Independent Auditors' Report

To the Participants and Plan Administrator of the
Retirement Plan for Former Employees of
Ingersoll-Rand Company
Davidson, North Carolina

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Retirement Plan for Former Employees of Ingersoll-Rand Company (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2018 and 2017, the related statements of changes in net assets available for benefits for the years then ended, the statement of accumulated plan benefits as of December 31, 2017, the related statement of changes in accumulated plan benefits for the year ended December 31, 2017, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 ("ERISA"), the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by JP Morgan Chase Bank, N.A., the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2018 and 2017 and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

DIXON HUGHES GOODMAN LLP

Disclaimer of Opinion

Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance with DOL Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Change in Method

The decrement timing used in the valuation was changed from beginning of year to rounded middle of year. Under rounded middle of year decrement timing, all decrements are assumed to occur at the middle of the year and eligibility for benefits, commencement and cessation of benefits, and other events are assumed to occur at the middle of the year. The change in funding method meets the parameters for automatic approval of software changes under IRS Rev. Proc. 2017-56.

Demographic Assumptions

Inclusion date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality	
■ Healthy	Separate rates for non-annuitants (based on RP-2000 “Employees” table without collar or amount adjustments), projected to 2033 using Scale AA and annuitants (based on RP-2000 “Healthy Annuitants” table without collar or amount adjustments), projected to 2025 using Scale AA.
■ Disabled	Mortality in accordance with Revenue Ruling 96-7.
Retirement	Terminated Vested participants are assumed to retire at age 65.
Unpredictable Contingent Event Benefit (UCEB) assumptions	None
Percent married	Actual data is used for retired participants. For all other participants 70% of males and 55% of females are assumed to be married at retirement.
Spouse age	Females are assumed to be 2 years younger than their husbands.
Administrative expenses	$1,009,000 of administrative expenses are assumed to be paid out of the trust in 2018 and are added to the target normal cost. The amount is based on the noninvestment-related expenses that were paid out of the plan in the prior fiscal year and the expected change in PBGC variable rate premium from the prior year to the current year.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month.

SCHEDULE SB ATTACHMENTS

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets for determining minimum required contributions	Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 5.25%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 5.25%, and the applicable limitation for the plan year, equal to 6.48%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 5.50%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 5.50%, and the applicable limitation for the plan year, equal to 6.65%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.3. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

SCHEDULE SB ATTACHMENTS

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with the plan sponsor regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any significant benefits required to be valued that were not.

Participant data

Employee data was supplied by Ingersoll Rand as of the census date. We have not independently verified the accuracy or completeness of the data or information provided, but we have performed limited checks for reasonableness.

Terminated vested participants over age 65 were assumed to receive benefits actuarially increased from age 65 to January 1, 2018 under the actuarial equivalence basis detailed in the plan document.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2018 is used to determine the maximum deductible contribution for the tax year ending December 31, 2018.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Administrative expenses

Administrative expenses are estimated by determining the expected actual expenses for the coming year, reflecting items like expected PBGC premiums and actual expenses paid from the trust the preceding year.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Disabled Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Form of payment

The assumed form and timing of payments were selected based on recent experience and best estimate of future behavior.

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Summary of Plan Provisions

Plan Provisions

The original plan was effective March 31, 1988. The Plan was amended and restated effective January, 2010. The most recent amendment reflected in the following plan provisions was effective December 31, 2013.

Coverage and Participation

The plan was created by the spin-off from the Clark Equipment Company Plan 23 of a mirror image pension plan for retired and deferred vested former employees in that plan as of March 31, 1988. Effective April 1, 1988, Clark Equipment Company Plans 1, 2, 3, 5, 10, 30, 40 and 44 were also merged into the plan.

Effective December 31, 1997, the Retirement Plan for Employees of Ingersoll-Rand Oilfield Products Company was merged into the plan.

Effective December 31, 2000, the Ingersoll-Dresser Pump Company Pension Plan was merged into the plan.

Effective December 31, 2002, the Alco Hourly Employees' Pension Plan, the Pension Agreement between Fafnir Bearing Division of the Torrington Company and Local No. 133, the Pension Agreement between the Fafnir Bearings Division of the Torrington Company and Local No. 1249 and the Thermo King Pension Plan for Hourly Employees at the Montgomery, Alabama Plant were merged into the plan.

Effective December 31, 2005, the Blaw Knox Construction Equipment Corporation Hourly Pension Plan was merged into the plan.

Effective December 31, 2006, the Clark Equipment Company General Non-Salaried Employee Pension Plan was merged into the plan.

