Kennecott Utah Copper Pension Plan for Represented
Hourly Employees
South Jordan, Utah

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Kennecott Utah Copper Pension Plan for Represented Hourly Employees, (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2019 and 2018, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by State Street Bank and Trust Company, the trustee, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2019 and 2018, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements. Accordingly, we do not express an opinion on these financial statements.

Emphasis of Matter – Group Annuity Purchase

As discussed in Note 1 to the financial statements, the governing body of the Plan approved a group annuity purchase for certain annuitized individuals, which occurred during the year ended December 31, 2019. Our opinion is not modified with respect to this matter.

Emphasis of Matter – Subsequent Events

As more fully described in Note 2, Summary of Significant Accounting Policies, Subsequent Events, due to the outbreak of a novel coronavirus (COVID-19), which was declared a global pandemic by the World Health Organization in March 2020, there has been substantial volatility in world financial markets resulting in declines in the market value of investments. Our opinion is not modified with respect to this matter.

Other Matter

The supplemental schedule of non-exempt transactions for the year ended December 31, 2019 is required by the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 and is presented for the purpose of additional analysis and is not a required part of the financial statements. Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we do not express an opinion on this supplemental schedule.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, is presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to Financial Statements

Note 1. Description of the Plan

The following description of Kennecott Utah Copper Pension Plan for Represented Hourly Employees (the “Plan”) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan’s provisions.

General: The Plan was established by Kennecott Utah Copper LLC (the “Company”). The Plan is a noncontributory defined benefit pension plan covering all eligible hourly employees who are represented by or included in a collective bargaining unit of Kennecott Utah Copper LLC and its participating subsidiaries (collectively, the “Participating Employers”), as designated in the Plan document. Employees begin participating in the Plan upon employment. Effective January 1, 2018, the Plan was closed to new participants, rehires and transfers. The Participating Employers are subsidiaries of Rio Tinto America Inc., which is an indirect, wholly-owned subsidiary of Rio Tinto plc (the “Parent”). The Plan is intended to be a qualified retirement plan under the Internal Revenue Code (“IRC”) and is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”), as amended. The Company has appointed Conduent HR Services to be the third party administrator of the Plan. The Plan is administered by the Rio Tinto America Inc. Benefits Governance Committee (the “Plan Administrator”).

Effective January 1, 2018, the Plan was amended to make certain changes related to the definition of permanent and total disability, payment of benefits prior to age 65 when receiving group long-term disability benefits, and to make certain conforming changes pursuant to negotiated changes in the applicable collective bargaining agreement. The Plan was also amended, effective April 1, 2018, to change certain actuarial factors.

The Plan was amended on August 19, 2019 to allow certain terminated vested participants (as defined in the amendment) to make an election to receive their plan benefits as a lump sum or annuity payment (calculated according to the parameters in the amendment) during a limited election period. Participants were required to submit their election to take a lump sum payment or annuity payment by October 31, 2019. All lump sum payments or annuity commencements were completed by December 31, 2019.

The Plan participates in the Rio Tinto America Master Retirement Trust (“Master Trust”), which was created to hold the qualified defined benefit investment assets of the Plan and other plans sponsored by the Parent’s subsidiaries. The Company has appointed State Street Bank and Trust Company (“Trustee”), to be the trustee of the Master Trust and to invest and manage assets of the related plans.

2019 Annuity Buy Out: Effective April 2, 2019, the Plan entered into, and was amended to reflect, a group annuity contract purchase (“2019 Annuity Buy Out”) with Met Tower Life, under which the entire benefit rights of 1,805 annuitized individuals were fully guaranteed by Met Tower Life, legally enforceable by the annuitized individuals against Met Tower Life, and guaranteed by Met Tower Life by way of an irrevocable commitment to pay benefit liabilities to the annuitized individuals. Net premium payments totaled approximately \$207,037,000 related to the 2019 Annuity Buy Out. Funds under this contract were allocated and applied to the purchase of these annuities and were excluded from the Plan’s interest in the Master Trust as of December 31, 2019.

