Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Pollock Retirement Plan (the "Plan"), which comprise the statements of net assets available for benefits (modified cash basis) as of December 31, 2018 and 2017, and the related statements of changes in net assets available for benefits (modified cash basis) for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with the modified cash basis of accounting as described in Note 2; this includes determining that the modified cash basis of accounting is an acceptable basis for the preparation of the financial statements in these circumstances. Management is also responsible for the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient, appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 7, which was certified by Principal Life Insurance Company and State Street Bank and Trust Company, the Trustees of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedules. We have been informed by the Plan Administrator that State Street Bank and Trust Company held the Plan's investment assets and executed investment transactions for the period January 1, 2017 to September 30, 2017 and that Principal Life Insurance Company held the Plan's investment assets and executed investment transactions for the period from October 1, 2017 to December 31, 2018. The Plan Administrator has obtained certifications from the Trustees as of and for the years ended December 31, 2018 and 2017, that the information provided to the Plan Administrator by the Trustees is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient, appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Other Matters

The supplemental Schedule of Assets (Held at End of Year) as of December 31, 2018 and the Schedule of Reportable Transactions for the year ended December 31, 2018 are required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 and are presented for the purpose of additional analysis and are not a required part of the financial statements. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we do not express an opinion on the supplemental schedules referred to above.

Report on Form and Content in Compliance with DOL Rules and Regulations

The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the Trustees, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Basis of Accounting

We draw attention to Note 2 of the financial statements, which describes the basis of accounting. The financial statements are prepared on the modified cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America. Our disclaimer of opinion is not modified with respect to this matter.

Pollock Retirement Plan
NOTES TO FINANCIAL STATEMENTS

1. DESCRIPTION OF THE PLAN

The following description of the Pollock Retirement Plan (“the Plan”) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan’s provisions.

General

The Plan was formed January 1, 1972 to provide retirement and incidental benefits to covered employees of Pollock Investments, Inc. (the “Corporation”). The Plan is a defined benefit plan that covered all employees of the Corporation whose benefits were not subject to collective bargaining. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”). The Plan was amended effective January 1, 2016; this amendment did not change benefits or participation requirements. Effective November 28, 2018, the sponsorship of the Plan was transferred from the Corporation, to PK Pension LLC, a Delaware Limited Liability Company (the “Company”) following the sale of the Corporation to another company. PK Pension LLC assumed all responsibilities of the Plan as the new Plan Sponsor and Plan Administrator.

The Plan is administered by the Plan Administrator. The duties of the Plan Administrator are to oversee the operations and administration of the Plan in accordance with the specific terms of the Plan, provide for prudent investment of the Plan’s assets and keeping accurate records and reports. The Plan’s trustee Principal Life Insurance Company (“Principal”) is responsible for the custody and management of the Plan’s assets.

Employees participated in the Plan upon attaining the age of 21 years and completion of six months of eligible service. Participants were fully vested with respect to their contributions and became fully vested in the Corporation’s contributions after five years of vesting service. No new employees have been allowed to enter the Plan after July 31, 2005.

Expenses incurred in the administration of the Plan are paid by both the Plan and the Corporation through November 27, 2018, and effective November 28, 2018, the Company.

Normal Retirement Benefit

The normal retirement age is 65 years. Normal retirement benefits are payable monthly for life and commence at normal retirement date, subject to formulas and limitations set forth in the Plan. Benefit amounts were frozen effective July 31, 2005, accordingly no further credit for service years after July 31, 2005 shall be considered in the determination of benefits.

Minimum Benefit

In no event will a participant receive less as a monthly pension than the amount which can be provided by their contributions to the plan, with interest credited at the rate of 4% per annum through 1975, 5% per annum from 1975 through 1987 and 120% of the applicable Federal mid-term rate to date of termination and at Pension Benefit Guaranty Corporation (“PBGC”) rates from date of termination to the participant’s normal retirement date.

Early Retirement Benefit

A participant may elect early retirement after attainment of the age of 55 years and ten years of vesting service. Early retirement benefits are payable for life and are deferred to the normal retirement date at which time they are reduced by the ratio of accrued benefit service to anticipated benefit service. At the participant’s request, a reduced benefit may be paid beginning upon actual retirement. The reduction is 1/15 for each of the first five years and 1/30 for each of the next five years that the starting date of the benefit precedes normal retirement date.

