AXEL JOHNSON, INC. RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

1. DESCRIPTION OF THE PLAN

The following brief description of the Axel Johnson Inc. Retirement Plan (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan is a noncontributory defined benefit pension plan. Effective December 31, 2003, accrued benefits were frozen. Prior to December 31, 2003, eligible employees of Axel Johnson Inc. (the “Company”) became eligible to participate in the Plan as of the first month following one year of service. Individuals who were members of any collective bargaining unit that did not provide for participation of such employees in the Plan were excluded. The Plan is subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”) and is administered by the administrative committee of the Plan. All of the assets of the Plan are held by Wells Fargo Bank, NA (the “Trustee”).

Vesting

Prior to December 31, 2003, employees had to be credited with five years of service to be vested under the Plan. A year of service is any calendar year in which an employee is credited with 1,000 or more hours. Effective December 31, 2003, all participants were 100% vested in their accrued benefit. Non-vested benefits include subsidized early retirement, death and disability benefits that have not yet been accrued since the participant has not yet met the eligibility for such benefit.

Retirement Benefits

Plan benefits, regardless of when participants begin to receive them, are based on a formula using the participant’s final average compensation (also known as final average pensionable earnings), credited service and Social Security-covered compensation prior to December 31, 2003. A participant’s years of credited service (both before and after the Plan became frozen) and age determine when the participant qualifies for retirement benefits under the Plan.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared under the accrual basis of accounting except for benefit payments, which are recorded when paid.

Investment Valuation and Income Recognition

Investments in highly liquid instruments (cash and short-term securities) with original maturities of three months or less are classified as cash equivalents.

Mutual funds are valued at the last reported quoted price on the last business day of the year. Mutual funds purchased or sold are recorded as of the trade date. Investments in the private investment funds and limited partnerships are carried at estimated fair value, which is determined by the aggregate estimated values of assets held by the fund as reported by the Fund’s manager (see Note 3).

AXEL JOHNSON, INC. RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

Interest income is recorded by the Plan as earned. Dividends are recorded by the Plan on the ex-dividend date. Purchases and sales of securities are recorded on a trade-date basis.

Administrative Expenses

Administrative expenses consist primarily of the Trustee, custodian and investment advisor fees and are generally paid from the Plan assets.

Funding Policy

The Company's policy is to annually fund at least the minimum contribution required by ERISA as determined by actuarial computation utilizing the unit credit method. For the years ended December 31, 2018 and 2017, the Plan has satisfied the minimum funding requirements of ERISA.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to employees or their beneficiaries in the event of retirement, death, disability or termination of employment.

The actuarial present value of accumulated plan benefits is determined by an actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The more significant actuarial assumptions used in the valuations as of December 31, 2018 and 2017, are as follows:

Discount rate	6.25% in 2018; 6.00% in 2017
Mortality basis	2018: RP-2014 Total Employee and Healthy Annuitant Mortality tables projected with Mortality Improvement Scale MP-2017; 2017: RP-2014 Total Employee and Healthy Annuitant Mortality tables projected with Mortality Improvement Scale MP-2016
Retirement age	55 - 70

The foregoing assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of the accumulated plan benefits.

The table below sets forth the accumulated plan benefits as of December 31, 2017:

Retirement Benefits

In general, a participant must terminate employment with the Company before commencing his or her benefits. In general, if the cash value of the participant's vested annuity is \$5,000 or less, it can be paid in a single lump sum. However, if the cash value of the benefit is more than \$5,000, only an annuity benefit is payable.

Plan Termination

If the Plan is terminated, the funds held by the Trustee on behalf of the affected employees shall be allocated, subject to provisions for expenses of administration or liquidation, to provide the accrued benefits of members and retired and vested terminated employees based on their credited service to the date of termination of the Plan, in the manner and order specified in Section 4044 of ERISA.

After full satisfaction of all benefits to which members are entitled under the foregoing, any remaining balance shall revert to the Company, subject to the Internal Revenue Code ("IRC").