Notes to Financial Statements

Note 1. Description of the Plan (Continued)

Pension benefits: Participants are eligible for monthly benefit payments upon reaching normal retirement age. Normal retirement is the earlier of attaining age 65 and attainment of the 5th anniversary of original date of hire or attainment of 70th birthday, or 30 years of continuous service. Pension payments are calculated using continuous years of service. Participants terminating employment from January 1, 2016 through March 31, 2017 receive \$47 a month per continuous years of service. Employees terminating employment on or after April 1, 2017 receive \$48 a month per continuous years of service, and this rate will increase by \$1 increments on January 1st each following year, through 2021.

The normal forms of retirement benefits available under the Plan are a single life annuity for a single participant or, for a married participant, a qualified 55 percent joint and survivor annuity. Participants will receive a lump-sum distribution in the event that the actuarial present value of the participant's entire vested benefit is \$1,000 or less. An early retirement benefit is available after attainment of age 60 and completion of between 10 and 30 years of continuous service.

A participant vests fully in the plan benefits after five years of continuous service with the Participating Employers or upon termination of the Plan.

Termination of the Plan: Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits which former participants or their beneficiaries have been receiving for at least three years, or employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit which was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit which would be payable under the Plan provisions in effect at any time during the five years preceding Plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations (discussed below).
- c. All other vested benefits (vested benefits not insured by the PBGC).
- d. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The accompanying financial statements are prepared on the accrual basis of accounting.

Use of estimates: The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires plan management to make estimates and assumptions which affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term could be material to the financial statements.

Risks and uncertainties: The Master Trust invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market, currency exchange rate, and credit risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near-term and such changes could materially affect the amounts reported in the 2019 statement of net assets available for benefits. See Subsequent Events disclosure below.

The Master Trust invests in securities with contractual cash flows, such as futures contracts, forward contracts, credit default swaps, interest rate swaps and options. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, delinquencies and/or defaults, and may be adversely affected by a shift in the market's perception of the issuers and changes in interest rates.

Investment valuation and income recognition: Investments are reported at fair value. Fair value is the price which would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Rio Tinto America Inc. Pension Investment Committee ("Investment Committee") determines the Plan's investment valuation policies, utilizing information provided by the investment advisors and Trustee. See Note 6 for a discussion of fair value measurements.

Interest income is recorded on the accrual basis, and dividends are recorded on the ex-dividend date. Purchases and sales of investments are recorded on a trade-date basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Valuation of investment in Master Trust: The Master Trust is a multiple-plan trust, ownership of which is divided among the plans based on allocated units of participation. Each participation unit has a value equal to the total fair value of the Master Trust's net assets divided by the total participation units outstanding.

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

The Plan has an undivided interest in the Master Trust's underlying investments. The Plan's investment in the Master Trust is stated at fair value. The Plan's interest in the Master Trust is based on the beginning-of-year value of the Plan's interest in the Master Trust, plus actual contributions and allocated investment income (loss), less actual distributions and actual and allocated investment-related expenses. The net investment income (loss) and investment-related expenses attributable to the Master Trust, which are not plan-specific, are allocated by the Trustee to the Plan based on the Plan's pro rata share of each of the underlying assets of the Master Trust on a monthly basis. The Plan presents in the statements of changes in net assets available for benefits its interest in the net investment income or loss of the Master Trust, which consists of the realized gains or losses, unrealized appreciation or depreciation, interest, dividends of the Master Trust's investments, and allocated expenses.

Funding policy: The Company contributes to the Plan at such times and in such amounts as considered necessary so contributions are sufficient to provide benefits as actuarially calculated under the terms of the Plan. The Company's current funding policy is to pay contributions with the goal of eliminating the PBGC variable rate premium.

Contributions to the Plan are designed to fund at least the minimum required contributions as specified by ERISA and determined under IRC section 430(a). The minimum contribution is determined as of the beginning of the plan year, and all contributions are discounted at the effective interest rate from the date funded to the beginning of the plan year. The Company may elect to use all or a portion of any funding standard carryover balance or prefunding balance to offset the minimum required contribution for a plan year depending on the Plan's funded status.

