The Plan is a noncontributory defined benefit pension plan that prior to June 30, 2007 covered substantially all employees of Marietta Memorial Hospital (the Hospital) who worked at least 1,000 hours in a consecutive twelve month period and had reached 21 years of age. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

Effective June 30, 2007, the Hospital froze the Plan to new participants. The accrued benefit of each participant is frozen as of March 31, 2018 for all purposes under the Plan, and no benefits shall accrue after such date.

Pension Benefits

Employees with five or more years of service or have reached normal retirement age are entitled to annual pension benefits beginning at normal retirement age (65). The Plan provides retirement benefits in the form of direct monthly payments, equal to a percentage of their average compensation times years of service up to a maximum of thirty-five (35) years. In addition to the default direct monthly payment option, participants may elect other forms of benefit payments. The Plan also provides for early retirement, disability retirement, and death benefits in certain circumstances.

Death and Disability Benefits

Death benefits may be paid to the participant's beneficiary, depending on the commencement of benefits prior to death, benefit payment method selected, and whether certain plan conditions have been met. Participants retiring from service with the Hospital due to permanent disability have the option to defer benefit payments until normal retirement age or may begin receiving an actuarially decreased benefit as soon as they become disabled.

Contributions

The Hospital's funding policy is to make quarterly contributions that are actuarially determined in amounts sufficient to meet the minimum funding requirements of ERISA. Participant contributions are not required or permitted by the Plan. The Plan has met the ERISA minimum funding requirements for the years ended December 31, 2018 and 2017.

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).
3. All other vested benefits (that is, vested benefits not insured by the PBGC).
4. All non-vested benefits

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2018, that ceiling was \$5,420 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits, should the Plan terminate at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Valuation of Investments

For 2018 and 2017, Peoples Bank managed the investment portfolio of the Plan with full discretionary authority within the general objectives and guidelines established by the plan administrator. The plan administrator strives to maintain a diverse investment portfolio and limits any possible concentration in any one entity, industry of investment in order to achieve its objectives. The Plan's investment objective is to invest its funds in such a way as to earn the highest possible real return (capital appreciation and current return) with prudent levels of risk.

Investments are valued at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Investment Committee determines the Plan's valuation policies utilizing information provided by the investment custodian. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Most significantly, estimates are used in determining the actuarial present value of accumulated plan benefits and valuation of investments. Actual results could differ from those estimates.

Benefit Payments

Retirement benefits are recorded when paid.

Administrative Expenses

Certain administrative expenses of maintaining the Plan are paid by the Hospital.

MARIETTA MEMORIAL HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2018 AND 2017

Subsequent Events

The Plan has evaluated subsequent events through October 15, 2019, the date the financial statements were available to be issued.

3. INFORMATION CERTIFIED BY THE PLAN'S CUSTODIAN

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Peoples Bank National Association, the custodian of the Plan, has certified to the completeness and accuracy of all investments reflected on the accompanying statement of net assets available for benefits as of December 31, 2018 and 2017, and investment related activity reflected in the statements of changes in net assets available for benefits for the years ended December 31, 2018 and 2017.

4. FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The three levels of the fair value hierarchy are described as follows:

- Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 - Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

MARIETTA MEMORIAL HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2018 AND 2017

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2018 and 2017.

- Money markets – Valued based at the subscription and redemption activity at a \$1 stable net asset value (NAV). However, on a daily basis the funds are valued at their daily NAV calculated using the amortized cost of the securities held in the fund.
- Mutual funds - Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2018 and 2017. Classification within the fair value hierarchy table is based on the lowest level of any input that is significant to the fair value measurement.

Assets at Fair Value as of December 31, 2018

	Level 1	Level 2	Level 3	Total
Money markets	\$ -	\$ 2,459,763	\$ -	\$ 2,459,763
Mutual funds	47,212,084	-	-	47,212,084
Total assets at fair value	\$ 47,212,084	\$ 2,459,763	\$ -	\$ 49,671,847

Assets at Fair Value as of December 31, 2017

	Level 1	Level 2	Level 3	Total
Money markets	\$ -	\$ 1,544,969	\$ -	\$ 1,544,969
Mutual funds	51,845,963	-	-	51,845,963
Total assets at fair value	\$ 51,845,963	\$ -	\$ -	\$ 53,390,932

The Plan's policy is to recognize transfers between levels as of the end of the reporting period. There were no significant transfers between levels during 2018 and 2017.