Notes to Financial Statements

December 31, 2018 and 2017

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (“U.S. GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

Investments held by the Plan are exposed to various risks, such as interest rate, market volatility and credit risk. Due to the level of risk associated with certain investment securities, it is possible that changes in the values of investments may occur in the near term and that changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

3. FAIR VALUE MEASUREMENTS

Financial assets and liabilities are required to be measured and reported on a fair value basis using the following three categories for classification and disclosure purposes:

- Level 1 - Measurements that are most observable and are based on quoted prices of identical instruments obtained from the principal markets in which they are traded. Closing prices are both readily available and representative of fair value. Market transactions occur with sufficient frequency and volume to assure liquidity.
- Level 2 - Measurements derived indirectly from observable inputs or from quoted prices from markets that are less liquid are considered Level 2.
- Level 3 - Measurements that are least observable are estimated from significant unobservable inputs determined from sources with little or no market activity for comparable contracts or for positions with longer durations.

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measure in its entirety.

The following is a description of the valuation methodologies used for assets measured at fair value:

Mutual funds - mutual funds are valued at the daily closing price as reported by the fund. The mutual funds held by the Plan are deemed to be actively traded.

Collective Trust, Limited partnerships and private investment funds - The Collective Trust (“CCT”) are investments in international equity securities, debt securities and hedge funds that invest in a variety of investments that are valued using quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly.

AXEL JOHNSON, INC. RETIREMENT PLAN

Notes to Financial Statements

December 31, 2018 and 2017

The CCT is carried at the estimated fair value, based on the NAV practical expedient, which is based on the fair value of the underlying assets held by the CCT. Unit values of the CCT is determined by dividing the funds' net assets at fair value by their units outstanding at the valuation dates.

The limited partnerships and private investment funds are carried at their estimated fair value based on the NAV practical expedient as reported by the fund's manager and certified by the Trustee. This is the value that the Plan would receive upon any redemption request or distribution and, as such, constitutes the exit price for the Plan. The Plan believes that the NAV or partnership interest, as provided by the fund manager, is the best indicator of fair value available. Some of these funds invest in illiquid investments whose value is derived from valuation models which the Plan is not privy to. Therefore, the Plan cannot independently value these assets. These investments are in hedge funds or limited partnerships, which report NAVs based on the aggregate estimated fair value of investments held by the funds in accordance with U.S. GAAP and have annual financial statements audited by independent accounting firms.

The methods described above may produce a fair value calculation that may not be reflective to future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. The following present the Plan's assets using the fair value hierarchy as of December 31:

6. TAX STATUS

The Plan has received a determination letter from the Internal Revenue Service (“IRS”) dated November 14, 2013, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the “Code”) and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax-exempt.

U.S. GAAP requires plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan and has concluded that, as of December 31, 2018 and 2017, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

7. RELATED-PARTY TRANSACTIONS

Certain of the Plan’s assets are invested in a cash mutual fund managed by the Trustee of the Plan. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

Actuarial cost method

The Funding Target is the present value of accrued benefits based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected plan administrative and expenses to be paid from plan assets during the year.

Expenses

Expected plan expenses of \$1,400,000 were added to the Target Normal Cost. Expected expenses include administrative expenses, investment management expenses, and the estimated PBGC premium.

EIN/PN: 06-1600707 / 001

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods (continued)

Non-Prescribed Funding Assumptions and Methods (continued)

Asset valuation method

The Valuation Assets are determined using a method that spreads asset gains/(losses) over two years. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The actuary's expected rate of return was selected after a review of an analysis performed by the plan's investment consultant, which was based on the plan's asset allocation and forward-looking expected rates of return by asset category. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the Valuation Assets.

	Actuary's Assumption ¹	Third Segment Rate	Reflecting PPA Limit
2018 Expected Return	7.60%	6.29%	6.29%
2017 Expected Return	7.50%	6.48%	6.48%
2016 Expected Return	8.00%	6.65%	6.65%

The actuary's expected return assumption is before netting expenses.

Future actuarial measurements

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions, applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this report.

Summary of Changes from the January 1, 2017 Valuation

- The mortality assumption was updated to the tables mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1 as revised in October 2017.
- The interest basis was updated to the current rates as specified in IRS Regulation 1.430(h)(2)-1 as revised in October 2017. These rates are constrained in accordance with HATFA.
- These changes increased the Funding Target by approximately \$7.1 million.

¹ For funding purposes, certain administrative expenses are treated as cash flow, rather than as elements of investment return.