The Plan is "not-at-risk" for 2019, thus allowing the use of a more favorable interest rate corridor in determining the minimum required contribution. Adjustment to the statutory interest rates specified under IRC section 430 were first introduced by the Moving Ahead for Progress in the 21st Century Act ("MAP-21") and subsequently modified by the Highway and Transportation Funding Act of 2014 ("HATFA").

The Plan has met all minimum funding requirements. Under the law, the minimum required contribution for the 2019 and 2018 plan years, respectively, was \$7,529,843 and \$6,292,749. The minimum required contribution was satisfied in 2018 with a combination of prefunding balances and cash contributions. The total cash contributions were \$6,000,000 for the 2018 plan year. The minimum contribution for the 2019 plan year was satisfied fully by an application of prefunding balances.

Benefit restrictions under IRC section 436 depend on the Plan's Adjusted Funding Target Attainment Percentage ("AFTAP"). For 2019, the Plan's AFTAP was 112.09 percent. As this exceeds 90 percent and the plan sponsor is not in bankruptcy there are no restrictions on amendments increasing benefits, accelerated payments, or future accruals.

Payment of benefits: Benefits are recorded when paid by the Plan.

Administrative expenses: The Company pays a portion of the costs and expenses incurred in administering the Plan, with the Plan paying the remaining costs and expenses. The Company provides accounting and other services for the Plan at no cost to the Plan. Expenses paid directly by the Company are excluded from these financial statements, unless reimbursed by the Plan.

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

Tax status: The Internal Revenue Service has determined and informed the Company by a letter dated April 2, 2014, the Plan and the Master Trust are designed in accordance with the applicable requirements of the IRC. The Plan has been amended since receiving the determination letter; however, the Plan Administrator believes the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and therefore believes that the Plan and the Master Trust are tax-exempt.

The Plan Administrator has evaluated the Plan's tax positions and concluded that the Plan had taken no uncertain tax positions which would require adjustment to the financial statements or disclosures. Therefore, no provision or liability for income taxes has been included in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax years in progress.

Subsequent events: The Plan Administrator evaluated subsequent events and transactions through September 25, 2020, the date which the financial statements were available to be issued. No events, other than those noted below, require recognition or disclosure.

The COVID-19 outbreak was declared a worldwide pandemic on March 11, 2020 by the World Health Organization ("WHO"). The full impact of the COVID-19 outbreak continues to evolve as of the date of this report. This pandemic has adversely affected global economic activity and greatly contributed to significant deterioration and instability in financial markets. As a result, the Plan's investment portfolio has incurred volatility since December 31, 2019. However, because the values of the Plan's investments have and will fluctuate in response to changing market conditions, the amount of losses that may be recognized in subsequent periods, if any, cannot be determined. The value of the Plan's investments has a direct impact on its funded status. As a result of such changes in market value and possible changes to the actuarial assumptions used in determining the present value of accumulated plan benefits, the Plan Sponsor may need to make greater cash contributions to fund the Plan. However, the actual impact, if any, on future required contributions, Plan liquidity, and benefit limitations cannot be determined at this time.

On March 27, 2020, the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") was passed into law. As of the date of this report, the Company has declined to offer the expanded plan features covered under the Act.

Note 3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees with vested rights or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service rendered prior to the valuation date.

The actuarial present value of accumulated plan benefits was calculated by consulting actuaries and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected future payment dates.

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial valuation was done by using the beginning-of-the-year method. Therefore, the accumulated plan benefits as of December 31, 2018, are presented from information provided by the actuary as of January 1, 2019. There has been no significant change in the Plan's provisions or coverage from December 31, 2018, to January 1, 2019.