Late Retirement Benefit

The benefit is computed as for normal retirement, considering benefit service and compensation to actual retirement date, with a minimum of the actuarial equivalent of the benefit payable at normal retirement.

Pollock Retirement Plan
NOTES TO FINANCIAL STATEMENTS

1. DESCRIPTION OF THE PLAN (Continued)

Disability Benefit

Participants with ten or more years of vesting service are eligible for disability benefits after termination for reason of disability. Benefits are payable for life, commencing at normal retirement date, if the participant is continuously disabled until that time. The benefit is the normal retirement benefit, considering compensation to the date of disablement and benefit service to the normal retirement date. Benefit service is given for the period of disability. Effective July 31, 2005, any benefit accruals under the disability provisions of the Plan were eliminated.

Deferred Vested Benefit

A participant who terminates for reasons other than death or retirement with five or more years of eligible service is eligible for a benefit, deferred to normal retirement date, determined as for early retirement. At the participant's request, a benefit reduced in the same manner as for early retirement may be paid after age 55, but prior to normal retirement date.

In-Service Death Benefit

The surviving spouse of an active employee who had completed five years of vesting service on the date of death shall be eligible for an in-service benefit provided the employee had been married to the surviving spouse for at least 12 months immediately preceding the employee's death. The monthly annuity shall be determined as though the employee had terminated employment on the date of their death and elected to receive the qualified 50% survivor pension with payments commencing at the earliest date permissible and with their death occurring the day after commencement.

Death Benefit After Retirement But Before Commencement of Payments

If a participant dies after early retirement but prior to commencement of payments, then, provided the participant was continuously married for at least one year immediately preceding their death, their surviving spouse will receive a pension for life. The benefit is 50% of the pension the employee would have received had they taken early retirement on the date of their death with the 50% joint and survivor option.

Death Benefit After Normal Retirement, Disability Retirement or After Commencement of Early Retirement

Unless an employee with spousal consent makes an election to the contrary prior to his date of death, the death benefit will be paid as under the qualified joint and survivor option. In the event that an employee rejected the qualified joint and survivor option or if they were not married on their date of death, no death benefit shall be paid to or for them unless they elected an optional form of payment.

Death Benefit After Deferred Vested Retirement Before Commencement of Payments

If an employee terminates with a deferred vested benefit and subsequently dies prior to commencement of benefits, the surviving spouse of such employee shall be eligible to receive a monthly annuity determined as though the employee had survived to the earliest date their pension could commence and elected to receive the qualified joint and survivor option, with their death occurring on the day after commencement.

Return of Contributions with Interest

If a participant terminates before being eligible for a pension, a benefit is payable equal to the Contribution Accumulation. This amount is the participant's contributions to the Plan, plus interest credited at the rate of 4% per annum through 1975, 5% per annum from 1975 through 1987, and 120% of the Federal mid-term rate to date of refund.

If, upon payment of all benefits to a participant and their beneficiary, the total of the benefits paid is less than the Contribution Accumulation, then the excess is paid to the beneficiary or the estate. If a participant terminates while eligible for a Deferred Vested pension, they may receive their Contribution Accumulation, and any subsequent benefit will be reduced.

Pollock Retirement Plan
NOTES TO FINANCIAL STATEMENTS

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies consistently used in the preparation of the Plan's financial statements.

Method of Accounting

The financial statements are prepared under the modified cash basis of accounting. Accordingly, income and the related assets, except for employer contributions, are recognized when received rather than when earned and expenses, including benefit payments, are recognized when paid rather than when the obligation is incurred.

Use of Estimates

In preparing financial statements under the basis of accounting used by the plan, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value, with the exception of the common / collective trusts which are fully benefit-responsive investments. Changes in fair value are reflected in operations. Mutual funds, pooled separate accounts, and common / collective trusts represent investments with various investment managers. The respective fair values of these investments are determined by reference to the funds' underlying assets, which are principally marketable equity and fixed income securities. Quoted market prices are used to value investments. Shares held in mutual funds are traded on national securities exchanges and are valued at the net asset value of shares held by the Plan at year end. Units held in pooled separate accounts and common / collective trusts are valued at the unit value of units held by the Plan at year end as reported by the investment managers. All investments in mutual funds and common / collective trusts were liquidated during 2017.

