A.T. CROSS COMPANY PENSION PLAN

NOTES TO FINANCIAL STATEMENTS YEARS ENDED DECEMBER 31, 2019 AND 2018

1. DESCRIPTION OF PLAN

The following description of the A.T. Cross Company Pension Plan (the “Plan”) provides general information only. Participants should refer to the Plan document for more complete information.

General – The Plan is a noncontributory, defined benefit plan for the employees of Costa, Inc. (formerly A.T. Cross Company) (the “Company”). The Plan was amended effective May 20, 2006 to freeze all benefit accruals such that no compensation earned or service performed after that date be recognized in the determination of pension benefits. The Plan covers substantially all of the Company’s non-seasonal employees for service prior to May 20, 2006, and provides retirement and death benefits. The Plan is subject to the Employee Retirement Income Security Act of 1974 (“ERISA”). The Investment Committee is responsible for oversight of the Plan, determines the appropriateness of the Plan’s investments, and monitors investment performance.

On September 6, 2013, the Company completed the sale of its Cross Accessory Division. The Plan remains the obligation of the Company. On September 11, 2013, the Company changed its name to Costa, Inc. Active participants of the Plan who were part of the Cross Accessory Division were terminated from the Plan and are 100% vested. The sale caused a significant decrease in the number of active participants in the Plan, for which appropriate filings were made with the Pension Benefit Guaranty Corporation (PBGC).

Plan management is in discussions to terminate the Plan or to merge it into another plan sponsored by the parent company of the Plan sponsor, although a formal course of action has not yet been voted.

Vesting – An employee’s accrued benefits are vested after five years of credited service.

Pension Benefits – Benefits under the Plan are based primarily on an employee’s length of service and highest average annual compensation for any period of five consecutive years, subject to limitations specified in the Internal Revenue Code. Benefits are paid at normal retirement age (65) or at early retirement age (62 to 64) under certain conditions. Employees may elect to receive their pension benefits in the form of a life annuity or qualified joint and survivor annuity, payable monthly from retirement.

Administrative Expenses – Administrative expenses of the Plan are paid by either the Plan or the Plan sponsor, as provided in the Plan document.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting – The accompanying financial statements have been prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition – The Plan’s investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on the trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan’s gains and losses on investments bought and sold as well as held during the year.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Benefit Payments – Benefits are recorded when paid.

Risks and Uncertainties – Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

The Plan invests in various investment instruments. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

3. INFORMATION CERTIFIED BY THE TRUSTEE (UNAUDITED)

The plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Bank of America, N.A., the trustee of the Plan, has certified that the following data included in the accompanying financial statements and supplemental schedules is complete and accurate:

- Investments as shown on the statements of net assets available for benefits as of December 31, 2019 and 2018;
- Net investment activity as shown in the statements of changes in net assets available for benefits for the years ended December 31, 2019 and 2018;
- Investment information included in the 2019 and 2018 footnotes and supplemental schedules of assets (held at end of year) and reportable transactions as of and for the year ended December 31, 2019.

The Plan's independent auditors did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedules.

4. FAIR VALUE MEASUREMENTS

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy described below:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

4. FAIR VALUE MEASUREMENTS (CONTINUED)

- Level 2: Inputs to the valuation method include: quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3: Inputs to the valuation method are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2019 and 2018.

Money market funds – carried at cost which approximates market value.

Mutual funds – valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The following table sets forth, by level within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2019:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Money market funds and cash	\$ 694,363	\$ -	\$ -	\$ 694,363

Total assets at fair value	<u>\$ 32,228,025</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 32,228,025</u>

The following table sets forth, by level within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2018:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Money market funds and cash	\$ 1,112,346	\$ -	\$ -	\$ 1,112,346
Mutual funds	<u>26,340,164</u>	<u>-</u>	<u>-</u>	<u>26,340,164</u>
Total assets at fair value	<u>\$ 27,452,510</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 27,452,510</u>

5. ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on the employee's average compensation during the five consecutive calendar years of credited service which produced the highest average compensation. Benefits payable under all circumstances – retirement, death, disability, and termination or employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by consulting actuaries and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant assumptions underlying the January 1, 2019 and 2018 actuarial computations are as follows:

- *Mortality* – RP-2014 Employee with Scale MP-2018 Generational Improvements from 2006 (RP-2014 Employee with Scale MP-2017 Generational Improvements from 2006 in the 2018 actuarial valuation)
- *Retirement* – Age-related retirement rates from age 62 to age 70 for active employees were discontinued in 2019 as there are no longer active employees. Terminated participants are assumed to retire at age 65; and
- *Valuation Interest Rates* – 7.5% (7.8% in the 2018 actuarial valuation)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of January 1, 2019 is as follows:

