31, 2013).

PBGC Variable Premiums: Segment rates of 2.33% for the first 5 years, 3.55% for the next 15 years, and 4.11% thereafter. The PBGC Standard Rule was adopted for the 2014 Plan year.

Asset Returns

Funding: 6.25% per year (adopted January 1, 2014).

FASB ASC Topic 715: 6.25% per year (adopted December 31, 2013).

Compensation Increases

Not applicable.

Maximum Benefit and Annual Compensation Limitation Increases

Not applicable.

Funding Mortality

Statutory static tables for 2018 based on RP-2000 Non-Annuitant and Annuitant Mortality Tables, projected 15 and 7 years from the valuation date, respectively, sex distinct.

ABX Air has elected to delay adoption of the new RP-2014/MP-2016 mortality tables as prescribed by IRC Section 430(h)(3)(A) to January 1, 2019.

FASB Mortality

RP-2014 Mortality Tables, adjusted to factor out Scale MP-2014 from the 2006 base year, then projected forward using Scale MP-2017 on a generational basis, with gender-specific employee rates before benefit commencement and Healthy Annuitant rates after benefit commencement.

Turnover

Vesting service accrual under the Plan is contingent upon continued employment. Participants who terminate their employment before becoming eligible to retire are entitled to receive the future pension benefits accrued and vested up to their termination.

We have included a discount for expected termination of employment which is applied to non-vested future benefits in accordance with the following tables:

Pilots	
Service	Rates
0 - 10	4.0%
10 and over	4.0%

Flight Engineers	
Service	Rates
0 - 7	25.0%
8	17.5%
9	10.0%
10 and over	5.0%

Retirement Rates for Active Participants

The Plan specifies a normal retirement age of 60 for pilots and 65 for flight engineers. Recent experience suggests that active participants are delaying retirement based on the Plan's normal retirement ages.

Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year). The following table represents our assumed rates of retirement:

Age	Flight Engineers	Pilots
55	10.0%	10.0%
56-58	5.0%	5.0%
59	5.0%	10.0%
60	5.0%	75.0%
61	10.0%	40.0%
62	25.0%	40.0%
63-64	15.0%	40.0%
65	50.0%	100.0%
66	90.0%	100.0%
67	100.0%	100.0%

Retirement Rates for Inactive Participants

Vested terminated participants are assumed to retire at the following rates. Vested terminated participants age 65 or above are assumed to retire immediately.

Age	Flight Engineers	Pilots
55	20.0%	20.0%
56-58	10.0%	10.0%
59	10.0%	25.0%
60	15.0%	75.0%
61	15.0%	20.0%
62	20.0%	20.0%
63-64	10.0%	20.0%
65	100.0%	100.0%

Disability

The Plan does not provide ancillary or subsidized disability benefits. If a participant became disabled, his benefit would be the same as if he had been able to elect to retire at that time. The benefit is reduced actuarially for early commencement. Accordingly, no additional assumption has been made as to the probability of disability beyond the normal rates of turnover.

Form of Payment

Life annuity.

Marital Characteristics

For participants not in pay status: 80% of participants are assumed to be married, with males three years older than females.

For participants in pay status: Actual birth dates of spouses are included in the census data, where relevant.

Expenses

Expected administrative expenses payable from the trust are explicitly added to the normal cost. For the current valuation, the loading for administrative expenses (assumed to be payable at the beginning of the year) is \$625,000.

Benefits Not Valued

All benefits are valued.

Special Data Adjustments

None.

Exhibit 5

Employer Contributions for Prior Plan Year

The employer contributions for the prior plan year ending December 31, 2018 were paid or are payable on the dates and in the amounts shown below. The prior plan year's Effective Interest Rate of 5.63% per year is used to discount contributions back to January 1, 2018. Contributions (or portions of contributions) made after the due date for a quarterly required contribution are penalized an additional 5% per year during the late period. Contributions made solely to avoid the application of benefit restrictions cannot be considered in determining excess contributions.