Purchase and sales of securities are recorded on the trade date. Gains or losses on sales of securities are based upon the average cost of securities. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis.

For the period from January 1, 2017 to September 30, 2017, the Plan was invested in the Long Bond Fund ("LBF"), a common / collective trust fund with underlying investments in bond funds. The LBF is valued at fair value and then adjusted by the issuer to contract value. The investment objective of the LBF is to maximize total return through investment in a diversified portfolio of long duration fixed income securities. Fair value of the LBF is determined by the last available bid price on the bonds held as determined by an independent pricing service. Individual participant accounts invested in the LBF are maintained on a unit value basis. Participants do not have beneficial ownership in specific underlying securities or other assets in the LBF but have an interest therein represented by units valued daily. Participants may withdraw from the fund at the stated unit value at the close of business on any business day. Issuances and redemptions of units are made on such days based upon the net asset value per unit. The LBF earns interest income which is automatically reinvested in additional units. For the year ended December 31, 2017, fees were charged by the LBF based on 0.45% of daily net assets; this fee is accounted for within the net asset value. Generally, contributions to and withdrawal payments from the LBF are converted to units by dividing the amounts of such transactions by the unit values as last determined, and the participants' accounts are charged or credited with the number of units properly attributable to each participant.

For the period from January 1, 2017 to September 30, 2017, the Plan was invested in the Real Estate Fund ("REF"), a common / collective trust fund with underlying investments in real estate investment trusts. The REF is valued at fair value and then adjusted by the issuer to contract value. The investment objective of the REF is to maximize total return through investment in public real estate securities with a combination of above average income and long term growth of capital. Investment in the REF involves certain unique risks as valuations are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, default by borrowers, and self-liquidation. The REF is also subject to interest rate risks.

Pollock Retirement Plan
NOTES TO FINANCIAL STATEMENTS

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Investment Valuation and Income Recognition (Continued)

Fair value of the REF is determined by the value of the individual investments as follows:

- Equity securities are valued at the official closing price or the last sales price on the exchange on which they are primarily traded or the last quoted bid price for securities in which there were no sales during the day.
- Securities listed on the NASDAQ National Market and NASDAQ Small Cap Market for which reliable market quotations are available are valued at the official closing price, or if there is no official closing price on that day, at the last sales price.
- Investments in open-end investment companies are valued at such investment company's current day closing net asset value per share and may be redeemed daily. When valuations are not readily available, securities will be valued at their fair market value as determined by the advisor.

Individual participant accounts invested in the REF are maintained on a unit value basis. Participants do not have beneficial ownership in specific underlying securities or other assets in the REF but have an interest therein represented by units valued daily. Participants may withdraw from the fund at the stated unit value at the close of business on any business day. Issuances and redemptions of units are made on such days based upon the net asset value per unit. For the year ended December 31, 2017, fees were charged by the REF based on 0.75% (for unbundled units) to 1.35% (for bundled units) of daily net assets; this fee is accounted for within the net asset value. Generally, contributions to and withdrawal payments from the REF are converted to units by dividing the amounts of such transactions by the unit values as last determined, and the participants' accounts are charged or credited with the number of units properly attributable to each participant.

