A Hawaii Limited Liability Partnership

Independent Auditor's Report

To the Administrative Committee and the Investment Committee of the
Pension Plan for Employees of A&B Agricultural Companies:

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Pension Plan for Employees of A&B Agricultural Companies (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2018 and 2017, the related statement of changes in net assets available for benefits for the year ended December 31, 2018, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by First Hawaiian Bank, the trustee of the Plan, except for comparing this information with the related information included in the financial statements. We have been informed by the Plan Administrator that the trustee holds the Plan's assets and executes transactions. The Plan Administrator has obtained certifications from the trustee as of December 31, 2018 and 2017, and for the year ended December 31, 2018, that the information provided to the Plan Administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance with Department of Labor Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to Financial Statements
December 31, 2018 and 2017

1. Plan Description

The following brief description of the Pension Plan for Employees of A&B Agricultural Companies (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

a. General

The Plan is a defined benefit pension plan for Salaried and Hourly Bargaining Unit Employees of Hawaiian Commercial & Sugar Co. (HC&S) and McBryde Hourly Bargaining Unit Employees of Alexander & Baldwin, LLC, Series T. (the Companies). The Administrative Committee of the Board of Directors of the Companies controls and manages the operation and administration of the Plan. The assets of the Plan are held in the Alexander & Baldwin Retirement and Pension Trust (Master Trust). First Hawaiian Bank (the Trustee) serves as the trustee of the Plan, and together with several investment managers, manages the Plan's investments. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

As of December 31, 2014, the KCC, Inc. Pension Plan for Salaried Bargaining Unit Employees, KCC, Inc., Pension Plan for Hourly Bargaining Unit Employees and KT&S Pension Plan for Bargaining Unit Employees, merged into the Plan. The merger of the plans does not impact participant benefits as the benefit provisions of the merged plans were incorporated in the Plan.

Effective December 30, 2016, HC&S was shut down. The rights of employees who terminated before January 1, 2017 shall be determined solely in accordance with the actual provisions of the Plan in effect at the time of such termination, except as expressly provided otherwise in the Plan or as required by law.

During 2017, Alexander and Baldwin, Inc. completed a conversion process with the requirements to be treated as a real estate investment trust commencing within the year ended December 31, 2017.

b. Pension Benefits

Employees become eligible to participate in the Plan after one year of service. Effective January 1, 1968, the Plan became noncontributory. Normal retirement age is 65 (62 using the stevedore formula). There are provisions for early and postponed retirement with relative adjustments in benefits. Normal retirement benefits are based on years of service and compensation with various maximum and minimum levels.

1. Plan Description (continued)

b. Pension Benefits (continued)

Salaried bargaining unit and hourly bargaining unit employees who were hired prior to June 1, 1995 were eligible to participate in the Plan after one year of service. Effective June 1, 1995, all newly hired KT&S, HC&S and McBryde bargaining unit employees are not eligible to participate in the Plan. Retirement benefits for bargaining unit employees is equal to the greater of a basic benefit formula or a minimum benefit formula, plus a supplemental monthly amount. Bargaining employees become fully vested after five years of service. If employees terminate before they are fully vested, they forfeit the right to receive the portion of their accumulated Plan benefits.

Salaried employees hired on or after January 1, 2008, accrue benefits under the cash balance benefit pension formula. An account is maintained for each participant in which contributions are credited for the benefit of the individual.

Salaried employees hired prior to January 1, 2008, accrued benefits under the traditional defined benefit pension formula (traditional formula). On December 31, 2011, all accrued benefits were frozen under the traditional formula and replaced with the cash balance formula described below.

Salaried employees become fully vested after five years of service under the traditional formula or three years of service if any portion or the entire portion of accrued benefit under the Plan is a cash balance account benefit. If employees terminate before they are fully vested, they forfeit the right to receive a portion of their accumulated Plan benefits.

