(1) The Plan

The following description of the Maritz Holdings Inc. Retirement Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a complete description of the Plan's provisions.

The Plan, established March 1, 1966, restated in 2015, and periodically amended, is a noncontributory defined benefit pension plan established for qualified full time and regular part time employees of Maritz Holdings Inc. and its domestic subsidiaries (the "Company"). Employees are a participant in the Plan if they participated in the prior retirement plan and were an active employee on January 1, 1996. Otherwise, employees are eligible after completing 1,000 hours in the first 12 months of employment, if attained by April 30, 2007.

Effective May 1, 2007, the cash balance retirement plan was amended to freeze benefit accruals previously earned under the cash balance formula. Each employee's existing cash balance under both plans will continue to earn interest at a variable annual rate. At retirement, employees may elect to receive their pension benefit as a lump sum or as an annuity.

Effective March 1, 2016, the Plan was amended so that if a Participant's retirement income has a present value that exceeds \$1,000 but does not exceed \$5,000, and the Participant does not consent to a distribution after receipt of notice, the present value of such benefit shall be rolled over to an Individual Retirement Account established on behalf of the Participant, and if the present value does not exceed \$1,000, the present value of such benefit shall be distributed in one lump-sum payment to the participant.

The Plan is a cash balance plan where benefits are expressed as an account balance that grows with interest each year. Interest is equal to the lesser of the average yield on one-year treasuries or the average yield on 30 year treasuries for the month of October of the previous Plan year (with a maximum of 8% and a minimum of 4%).

Participants choosing to retire after age 65 may defer receiving their pension benefits and continue to earn interest credits. The Plan also allows early retirement for those vested participants having reached age 55. This benefit will be calculated in the same manner as normal retirement age based on the participant's accrued benefit at the early retirement date.

The Company's funding policy is to make annual contributions to the Plan in amounts, based on actuarial calculations, designed to fund current service costs annually and to fund prior service costs over a 25-year period. The minimum funding requirements of the Employee Retirement Income Security Act of 1974 were met in both 2018 and 2017.

(a) Death Benefits

If a participant has satisfied the requirements for a vested benefit and dies prior to the termination of employment and before commencement of benefits, the designated beneficiary may elect either a lump sum death benefit or to receive payment in the form of an annuity.

(b) Distributions

Participants who leave the Company are entitled to receive his or her vested accrued benefit. Plan benefits vest 100% after three years of credited service.

(1) The Plan (Continued)

(c) Actuarial Assumptions

The actuarial present value of accumulated benefits is presented based on actuarial calculations as of the beginning of the respective Plan years. The more significant assumptions underlying the actuarial valuations as of January 1, 2018 and 2017 are as follows:

	2018	2017
Average rate of return on investments	5.42% compounded annually	5.64% compounded annually
Discount rate for benefit obligations	3.85% per year	3.78% per year
Life expectancy of participants	RP-2014 with MP-2014 scale adjustments	RP-2014 with MP-2014 scale adjustments
Average retirement age	62 years of age	62 years of age
Normal entry age	Age on birthday nearest valuation date following employment	Age on birthday nearest valuation date following employment

(2) Summary of Significant Accounting Policies

(a) Basis of Accounting

The accompanying financial statements of the Plan are presented on the accrual basis of accounting. Benefits are recorded when paid. Amounts representing discretionary employer contributions are recorded at the time of payment.

(b) Valuation of Investments and Income Recognition

The Plan invests in various investment securities. Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investments, it is reasonably possible that changes in values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Benefits Committee determines the Plan's valuation policies utilizing information provided by the investment advisor and custodian. See note 3 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Net appreciation/(depreciation) in fair value of investments includes both realized and unrealized gains/losses and is based upon comparison to beginning of the year fair values or the value at the date of purchase, if acquired during the year. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

(2) Summary of Significant Accounting Policies (Continued)

(c) Administrative Expenses

Expenses of the Plan, such as audit, actuarial, management, custodial, and consulting fees to the extent allowed by the law, are paid directly by the Plan. All other costs of administering the Plan are paid by the Company. Expenses that are paid by the Company are excluded from these financial statements. In addition, certain investment related expenses are included in net appreciation/(depreciation) of fair value of investments presented in the accompanying Statements of Changes in Net Assets Available for Benefits.

(d) Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes thereon. Actual results could differ from those estimates.

(3) Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

- | | |
|---------|--|
| Level 1 | Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access. |
| Level 2 | Inputs to the valuation methodology include: <ul style="list-style-type: none">• Quoted prices for similar assets or liabilities in active markets;• Quoted prices for identical or similar assets or liabilities in inactive markets;• Inputs other than quoted prices that are observable for the asset or liability;• Inputs that are derived principally from or corroborated by observable market data by correlation or other means. <p>If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.</p> |
| Level 3 | Inputs to the valuation methodology are unobservable and significant to the fair value measurement. |

Notes to Financial Statements
December 31, 2018 and 2017
(See Independent Auditor's Report)

(3) Fair Value Measurements (Continued)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2018 and 2017.

Corporate stocks, Exchange Traded Funds, Real Estate Investment Trusts: Valued at the closing price reported on an active exchange.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Security Exchange Commission ("SEC"). These funds are required to publish their daily net asset value ("NAV") and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

U.S. government and government agency obligations, mortgage backed obligations, and corporate debt: Valued using pricing models maximizing the use of the observable inputs for similar securities.