For the period from January 1, 2017 to September 30, 2017, the Plan was invested in the Stock Index Fund ("SIF"), a common / collective trust fund with underlying investments in the BlackRock Equity Index Fund E ("BlackRock") which is a bank collective trust. The SIF is valued at contract value. The investment objective of the SIF is to match the performance of the S&P 500 Index. Fair value of the SIF is determined by the net asset value per unit of BlackRock as determined at the close of business on each business day. The net asset value of a unit of BlackRock is determined based upon market quotations provided by independent pricing services. BlackRock is a non-registered collective trust not listed on the New York Stock Exchange. Individual participant accounts invested in the SIF are maintained on a unit value basis. Participants do not have beneficial ownership in specific underlying securities or other assets in the SIF but have an interest therein represented by units valued daily. Participants may withdraw from the fund at the stated unit value at the close of business on any business day. Issuances and redemptions of units are made on such days based upon the net asset value per unit. Net investment income and realized gains (losses) earned by BlackRock are not distributed or allocated to the SIF, but are accumulated and reinvested and are not therefore included in the determination of the SIF's unit value. For the year ended December 31, 2017, fees were charged by the SIF based on 0.15% of daily net assets; this fee is accounted for within the net asset value. Generally, contributions to and withdrawal payments from the SIF are converted to units by dividing the amounts of such transactions by the unit values as last determined, and the participants' accounts are charged or credited with the number of units properly attributable to each participant.

For the period from October 1, 2017 to December 31, 2017 and the period ended December 31, 2018, the Plan was invested in pooled separate accounts ("PSAs") which invests mainly in domestic stocks. The majority of the underlying securities have observable level 1 quoted pricing inputs. The net asset value ("NAV") of the pooled separate account is not publicly quoted but can be redeemed at NAV as of the measurement date. Therefore, the investments have a readily determinable fair value. The NAV is calculated in a manner consistent with accounting principles generally accepted in the United States of America for investment companies. Most of the security prices were obtained from a pricing service, Interactive Data Corporation (IDC).

Net Appreciation/Depreciation in Fair Value of Investments

Net appreciation (depreciation) in fair value of investments include realized and unrealized investment gains and losses. Brokerage fees, if any, are added to the acquisition costs of assets purchased and subtracted from the proceeds of assets sold.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Administration

Under the terms of the trust agreements between the Trustee and the Corporation, and subsequent to November 27, 2018 the Company, the Trustee manages a trust fund on behalf of the Plan. Accordingly, the Trustee has been granted certain discretionary authority concerning investment and management powers.

Risks and Uncertainties

The Plan provides for investments in various investment securities which, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Further, due to the level of risk associated with certain investment securities, it is at least reasonably possible that change in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

3. FUNDING POLICY

As of January 1, 1992, employees are not required nor permitted to make contributions under this Plan. There were \$75,396 of employees' accumulated contributions at January 1, 2018 and 2017 (excluding interest accumulated). Including accumulated interest, there were \$323,483 and \$316,025 as of January 1, 2018 and 2017, respectively. Contributions to the Plan are made by the Corporation to the Trustee in amounts, as determined by consulting actuaries using the entry age actuarial cost method, sufficient to pay all benefits under the Plan. The Corporation made contributions of \$4,286,501 and \$393,745 for the years ended December 31, 2018 and 2017, respectively. Which was in compliance with the minimum funding requirements of ERISA. As part of the sale of the Corporation, \$3,892,500 was funded into the plan, this amount is included in the employer contribution during the year ended December 31, 2018. The plan was in compliance with the minimum funding requirements of ERISA for 2018 and 2017.

4. PLAN TERMINATION

The plan was amended and restated effective January 1, 1992. Benefits under the Plan as it existed prior to its amendment and restatement were frozen as of December 31, 1991. No further credit for service years is available to Participants after July 31, 2005. Benefits under the amended and restated Plan are funded solely through Corporation contributions as determined from time to time, based on actuarial advice. The Company is in the process of terminating the Plan and issued a Notice to Affected Parties of Intent to Terminate Plan on December 18, 2018. During 2019, the plan was amended to set the effective date of plan termination as February 26, 2019. The termination process is awaiting an approval from the PBGC and the United States Internal Revenue Service ("IRS").

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during each of the years 2018 and 2017, that monthly ceiling, which is adjusted periodically, was \$5,420 and \$5,369, respectively. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For young annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

4. PLAN TERMINATION (Continued)

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits after payment of administration, termination, and liquidation expenses in the order indicated:

- a) Benefits attributable to employee contributions.
- b) Annuity benefits former employees or their beneficiaries have been receiving for at least three years, or those employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of an annuity under the Plan, subject to certain limitations.
- c) Other vested benefits insured by the PBGC up to the applicable limitations.
- d) All other vested benefits (that is, vested benefits not insured by the PBGC).
- e) All non-vested benefits.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

5. INCOME TAX STATUS

The Corporation has received a favorable determination letter from the IRS dated December 7, 1993 stating that the Plan is qualified under the provision of Section 401(a) of the United States Internal Revenue Code (the "Code") and therefore is exempt from taxation. The Plan has been amended subsequent to receiving this determination letter however the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code.