Effective April 30, 2007, all participants employed or formerly employed by Ingersoll Rand's Road Machinery business units were spun-off in connection with the sale of those business units to Volvo Construction Equipment-North America.

Effective November 30, 2007, all participants employed or formerly employed by Ingersoll Rand's Bobcat, Utility Equipment and Attachments business units were spun-off in connection with the sale of those business units to Doosan Infracore.

Effective December 1, 2013, certain participants formerly employed by Ingersoll Rand's security businesses were spun-off in connection with the spin-off of those business units to Allegion.

Change in Method

The decrement timing used in the valuation was changed from beginning of year to rounded middle of year. Under rounded middle of year decrement timing, all decrements are assumed to occur at the middle of the year and eligibility for benefits, commencement and cessation of benefits, and other events are assumed to occur at the middle of the year. The change in funding method meets the parameters for automatic approval of software changes under IRS Rev. Proc. 2017-56.

Demographic Assumptions

Inclusion date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality	
■ Healthy	Separate rates for non-annuitants (based on RP-2000 "Employees" table without collar or amount adjustments), projected to 2033 using Scale AA and annuitants (based on RP-2000 "Healthy Annuitants" table without collar or amount adjustments), projected to 2025 using Scale AA.
■ Disabled	Mortality in accordance with Revenue Ruling 96-7.
Retirement	Terminated Vested participants are assumed to retire at age 65.
Unpredictable Contingent Event Benefit (UCEB) assumptions	None
Percent married	Actual data is used for retired participants. For all other participants 70% of males and 55% of females are assumed to be married at retirement.
Spouse age	Females are assumed to be 2 years younger than their husbands.
Administrative expenses	$1,009,000 of administrative expenses are assumed to be paid out of the trust in 2018 and are added to the target normal cost. The amount is based on the noninvestment-related expenses that were paid out of the plan in the prior fiscal year and the expected change in PBGC variable rate premium from the prior year to the current year.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month.

SCHEDULE SB ATTACHMENTS

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets for determining minimum required contributions	Under this method, the valuation assets are equal to the average of three values (all determined without regard to receivable contributions), the result increased by the discounted present value of contributions expected to be made after the valuation date based on the prior plan year PPA effective interest rate. This amount is then subject to a 10% corridor around the market value of assets (including the discounted present value of receivable contributions) as of the valuation date. The three values used to develop the average value are: the market value of assets as of the current valuation date, the adjusted market value of assets as of the prior valuation date and the adjusted market value of assets as of the second prior valuation date. The adjusted market value as of a relevant valuation date is equal to the market value of assets as of the prior valuation date increased by actual plan contributions and assumed return on plan assets and decreased by actual plan disbursements after that date until the current valuation date. The assumed rate of return on plan assets for the prior plan year (pursuant to IRS Notice 2009-22) was 5.25%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 5.25%, and the applicable limitation for the plan year, equal to 6.48%. The assumed rate of return on plan assets for the second prior plan year (pursuant to IRS Notice 2009-22) was 5.50%, which is the lesser of the anticipated rate of return on assets for the plan year, equal to 5.50%, and the applicable limitation for the plan year, equal to 6.65%. The algebraically equivalent development of this method (pursuant to IRS Notice 2009-22) is shown in Section 2.3. Because expected investment returns under this method are limited under WRERA, over time it is more likely to produce an actuarial value that is expected to be less than the market value of assets.

SCHEDULE SB ATTACHMENTS

Benefits not valued	All benefits described in the Plan Provisions section of this report were valued based on discussions with the plan sponsor regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with the plan sponsor and, based on that review, is not aware of any significant benefits required to be valued that were not.
Participant data	Employee data was supplied by Ingersoll Rand as of the census date. We have not independently verified the accuracy or completeness of the data or information provided, but we have performed limited checks for reasonableness. Terminated vested participants over age 65 were assumed to receive benefits actuarially increased from age 65 to January 1, 2018 under the actuarial equivalence basis detailed in the plan document.
Tax policy	The actuarial valuation performed for the plan year ending December 31, 2018 is used to determine the maximum deductible contribution for the tax year ending December 31, 2018.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Administrative expenses	Administrative expenses are estimated by determining the expected actual expenses for the coming year, reflecting items like expected PBGC premiums and actual expenses paid from the trust the preceding year.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Form of payment	The assumed form and timing of payments were selected based on recent experience and best estimate of future behavior.