Shortfall Amortization

The amount needed to amortize the Funding Shortfall to the Applicable Funding Target for the plan year beginning January 1, 2018 is determined below. The Funding Shortfall is amortized in seven level payments using the interest rates for determining the Applicable Funding Target for the current plan year.

1. Applicable Funding Target	\$390,781,985
2. Actuarial Value of Assets less Carryover and Prefunding Balances	386,181,633
3. Funding Shortfall [(1) - (2), but not < \$0]	4,600,352
4. Amortization factor	Exempt
5. Shortfall Amortization for current plan year [(3) ÷ (4)]	\$0

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Employer Contributions for Prior Plan Year

The employer contributions for the prior plan year ending December 31, 2018 were paid or are payable on the dates and in the amounts shown below. The prior plan year's Effective Interest Rate of 5.63% per year is used to discount contributions back to January 1, 2018. Contributions (or portions of contributions) made after the due date for a quarterly required contribution are penalized an additional 5% per year during the late period. Contributions made solely to avoid the application of benefit restrictions cannot be considered in determining excess contributions.

Appendix A – Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. The plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that the plan will be adequately and systematically funded and accounted for. Annual contributions and accounting expense are also affected by the "asset valuation method" (as well as the plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements and the FASB ASC Topic 960 values is the unit credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's normal cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's future benefits.

The actuarial cost method used for determining the Plan Sponsor's FASB ASC Topic 715 accounting requirements is the projected unit credit method. Under this method, a projected benefit is determined at each active participant's assumed retirement age assuming future compensation increases. The Plan's normal cost is the sum of the present value of the portion of each active participant's projected benefit attributable to the current year of service. The plan's accrued liability is the sum of (a) the present value of the portion of each active participant's projected benefit attributable to all prior years of service plus (b) the present value of each inactive participant's accrued benefits.

Asset Valuation Method

The asset valuation method determines the asset value used to calculate the funding requirements of the Plan. The resulting asset value is referred to as **plan assets**.

Plan assets are equal to the **market value** of assets as of the valuation date, plus the discounted value of employer contributions made after the valuation date. These contributions are discounted to the valuation date using the effective interest rate for the prior plan year.

The Market-Related Value of Plan Assets used for determining the plan sponsor's FASB ASC Topic 715 accounting requirements is equal to the Fair Value of Plan Assets (without inclusion of any contributions receivable).

Changes in Actuarial Methods Since Prior Valuation

None.

Appendix B – Summary of Actuarial Assumptions

Interest Rates

Funding: 24-month average segment rates, using a four-month lookback period, adjusted to reflect the applicable HATFA segment rates stabilization corridor (adopted January 1, 2014 and updated annually). The current rates are:

	Minimum Funding	Maximum Deductible
Segment 1 (0-5 years)	3.92%	1.75%
Segment 2 (5-20 years)	5.52%	3.76%
Segment 3 (20+ years)	6.29%	4.66%
Effective Interest Rate	5.63%	3.95%

The HATFA segment rate stabilization corridor applies for minimum funding purposes, but does not apply for maximum deductible, PBGC variable premium, and ERISA Section 4010 reporting purposes.

FASB ASC Topic 715: 4.00% per year (adopted December 31, 2017).

FASB ASC Topic 960: 6.25% per year (adopted December 31, 2013).

PBGC Variable Premiums: Segment rates of 2.33% for the first 5 years, 3.55% for the next 15 years, and 4.11% thereafter. The PBGC Standard Rule was adopted for the 2014 Plan year.

Asset Returns

Funding: 6.25% per year (adopted January 1, 2014).

FASB ASC Topic 715: 6.25% per year (adopted December 31, 2013).

Compensation Increases

Not applicable.

Maximum Benefit and Annual Compensation Limitation Increases

Not applicable.

Funding Mortality

Statutory static tables for 2018 based on RP-2000 Non-Annuitant and Annuitant Mortality Tables, projected 15 and 7 years from the valuation date, respectively, sex distinct.

ABX Air has elected to delay adoption of the new RP-2014/MP-2016 mortality tables as prescribed by IRC Section 430(h)(3)(A) to January 1, 2019.