Retirement benefits for salaried employees under the cash balance pension formula are based on a fixed percentage (currently 5 percent) of employee eligible compensation, plus interest. The Plan's interest credit rate will vary from year-to-year based on the 10-year U.S. Treasury rate. Upon termination of employment, the vested account balance can be paid out in the form of a lump sum or as a monthly annuity.

Employee contributions made before the Plan become noncontributory are being credited annually with 5 percent interest since that date.

2. Summary of Significant Accounting Policies

a. Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

b. Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated Plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

c. Risks and Uncertainties

The Plan's interest in the Master Trust utilizes various investment securities, including common collective trusts, fixed-income securities, money market mutual funds, private equity partnership interests, and insurance contracts. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumption pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

d. Investment Valuation and Income Recognition

The Plan's interest in the Master Trust is stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date of the Master Trust. The Plan's Investment Committee determines the Plan's valuation policies utilizing information provided by investment advisors. See Note 5 for description of valuation methods.

2. Summary of Significant Accounting Policies (continued)

d. Investment Valuation and Income Recognition (continued)

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on an accrual basis. Dividends are recorded on the ex-dividend date. Investment loss includes the Plan's gains and losses on investments bought and sold, as well as held during the year.

e. Administrative Expenses

Administrative expenses of the Plan are paid by the Master Trust, as provided in the Plan document.

f. Payment of Benefits

Benefit payments to participants are recorded upon distribution.

g. Recently Adopted Accounting Pronouncement

In February 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2017-06 *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Benefit Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting*. The purpose of this update is to improve the usefulness of the information reported to users of employee benefit plan financial statements and to provide clarity to preparers and auditors. The ASU clarifies presentation requirements for a plan's interest in a master trust and require more detailed disclosures of the plan's interest in the master trust by 1) requiring that any changes in the plan's interest to be presented in separate line items in the statement of net assets available for benefits and in the statement of changes in net assets available for benefits, 2) removing the requirement to disclose the percentage interest in the master trust for plans with divided interest and requiring plans to disclose the dollar amount of their interest in the investments held by the master trust, presented by general type, and 3) requiring the dollar amount of the master trust's other asset and liability balances to be disclosed, based on the plan's interest. ASU No. 2017-06 is effective for plans with fiscal years beginning after December 15, 2018. The amendments should be applied retrospectively to each period for which financial statements are presented. Early adoption is permitted. The Plan adopted this ASU for the 2018 Plan year, resulting in changes to the Master Trust disclosures in 2018 and 2017.

2. Summary of Significant Accounting Policies (continued)

h. Subsequent Events

The Plan Administrator has evaluated subsequent events through October 10, 2019, the date on which the financial statements were available to be issued, and it was determined that all subsequent events have been properly accounted for.

3. Funding Policy

Contributions to provide benefits under the Plan are made solely by the Companies. The Companies' funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Companies contribution met the minimum funding requirements of ERISA for the year ended December 31, 2018.

4. Investment in Master Trust and Information Certified by Trustee

Investment in Master Trust

The Plan's investment assets are held in a trust account by the Trustee and consist of an undivided interest in an investment account of the Master Trust, a master trust established by the Companies and administered by the Trustee. Use of the Master Trust permits the commingling of trust assets with the assets of the Companies' various pension plans for investment and administrative purposes. Although assets of multiple plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment loss of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

At December 31, 2018 and 2017, the Master Trust consisted of assets of the following plans:

- A&B Retirement Plan for Salaried Employees of Alexander & Baldwin, LLC
- Pension Plan for Employees of A&B Agricultural Companies

Information Certified by Trustee

The Plan Administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to the following information certified or provided by the Trustee, except for comparing such information certified by the Trustee to information included in the Plan's financial statements.

4. Investment in Master Trust and Information Certified by Trustee (continued)

The Plan's interest in the Master trust represents approximately 68 percent of the Master Trust's investments at December 31, 2018 and 2017. The Plan's investment loss from the Master Trust amounted to \$(6,328,228), representing approximately 68 percent of the Master Trust's investment loss.

