Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Independent Auditors' Report

The Plan Administrator
Nestlé Hourly Retirement Plan:

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Nestlé Hourly Retirement Plan (the Plan), which comprise the statements of net assets available for benefits and accumulated plan benefits as of December 31, 2018 and 2017, and the related statements of changes in net assets available for benefits and changes in accumulated plan benefits for the year ended December 31, 2018, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in notes 5, 7, and 8, which was certified by The Northern Trust Company, the trustee of the Nestlé in the USA Pension Trust (Trust) in which the Plan participates, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Trust's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2018 and 2017, and for the year ended December 31, 2018, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

NESTLÉ HOURLY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

(1) Description of the Plan

The following brief description of the Nestlé Hourly Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

(a) General

The Plan is a defined benefit pension plan covering certain hourly employees of Nestlé USA, Inc. and certain affiliated companies (Company or Plan Sponsor). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

(b) Pension Benefits

Participating employees at each Company location covered under the Plan receive benefits under a separate schedule of benefits (Schedule) that sets out specific eligibility provisions and benefit amounts for each location. The Plan provides defined benefits to retired participants based on their years of service. In general, the pension benefits are set to begin at age 65 in the form of a life annuity. Effective April 1, 2015, the Plan was amended to universally offer commencement of benefits and a lump sum option at any age once employment ends. Other forms of payment and early commencement are available based on provisions specific to the various collective bargaining agreements and locations covered under the Plan. For the majority of participants, benefits become fully vested after they have completed three years of vesting service. Periodically, for eligible participants at certain Company locations, changes to the Plan's provisions are negotiated to increase the base rates used to calculate pension benefits (including benefit level increases to take effect in future periods). The base rates within the Schedule for certain locations were updated in both the years ended December 31, 2018 and 2017.

(c) Death and Disability Benefits

If an active participant dies after completing the applicable vesting requirements, a death benefit may be paid to the participant's qualified surviving spouse. Based on the applicable Schedule, the amount of the benefits paid to the surviving spouse is computed with reference to the applicable early retirement factors of the Plan for participants who meet the applicable early retirement provisions, or with reference to the applicable vested deferred retirement factors for participants who meet the applicable deferred vested retirement provisions. In general, disability benefits are also available and vary by covered location.

(2) Summary of Significant Accounting Policies

The following are the significant accounting policies followed by the Plan:

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

NESTLÉ HOURLY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

(b) Investment Valuation

Plan assets are held in the Nestlé in the USA Pension Trust (Pension Trust), which was established by the Company for the pooled investment of assets for various qualified pension plans sponsored by the Company. The Pension Trust is maintained by The Northern Trust Company, as trustee.

The Pension Trust investments are stated at fair value, in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*.

Purchases and sales of securities are recorded on a trade-date basis. Interest and other income are recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Pension Trust's gains and losses on investments bought and sold as well as held during the year.

(c) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provision to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

The accumulated plan benefits for active employees are based on their years of credited service multiplied by benefit factors defined in the Plan document. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee credited service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary, Willis Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements due to death, disability, termination, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations were as follows:

	2018	2017
Life expectancy of participants	RP-2014 with Modified MP-2016 projection	RP-2014 with Modified MP-2016 projection
Retirement age	Varying by age	Varying by age
ASC 960 discount rate and expected return on Plan assets	4.70%	5.40%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NESTLÉ HOURLY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

(d) Administrative Expenses

The Plan allows for administrative expenses such as trustee fees, investment management fees, actuarial valuation fees, accounting fees, and recordkeeping fees to be paid from Plan assets.

(e) Payment of Benefits

Benefit payments to participants are recorded upon distribution.

(f) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

(g) Risks and Uncertainties

The Pension Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate risk, market risk, and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

(h) Derivative Financial Instruments

The Pension Trust accounts for derivatives and hedging activities in accordance with ASC 815, *Derivatives and Hedging*, which requires that all derivative instruments not qualifying for hedge accounting be recorded on the statements of net assets available for benefits at their respective fair values.