FASB Mortality

RP-2014 Mortality Tables, adjusted to factor out Scale MP-2014 from the 2006 base year, then projected forward using Scale MP-2017 on a generational basis, with gender-specific employee rates before benefit commencement and Healthy Annuitant rates after benefit commencement.

Turnover

Vesting service accrual under the Plan is contingent upon continued employment. Participants who terminate their employment before becoming eligible to retire are entitled to receive the future pension benefits accrued and vested up to their termination.

We have included a discount for expected termination of employment which is applied to non-vested future benefits in accordance with the following tables:

Pilots	
Service	Rates
0 - 10	4.0%
10 and over	4.0%

Flight Engineers	
Service	Rates
0 - 7	25.0%
8	17.5%
9	10.0%
10 and over	5.0%

Retirement Rates for Active Participants

The Plan specifies a normal retirement age of 60 for pilots and 65 for flight engineers. Recent experience suggests that active participants are delaying retirement based on the Plan's normal retirement ages.

Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year). The following table represents our assumed rates of retirement:

Age	Flight Engineers	Pilots
55	10.0%	10.0%
56-58	5.0%	5.0%
59	5.0%	10.0%
60	5.0%	75.0%
61	10.0%	40.0%
62	25.0%	40.0%
63-64	15.0%	40.0%
65	50.0%	100.0%
66	90.0%	100.0%
67	100.0%	100.0%

Retirement Rates for Inactive Participants

Vested terminated participants are assumed to retire at the following rates. Vested terminated participants age 65 or above are assumed to retire immediately.

Age	Flight Engineers	Pilots
55	20.0%	20.0%
56-58	10.0%	10.0%
59	10.0%	25.0%
60	15.0%	75.0%
61	15.0%	20.0%
62	20.0%	20.0%
63-64	10.0%	20.0%
65	100.0%	100.0%

Disability

The Plan does not provide ancillary or subsidized disability benefits. If a participant became disabled, his benefit would be the same as if he had been able to elect to retire at that time. The benefit is reduced actuarially for early commencement. Accordingly, no additional assumption has been made as to the probability of disability beyond the normal rates of turnover.

Form of Payment

Life annuity.

Marital Characteristics

For participants not in pay status: 80% of participants are assumed to be married, with males three years older than females.

For participants in pay status: Actual birth dates of spouses are included in the census data, where relevant.

Expenses

Expected administrative expenses payable from the trust are explicitly added to the normal cost. For the current valuation, the loading for administrative expenses (assumed to be payable at the beginning of the year) is \$625,000.

Benefits Not Valued

All benefits are valued.

Special Data Adjustments

None.

Appendix C – Summary of Principal Plan Provisions

This summary of plan provisions is intended to only describe the essential features of the Plan. All eligibility requirements and benefit amounts shall be determined in strict accordance with the plan document itself.

Effective Date

The effective date of this Plan is January 1, 1981. The Plan was completely restated effective January 1, 1994 to incorporate all prior amendments and plan design changes. The Plan was amended effective January 1, 1996 to incorporate GATT and certain benefit payment options. The Plan was amended effective January 1, 1997 to be a flat 2.0% formula. Also, the Plan was completely restated to incorporate all prior amendments and plan design changes and to conform to GUST.

Effective January 1, 2002, the Plan was amended to be in good faith compliance with the requirements of EGTRRA. Most notably, the mortality for actuarial equivalence was updated to be GAR 94 at 8.0%.

Effective March 28, 2005, the Plan was amended so that forced cashouts do not exceed \$1,000.

Effective May 26, 2006, the Plan was amended to offer an early retirement program to certain pilots.

Effective June 2007, the Plan was amended to offer an early retirement program to certain pilots.

The Plan was amended effective December 19, 2008 to conform to final regulations under Code Section 415 of the Internal Revenue Code and for certain other administrative reasons.

Effective December 30, 2009, the Plan was amended to remove the "project and prorate" feature from the benefit formula.