5. Fair Value Measurements

GAAP establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under GAAP are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include quoted prices for similar assets in active markets; quoted prices for identical or similar assets in inactive markets; inputs other than quoted prices that are observable for the asset; and inputs that are derived principally from or can be corroborated by observable market data by correlation or other means. If the asset has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

An asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

5. Fair Value Measurements (continued)

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2018 and 2017.

Fixed-Income Securities - Corporate bonds and U.S. government treasury and agency securities are valued based upon the closing price reported in the active market in which the security is traded. Corporate asset-backed securities may utilize models, such as a matrix-pricing model, that incorporates other observable inputs, such as cash flow, security structure, or market information, when broker/dealer quotes are not available.

Money Market Mutual Funds - Valued based on quoted market prices of each fund, which represent the net asset value of shares held by the Plan at year end.

Insurance Contract – The insurance contract is invested in group annuity contracts, which are valued based on the present value of expected future payments.

Private Equity Partnerships - The fair value of private equity partnerships are determined by the issuer based on the unit values of the funds. Unit values are determined by dividing the fund's net assets, as recorded in the fund's audited financial statements, by the number of units outstanding at the valuation date. Fair value of underlying investments in private equity assets is determined based on information provided by the general partner taking into consideration the purchase price of the underlying securities, developments concerning the investee company subsequent to the acquisition of the investment, financial data and projections of the investee company provided to the general partner, and such other factors as the general partner deems relevant.

Common Collective Trusts – Common collective trusts are valued at net asset value (NAV). The NAV is based on the fair value of the underlying assets owned by the fund and is determined by the investment manager or custodian of the fund.

5. Fair Value Measurements (continued)

The following tables set forth by level within the fair value hierarchy a summary of the Master Trust's investments measured at fair value on a recurring basis at December 31, 2018 and 2017.

December 31, 2018				
	Level 1	Level 2	Level 3	Total
Money market mutual funds	\$ 1,381,327	\$ -	\$ -	\$ 1,381,327
Insurance contract	-	-	133,444	133,444
Total assets in the fair value hierarchy	<u>\$ 1,381,327</u>	<u>\$ -</u>	<u>\$ 133,444</u>	1,514,771
Common collective trusts (a)				<u>172,061,315</u>
Total Investments				<u>\$ 173,576,086</u>

December 31, 2017				
	Level 1	Level 2	Level 3	Total
Fixed-income securities	\$ 80,540,194	\$ 110,616,860	\$ -	\$ 191,157,054
Money market mutual funds	4,207,714	-	-	4,207,714
Insurance contract	-	-	249,386	249,386
Total assets in the fair value hierarchy	<u>\$ 84,747,908</u>	<u>\$ 110,616,860</u>	<u>\$ 249,386</u>	195,614,154
Limited partnership interest in private equity fund (a)				<u>71,933</u>
Total Investments				<u>\$ 195,686,087</u>

- (a) In accordance with Accounting Standards Codification Subtopic 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in the tables above are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statements of net assets available for benefit.

Pension Plan for Employees of A&B Agricultural Companies

Notes to Financial Statements
December 31, 2018 and 2017

5. Fair Value Measurements (continued)

Transfers between Levels - The availability of observable market data are monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

For the years ended December 31, 2018 and 2017, there were no significant transfers in and out of Levels 1, 2, and 3.