SCHEDULE SB ATTACHMENTS

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2016 to September 2017.
- The required mortality table used to calculate the funding target and target normal cost was updated to included one additional year of projected mortality improvements. The valuation does not reflect the updated mortality tables provided in the final regulations under IRC Section 430 issued in October 2017.
- The assumed plan-related expenses added to the target normal cost were changed from $1,051,000 for 2017 to $1,009,000 for 2018.

Independent Auditors' Report

To the Participants and Plan Administrator of the
Retirement Plan for Former Employees of
Ingersoll-Rand Company
Davidson, North Carolina

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Retirement Plan for Former Employees of Ingersoll-Rand Company (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2018 and 2017, the related statements of changes in net assets available for benefits for the years then ended, the statement of accumulated plan benefits as of December 31, 2017, the related statement of changes in accumulated plan benefits for the year ended December 31, 2017, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 ("ERISA"), the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by JP Morgan Chase Bank, N.A., the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2018 and 2017 and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

1. Description of the Plan

The following brief description of the Retirement Plan for Former Employees of Ingersoll-Rand Company (the "Plan") is provided for general information purposes. Participants should refer to the plan document for complete information.

General

The Plan is sponsored by Ingersoll-Rand Company, a U.S. subsidiary of Ingersoll-Rand plc (collectively referred to as the "Company"). The Plan is a noncontributory defined benefit pension plan covering only certain retired and terminated employees of certain U.S. subsidiaries of the Company ("Subsidiaries") previously entitled to pension benefits under their previous company plans that were merged into the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") and Internal Revenue Code of 1986, as amended ("IRC").

As the Plan covers only retired and other former employees of the Company and its Subsidiaries, no future benefit accruals are provided under the Plan. If a former employee, who was a participant in one of the merged plans and who is receiving payments under the Plan, subsequently resumes employment with the Company, benefit payments under the Plan shall be suspended, and any subsequent service with the Company shall be credited to the applicable active pension plan or savings plan.

Pension Benefits

The normal retirement age is provided under the applicable variation of the Plan. The monthly pension benefit is based on annual compensation, Social Security benefit, and years of credited service. Variations of this formula apply to employees of specific Subsidiaries of the Company. Eligibility for early retirement and surviving spouse benefits vary as defined by the applicable variations of the Plan. Employees electing early retirement receive reduced pension benefits based on the commencement of pension payments under the applicable variations.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the dates of the financial statements. Actual results could differ from those estimates.

Valuation of Investments

Plan investments are held in the Ingersoll-Rand Collective Trust Fund ("CTF"), a master trust administered by the JPMorgan Chase Bank N.A. (the "Trustee"). The CTF provides unified investment management for certain U.S. tax qualified pension plans of Ingersoll-Rand plc and its U.S. subsidiaries.

The CTF maintains separate accounts at fair value for each participating defined benefit plan. Each account records contributions, benefit payments and direct plan disbursements and receipts, and a pro rata share of indirect expenses, realized and unrealized gains or losses, interest and dividend income. Pro rated items are allocated monthly to each account based on each participating Plan's beginning of month asset value in relation to the total CTF assets.

Investments in the CTF are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) represents the Plan's pro-rata share of net realized and unrealized gains and losses on the CTF's investments.

Funding Policy
The Company's funding policy is to make annual minimum contributions as required by law as determined by the Plan's actuary, and other contributions in its discretion as allowed by law. The Plan's actuary determines the required contributions using the Projected Unit Credit Cost Method. As determined by the Plan's actuary, contributions were required during 2018 and 2017 in the amount of $2,250,000 and $1,890,000, respectively; however, the Company made contributions of $3,900,000 and $4,000,000 during 2018 and 2017, respectively. The amounts over the minimum required contributions were discretionary.

Expenses
The Plan pays many expenses incurred with administrating the Plan and a pro rata share of the CTF expenses. The Plan's actuarial cost method includes a factor to fund such expenses through employer contributions. Fees paid by the Plan include various professional fees, investment fees, Pension Benefit Guaranty Corporation ("PBGC") fees and any other costs of administering the Plan. The PBGC requires the Plan to pay an annual fee based on the number of participants in the Plan. The fee for 2018 and 2017 was $74 and $69 per participant, respectively; however, the yearly cost is determined by the PBGC and is subject to change. The fixed annual PBGC fee per participant is expected to be $80 in 2019 with no scheduled increases (other than indexing) for subsequent years.

Benefit Payments
Benefit payments are recorded when paid.

Subsequent Events

The Plan has evaluated subsequent events through October 15, 2019, in connection with the preparation of these financial statements, which is the date the financial statements were available to be issued.