The more significant assumptions underlying the actuarial computations as of December 31, 2018, are as follows:

Investment return	5.50% per annum
Mortality table used	Pri-2012 blue collar table with generational mortality projected by Scale MP2019
Retirement rates and average retirement age	Rates increasing from 3% to 100% between ages 50 and 70, and an average retirement age of 62 for active and terminated vested participants
Withdrawal rates	Rates for pre-retirement ages that vary by age and gender

The foregoing actuarial assumptions are based on the presumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of December 31, 2018, is summarized as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:

Participants currently receiving benefits	\$ 200,083,055
Other participants	<u>76,862,012</u>
	276,945,067

Nonvested benefits	<u>7,685,728</u>
--------------------	------------------

Total actuarial present value of accumulated plan benefits, at December 31, 2018	<u>\$ 284,630,795</u>
--	-----------------------

Below is a summary of significant changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2018:

Actuarial present value of accumulated plan benefits, at beginning of year	<u>\$ 295,086,985</u>
Increase (decrease) during the year attributable to:	
Benefits paid	(19,800,321)
Interest accumulation	14,836,239
Plan amendments	1,685,345
Change in actuarial assumptions*	(11,289,361)
Other changes**	<u>4,111,908</u>
Net change	<u>(10,456,190)</u>
Actuarial present value of accumulated plan benefits, at end of year	<u>\$ 284,630,795</u>

Kennecott Utah Copper Pension Plan for Represented Hourly Employees

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

*The most significant changes in actuarial assumptions were a change in the Investment Return from 5.20 percent to 5.50 percent; and a change in the mortality assumption from the RP2014 (2006 base rates) blue collar table with generational mortality projected by Scale MP2018 to the Pri-2012 blue collar table with generational mortality projected by Scale MP2019.

**The other changes component represents the normal operation of the pension plan. The normal operation of the pension plan consists primarily of the increase due to the ongoing benefit accruals (such as the annual increase in the benefit multiplier) and those items of plan experience that are not associated with plan asset performance.

The actuarial present value of accumulated plan benefits at December 31, 2019 will be reduced by an estimated \$200,200,000 for the participants included in the 2019 Annuity Buy Out.

Note 4. Information Certified or Provided by the Trustee

The following is a summary of the Plan's asset information as of December 31, 2019 and 2018, and for the years then ended, included throughout the Plan's financial statements, which were prepared by or derived from information provided by the Trustee and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the Trustee that the information provided to the Plan Administrator by the Trustee related to the following assets is correct and complete to the best of their knowledge and belief.

Accordingly, as permitted by 29 CFR 2520.103-8 of the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information which appears throughout the financial statements related to the following assets:

	December 31	
	2019	2018
Investments:		
Plan's interest in Rio Tinto America Master Retirement Trust	\$ 126,089,643 *	\$ 314,842,161 *

The Trustee also certified to the best of their knowledge and belief the correctness and completeness of investment results of the Plan's interest in the Master Trust for the years ended December 31, 2019 and 2018 as follows:

	Years Ended	
	2019	2018
Investment results:		
Plan interest in Rio Tinto America Master Retirement Trust		
investment income (loss)	\$ 32,762,172 *	\$ (6,723,441) *

* The Plan's interest in and the investment results of the Master Trust as presented above do not reflect certain adjustments for an increase in the value of partnerships/joint ventures/real estate investments and certain accrued Master Trust expenses.

Note 5. Interest in Master Trust

The Plan participates in the Master Trust as permitted by the Plan document and Master Trust agreement. The Plan has an undivided interest of 14.3 percent and 23.9 percent in the net assets of the Master Trust as of December 31, 2019 and 2018, respectively.

The Master Trust financial information disclosed below and in Note 6 represents 100 percent of the Master Trust net assets and the related changes in net assets in which the Plan has an undivided interest as of and for the years ended December 31, 2019 and 2018.

Note 6. Fair Value Measurements

Accounting guidance provides the framework for measuring fair value. That framework provides a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2: Inputs to the valuation methodology include quoted market prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets within the Master Trust measured at fair value. There have been no significant changes in the methodologies used at December 31, 2019 and 2018.

