General

The Americhem, Inc. Employees' Pension Plan (the Plan), a defined benefit plan, was established to provide retirement benefits for eligible employees of Americhem, Inc. (the Company). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective September 30, 2007, the Company froze all benefit accruals under the Plan and all active employees participating in the Plan became 100% vested. Benefits are payable upon retirement, termination, disability or death. For more complete information regarding the general provisions of the Plan, including the benefits available and vesting provisions, participants should refer to the Plan agreement.

Administration

The Plan is administered by the Company or persons appointed by the Company. The administrator has the responsibility for interpreting the Plan and authorizing disbursements. The trustee receives and holds Plan assets and remits benefits to eligible participants as provided by the Plan.

Contributions

The Company makes contributions which meet or exceed the minimum funding required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA and the Internal Revenue Code.

Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

A. Vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC), a U.S. Government agency, up to the applicable limitations
B. All other vested benefits (that is, vested benefits not insured by the PBGC)

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America (GAAP).

Valuation of Investments

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Benefit Distributions

Benefit distributions are recorded when paid to participants.

Expenses of the Plan

During the Plan years ended September 30, 2019 and 2018, the Plan incurred $129,393 and $127,153 respectively, in investment advisory expenses and administrative expenses for the trustees' services. Certain other administrative expenses of the Plan are paid by the Company and not reimbursed by the Plan.

Use of Estimates

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities, the reported amounts of additions to and deductions from net assets during the reporting period, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Additionally, the Plan's investment securities are exposed to various risks, such as interest rate and market fluctuations. Due to the level of risk associated with certain investment securities, as well as the level of uncertainty related to changes in the value of the investment securities, it is at least reasonably possible that changes in risks in the near term would materially affect the amounts reported in the financial statements.

Evaluation of Subsequent Events

The Plan has evaluated subsequent events through July 14, 2020, which is the date the financial statements were available to be issued, and has determined that there were no subsequent events that have occurred through that date that have not already been reflected in the financial statements and/or disclosed in the notes, other than the disclosures below.

On January 30, 2020, the World Health Organization ("WHO") announced a global health emergency because of a new strain of coronavirus originating in Wuhan, China (the "COVID-19 outbreak") and the risks to the international community as the virus spreads globally beyond its

point of origin. In March 2020, the WHO classified the COVID-19 outbreak as a pandemic, based on the rapid increase in exposure globally.

The full impact of the COVID-19 outbreak continues to evolve as of the date of this report. This pandemic has adversely affected global economic activity and greatly contributed to significant deterioration and instability in financial markets. As a result, the Plan's investment portfolio has incurred a significant decline in fair value since September 30, 2019. However, because the values of the Plan's investments have and will fluctuate in response to changing market conditions, the amount of losses that will be recognized in subsequent periods, if any, cannot be determined. The value of the Plan's investments has a direct impact on its funded status. As a result of such declines in market value and possible changes to the actuarial assumptions used in determining the present value of accumulated plan benefits, the Plan Sponsor may need to make greater cash contributions to fund the Plan. Based on the Plan's funded percentage, there may be certain benefit limitations imposed. However, the actual impact, if any, on future required contributions, Plan liquidity, and benefit limitations cannot be determined at this time.

On March 27, 2020, President Trump signed into law the "Coronavirus Aid, Relief, and Economic Security (CARES) Act." The CARES Act, among other things, includes several relief provisions available to tax-qualified retirement plans and their participants. Plan management is currently evaluating the impact of the CARES Act on the Plan's financial statements.

3. Fair Value Measurements

The Plan follows the provisions of *Fair Value Measurements and Disclosures*, which defines fair value and provides guidance for measuring fair value and expands disclosures about fair value measurements. *Fair Value Measurements and Disclosures* does not require any new fair value measurements, but rather applies to all other accounting pronouncements that require or permit fair value measurements.

Fair Value Measurements and Disclosures establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobserved inputs (Level 3 measurements).

The three levels of the fair value hierarchy are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurements.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.
Following is a description of the valuation methodology used for assets measured at fair value. There have been no changes in the methodologies used at September 30, 2019 and 2018.

Registered investment companies: Valued at the daily closing price as reported by the fund. Registered investment company securities held by the Plan are open-ended mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The registered investment company securities held by the Plan are deemed to be actively traded.

Cash equivalents, including money market funds: reported at amortized cost, which approximates fair value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of September 30, 2019:

	Fair Value Measurements at Reporting Date Using			
	Level 1	**Level 2**	**Level 3**	**Total**

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of September 30, 2018:

4. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service rendered by employees. Accumulated plan benefits include benefits expected to be paid to (i) retired or terminated employees or their beneficiaries, (ii) beneficiaries of employees who have died, and (iii) present employees or their beneficiaries. Benefits payable under all circumstances are included to the extent that they are deemed attributable to employee service rendered up to the valuation date.

