Schedule MB, Line 6 – Actuarial Assumptions and Methods

Valuation Assumptions and Methods

Traditional Unit Credit

The actuarial cost method used in the valuation is the unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. For active participants whose credited service equals or exceeds the plan maximum, if any, and for non-active participants, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. The unfunded liability is the actuarial accrued liability less the valuation assets, and is referred to as the “shortfall.”

Projected Unit Credit

The projected unit credit cost method is used for computing pension cost under current accounting rules.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumption, divided by the participant’s expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

Plan Name: The Bellevue Manufacturing Company UAW Retirement Income Plan

Plan Year: 2018

EIN: 34-4186030, PN: 002

Schedule MB, Line 11 – Justification for Change in Actuarial Assumptions

Mortality was updated starting with the 2015 Plan Year to use RP-2014 Blue Collar Mortality fully generational projection using scale MP-2015. Lines 6c(1) and 6c(2) were inadvertently not updated on the Schedule MB for the 2015, 2016 and 2017 Form 5500 filings. The correction on Lines 6c(1) and 6c(2) was made starting with the 2018 Schedule MB, although this is not a change in actuarial assumption for 2018.