Note 6. Fair Value Measurements (Continued)

Fixed-income securities: Fixed-income securities consist of U.S. and foreign government securities, mortgage backed securities, options, corporate bonds and other obligations. These securities are valued based on pricing matrices or models from pricing vendors used by the Trustee. Commingled funds are valued based on the net asset value ("NAV") of units held at year-end as provided by the fund administrator.

Common collective trusts: The common collective trusts are valued based on the NAV of units held at year-end as provided by the fund administrator. Generally, under ordinary market conditions, all common collective trust positions provide daily market liquidity to the Master Trust. Certain Master Trust-directed withdrawals may be subject to market value adjustments calculated in accordance with the provisions of the investment contracts. The Common collective trusts were liquidated, with no restrictions, during 2019.

Common and preferred stocks: Common and preferred stocks are valued based on the last sales price on the primary exchange.

Partnerships/joint ventures/real estate: Partnerships/joint ventures/real estate investments are valued based on the estimated fair value of the participation owned by the Master Trust as determined by the general partner or investment manager of the respective partnership. The NAV of these investments is based on the fair value of the underlying investments. The fair value of the underlying investments is estimated using techniques that may rely heavily on the investment managers' assumptions and qualitative observations. The valuation inputs for the underlying investments are derived primarily from estimated future cash flows, market rates for real estate assets, market interest rates, interest spreads, credit risk, liquidity and other financial data. The Trustee uses the fair valuations from the investment managers and the Investment Committee reviews and validates their valuation methods and processes throughout the year. The Trustee did not make any adjustments to any valuations. The Investment Committee establishes and follows valuation policies and procedures, and periodically evaluates the fair valuation policies and procedures of the specialized investment consultants who perform the valuations and requests and reviews the valuation policies of the investment managers and general partners annually.

This category includes 15 private equity funds as of December 31, 2019 and 16 private equity funds as of December 31, 2018. They are comprised of limited partnerships that invest in private equity, both domestically and internationally. Certain of these investments are considered illiquid and are meant to be held for the life of the funds but, if necessary, sales can be arranged through the secondary market. Distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next several years, but no later than 12 years. Unfunded commitments of the Master Trust as of December 31, 2019 and 2018 approximate \$49 million and \$69 million, respectively, for these funds.

This category includes 6 investments in domestic and international real estate fund limited partnerships and one commingled real estate fund, for the years ended December 31, 2019 and 2018. The fair value of the limited partnerships is estimated using the NAV of the Master Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third-party appraisals. Certain of these investments are considered illiquid, but sales can be arranged on the secondary market. Distributions from each fund are received as income is generated through the investments and as the underlying assets of the funds are liquidated. It is estimated that the underlying assets will be liquidated over the next several years, but no later than 11 years. Unfunded commitments of the Master Trust as of December 31, 2019 and 2018 approximate \$19 million and \$31 million, respectively, for these 6 investments. The commingled real estate fund is valued based on the NAV of units held at year-end as provided by the fund manager.

Note 6. Fair Value Measurements (Continued)

Interest-bearing cash and cash equivalents: Interest-bearing cash is valued at cost plus accrued income, which approximates fair value measured by similar assets in active markets.

Loans secured by mortgages: Loans secured by mortgages are valued on the basis of their principal and interest payments discounted at prevailing interest rates for similar investments.

Derivatives and cash collateral: Futures contracts, credit default swaps, interest rate swaps, and other derivatives are valued based on pricing matrices or models from pricing vendors used by the Trustee. See Note 8 for additional disclosures.

(a) In accordance with Subtopic 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statements of net assets available for benefits.

The following table sets forth a summary of changes in fair value of the Master Trust's Level 3 investment assets for the years ended December 31, 2019 and 2018:

Note 6. Fair Value Measurements (Continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. The Master Trust evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets. For the years ended December 31, 2019 and 2018, there were no transfers in or out of Levels 1, 2 or 3.

The Master Trust follows guidance on how entities should estimate fair value of certain alternative investments. The fair value of investments within the scope of the guidance can be determined using NAV per share as a practical expedient, when fair value is not readily determinable, unless it is probable the investment will be sold at something other than NAV.