Effective December 30, 2009, the Plan was amended to freeze benefits as of April 6, 2010.

The Plan was amended December 13, 2010 to conform to the Heroes Earnings Assistance and Relief Act of 2008 (HEART).

The Plan was amended and restated effective January 1, 2015 to comply with applicable law and other requirements set forth in IRS Notice 2013-84 with regard to a Cycle D determination letter filing.

Plan Year and Fiscal Year

The Plan Year ends December 31 and the company's fiscal year ends December 31.

Eligible Employees

Every employee belonging to the pilots' union who works 400 or more hours per year is eligible to participate in this Plan following twelve (12) months of employment, provided that such employee does not participate in another retirement plan to which the company, as a result of collective bargaining, is required to contribute.

Employee Census

The employee data used as a basis for the valuation in this report was submitted to us by ABX Air, Inc. as of January 1, 2018.

Considered Earnings

All payments to an employee for services rendered, including wages, commissions, sick pay, vacation pay, overtime pay and incentive bonuses are considered compensation under this Plan. Other bonuses, severance pay, cost of living differential payments and employer contributions to this or any other employee benefit plan are not considered.

Credited Service

Credited service for benefit purposes is limited to a total of 25 years for all employees.

Amount of Retirement Income

This Plan, commonly known as a “floor” pension plan, is coordinated with benefits available from the ABX Air, Inc. Profit Sharing Plan. Its purpose is to ensure that every employee will receive a meaningful level of retirement income from the combination of company-provided and statutory sources in relation to service and accustomed earnings.

In order to accomplish this objective, the Plan provides a benefit at normal retirement for each participant equal to:

1. 2.00% of his or her final five-year average monthly compensation multiplied by his or her years of credited service, reduced by:
2. His or her Profit Sharing Plan Annuity Benefit; and
3. Any additional retirement income benefit payable to the employee from any plan to which the employer contributes on behalf of said employee, other than the Pilots Investment Plan (PIP).

Benefit accruals were frozen as of April 6, 2010.

Employee Contributions

Contributions by employees are neither required nor allowed under this Plan.

Company Contributions

The employer contributes annually, the entire amount actuarially determined to be necessary to provide the benefits of the Plan.

Normal Retirement

Normal retirement is age 60 for pilots and age 65 for flight engineers.

Late Retirement

Late Retirement Date: The first day of the month following the date of termination of service if it occurs after the Normal Retirement Date.

Late Retirement Benefit: The greater of (a) the Accrued Benefit determined as of the Late Retirement Date, or (b) the Accrued Benefit determined as of the Normal Retirement Date increased to the Late Retirement Date with the Plan's actuarial equivalence of 1994 Group Annuity Reserving Unisex Mortality table, and an annual interest rate of 8.00%.

Early Retirement

Employees may retire at age 55 with 10 years of employment. Participants who leave service under the Plan's early retirement provisions are eligible to receive a reduced pension (6% per year from normal retirement) offset by his or her Profit Sharing Plan Annuity Benefit commencing at the early retirement date.

Vested Benefits

Each participant's accrued benefits vest in accordance with the following schedule:

Years of Service	Percentage of Accrued Benefit
Less than five years	0%
Five or more years	100%

Investment of Assets

The assets of this Plan are held in trust and managed by the trustee, Northern Trust.

Plan Administrator

The named plan administrator is the retirement Committee appointed by the corporation's Board of Directors.

Changes in Principal Plan Provisions Since Prior Valuation

No Plan changes have been made since the prior year.

Shortfall Amortization

The amount needed to amortize the Funding Shortfall to the Applicable Funding Target for the plan year beginning January 1, 2018 is determined below. The Funding Shortfall is amortized in seven level payments using the interest rates for determining the Applicable Funding Target for the current plan year.

1. Applicable Funding Target	\$390,781,985
2. Actuarial Value of Assets less Carryover and Prefunding Balances	386,181,633
3. Funding Shortfall [(1) - (2), but not < \$0]	4,600,352
4. Amortization factor	Exempt