Quantitative Information about Significant Unobservable Inputs Used in Level 3 Fair Value Measurements - In estimating fair value of insurance contract investments in Level 3, the Investment Committee uses a third-party pricing source. In substantiating the reasonableness of the pricing data provided by the third party, the Investment Committee evaluates a variety of factors, including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

Fair Value of Investments that Calculate Net Asset Value - Below is a summary of the Plan's Master Trust investments at December 31, 2018 and 2017 where fair value is estimated based on the net asset value:

Investment	Fair Value Estimated Using Net Asset Value Per Share			
	December 31, 2018			
	Fair Value	Unfunded Commitment	Redemption Frequency (If Currently Eligible)	Redemption Notice Period
Mercer Long Duration Investment Grade Fixed Income Portfolio (a)	\$ 97,431,010	\$ -	Each business day	Each business day
State Street U.S. Long Government Bond Index NL A (b)	41,892,343	-	Each business day	Each business day

5. Fair Value Measurements (continued)

Investment	Fair Value Estimated Using Net Asset Value Per Share			
	December 31, 2017			
	Fair Value	Unfunded Commitment	Redemption Frequency (If Currently Eligible)	Redemption Notice Period
Private equity partnerships (c)	\$ 71,933	\$ -	N/A	N/A

- (a) The Mercer Long Duration Investment Grade Fixed Income Portfolio invested in the State Street U.S. Long Credit Bond Index Non-Lending Series Fund and the State Street U.S. Long Treasury Index Non-Lending Series Fund. The Mercer Long STRIPS Fixed Income Portfolio invests in the State Street 20+ U.S. Treasury STRIPS Index Non-Lending Fund. These funds seek to maximize long-term total return through investments in debt securities.
- (b) The State Street U.S. Long Government Bond Index Non-Lending Series Fund – Class A and the State Street Intermediate U.S. Government Bond Non-Lending Series Fund – Class A invests in U.S. Government Agency obligations and U.S. Treasury obligations.
- (c) This class includes private equity partnership interests that primarily invest in domestic technology companies. These investments cannot be redeemed. Instead, the nature of the investments in this class is that distributions are received through the liquidation of the underlying assets of the fund. The fair values of the investments in this class have been estimated using recent observable transaction information for similar investments, nonbinding bids received from potential buyers of the investments, developments concerning the investee company subsequent to the acquisition of the investment, financial data and projections of the investee company provided to the general partner, and such other factors as the general partner deems relevant. It is probable that all of the investments in this class will be sold at an amount different from the net asset value of the Plan's ownership interest.

6. Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during their last five years of credited service. The accumulated plan benefits for active salaried employees are based on their average compensation during the five years (under the traditional formula) or 5 percent of employees' eligible compensation plus interest based on a 3-month average of the 10-year Treasury Constant Maturities rate (under the cash balance formula). The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of December 31, 2018 and 2017 are as follows:

	2018	2017
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving payments	\$ 104,735,967	\$ 105,977,176
Other participants	23,277,733	26,675,628
Total vested benefits	128,013,700	132,652,804
Nonvested benefits	56	88
Total actuarial present value of accumulated plan benefits	<u>\$ 128,013,756</u>	<u>\$ 132,652,892</u>

Pension Plan for Employees of A&B Agricultural Companies

Notes to Financial Statements
December 31, 2018 and 2017

6. Accumulated Plan Benefits (continued)

The changes in accumulated plan benefits for the year ended December 31, 2018 are as follows:

Actuarial present value of accumulated plan benefits - beginning of year	\$ 132,652,892
Increase (decrease) during the year attributable to:	
Increase for interest due to the decrease in the discount period	5,487,981
Benefits paid	(9,277,731)
Present value of benefits accumulated	(333,095)
Actuarial assumption changes	<u>(516,291)</u>
Actuarial present value of accumulated plan benefits - end of year	<u>\$ 128,013,756</u>

The significant actuarial assumptions used in the December 31, 2018 valuations were as follows:

- Mortality: RP-2014 Mortality Table projected scale based on MP-2018, with an ultimate rate of 1.20% at age 64, grading down to 0% at age 115 in a straight line
- Retirement age assumptions (representative annual rates of retirement were used)
- Inflation: 2.20 percent per annum
- Investment return: 4.30 percent per annum

The significant actuarial assumptions used in the December 31, 2017 valuations were as follows:

- Mortality: RP-2014 Mortality Table projected scale based on MP-2016 through 2006, with an ultimate rate of 1.20%, grading down to 0% at age 115 in a straight line
- Retirement age assumptions (representative annual rates of retirement were used)
- Inflation: 2.20 percent per annum
- Investment return: 4.30 percent per annum

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that certain changes in these estimates and assumptions could be material to the financial statements.