The Pension Trust uses derivatives for the benefit of the plans in the Pension Trust as a tool to reduce risk and as an investment strategy. The Pension Trust will enter into the following types of derivative instruments: interest rate swaps, credit default swaps (CDS), equity swaps, commodity swaps, financial futures, commodities futures, foreign exchange forward contracts and options, and swaptions and options. The derivative instruments outstanding as of period-end and the amounts of realized and unrealized gains and losses, as well as other income on derivative instruments during the period (as disclosed in the derivatives tables in note 7), serve as indicators of the volume of derivative activity for the Pension Trust. Derivative strategies involve risk and like other investments, can lose money. The impact on Pension Trust performance can be positive or negative, and will vary depending on market movements.

NESTLÉ HOURLY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

The Pension Trust manages interest rate risk using interest rate swaps and/or US Treasury futures (interest rate hedge). The objective of the interest rate hedge is to manage the effective duration of the Pension Trust's assets to better match its defined benefit obligations, thereby protecting the funded ratio of the Pension Trust as interest rates fluctuate. Interest rate swaps and futures used in this manner adjust interest rate and yield curve exposures and substitute for physical securities.

The Pension Trust also uses derivatives as a substitute for physical securities in order to gain exposure to certain asset classes. Using derivatives instead of physical securities may be a more efficient means to gain exposure to an index or a market sector due to its characteristics of increased liquidity and reduced transaction costs. Using derivatives may also reduce the need to sell assets when there is a difficult trading environment. These derivatives are used to create credit, equity, and foreign exchange exposures.

The Pension Trust uses a mix of equity, fixed income, and foreign exchange futures to securitize a cash position. Use of these derivatives enables the cash of the Pension Trust to earn a return as if it were invested in the various asset classes as defined by the strategic asset allocation. It allows the Pension Trust to retain liquidity and flexibility, while still earning equity, fixed income, or foreign exchange returns.

The Pension Trust manages credit risk through use of CDS. These derivatives are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure (selling protection), obligating the Pension Trust to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure (buying protection) providing the right to "put" (sell) bonds to the counterparty in the event of a default.

The Pension Trust has managed the foreign currency risk inherent in international equity portfolios through the use of foreign exchange forwards, which are foreign exchange transactions that have settlement periods longer than three days. The Pension Trust terminated its passive FX hedging strategy during the third quarter of 2017. The Pension Trust also uses foreign exchange forwards and currency options as an investment strategy. The Pension Trust terminated its active FX strategy during the third quarter of 2018.

Counterparty risk for swaps and forwards that are not centrally cleared through a central exchange is mitigated through the use of International Swaps and Derivatives Association (ISDA) standardized agreements that require gains and losses owed to and from the counterparty to be agreed daily, and gains or losses to be collateralized with cash. For futures, the gain (loss) is calculated and funds are transferred to and from the Pension Trust on a daily basis, based on the prior day's market valuation. The types of counterparties are large banks and brokers, and the investment managers each have netting arrangements within their accounts to reduce the exposure to any single counterparty.

Holding derivatives has a significant impact on cash flow. Daily mark to markets and accumulated gains and losses can be large, depending on the volatility of the markets. The Pension Trust has maintained the liquidity necessary to settle any losses under a variety of market conditions, including the most severe.

NESTLÉ HOURLY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

(i) Foreign Currency

The Pension Trust's investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions.

The Pension Trust does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net appreciation and depreciation from investments.

(j) Recently Issued Accounting Standards

In February 2017, the FASB issued ASU 2017-06, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting*, which changes the presentation and disclosures for plans that participate in a master trust. ASU 2017-06 introduces a new concept of plans having divided or undivided interest in the master trust. Plans with an undivided interest have a proportionate share in the master trust and plans with a divided interest have a specific share in each asset of the master trust. The requirement to disclose percentage interest in the master trust was removed for plans with a divided interest in the master trust. Upon adoption, plans will be required to disclose the dollar amount of the plan's interest in each of the general types of investments held by the master trust, as well as the master trust's other assets and liabilities and the dollar amount of the plan's interest in each of those other assets and liabilities. The Plan is currently evaluating this issued but not yet effective accounting standard, and has not yet determined the impact to the financial statements. The accounting standard is effective for the Plan year beginning after December 15, 2018.