Plan management evaluates tax positions taken by the Plan and recognizes a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2018 there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for years prior to 2015.

6. ACTUARIAL ASSUMPTIONS AND CALCULATIONS

The significant actuarial assumptions used in the valuations of the Plan as of and for the years ended December 31, 2018 and 2017 are as follows:

- Life expectancy of active participants and nondisabled pensioners - life expectancy of active participants: applicable mortality table as set forth in RP 2014 Employee/Annuitant Mortality Table for Males/Females with and MP 2017 generational improvement for 2018 and MP 2016 generational improvements for 2017.

6. ACTUARIAL ASSUMPTIONS AND CALCULATIONS (Continued)

• Retirement Rates

	Age	Rate
	55 - 61	1.0%
	62	10.0%
	63 - 64	7.5%
	65+	81.5%
	At January 1, 2018	At January 1, 2017
Investment return (per annum, compounded annually)	6.50%	6.50%
Discount rate	6.00%	6.50%

Employee turnover and disability assumptions (at graduated rates) and an earnings progression assumption are also used for the valuation.

The actuarial present values of accumulated plan benefits at January 1 are as follows:

	2018	2017
Vested benefits:		
Active participants	\$ 2,568,522	\$ 2,335,878
Participants with deferred benefits	3,112,277	2,806,655
Participants receiving benefits	<u>4,771,878</u>	<u>4,884,838</u>
	10,452,677	10,027,371
Non-vested benefits	<u>1,733</u>	<u>2,608</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 10,454,410</u>	<u>\$ 10,029,979</u>

The change in actuarial present values of accumulated plan benefits for the years ended January 1 are as follows:

	2018	2017
Actuarial present value of accumulated plan benefits at beginning of year	\$ 10,029,979	\$ 9,799,082
Increase for interest due to decrease in discount period	631,587	642,117
Change in actuarial assumptions (change in life expectancy assumptions and investment returns for 2017 and change in discount rate for 2018)	439,971	114,808
Benefits accrued and actuarial experience	(10,608)	55,952
Benefits paid	<u>(636,519)</u>	<u>(581,980)</u>
Actuarial present value of accumulated plan benefits at end of year	<u>\$ 10,454,410</u>	<u>\$ 10,029,979</u>

The foregoing actuarial assumptions were based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. Subsequent to the date of the actuarial valuation, the determination to terminate the plan was made, see Note 10.

7. INFORMATION CERTIFIED BY THE PLAN'S TRUSTEES

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the United States Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustees have certified that the following data included in the accompanying financial statements and supplemental schedules is complete and accurate as of and for the years ended December 31:

	2018	2017
Investments, at fair value:		
Pooled separate accounts	<u>\$ 12,119,014</u>	<u>\$ 9,290,277</u>
Total investments	<u>\$ 12,119,014</u>	<u>\$ 9,290,277</u>

Investment income:

Net (depreciation) appreciation in fair value of investments	\$ (498,234)	\$ 1,241,558
Dividends	<u>-</u>	<u>10,286</u>
Total investment income	<u>\$ (498,234)</u>	<u>\$ 1,251,844</u>

The Plan's independent accountants did not perform any auditing procedures with respect to this information, except for comparing such information to the related information included in the accompanying financial statements and supplemental schedules.

8. FAIR VALUE OF INVESTMENTS

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

The three levels of the fair value hierarchy under FASB ASC 820 are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of the observable inputs and minimize the use of unobservable inputs. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. For the years ended December 31, 2018 and 2017, there were no significant transfers in or out of levels 1, 2, or 3.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used as of December 31, 2018 and 2017.