The following tables include categories of investments within the Master Trust that measure NAV per share (or its equivalent) as of December 31, 2019 and 2018:

		2019			
		Fair Value	Unfunded Commitment	Redemption Frequency	Redemption Notice Period
Asset category:					
Fixed-income investments:					
Commingled funds (c)		\$ 64,987,272	\$ -	Immediate	None

International (b)		57,417,539	-	Varies	1-10 days

- (a) Domestic - The objective of the funds is to seek capital appreciation by investing in U.S. publicly listed companies.
- (b) International - The objective of the funds is to seek capital appreciation by investing in international publicly listed companies.
- (c) Commingled funds - The objective of these investments is to seek current income and total return by investing in a diversified portfolio of fixed-income investments of varying maturities (mainly long credit).

Note 7. Related Party and Party-in-Interest Transactions

The Master Trust invests in the following investments managed by the Trustee or affiliated companies that qualify as party-in-interest transactions:

	December 31	
	2019	2018
State Street Bank & Trust Co. Short Term Investment Fund	\$ 18,953,651	\$ 56,724,618
AXA Early Secondary Fund V	8,968,881	7,812,026
AXA Capital Europe	716,542	639,946
AXA Capital America LP	443,346	519,007
AXA Secondary Fund V	431,245	3,641,509
State Street Corp JR Subordinated	159,417	236,563
State Street Corp Preferred Stock	49,428	44,064
AXA Private Equity Fund II	30,087	30,505
State Street Global Advisors Russell 1000 Index Fund	-	44,573,700
AXA Equitable Holdings I SR Unsecured	-	178,048

Fees paid by the Master Trust and the Plan for investment-related, administrative and custodial expenses to the Trustee and affiliated companies amounted to approximately \$293,000 and \$375,000 for the years ended December 31, 2019 and 2018, respectively. Fees paid by the Master Trust or Plan for investment management services were included as a reduction of the return earned on each investment. Certain other administrative functions are performed by officers or employees of the Parent and affiliates, for which no compensation is received from the Plan.

These transactions are not, however, considered prohibited transactions under Section 408(b) of the ERISA regulations.

During the year ended December 31, 2019, the Trustee inadvertently overpaid invoices of \$6,792 for investment management services. The overpayment was refunded to the Plan at a later date; however, the Plan Administrator has determined that this was a prohibited transaction at the Master Trust level, and has calculated and remitted the related lost earnings. This prohibited transaction is reflected on Schedule G of the 2019 Master Trust Form 5500.

During the year ended December 31, 2019, certain administrative invoices were paid twice out of Plan assets in error, which resulted in a non-exempt transaction with a party-in-interest. The Plan was reimbursed for the non-exempt transaction amounts noted above, and has calculated and remitted the related lost earnings. See the Schedule of Non-Exempt Transactions.

Note 8. Derivative Financial Instruments

As of December 31, 2019 and 2018, a fixed-income manager of the Master Trust utilizes derivative financial instruments, including but not limited to, futures contracts, credit default swaps and interest rate swaps. This manager uses these financial instruments to manage exposure to interest rate and credit risks and to achieve the overall desired duration under the Master Trust's fixed-income mandate. Since all derivative instruments are held within the Master Trust, all are included at fair value in the Plan interest in the Rio Tinto America Master Retirement Trust as presented in the Statements of Net Assets Available for Benefits. Changes in the fair value (i.e., gains or losses) of the derivatives are recorded in the Plan interest in the Rio Tinto America Master Retirement Trust investment income (loss) ("Plan interest in MT Income") in the accompanying Statements of Changes in Net Assets Available for Benefits.

Note 8. Derivative Financial Instruments (Continued)

Futures contracts are used to adjust interest rate exposures and replicate government bond positions. Many offer opportunity to outperform due to active management of the liquid portfolio backing the exposure. These contracts are valued using a marked approach based on quoted prices, recent trading activity for identical or similar instruments or broker or dealer quotes with reasonable levels of price transparency.

