General

The Plan is a noncontributory defined benefit pension plan and covers substantially all employees of Century Aluminum of West Virginia, Inc. (the "Company") who were represented by the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industries and Service Workers International Union, AFL-CIO-CLC (the "Union").

Effective December 31, 2017, Century Aluminum Employees Retirement Plan (the "Employees Retirement Plan") merged into the Plan. The Employees Retirement Plan was a noncontributory defined benefit plan covering substantially all salaried employees of Century Aluminum Company and Century Aluminum of West Virginia, Inc.; all salaried employees and nonunion employees of Century Aluminum of Kentucky General Partnership as of April 1, 2001; all salaried employees of Century Aluminum Sebree LLC as of June 1, 2013; and all salaried employees of Century Aluminum of South Carolina, Inc. as of August 31, 2015 (collectively, the "Salaried Employees"). Effective January 1, 2015, benefits were frozen for participants of the Employees Retirement Plan who were under 50 years of age, and participation was frozen for all subsequent new and rehired employees. Upon the merger of the Employees Retirement Plan into the Plan, the Plan was amended to incorporate the terms and provisions of the Employees Retirement Plan as it existed immediately prior to the merger date.

On January 26, 2017, Century Aluminum Company, through its wholly owned subsidiary, Century Aluminum of West Virginia, Inc., completed the sale of substantially all of the Company's assets, including the Company's Ravenswood aluminum smelter. Century Aluminum Company has accepted the assignment rights and delegation of obligations as the plan sponsor of the Plan from the Company.

Contributions

All contributions to the Plan are made by the Company. The Company contributes such amounts, as determined on an actuarial basis, to provide the Plan with assets sufficient to meet the projected benefits to be paid to plan participants. No participant contributions are permitted.

Funding

All contributions to the Plan are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Pension Benefits

For all union employees and former union employees of Century Aluminum of West Virginia, Inc., retirement benefits are based upon age attained and years of service. The collective bargaining agreement between the Company and the West Virginia Union specifies the pension factors by job class, which are utilized in the determination of monthly benefits. Eligibility for normal retirement requires the participant to attain the age of 62 and have 10 years of service or to have 30 or more years of continuous service, but not to have attained age 62. The Plan permits early retirement at age 60, provided the participant has completed at least 10 years of continuous service.

For all the Salaried Employees covered under the Plan, retirement benefits are calculated based on a percentage of final average salary and years of service times 1.5 percent divided by 12 or, if higher, a fixed multiplier times years of service. Under the merged plan, eligibility for early retirement requires the participant to attain the age of 55 and have 10 years of service, or that the sum of their age and years of service total at least 70.

Note 1 - Plan Description (Continued)

The Plan also provides for death and disability benefits. Participants become vested following the completion of five years of service.

Party-in-interest Transactions

Certain plan assets are in investment funds managed by SEI Private Trust Company or its affiliates. SEI Private Trust Company is the custodian of the Plan; therefore, these transactions qualify as party-in-interest transactions, as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation and Income Recognition

Investments held by the Plan are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to:

(a) Retired or terminated employees or their beneficiaries

(b) Beneficiaries of employees who have died

(c) Present employees or their beneficiaries

Actuarial Assumptions

The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The actuarial valuation was completed using the beginning-of-the-year method. Therefore, the accumulated plan benefits as of December 31, 2017 are presented from information provided by the actuary as of January 1, 2018.

The significant actuarial assumptions used in the valuation of the Plan at December 31, 2017 are summarized as follows:

Actuarial cost method	Unit credit actuarial cost method
Assumed rate of return	7.25 percent per annum
Mortality basis	RP-2014 Mortality Table, adjusted to 2006, with blue collar adjustment, projected on a fully generational basis using the Social Security Administration (SSA) Improvement Scale for 2018
Incident of retirement	Early retirement age assumptions beginning at age 60 and 55 with full retirement at age 62 and 70 for the Century Aluminum of West Virginia, Inc. union employees and salaried employees, respectively

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 2 - Summary of Significant Accounting Policies (Continued)

Benefit Payments

Benefits are recorded when paid.

Administrative Expenses

Certain administrative costs, including custodial, retirement services, and Pension Benefit Guaranty Corporation (PBGC) fees and expenses, are paid by the Plan. All other administrative costs are paid by the Company.

Risks and Uncertainties

Contributions to the Plan and the accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the financial statements.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including September 23, 2019, which is the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

In instances whereby inputs used to measure fair value fall into different levels of the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Note 3 - Fair Value Measurements (Continued)

The following valuation methodologies have been used to value the Plan's investments:

Mutual Funds

Mutual funds are valued at quoted prices reported in active markets.

Money Market Fund

The money market fund is valued at the outstanding balance, which is the best estimate of fair value.

U.S. Government Securities

U.S. government securities are valued using quoted market prices.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2018 and 2017:

	Assets Measured at Fair Value on a Recurring Basis at December 31, 2018			
	Investments (at Fair Value)	Level 1	Level 2	Level 3
Mutual funds	$ 169,018,459	$ 169,018,459	$ -	$ -
U.S. government securities	16,936,214	16,936,214	-	-
Money market fund	792	-	792	-
Total	$ 185,955,465	$ 185,954,673	$ 792	$ -

	Assets Measured at Fair Value on a Recurring Basis at December 31, 2017			
	Investments (at Fair Value)	Level 1	Level 2	Level 3
Mutual funds	$ 210,149,370	$ 210,149,370	$ -	$ -
U.S. government securities	5,152,620	5,152,620	-	-
Total	$ 215,301,990	$ 215,301,990	$ -	$ -

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer.