Pooled separate accounts: Valued, as a practical expedient, at the NAV of units held by the Plan at year end. This fair value is considered to be readily determinable.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

8. FAIR VALUE OF INVESTMENTS (Continued)

The following table sets forth by level, within the fair value hierarchy, the Plan's assets measured at fair value on a recurring basis as of December 31, 2018:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Total assets in the fair value hierarchy	\$ -	\$ -	\$ -	\$ -
Pooled separate accounts (a)				12,119,014
Total investments at fair value				<u>\$ 12,119,014</u>

The following table sets forth by level, within the fair value hierarchy, the Plan's assets measured at fair value on a recurring basis as of December 31, 2017:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Total assets in the fair value hierarchy	\$ -	\$ -	\$ -	\$ -
Pooled separate accounts (a)				9,290,277
Total investments at fair value				<u>\$ 9,290,277</u>

(a) These investments are valued using net asset value as a practical expedient, and therefore have not been classified in the fair value hierarchy.

9. REPORTABLE TRANSACTIONS

During the years ended December 31, 2018 and 2017, there were no loans in default or uncollectible or non-exempt transactions with parties-in interest which would require supplemental presentation under DOL regulations. Investment assets acquired and disposed of within the Plan are reported on the supplemental presentation under DOL regulations as applicable.

10. SUBSEQUENT EVENTS

The Pension Committee has evaluated subsequent events through on October 14, 2019, the date the financial statements were available to be issued.

Effective February 26, 2019, the Plan Sponsor amended the plan to affect the termination of the plan. The termination process is subject to an approval from the PBGC and the IRS. Net assets available for benefits are not expected to be distributed or paid out until the year ending December 31, 2020.

	Before benefit payment period
	IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.
	At the plan sponsor's direction, we are delaying the use of the Notice 2017-60 mortality table to 2019. The mortality tables are determined using the methodology in §1.430(h)(3)-1 prior to its amendment by T.D. 9826.

Assumptions selected by actuary

Inflation	2.00% increase per year.									
	See Long-Term Capital Market Assumptions link.									
Asset return	6.50% for the current plan year.									
	The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.									
Expected expense	The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.									
Retirement	Active participants									
	<table><tr><th>Age</th><th>Probability of retirement</th></tr><tr><td>55-61</td><td>1.00%</td></tr><tr><td>62</td><td>10.00%</td></tr><tr><td>63-64</td><td>7.50%</td></tr><tr><td>65</td><td>Remaining participants</td></tr></table>	Age	Probability of retirement	55-61	1.00%	62	10.00%	63-64	7.50%	65

55-61	1.00%									
62	10.00%									
63-64	7.50%									
65	Remaining participants									
	Inactive participants are assumed to retire at age 65.									
	We don't have the plan experience necessary to directly set this assumption; therefore, we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design. As we gain plan experience, we will monitor and make appropriate adjustments in the future.									

Disability	None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.
Marriage	75% married; husbands are 3 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	2003 Society of Actuaries Small Plan Age Table, multiplied by 0.50. We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 0.50 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience. This multiplier has been applied to the withdrawal experience table to assume withdrawal rates approximately equal to the prior actuary. Since we don't have the experience necessary to directly set this assumption we are relying on the assumption set by the prior actuary.
Form of benefit	Participants are assumed to receive their benefits on the normal form at the assumed retirement age.
Methods prescribed by law	
Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Methods selected by plan sponsor

Asset method	<p>The asset valuation method is prescribed by law for plans that elect to use a value other than market value.</p> <p>For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.</p> <p>The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.</p> <p>When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.</p>
Segment rates	<p>24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.</p>
PBGC premium basis	<p>Variable Rate Premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2008 plan year and this method must be used for five years before a change can be made.</p>

Methods elected by actuary

Retirees	<p>Assets and liabilities for current and future retirees are included.</p>
Vested benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality

Based on RP-2006 total dataset mortality table projected to future years with historical and assumed mortality improvement (MI) rates using the Principal Mortality Improvement Scale (PFG2013-10).

RP-2006 is a baseline mortality rates table underlying the SOA RP-2014 experience study as of central year of the experience data for 2004-2008 years. The Principal Mortality Improvement scale is based on the SOA MI model RPEC_2014_v2017 and Principal-selected assumption set published November 2017. For detailed rationale please see full [Mortality documentation](#).