7. Plan Termination

Although it has not expressed any intention to do so, the Companies have the right under the Plan, in certain circumstances, to discontinue their contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder, and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

During the plan year ended December 31, 2016, the Plan Sponsor ceased operations of the Hawaiian Commercial & Sugar Company division. The active participants in the Plan were reduced as a result of the shutdown beginning in 2016 and ending on December 30, 2016. The termination represented a partial termination of the Plan. As a result of the partial termination, all accumulated benefits of the affected employees were fully vested at the time of their termination.

8. Exempt Party-in-Interest Transactions

Certain investments in the Master Trust are invested in securities managed by the Trustee, and therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for the investment management services are included as a reduction of the return on each fund.

Pension Plan for Employees of A&B Agricultural Companies

Notes to Financial Statements
December 31, 2018 and 2017

9. Federal Income Tax Status

The Plan received a favorable tax determination letter on September 7, 2016, which stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan Administrator believes the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, and the Plan and related trust continue to be tax exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. Management is not aware of any uncertain tax positions that would require the Plan to recognize a tax liability (or asset).

The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Benefits Included or Excluded

Unless noted below, all benefits provided by the plans, as restated effective January 1, 2018, are included in this valuation:

- Most recent plan amendments included:** This valuation reflects the provisions that include all the amendments made on and before and December 31, 2018.
- Plan amendments excluded:** None
- Late retirement increases:**
 - Active participants:* The plans provide benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation does not include any late retirement increases.
 - Deferred vested participants:* Current deferred vested participants over normal retirement age are valued using benefits provided by the plan administrator.
- Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations. For 2017, the IRC Section 415 and 401(a)(17) limits are \$215,000 and \$270,000 respectively.
- IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plans are not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

PLAN PROVISIONS SPECIFIC TO FUNDING

Additional Benefits Included or Excluded

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

PLAN PROVISION CHANGES SINCE PRIOR VALUATION

The plan documents were restated as of January 1, 2018 to reflect A&B conversion to a Real Estate Investment Trust (REIT) structure, otherwise only clarifying changes were made.

Maximum compensation amounts and maximum benefit amounts under IRS rules were updated from 2017 to 2018.

RATIONALE FOR SIGNIFICANT ASSUMPTIONS

- **Salary scale** – Per A&B, the salary increase assumption for the A&B Salaried Plan would remain at 3.00% per year, and the salary increase assumption for the A&B Agricultural Plan would decrease to 0.50% per year. This assumption is provided by A&B, based on their long-term salary growth expectation. For union employees, the union contracts allow for promotional increases, but do not provide for merit increases, instead, union employees will receive performance bonuses which are not included in pensionable earnings. A&B expects to continue these terms in future union negotiations.
- **Social Security wage base** – This assumption is typically assumed to be 50bp to 150bp more than CPI. For A&B, this assumption is based on inflation plus 1.05% for real wage growth, based on historical US Average Wage increases.
- **Inflation** – This assumption is based on the inflation assumption periodically published by Mercer Investment Consulting in the Capital Markets Outlook.
- **Expected investment return** – Selected by A&B, and is within the acceptable range based on simulated investment return using capital market assumptions published in Mercer Investment Consulting's Capital Market Outlook for the plan's target asset mix, net of an adjustment of 20 basis points for investment expenses assumed to be paid from plan assets.
- **Expenses** – Based on the prior year's non-investment expenses paid from plan assets, adjusted for expected current year PBGC premiums.
- **Cash balance interest accumulation rate** – This assumption is based on the actual interest crediting rate for the year, which is the arithmetic average of 10-year Constant Maturities rate for August, September, and October immediately preceding the plan year.
- **Cash balance annuity conversion basis** – This assumption is based on the plan's annuity conversion basis for the plan year, which is based on the IRS prescribed Segmented yield curve as of September of the preceding plan year for accounting.
- **All other demographic assumptions** – All other significant demographic assumptions are primarily based on the experience study dated December 10, 2014, which reviewed three years data from January 1, 2012 through January 1, 2014. The expectation is that the future demographic patterns and circumstances of the employer will not differ significantly from the period studied. The study reviewed the following assumptions:
 - Retirement rates
 - Withdrawal rates
 - Form of payment election
 - Benefit commencement age for vested benefits
 - Spousal age difference