MARIETTA MEMORIAL HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2018 AND 2017

5. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired, disabled or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries.

Prior to the freezing of plan benefits, accumulated plan benefits under the Plan were based on employees' compensation during their years of participation in the Plan. The accumulated plan benefits for active employees were based on their average compensation prior to the date the benefit information is presented (valuation date). After the freezing of the plan benefits effective March 31, 2018, the accrued benefit of each participant is frozen and no benefits shall accrue after that date, no additional years of service will be credited to the participants and average compensation for the plan will not include compensation paid after March 31, 2018.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

The actuarial present value of accumulated plan benefits is determined by an actuary from Findley and is an amount that results from applying actuarial assumption to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, withdrawal or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions underlying the computations for the Plan as of January 1, 2018 are as follows:

	2018	2017
Discount rate	8.00%	8.00%
Life Expectancy	SOA RP-2014 Total Dataset Mortality scaled back to 2006 using the MP-2014 projection scale and then forward using the MP-2017 projection scale.	
Retirement	Normal Retirement Age, or Valuation Age if later	
Actuarial Valuation Method	3-year averaging method

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2018 AND 2017

Accumulated plan benefit information is as follows:

	2018	2017
Actuarial present value of accumulated Plan benefits:		
Vested benefits:		
Participants currently receiving payments	\$ 19,900,119	\$ 19,237,044
Other participants	26,860,393	25,459,882
Total vested benefits	46,760,512	44,696,926
Nonvested benefits	14,263	4,915
Actuarial present value of accumulated Plan benefits	\$ 46,774,775	\$ 44,701,841

Changes in the present value of accumulated plan benefits are as follows:

	2018	2017
Accumulated plan benefits - beginning of year	\$ 44,701,841	\$ 45,671,609
Increase (decrease) attributable to:		
Effect of assumption change	(255,568)	(3,336,195)
Benefits paid	(2,308,201)	(2,294,346)
Benefits accumulated	1,151,108	1,319,885
Decrease in the discount period	3,485,595	3,340,888
Net increase (decrease)	2,072,934	(969,768)
Accumulated plan benefits - end of year	\$ 46,774,775	\$ 44,701,841

These actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2018 AND 2017

6. RELATED-PARTY TRANSACTIONS AND PARTY-IN-INTEREST TRANSACTIONS

Parties-in-interest are defined under Department of Labor regulations as any fiduciary of the Plan, any party rendering service to the Plan, the Hospital and certain others. Investment management fees are paid to Peoples Bank, the custodian. Findley serves as the Plan Actuary. Blue & Co., LLC is the independent auditor for the Plan. The aforementioned parties generally receive payment from the Hospital.

7. TAX STATUS

The Plan obtained its latest determination letter on September 25, 2015, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code.

8. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Because of the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

9. COMMITMENTS AND CONTINGENCIES

The Plan maintains deposits at various financial institutions covered by Federal Deposit Insurance Corporation ("FDIC"). At various times throughout the year, the Plan may maintain amounts in excess of the FDIC insured limits. Due to the strong credit rating of these financial institutions, the Plan believes that any credit risk related to these deposits is minimal.

Rates of Disability None

Assumptions Made In Valuing Spouse's Benefit 100% of the employees included in the valuation are assumed to be married. This percentage is used as the probability that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be the same age as the husband.

Optional Form Selection All employees are assumed to elect the life annuity form of benefit.

Provision for Expenses \$110,155 for 2018, the actual administrative expenses paid from the plan assets during the prior year, were included in the Target Normal Cost for Minimum Required Contribution purposes.

Appendix B (Continued)

Standing Elections	The client has not signed an election that provides for the automatic use of the Carryover Balance and/or Prefunding Balance if necessary to meet the minimum funding requirement. The client also has not signed a standing election to add the maximum amount possible to the Prefunding Balance for any future affected plan year.
Asset Method	Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
Funding Method	Pure Unit Credit
Employees Valued	Only participants as of the valuation date were valued.
Changes in Assumptions and Methods since the Last Actuarial Valuation	<p>The interest rates used for determining the funding target were 4.16%, 5.72% and 6.48%. These rates were updated to the rates required for the current plan year.</p> <p>The mortality table for the funding target was changed as required under PPA '06.</p>
Justification for Changes in Actuarial Assumptions	The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