Hedge funds and limited partnership units: Valued at NAV of units held. The NAV is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liability. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

Collective trust funds – Valued at the NAV of units of a bank collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

The valuation methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

(3) Fair Value Measurements (Continued)

The following table sets forth additional disclosure of the Plan's investments whose fair value is estimated using the net asset value per share (or its equivalent):

Investment	Fair Value at 12/31/18	Fair Value at 12/31/17	Unfunded commitment	Redemption frequency	Redemption notice period

(a) The investment strategy is to achieve superior risk-adjusted total returns by investing in public and private non-investment grade and non-rated debt securities including bank debt, public and private equity, options, swaps and real estate related instruments.

(b) The investment strategy is trading and investing in securities, private investment companies and other investments. Long/shore equity hedge funds represent the most significant portion of the portfolio with the remaining balance invested in distressed/credit, sector or commodity-related funds, or other thematic investment opportunities.

(c) The investment strategy is to achieve long-term returns in the general equity markets by investing predominantly in interest in limited partnerships and similar pooled invested vehicles that employ diverse alternative investment strategies across a variety of asset classes.

(d) The investment strategy is to achieve capital appreciation and current income by investing in debt and equity securities that are perceived to be inefficiently priced as a result of business, financial, or legal uncertainties.

(e) The investment strategy is to achieve capital appreciation through investing in investment funds managed by third-party investment managers that employ a variety of alternative investment strategies.

(4) Tax Status

The Internal Revenue Service has determined and informed the Company, in a letter dated July 28, 2016, that the Plan meets the requirements of Section 401(a) of the IRC and is exempt from Federal income tax under Section 501(a) of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Company has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2018 and 2017 there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The

Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

(5) Priorities upon Plan Termination

In the event of termination of the Plan, net assets are to be distributed to eligible participants, as defined, in the following manner:

- 1) Participants receiving benefits
- 2) Participants eligible to retire who have not retired
- 3) All others entitled to benefits under the Plan

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age and early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of Plan benefits, and the amount of benefit protection is subject to certain limitations. The statutory ceiling on the amount of an individual's monthly pension benefit that the PBGC guarantees for normal retirement age of 65 was \$5,420 and \$5,369 for plan terminations occurring during 2018 and 2017, respectively. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide these benefits, the priority of those benefits, (as described in the Plan's document), the assets available from the Company, and the level of benefits guaranteed by the PBGC at that time.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable.

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with Maritz Holdings, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of January 1, 2018. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with the plan sponsor, the following assumptions were made for missing or apparently inconsistent data elements:

- Missing birth dates for beneficiaries of retirees with joint and survivor payment forms were assumed to be three years prior to the retirees' birth dates if the retirees were female and three years after the retirees' birth dates if the retirees were male
- Missing sex of beneficiaries were assumed to be opposite of the retirees' sex.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The plan credits interest to cash balance accounts using the lesser of the average yield on 1-year treasuries or the average yield on 30-year treasuries for the month of October preceding the first day of the plan year, but with a minimum interest credit rate of 4.00% and a maximum interest credit rate of 8.00%. Maritz Holdings, Inc. has selected an expected future rate of 4.00%. After examining historical variability in this rate, and considering the increase (reduction) in interest crediting expected to be caused by the minimum (maximum) interest credit, we believe the selected assumption does not significantly conflict with what would be reasonable based on a combination of market conditions at the measurement date and future expectations consistent with other economic assumptions used, other than the discount rate.
Annuity conversion rate for hybrid plans	As required by IRC 430, annuity benefits are valued by converting accounts to annuities using the current IRC 430 interest rates, so that the interest rates assumed are effectively the same as described above for the discount rate.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h). Note that the plan sponsor has decided, as allowed by regulation §1.430(h)(3)-1, to delay until the 2019 plan year updating the required mortality table to reflect the RP-2014 study and subsequent Society of Actuaries studies.

Note that the plan sponsor has decided, as allowed by regulation §1.430(h)(3)-1, to delay until the 2019 plan year updating the required mortality table to reflect the RP-2014 study and subsequent Society of Actuaries studies.
Termination	Assumed termination rates differ by age and service because of expected differences in termination rates by service.
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Cash balance benefit

The accumulated value of the opening balance credit and the annual credits to a participant's account, according to the following schedule:

Age as of 12/31	Credit Percentage
Less than 30	2.50%
30 – 34	3.00%

All amounts are accumulated using an interest credit equal to the lesser of the average yield on 1-year treasuries or the average yield on 30-year treasuries for the month of October preceding the first day of the plan year. In no event will the interest credit be less than 4% nor greater than 8%.

No pay credits are provided to non-grandfathered participants after April 30, 2007. No pay credits are provided to grandfathered participants after December 31, 2009.

Monthly preretirement death benefit payable on behalf of an active employee with accruals frozen as of December 31, 2009 under prior plan formula is calculated as if participant terminated employment on the date of death, survived to age 55 (if death occurs prior to age 55) and elected a 50% J&S annuity commencing immediately. (The surviving spouse may elect a Cash Balance Account death benefit in lieu of this benefit.)

Otherwise, benefits are paid in the form of 50% joint and survivor annuity option or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan. Optional forms are a 100% joint and survivor annuity, a ten-year certain and life annuity, or (for married participants) a life annuity. Actuarial equivalence is based on the 417(e) applicable mortality table and an 8.00% interest rate.