Schedule SB, PART V - Statement of Actuarial Assumptions/Methods

ACTUARIAL METHODS

Asset Methods

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

The method used to allocate Alexander & Baldwin (A&B)'s retirement plans' Master Trust market value of assets is comprised of several steps:

1. Reconcile the master trust assets from the beginning of the plan year to the end of the plan year and identify the various receipts and disbursements items.
2. Identify which of those receipts and disbursements entries can be associated with specific retirement plan. These entries include employer contributions paid to the Trust, benefit payments (including transfer of assets between retirement plans), PBGC premium payments, and fiduciary insurance premium payments that are paid from the Trust.
 - Mercer will receive a breakdown, by retirement plan, of all the non-purchased benefit payments paid during the year from Prudential and First Hawaiian Bank.
 - Employer contributions and PBGC premium payments are reported separately by retirement plan on the Trust statement.
 - The breakdown of fiduciary insurance premium payments by retirement plan will be provided by A&B.
3. The remaining receipts and disbursements, including investment expenses, and certain non-investment expenses and investment income earned (such as realized gains/losses, unrealized gains/losses, dividends and interest), that have not been associated with a particular retirement plan above are allocated in proportion to the "mean fund" using the following method:
 - i. Each plan's respective mean fund is calculated as the total of:
 - a. the prior year's year-end market value of assets (e.g., 12/31/2015 market value)
 - b. plus employer contributions paid to the plan during the year, weighted for the portion of the year after the date the contribution is made
 - c. minus any plan associated disbursements made during the year (such as lump sum payments, PBGC premium payments and fiduciary insurance premium payments), weighted for the portion of the year after the date the disbursement is made
 - d. minus any annuity payments made during the year, weighted for a $\frac{1}{2}$ year (assumes on the average disbursements are made in the middle of the year)
 - ii. The mean fund for the individual plans are then totaled to produce a "total" mean fund.

Schedule SB, PART V - Statement of Actuarial Assumptions/Methods

- iii. Each plan's share of the receipts/disbursements not associated with a specific plan is determined by applying the ratio of (i) divided by (ii) to each such receipt/disbursement.

Once each receipt and disbursement has been assigned or allocated among all the plans, the determination of each plan's respective portion of the year-end market value of assets is calculated by totaling the respective plan's beginning-of-year market value of assets, associated receipts and disbursements, and allocated share of receipts and disbursements not associated with a specific plan.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for non-vested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date is treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Schedule SB, PART V - Statement of Actuarial Assumptions/Methods

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, line 24 — Change in Actuarial Assumptions

- The administrative expenses added to the target normal cost were updated to include 2017 non-investment expenses and an estimated increase in PBGC premiums due in 2018 for each plan.
- Cash Balance interest accumulation rate was updated to 2018 actual interest credit rate of 2.26% from 1.65% in 2017.
- The mortality and interest rates for the cash balance to annuity conversion and the actuarial equivalence basis for determining optional forms of payment for traditional benefits were updated for the plan year 2018.
- The expected return on assets was changed from 6.80% to 4.30%.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