In August 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820) Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*. ASU 2018-13 improves the disclosure requirements for fair value measurements. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted. The Plan is assessing the impact on its disclosures of adopting the updated standard.

(3) Funding Policy

The funding policy of the Plan Sponsor is to make contributions for each plan year in the amount not less than the minimum required contribution under the law and not more than the maximum tax-deductible contribution. The Company may vary its contribution level, if appropriate to its tax and cash position and the Plan's funded status. Contributions made for the Plan year ended December 31, 2018, were \$18,417,500 and met the Company's policy.

(4) Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

NESTLÉ HOURLY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

In the event the Plan terminates, the net assets of the Plan will be allocated as prescribed by ERISA and its related regulations. The assets allocated to each participant would be distributed through either (a) continuance of the trust fund that is attributable to the Plan or establishment of a new trust fund, and/or (b) purchase of annuity contracts. In addition, certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees, which is adjusted periodically.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

(5) Trustee Certifications

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the plan administrator has obtained certifications from The Northern Trust Company, the trustee of the Pension Trust in which the Plan participates, as of December 31, 2018 and 2017, and for the year ended December 31, 2018, that all of the information provided by them is complete and accurate. Information included in the accompanying financial statements and notes thereto, as to investments and investment income (loss), is presented in reliance upon those certifications, with the exception of the Pension Trust's investments in real estate funds, hedge funds, and venture capital and partnership funds and the leveling of investments. These investments are held by the investment fund managers, who report the net asset values of the Pension Trust's interests to the Company and trustee on a periodic basis. Information included in the accompanying financial statements related to these funds is based upon these net asset values as of December 31, 2018 and 2017.

(6) Parties in Interest

During the years ended December 31, 2018 and 2017, Nestlé in the USA Pension Trust had parties in interest that included Plan Sponsor, trustee, investment advisory, legal, actuarial, and administrative service providers. The fees paid by the Pension Trust to these parties-in-interest were \$10,851,185 for the year ended December 31, 2018. The Plan's share of these expenses was \$1,502,448 for the Plan year ended December 31, 2018.

(7) Interest in Nestlé in the USA Pension Trust

The assets of the Plan are invested in the Pension Trust, in which the assets of the Plan are combined with the assets of other affiliated Company plans for investment purposes.

Pursuant to the trustee's method of allocating the investment holdings between the plans, contributions into the Pension Trust are treated as additions in the Pension Trust, withdrawals are treated as deductions in the Pension Trust, and investment income (loss) is allocated proportionately. Accordingly, the value of the Plan's investment in the Pension Trust is equal to the Plan's interest in each applicable investment increased or decreased by the Plan's allocated share in income, gains, and losses attributable to each applicable investment, which share is generally based upon the Plan's respective share of the Pension

Trust's combined net assets available for benefits each month before investment income (loss) and net appreciation (depreciation) in the fair value of investments. Those investment expenses of the Pension Trust, which can be specifically identified as being applicable to the Plan, are charged to the Plan. The remaining investment expenses are allocated to the Plan based on the Plan's respective share of the Pension Trust's combined net assets available for benefits on a monthly basis.

The Plan's equitable share of the Pension Trust's net assets was approximately 13.6% and 14.1% for the years ended December 31, 2018 and 2017, respectively. The following is financial information with respect to the Pension Trust:

** The Pension Trust participated in a securities lending arrangement through the trustee during the years ended December 31, 2018 and 2017. The Pension Trust obtained cash and noncash collateral from the borrowers of the Plan's securities as a result of this arrangement. The collateral received from borrowers was invested in The Northern Trust Company Core Qualified Collateral Section. The noncash collateral received consisted primarily of fixed income securities and domestic equity securities.