On April 30, 2019, the Company and Gardner Denver Holdings, Inc. ("GDI") announced that they entered into definitive agreements pursuant to which the Company will separate its Industrial segment businesses ("IR Industrial") by way of spin-off to its shareholders and then combine with GDI to create a new company focused on flow creation and industrial technologies ("IndustrialCo"). The Company's remaining HVAC and transport refrigeration businesses, reported under the Climate segment, will continue to focus on climate control solutions for buildings, homes and transportation ("ClimateCo"). The transaction is expected to close by early 2020, subject to approval by GDI's shareholders, regulatory approvals and customary closing conditions. The Company is assessing how the Plan will be impacted the transaction.

Actuarial Present Value of Accumulated Plan Benefits
Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the credited service that employees have rendered. Accumulated plan benefits include vested benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries or alternate payees under a qualified domestic relations order ("QDRO"). Benefits payable under all circumstances are included to the extent they are deemed attributable to employee credited service rendered to the valuation date.

The actuarial present value of accumulated plan benefits at January 1, 2018 was determined by the consulting actuary. The actuarial present value results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation at January 1, 2018 and 2017 were as follows:

- Participants' life expectancy for non-disabled participants, based on Base Mortality Table RP-2014 base table projected back to 2011 with Mortality Projection Scale MP-2014 with a 15 year convergence period and a long term rate of 0.75% with separate mortality rates for annuitants and non-annuitants. Life expectancy for disabled participants utilized the Base Mortality table RP-2014 disabled retiree base table projected back to 2011 with Mortality Projection Scale MP-2014 with a 15 year convergence period and a long term rate of 0.75%.

- Terminated vested participants are assumed to retire at age 65.
- Administrative expense assumption was $1,009,000 and $1,051,000 for 2018 and 2017, respectively.
- Average interest rate, which is assumed to be 5.00% and 5.25% in 2018 and 2017, respectively for funding.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits as may be required under applicable law.

New Accounting Pronouncements

In February 2017, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2017-06*, Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting.* This guidance requires the disclosure of the Plan's dollar amount of their interest in each general type of investment held by the master trust. In addition, the guidance requires disclosure of the master trust's other asset and liability balances and the Plan's interest in each of those other assets and liability balances. This guidance requires retrospective application and is effective for annual reporting periods beginning on or after December 15, 2018. Early adoption is permitted; however, the Plan has elected not to early adopt the ASU. The Company does not expect the adoption of this accounting guidance to have a significant impact on the Plan's financial statements.

3. Fair Value Measurements

Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Fair value measurements are based on a framework that utilizes the inputs market participants use to determine the fair value of an asset or liability and establishes a fair value hierarchy to prioritize those inputs. The fair value hierarchy is comprised of three levels that are described below:

Level 1 Inputs to the valuation methodology are based on quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs other than Level 1. Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in markets that are not active;
- Other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable inputs based on little or no market activity and that are significant to the fair value of the assets and liabilities.

The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs are obtained from independent sources and can be validated by a third party, whereas unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability based on the best information available under the circumstances. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Following is a description of the valuation methodologies used for the underlying assets in the CTF measured at fair value. There have been no significant changes in the methodologies used at December 31, 2018 and 2017.

Commingled funds: The investments are public investment vehicles valued using their daily Net Asset Value ("NAV") per share or the equivalent. NAV per share or the equivalent is used for fair value purposes as a practical expedient.

NAVs are calculated by the investment manager or sponsor of the fund. The NAV is a reasonable exit price, but it is quoted in a market that is not active. As a result, these funds are not subject to leveling.

U.S. government and agency obligations: Quoted market prices are not available for these securities. Fixed income securities are valued through a market approach with inputs including, but not limited to, benchmark yields, reported trades, broker quotes and issuer spreads. Such securities are classified as Level 2.

Corporate and foreign bonds: Quoted market prices are not available for these securities. Fixed income securities are valued through a market approach with inputs including, but not limited to, benchmark yields, reported trades, broker quotes and issuer spreads. Such securities are classified as Level 2.

Mortgage-backed securities, collateralized mortgage obligations and other asset-backed securities: Prices are based on a compilation of primarily observable market information or a broker quote in a non-active market. Fixed income securities are valued through a market approach with inputs including, but not limited to, benchmark yields, reported trades, broker quotes and issuer spreads. Such securities are classified as Level 2.

Registered mutual fund - equity specialty: The shares of registered investment companies are valued at quoted market prices in an exchange or active market. Registered mutual funds are pooled assets of multiple investors overseen by investment managers. Investors own a proportionate interest in the fund (i.e. number of units of the fund). Daily price (Net Asset Value or "NAV" per share) is determined based on the total market value of the fund divided by total number of shares outstanding. Registered mutual funds are typically daily traded, and their NAVs are publicly quoted. As a result, these funds are not subject to leveling.