Note 4 - Unaudited Information

SEI Private Trust Company (the "Custodian") holds the Plan's investments and executes all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements and supplemental schedules of assets held at end of year and reportable transactions are based solely on information certified by the Custodian.

Note 5 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from PricewaterhouseCoopers, LLP. The calculation of the actuarial present value of accumulated plan benefits attributable to participants in the Plan, which was made as of and for the year ended December 31, 2017, the most recent actuarial valuation, is as follows:

Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Participants currently receiving benefit payments	$ 98,136,900
Participants entitled to deferred benefits	20,374,959
Other vested participants	29,322,289
Total vested benefits	147,834,148
Nonvested benefits	3,334,539
Total actuarial present value of accumulated plan benefits	$ 151,168,687

A summary of significant changes in the actuarial present value of accumulated plan benefits during the year ended December 31, 2017 is as follows:

Actuarial present value of accumulated plan benefits - Beginning of year	$ 42,550,509
(Decrease) increase during the year attributable to:	
Net benefits accumulated (including actuarial gains and losses)	(370,227)
Interest due to the decrease in the discount period	2,739,609
Benefits paid	(3,927,429)
Plan amendments (1)	112,180,901
Changes in actuarial assumptions	(2,004,676)
Net increase	108,618,178
Actuarial present value of accumulated plan benefits - End of year	$ 151,168,687

(1) Effective December 31, 2017, the Employees Retirement Plan merged into the Plan. Thus, the accumulated plan benefits were included in the actuarial present value of accumulated plan benefits, as the actuarial valuation was completed using the beginning-of-the-year method.

The change in actuarial assumptions line item above is the result of a change in the discount rate due to the plan merger and a change in the mortality tables to better reflect anticipated plan experiences. The discount rate was changed from 6.75 percent to 7.25 percent to properly reflect the combined assets of the Plan. The mortality assumption was changed from the RP-2014 Mortality Table (adjusted to 2006), with collar adjustment determined by employee type, projected on a fully generational basis using Scale SSA 2017 to the RP-2014 Mortality Table (adjusted to 2006), with collar adjustment determined by employee type, projected on a fully generational basis using Scale SSA 2018.

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Accordingly, no provision for income taxes has been made in the accompanying financial statements.

Note 7 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

The demographic assumptions (e.g., retirement, turnover) were incorporated for the Century Aluminum Employees Retirement Plan participants due to the plan merger. However, the assumptions are unchanged from September 1, 2017 valuation for these participants.

The expected return on assets assumption was changed from 6.75% to 7.25% to reflect the expected return on plan asset assumption for the merged Plan.

The valuation interest rate was changed from the September 2016 Segment Rates set in IRS Notice 2016-54 according to MAP-21 and amended by Section 2003 of HATFA to the September 2017 Segment Rates set in IRS Notice 2017-50 according to MAP-21 and amended by Section 2003 of HATFA.

A. Actuarial Assumptions for Funding Purposes (continued)

Assumption Changes (continued)	For maximum deductible contribution (IRC Section 404) purposes: The valuation interest rate was changed from the September 2016 Segment Rates to the September 2017 Segment Rates. The mortality assumption was updated from the 2017 IRS Static Mortality Table to the 2018 IRS Static Mortality Table. All other actuarial assumptions were the same as those used in the January 1, 2017 actuarial valuation.

Actuarial Methods for Funding Purposes

1. Actuarial Cost Method

The actuarial cost method is the Unit Credit Actuarial Cost Method.

Under this cost method, the target liability is defined as the present value of the accrued benefits on the valuation date. The funding shortfall is the excess, if any, of the amount by which the target liability exceeds the actuarial value of Plan Assets.

The target normal cost, determined on the valuation date, is the amount required to fund the benefit expected to be earned in the current year plus expected expenses.

2. Asset Valuation Method

Smoothed Method (for ERISA Funding purposes only):

Smoothed value method. Under this method the Plan Assets is equal to the average of the fair market value on the valuation date and the adjusted fair market value on each of the preceding two valuation dates, but not less than 90% nor more than 110% of the Fair Value of Assets. The adjusted fair market value as of any preceding valuation date is equal to the fair market value as of such date increased for contributions reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, decreased for benefit payments and expenses reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, and adjusted for expected earnings (not in excess of the third segment rate with no phase-in applicable to the corresponding valuation date).

Assumptions Rationale

Valuation Interest rate	The interst rate assumption used is prescribed by IRC section 430(h), reflecting a 4 month look back period as elected by the plan sponsor.
Mortality	The mortality assumption used is prescribed by IRC section 430(h).
Disability Rates	The disability rate assumption was selected by management based on historical experience and future expectations for disablements.
Retirement Rates	The retirement rate assumption was selected by management based on historical experience and future expectations for retirements.
Withdrawal Rates	The turnover assumption was selected by management based on historical experience and future expectations for terminations.
Expected Return on Plan Assets	The Expected Return on Assets was selected by Century based on the Plan's asset mix and information from the Plan's asset advisors. We did not assess the reasonableness of this assumption as such an evaluation was not in scope.
Expense	Assumed to be equal to the administrative expenses paid from the trust during the prior year.

Actuarial gains and losses resulting from plan experience differing from the assumptions above are monitored each year.