(8) Fair Value Measurements

The Plan has adopted the guidance in ASC 820, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant judgment. The three levels are defined as follows:

- Level 1: Assets or liabilities that are valued based on unadjusted quoted prices in active markets that are accessible at measurement date.
- Level 2: Assets or liabilities that are valued based on observable inputs, other than those included in Level 1, based on quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, or financial instruments for which all significant inputs are observable; either directly or indirectly.
- Level 3: Assets or liabilities that are valued based on unobservable inputs, including the reporting entity's own analysis of the underlying economic data that market participants would factor into the pricing of the asset or liability.

Due to the Company's policy to diversify the holdings of the Pension Trust portfolio, there is no significant concentration of investments within any particular class of investments included above. The valuation methodologies utilized by the Plan and Pension Trust for the above investments as of December 31, 2018 and 2017, are as follows:

(a) Based on quoted market prices in active markets.

(b) Based on investment manager or industry pricing services of investments. Certain fixed income pricing is on a bid-evaluation basis. Institutional bid evaluations are estimated prices. Pricing vendors use models, which are generally proprietary, to arrive at the estimated prices. These prices represent the price a dealer would pay for a security. Model inputs vary depending on the type of security, but typically include trade data, institutional bids, comparable trades, dealer quotes, and news media. Market data is provided by multiple independent sources, including primary and secondary dealers, portfolio managers, and research analysts.

NESTLÉ HOURLY RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

- (c) Collateralized mortgage valuations are based on trade and quote activity of bonds with similar features including issuer, vintage, prepayment speeds, and purpose of the underlying loan (first or second lien).
- (d) Cash equivalents include short term fixed income instruments whose valuations are determined based upon maturity date, issue date, and credit ratings.
- (e) Commingled funds are valued based on the daily pricing of the underlying assets to estimate the fair value of the fund as determined by the investment manager. The liquidity of these investments is determined by the redemption period and settlement period for each fund. The Pension Trust considered these and other characteristics and concluded these commingled funds have a readily determinable fair value.
- (f) Government and municipal bonds are priced by obtaining feeds from various live data sources including market makers and interdealer brokers.
- (g) Currency forwards use quoted foreign exchange rates in an active market or exchange. Over-the-counter options are valued using bid, ask/offer quotes that are binding and corroborated. Swaps are valued using the discounted cash flow method. The two legs (fixed and floating) are priced independently as the present value of their expected cash flows.
- (h) Certain fixed income securities (primarily certain collateralized obligations) are valued based upon evaluated prices using unobservable inputs (i.e., extrapolated data, proprietary models, and indicative quotes).
- (i) Fair value is based on the net asset value of the Core Collateral Fund as determined daily, by the trustee, using market prices of underlying investments and evaluations supplied by industry pricing vendors.
- (j) Investments measured at net asset value include, alternative fixed income investments, real estate funds, hedge funds, and private equity funds. The net asset values are reported to the Company and trustee by the fund managers or the general partners of the fund. These net asset values are based on the fair value of the underlying portfolio investments held by the investment fund.

These fair values are determined by a variety of methods; real estate investments are valued at appraised values plus undistributed rental and interest income; hedge funds are valued by the investment manager using quoted market prices of underlying investments and evaluations supplied by industry pricing vendors; and private equity investments are valued using income and market based analysis.

For the year ended December 31, 2018, the Pension Trust entered into secondary market transactions to sell its private equity investments for an amount other than net asset value. As a result, the private equity investments have been included within the leveling disclosure in Level 1 for the year ended December 31, 2018.