Credit default swaps are used to manage credit exposure without buying or selling securities outright. Written credit default swaps increase credit exposure (“selling protection”), obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased credit default swaps decrease exposure (“buying protection”), providing the right to “put” bonds to the counterparty in the event of a default.

The maximum potential amount of future payments (undiscounted) that the Master Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of December 31, 2019 and 2018, for which the Master Trust is a seller of protection, are disclosed below. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, up-front payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Master Trust for the same referenced entity or entities.

Interest rate swap agreements involve the exchange by the Master Trust with a counterparty of their respective commitments to pay or receive interest, e.g., an exchange of floating-rate payments for fixed-rate payments, with respect to the notional amount of principal. These swaps are used to adjust interest rate and yield curve exposure and substitute for physical securities. Long swap positions (“received fixed”) increase exposure to long-term interest rates; short positions (“pay fixed”) decrease exposure. Notional amounts of all interest rate swap agreements outstanding as of December 31, 2019 and 2018, are disclosed below.

The notional values of futures contracts, credit default swaps and interest rate swaps, which are summarized below, provide an indication of the extent of the Plan’s involvement in such instruments. Notional amounts of derivative financial instruments do not necessarily represent amounts exchanged by parties and, therefore, are not a direct measure of the Plan’s exposure from its use of derivatives.

The gross and net fair value of the other derivatives held by the Master Trust as of December 31, 2019 and 2018 were not material to the Master Trust, and were not included in the tables below.

Effective January 1, 2016, the multiplier was increased to \$47 per year of benefit service. After 1/1/2016, the multiplier for Barney's Canyon employees increases in accordance with the multiplier increases for all other locations.</p>
Total Benefit- Other Locations	<p>A monthly benefit equal to \$50.00 per year of credited service for retirements after 1/1/2019.</p> <p>The following table lists benefit level changes under the prior and current collective bargaining agreement:</p>

Schedule SB Attachment (Form 5500)—2019 Plan Year
 Kennecott Utah Copper Pension Plan for Represented Hourly Employees
 EIN: 13-3108078 PN: 202

Effective Date	Benefit Level
1/1/2010	\$42.00
1/1/2013	\$44.00
1/1/2016	\$47.00
4/1/2017	\$48.00
1/1/2018	\$49.00
1/1/2019	\$50.00
1/1/2020	\$51.00
1/1/2021	\$52.00

The benefit level applicable as of 1/1/2010 was applied retroactively to participants that retired or terminated between 7/1/2006 and 12/31/2009.

The benefit levels effective 1/1/2020 and beyond are not reflected in the 2019 funding valuation since the increases are effective after the valuation date.

Early Retirement

Eligibility

Age 60 and 10 years of continuous service.

Total Benefit

The accrued normal retirement benefit multiplied by the appropriate age-based factor below:

Age	Factor	Age	Factor
65	1.00	59	0.88
64	1.00	58	0.84
63	1.00	57	0.80
62	1.00	56	0.76
61	0.96	55	0.72
60	0.92		

Early retirement reductions shall not apply if the participant meets any of the following eligibility criteria:

- 30 years of continuous service
- 60/30 retirement: age 60 and 30 years of continuous service
- 70/80 retirement: age 55 and age plus continuous service is at least 70, or age and continuous service is at least 80

 EIN: 13-3108078 PN: 202

Supplement An early retirement supplement is offered to participants who retire under 60/30 retirement or 70/80 retirement in the following amounts:

- 60/30 retirement: \$400 per month supplement payable until the earlier of age 62, or when unreduced Social Security benefits begin, plus a \$170 per month supplement payable from age 62 to age 65
- 70/80 retirement: \$300 per month supplement payable until the earlier of age 62, or when unreduced Social Security benefits begin

Late Retirement
 Eligibility

Retire after normal retirement date.

Total Benefit

The normal retirement benefit accrued at the date of late retirement.