Registered mutual fund - fixed income specialty: The shares of registered investment companies are valued at quoted market prices in a closed exchange. Registered mutual funds are pooled assets of multiple investors overseen by investment managers. Investors own a proportionate interest in the fund (i.e. number of units of the fund). Daily price (Net Asset Value or "NAV" per share) is determined based on the total market value of the underlying assets of the fund divided by total number of shares outstanding. As a result, these funds are not subject to leveling.

Cash and cash equivalents: The investments are valued using a market approach with inputs including quoted market prices for either identical or similar instruments. As these investments are not traded on active markets, these investments are classified as Level 2.

Real estate limited partnerships: Investments in real estate take the form of direct investment in real estate funds. Private real estate fund values are reported by the fund manager and are based on valuation or appraisal of the underlying investments. As the investments are infrequently traded and may not have available comparables, these investments are classified as Level 3.

Derivatives: Exchange-traded derivatives valued using quoted prices are classified within level 1 of the valuation hierarchy. If they are not listed on an exchange, derivative contracts are valued using models that use as their basis readily observable market parameters, which are actively quoted in the market and can be validated through external sources. Depending on the types and contractual terms of derivatives, fair value can be modeled using a series of techniques, such as the Black-Scholes option pricing model, simulation models or a combination of various models, which are consistently applied. Most of the inputs for this valuation are readily observable from actively quoted markets. Such instruments are generally classified as Level 2.

Guaranteed Interest Contracts ("GIC"): The value is reported based upon observable inputs, including the insurance company's assumptions as to what market participants would use in pricing such instruments. GICs are classified as Level 3.

The methods described above may produce a fair value that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. See Note 4 for further disclosures of the fair value of the assets held within the CTF.

4. Investments in the Collective Trust Fund (Master Trust)

All of the Plan's investments are included in the CTF, which was established for the investment of assets of the Plan and several other Company sponsored U.S. tax qualified retirement plans. Each participating retirement plan has an undivided interest in the CTF. Assets of the CTF are held by the Trustee. At December 31, 2018 and 2017, the Plan's interest in the net assets of the CTF was approximately 7.22% and 7.30%, respectively.

The following investments and net appreciation (depreciation) in fair value of investments, interest, and dividend income and other receipts of the CTF are certified by the Trustee to be complete and accurate. The Trustee has also certified the Plan's proportionate share of such items to be complete and accurate. The CTF financial statements are prepared on the modified cash basis of accounting, while the Plan's financial statements are prepared on the accrual basis of accounting.

5. Plan Termination

Ingersoll-Rand plc has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA and the IRC. In the event the Plan is terminated, the net assets of the Plan will be allocated, as prescribed by ERISA and the IRC and its respective related regulations.

Certain benefits under the Plan are insured by the PBGC if the Plan is terminated. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's benefits. However, the PBGC does not guarantee benefits for all Plan participants and for all types of benefits and the amount of benefit protection is subject to certain limitations.

Whether all participants receive their benefits should the Plan be terminated will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

6. Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated July 7, 2017, that the Plan and related trust are designed in accordance with the applicable sections of the IRC to be exempt from taxation. The plan administrator believes that the Plan is designed and is being operated in material compliance with the applicable requirements of the IRC.

GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2018 and 2017, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

7. Transactions with Parties-in-interest

Through the CTF, certain plan investments are held by JPMorgan Chase Bank, N.A. JPMorgan Chase Bank, N.A. is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. These transactions are allowable party-in-interest transactions under Section 408(b)(8) of the ERISA regulations.

8. Risks and Uncertainties

Through the CTF, the Plan invests in various stocks, bonds, fixed-income and other investment securities. These securities are exposed to various risks, such as interest rate, market and credit risks. The Company's objective in managing its defined benefit plan assets is to ensure that all present and future benefit obligations are met as they come due. It seeks to achieve this goal while trying to mitigate volatility in plan funded status, contribution, and expense by better matching characteristics of the plan assets to that of the plan liabilities. The Company utilizes a dynamic approach to asset allocation whereby a plan's allocation to fixed income assets increases as the plan's funded status improves. Due to the level of risk associated with certain of the CTF's investments, and the level of uncertainty related to changes in the fair values of such investments, it is at least reasonably possible that changes in such risks in the near term would materially affect the Plan's investment balances, and amounts reported in the Statements of Net Assets Available for Benefits and the Statements of Changes in Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.