The Pension Trust's investments measured at net asset value are in, real estate, hedge funds, and fixed income partnerships for the year ended December 31, 2018, as well as venture capital and infrastructure for the year ended December 31, 2017. These investments are primarily limited partnership investments and the fair value is determined using an audited net asset value (NAV). The fair value of investments is estimated using techniques that may rely heavily on the investment managers' assumptions and qualitative observations. The Pension Trust uses the fair valuations from the investment managers and reviews and validates their valuation methods and processes throughout the year. The Pension Trust did not make any adjustments to any valuations. The Pension Trust establishes and follows valuation policies and procedures. The Pension Trust employs specialized investment consultants who perform due diligence on the valuation policies and procedures of the general partners before making the investments and periodically thereafter. Using their own procedures and systems, they evaluate the reasonableness of the partnerships' NAVs on a monthly and quarterly basis using industry comparisons, operating performance metrics and they conduct frequent reviews with the general partners. The Pension Trust periodically evaluates the fair valuation policies and procedures of these specialized investment consultants and requests and reviews the valuation policies of the investment managers and general partners annually. The Pension Trust retains discretion to sell any of these investments at an amount other than the net asset value, should there be an investment case to sell these investments in the secondary market.

A summary of changes in the fair value of Level 3 assets and liabilities for the year ended December 31, 2018, is as follows:

Notes to Financial Statements

December 31, 2018 and 2017

The significance of transfers between levels is evaluated based upon the nature of the financial instrument and size of the transfer relative to the total net assets available for benefits. There were no significant transfers between levels for the year ended December 31, 2018.

(9) Tax Status

The Internal Revenue Service (IRS) has determined as of January 1, 2015, and informed the Plan by a letter dated January 19, 2016, that the Plan and related trust are designed in accordance with applicable Sections of the Internal Revenue Code (IRC). The Plan has been further amended since requesting the determination letter. The Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

The Plan Administrator evaluates tax positions taken by the Plan. The financial statement effects are recognized when the Plan has taken an uncertain position that more likely than not would be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2018, there are no uncertain tax positions taken or expected to be taken.

The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2015.

(10) Reconciliation of Financial Statements to Form 5500

Contributions of \$0 and \$18,417,500 were made by the Company during 2019 and 2018, respectively. Since the contributions were made prior to September 15 of each year, the contributions have been designated for the 2018 and 2017 plan years, respectively, for tax purposes on Form 5500. However, the Plan recognized \$18,417,500 in the 2018 financial statements, as this amount was not required to meet the minimum funding requirements and/or the Company's funding policy in plan year 2018.

The following is a reconciliation of net assets available for benefits per the financial statements as of December 31, 2018 and 2017, to Form 5500:

Funding target and PVAB	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during the year
Actuarial value of assets	Market value of assets, including contributions receivable
Funding policy	Nestlé USA's general funding policy is to make contributions for each plan year in an amount not less than the minimum required contribution under ERISA and to target 100% funded status on a Pension Protection Act (PPA) basis. This will not exceed the maximum tax-deductible contribution. Nestlé may vary its contribution level, if appropriate to its tax and cash position and the funded status.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with Nestlé and is not aware of any significant benefits required to be valued that were not.

Small benefits with present values up to \$5,000 may be paid in a single lump sum payment. Such lump sums are not explicitly valued as such; rather, such participants' benefits are valued using the benefit choice assumptions described above.

Assumptions Rationale – Significant Economic Assumptions

Rates of increase in compensation and statutory limits

Assumed increases were chosen by the plan sponsor and represent an estimate of future experience.

Administrative and investment expenses

Administrative and investment expenses are determined by Nestlé at year end.

Assumptions Rationale – Significant Demographic Assumptions

Termination

Termination rates were based on an experience study conducted in 2015 for the period 2009-2013, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumed termination rates differ by age, service and plan because of observed differences in termination rates by age, service and plan.

Disability

Disability rates were based on an experience study conducted in 2015 for the period 2009-2013, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumed disability rates differ by gender and plan because of observed differences in disability rates by gender and plan.

Retirement

Retirement rates were based on an experience study conducted in 2015 for the period 2009-2013, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumed retirement rates differ by plan because of observed differences in retirement rates by plan.

Benefit commencement date:

- Pre-retirement death benefit
Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value, and experience indicates that most spouses do take the benefit as soon as it is available.
- Deferred vested benefit
Commencement ages were based on an experience study conducted in 2015 for the period 2009-2013. Deferred vested early commencement factors are generally not subsidized so that the difference between this approach and using assumed commencement rates at different ages is not expected to be significant.