Disability Retirement
 Eligibility

Total and permanent disability after completing 10 or more years of Continuous Service.

Total Benefit

The accrued benefit based on service through the date of disability commencing after 5 months of permanent and total disability, plus a \$300 per month supplement payable until the earlier of age 62, or when unreduced Social Security benefits begin.

Vested Termination
 Eligibility

5 years of continuous service.

Total Benefit

The normal retirement benefit accrued to date of termination commencing at age 65. The participant may elect for benefits to start at any time after age 60 with the benefit reduced according to the following table:

Age	Factor
65	1.00
64	0.96
63	0.92
62	0.88
61	0.84
60	0.80

Death Benefits

Eligibility	5 years of continuous service.
Total Benefit	<p>For an active participant, the benefit is an immediate annuity to the surviving spouse equal to 50% of the accrued normal retirement benefit.</p> <p>For terminated vested participants, the benefit is a deferred annuity to the surviving spouse equal to 55% of the monthly benefit the participant would have been entitled to had he terminated employment on the date of his death, survived to early retirement age, elected the 55% J&S option, and then died the following day.</p>

Normal Form of Benefit	Actuarially reduced 55% J&S annuity if married, otherwise straight life.
------------------------	--

Optional Forms of Payment	<p>50%, 75%, or 100% joint and survivor annuities.</p> <p>Before April 1, 2018, these optional forms are based on the 1983 Group Annuity Mortality Table and 8.00% interest.</p> <p>After April 1, 2018, these optional forms are based on the 417(e) Mortality Table and 6.00% interest.</p>
---------------------------	---

Plan Changes Since the Prior Year

The funding valuation reflects the following plan changes:

- Effective April 1, 2018, the plan's actuarial equivalence definition was changed from 8.00% interest and the 1983 Group Annuity Mortality Table to 6.00% interest and the 417(e) Mortality Table.
- Effective January 1, 2019, the benefits for participants who are active in the Kennecott Hourly plan on that date increased to \$50.00 times all years of service and increase an additional \$1 each year through 2021.
- The dollar limit under Section 415(b) of the Internal Revenue Code changed from \$220,000 to \$225,000.

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

Due to software limitations with the electronic filing process, information filed electronically cannot be controlled by the Enrolled Actuary. The values on the signed Schedule SB will govern to the extent there are any differences in the entries filed electronically and the actual data contained on the signed Schedule SB.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following assumption changes:

- A change in the assumed expenses payable from the trust from \$829,094 to \$1,025,047.
- A change in the funding asset return assumption from 5.20% for 2018 to 5.50% for 2019.

These changes were made to better reflect anticipated plan experience. The non-prescribed assumption changes did not reduce the funding shortfall by more than \$5 million; as such, approval of the Commissioner is not required.

Disability Rates	See Table 3
Decrement Timing	Middle of year decrements (except that retirement is assumed to occur at the beginning of the year for ages where the assumed retirement rate is 100%)
Surviving Spouse Benefit	It is assumed that 80% of males and 80% of females have an eligible spouse, and that males are three years older than their spouses.
Benefit Limits	Projected benefits are limited by the current IRC section 415 maximum benefit of \$225,000.
Valuation of Plan Assets	<p>Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.</p> <p>A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).</p>

Schedule SB, line 22—Description of Weighted Average Retirement Age

The retirement decrement rates at each age depend on age and service. The rates that apply at each age are summarized below:

Retirement rates are 3% at the earliest retirement eligible age (Age + Service = 70, or Service = 30), 25% at ages 65-67 (ages 60-67 for those with at least 30 years of service), 50% at ages 68-69, and 100% at age 70.

In calculating the weighted average retirement age, the weight applied to each age is (a)/(b), where (a) and (b) are defined as follows:

- (a) The number of participants expected to retire at the retirement age to which the weight is being applied. The number of participants expected to retire is estimated by applying the assumed retirement decrement rates to the current active population at that age.
- (b) The total number of participants expected to retire. The number of participants expected to retire is estimated by applying the assumed retirement decrement rates to the current active population.