Interest rate used to value liabilities

6.00%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 2a - Explanation of Assets
Pollock Retirement Plan
EIN 83-2623691 Plan No. 001

The market value of assets on line 2a does not equal assets shown on Schedule H, Schedule I or Form 5500-SF. Schedule H, Schedule I and Form 5500-SF use the full value of contributions received after plan year end. Line 2a includes the value of \$194,383 contributions received after the plan year end with a discounted value of \$189,260.

In addition, the market value of assets on line 2a does not equal assets shown on Schedule H, Schedule I or Form 5500-SF due to an adjustment to the employer contributions. This resulted in a difference of \$39.

Schedule SB, Line 22 - Description of Weighted Average Retirement Age
 Pollock Retirement Plan
 EIN 83-2623691 Plan No. 001

The weighted average retirement age is weighted by the expected percentage of active participants retiring at each age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

Schedule SB, Part V - Summary of Plan Provisions
Pollock Retirement Plan
EIN 83-2623691 Plan No. 001

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the plan restatement signed 12/15/2016.

Plan eligibility

Age	Attained age 21.
Service	Six months of service.
Class	Employees whose terms of employment are not governed by a collective bargaining agreement, and non-leased employees Plan Participation is frozen effective July 31, 2005.

Normal retirement benefit

Age	Attained age 65.
Form	Monthly annuity payable for life (optional forms may be elected in advance of retirement).
Amount (accrued benefit)	The greater of (a), (b), (c), and (d) below: a) 0.50% of average compensation multiplied by accrual service b) Monthly accrued benefit as of 12/31/1991 plus 0.50% of average compensation multiplied by accrual service after 1/1/1992 c) Monthly accrued benefit as of 12/31/1988 plus 0.50% of average compensation multiplied by accrual service after 1/1/1989. d) Monthly accrued benefit provided by employee contribution balance converted to a life annuity Benefit accrual is frozen effective July 31, 2005.

Early retirement benefit

Age	Attained age 55.
Service	Completed 10 years of vesting service.
Form	Same as normal retirement benefit.
Amount	Accrued benefit on early retirement date reduced by 6 2/3% for each year up to five and 3 1/3% for each year between five and ten that the early retirement date precedes normal retirement date.

Late retirement benefit

Age	No maximum age.
Form	Same as normal retirement benefit.
Amount	Greater of accrued benefit on late retirement date or accrued benefit on normal retirement date actuarially increased to late retirement date. retirement age.

Termination benefit

Vesting percentage	100% after five years of vesting service.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

Survivor annuity death benefit (a vested benefit)

Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.

Definitions

Average compensation	The highest average monthly compensation of any five consecutive plan years out of the latest ten. No compensation earned after July 31, 2005 will be considered in the calculation of benefits.
Accrual Service	Service expressed in whole years and fractional parts of a year. Fractional periods of a year will be expressed in terms of months in which an employee performs an hour of service.
Optional forms of benefit payments	The optional forms of benefit payments are: <ul style="list-style-type: none">• Monthly annuity payable for life, 5 years certain and life, or 10 years certain and life.• Monthly annuity payments for a 10 year fixed period.• Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100.

The optional form conversion basis is 8.5% interest and the 1971 Group Annuity Mortality Table projected to scale D to 1975 as if all payees are males for payments other than lump sums.

The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the first calendar month preceding the first day of the stability period which is the plan year.

Changes in Principal Eligibility or Benefit Provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant Event

The enrolled actuary has not been made aware that any significant events have occurred during the year.

Schedule SB, Line 25 – Change in Method
Pollock Retirement Plan
EIN 83-2623691 Plan No. 001

A change in funding method has occurred since last year due to a change in the enrolled actuary and the business organization providing actuarial services to the plan. This change meets the automatic approval requirements under Rev Proc 2017-56.

Schedule SB, Line 24 – Change in Actuarial Assumptions
Pollock Retirement Plan
EIN 83-2623691 Plan No. 001

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan.

The turnover assumption has been updated from Transamerica's table of withdrawal rates to the 2003 Society of Actuaries Small Plan Age Table, multiplied by 0.50.

The marriage assumption has decreased assuming 100% of participants are married to 75% of participants are married.