Form of payment

The optional form of payment assumptions are based on an experience study performed in 2015 for the period 2009-2013.

For groups newly eligible for lump sums in 2016, the percentage of retiring participants assumed to take lump sums is based on observed experience for other Nestlé employee groups.

Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Change in assumptions and methods since prior valuation

The segment interest rates used to calculate the funding target was updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target was updated to reflect the new tables, based on RP-2014 and subsequent Society of Actuaries studies, published by IRS in October 2017 in regulation §1.430(h)(3)-1.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Covered employees	Nonunion hourly employees
Participation date	Completion of one year of service
Type of plan	Dollar per month

Definitions

Vesting service	One year for each 1,000-hour year of employment
Credited service	One year for each 2,000-hour year of employment; partial credit for partial years
Accumulated benefit:	Benefit level x credited service. See Appendix for locations and benefit levels.

For Distribution Centers and Transportation Centers participants of the Nestlé Hourly Retirement Plan:

- Current employees will receive a version of the account benefit formula. The benefit will be the better of A+B or C
 - o A is the CHPP benefit as of 12/31/2015
 - o B is the account formula benefit with past CHPP service for points counting towards points service in the PEP
 - o C is continued accruals under the \$36/month benefit formula which will run concurrent with the “A+B” benefit and will serve as a minimum benefit

Additionally, the current \$36/month benefit will continue to run concurrent with the “B” benefit and will serve as a minimum benefit.

Early retirement	Retirement before NRD and on or after both attaining age 57 and completing five years of vesting service
Postponed retirement	Retirement after both attaining age 65 and completing five years of vesting service
Vested termination	Termination for reasons other than death or retirement after completing five years of vesting service
Disability	Permanent and total disability on or after both attaining age 50 and completing fifteen years of vesting service
Preretirement death benefit	Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse on or after completing five years of vesting service

Benefits Paid Upon the Following Events

Normal retirement (NRD)	Accrued benefit payable immediately
Early retirement	Monthly pension benefit determined as of early retirement date, reduced $\frac{1}{2}$ of 1% for each month by which the early retirement date precedes age 62. Unreduced for employee retiring after attaining age 60 with 30 years of uninterrupted service
Postponed retirement	Accrued benefit payable immediately
Vested termination	Accrued benefit determined as of termination date, actuarially reduced for commencement of payments prior to NRD
Disablement	Accrued benefit determined as of disability retirement date reduced by certain other benefits by or at the expense of the company
Preretirement death	50% of the projected accrued benefit as of participant's normal retirement date is payable immediately to the dependent spouse until the death or remarriage of the dependent spouse. If not eligible for a dependent spouse benefit, a 50% surviving spouse benefit (100% if eligible for early retirement) is payable on the participant's early retirement age date. If neither a dependent nor surviving spouse benefit is payable, the lump sum balance as of the time of death is payable.

Optional Form Conversion Factors

<u>Form of Payment</u>	<u>Conversion Factors</u>	<u>Sample Rates</u>
Level Income Options to Age 62 (life Annuity Normal form)	The conversion factors are determined using an actuarial equivalent basis using 5.0% interest and the 1971 Group Annuity Mortality table blended 70% male / 20% female. Multiply the expected PIA at age 62 by the conversion factor to get the benefit decrease after age 62. The benefit before age 62 (payable until receipt of PIA) equals this decreased benefits plus PIA (payments are at beginning of month).	Age 55: 0.4378 Age 60: 0.1602
100% Contingent Annuitant	80% of the amount otherwise payable to the Participant as a sole annuitant, provided the age of the Participant and the designated contingent annuitant are the same. If the ages of the participant and the designated contingent annuitant are not the same, the 80% factor shall be increased by 1.0% up to a maximum of 100% for each full year that the birth date of the designated contingent annuitant precedes the birth date of the participant, or decreased by 1.0% for each full year that the birth date of the Participant precedes the birth date of the designated contingent annuitant.