The actuarial present value of accumulated plan benefits at October 1, 2018 and October 1, 2017 was determined by Findley, Inc. (formerly Findley Davies), an independent actuary retained by the Company. The present value amount results from applying actuarial assumptions in order to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The more significant assumptions used by the actuaries in determining the actuarial present value of accumulated plan benefits at October 1, 2018 and October 1, 2017 (the date of the most recent valuations), and the Company's annual contributions are as follows:

October 1,	**2018**	2017
Actuarial cost method	**Projected unit credit**	Projected unit credit
Discount rate	**4.13% per annum**	4.14% per annum
Rate of return on assets	**7.00% per annum**	7.00% per annum
Annual rate of salary increase	**N/A**	N/A
Life expectancy of participants	**RP-2014 Total Dataset Mortality adjusted back to 2006 using Scale MP-2014 then projected using Scale MP-2018**	RP-2014 Total Dataset Mortality adjusted back to 2006 using Scale MP-2014 then projected using Scale MP-2017
Normal retirement age	**Age 65**	Age 65

The actuarially computed value of accumulated plan benefits at the beginning of the Plan years (the date of the most recent valuations) are as follows:

October 1,	**2018**	2017
Present value of accumulated plan benefits		
Vested benefits:		
Participants currently receiving payments	**$ 455,285**	$ 478,860
Other participants	**4,060,977**	4,034,533
Total present value of accumulated plan benefits	**$ 4,516,262**	$ 4,513,393

The changes in accumulated plan benefits for the fiscal years are as follows:

October 1,	**2018**	2017
Actuarial present value of accumulated plan benefits, beginning of fiscal year	**$ 4,513,393**	$ 4,836,783
Increase (decrease) during the period attributable to:		
Benefits accumulated and actuarial gains and losses	**142,619**	242,514
Interest increase due to the decrease in the discount period	**298,512**	308,715
Benefits paid	**(506,423)**	(867,814)
Changes in actuarial assumptions	**68,161**	(6,805)
Actuarial present value of accumulated plan benefits, end of fiscal year	**$ 4,516,262**	$ 4,513,393

The change in benefits accumulated and actuarial gains and losses is due to a change in the lump sum interest rate used by the Plan's actuary.

5. Investments (unaudited)

All investment information disclosed in the accompanying financial statements and supplemental schedules, including investments held at September 30, 2019 and 2018, and the net appreciation in fair value of investments and other income, interest and dividends for the years ended September 30, 2019 and 2018, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the trustee of the Plan.

6. Tax Status of the Plan

The Internal Revenue Service has determined and informed the Plan by a letter dated June 16, 2005, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the tax authorities. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of September 30, 2019 and 2018, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

7. Parties-In-Interest Transactions

Certain plan investments are managed by Huntington National Bank, the trustee of the Plan. Transactions within this fund are allowable party-in-interest transactions under Section 408 of ERISA.

Rationale: based on expected returns held by th eplan as well as information provided by the plan's investment advisor.

PBGC Annual Interest Rates

24-month segment rates averaged through the end of September 2018 and published in October 2018 using the Alternative Method (as prescribed by IRC 430) as follows:

- Segment 1 (0 – 5 years) 2.35%
- Segment 2 (5 to 20 years) 3.85%

Mortality

Funding

RP-2000 static, non-generational Mortality Table as described in Regulation 1.430(h)(3) projected by Scale AA, to between 7 and 15 years beyond the year of the obligation, male and female, with combined rates for annuitants and nonannuitants (as prescribed by IRC 430).

Appendix B (Continued)

Rates of Retirement

All participants are assumed to retire at age 65.

Weighted Average Retirement Age is 65. This is the average retirement age for someone eligible to retire at all ages using the assumed retirement rates and no other decrements.

Rates of Disability

None.

Rates of Turnover

The 2003 SOA Turnover Table. Sample probabilities are below:

	Years of Service			
Age	0-1	2-4	5-9	10+
25	21.74%	17.14%	12.96%	0.00%
35	16.78	11.02	7.15	5.02
40	15.91	10.35	6.01	4.15
45	15.48	9.47	5.82	3.73
55	13.52	7.82	2.59	0.88

Assumptions Made In Valuing Spouse's Benefit

Sixty-five percent of employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Optional Form Election

All active employees are assumed to elect the lump sum form of payment.

Provision for Expenses

Non-investment expenses expected to be paid in the coming year were added to the Target Normal Cost. The expected expenses are assumed to equal actual administrative expenses during the prior year plus PBGC premiums for the current year.

Standing Elections

The sponsor has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.

Employees Valued

Only participants as of the valuation date were valued.

Funding Method

Pure Unit Credit

Appendix B (Continued)

Asset Method

Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.

Changes in Assumptions and Methods since the Last Actuarial Valuation

The segmented interest rates used for determining the funding target were 4.16%, 5.72% and 6.48%. These rates were updated to the rates required for the current plan year.

The mortality table for the funding target was changed as required under PPA '06, however the permitted one-year delay in using the generational rates was elected.

Justification for Changes in Actuarial Assumptions

The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