Actuarial present value of accumulated plan benefits	
Vested benefits:	
Participants currently receiving payments	\$ 20,217,907
Other participants	5,983,768
	<hr/>
	26,201,675
Nonvested benefits	
	<hr/>
	-
Total actuarial present value of accumulated plan benefits	<hr/>
	\$ 26,201,675

5. ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (CONTINUED)

The changes in the actuarial present value of accumulated plan benefits during the year ended January 1, 2019 are as follows:

Actuarial present value of accumulated plan benefits - January 1, 2018	\$ 26,337,314
Increase (decrease) during the year attributable to:	
Benefit payments	(2,424,478)
Benefits accumulated and actuarial gains	(209,311)
Interest due to decrease in the discount period	1,951,876
Changes in assumptions	546,274
Net decrease	(135,639)
Actuarial present value of accumulated plan benefits - January 1, 2019	\$ 26,201,675

6. FUNDING POLICY

The Company contributes such amounts as necessary to provide assets sufficient to meet the benefits to be paid to Plan participants. The Company's present intention is to make contributions in amounts sufficient to annually fund the Plan based upon actuarial valuations prepared by the Company's actuary, The Angell Pension Group. The Plan has met the ERISA minimum funding requirements for the years ended December 31, 2019 and 2018.

7. TAX STATUS OF THE PLAN

The Plan obtained its latest determination letter on March 21, 2003, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the plan administrator and the Plan's tax counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the Code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain tax position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

8. TRANSACTIONS WITH PARTIES-IN-INTEREST

Certain Plan investments are shares of mutual funds managed by Bank of America, N.A. Bank of America is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for investment management services amounted to \$38,289 and \$38,737 in 2019 and 2018, respectively.

9. PLAN TERMINATION PRIORITIES

The Company has the right, under the Plan, to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (“PBGC”) if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early-retirement benefits, and certain disability and survivors’ pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the levels in effect on the date of the Plan’s termination, subject to a statutory ceiling on the amount of an individual’s monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan’s net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by PBGC at that time. Some benefits may be fully or partially provided by the then-existing Plan assets and the PBGC guaranty, while other benefits may not be provided at all.

10. SUBSEQUENT EVENTS

On March 11, 2020, the World Health Organization declared the novel strain of coronavirus (COVID-19) a global pandemic and recommended containment and mitigation measures worldwide. The Plan Sponsor continues to operate with little disruption, however, cannot reasonably estimate the length or severity of this pandemic or the extent to which disruption may materially impact the Plan in fiscal 2020.

As a result of the spread of COVID-19, economic uncertainties have arisen which have resulted in significant volatility in the investment markets, resulting in a potential decline in the value of the investments. The duration of these uncertainties and the ultimate financial effects cannot be reasonably estimated at this time.

The Plan has evaluated subsequent events for recognition or disclosure through October 5, 2020, the date the financial statements were available to be issued.

SECTION XII

ACTUARIAL COST METHODS

Traditional Unit Credit

The actuarial cost method used in the development of the minimum contribution was the unit credit cost method.

The normal cost is the sum of all the individual normal costs for each participant. For active participants, the individual normal cost is the present value of the benefit earned during the year being valued. For active participants whose credited service equals or exceeds the plan maximum, if any, and for non-active participants, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all participants. The individual accrued liability for an active participant is the present value of the accrued benefit as of the valuation date. The unfunded liability is the actuarial accrued liability less the valuation assets.

The total annual cost of the plan is the normal cost plus an amount to amortize the shortfall amount.

Projected Unit Credit

The actuarial cost method used in the development of the maximum contribution was the projected unit credit cost method.

Under this method, the normal cost is the sum of the individual normal costs for all participants. For an active participant, the individual normal cost is the present value at the current age of the projected benefit at the assumed retirement age, based on the actuarial assumptions, divided by the participant's expected years of credited service at that age. For a non-active participant, the normal cost is zero.

The actuarial accrued liability is the sum of the individual accrued liabilities for all plan participants. For an active participant, the individual accrued liability is the product of the normal cost and the total years of credited service at the current age. For non-active participants, the individual accrued liability is the present value at the current age of future benefits. The unfunded actuarial accrued liability equals the actuarial accrued liability less the valuation assets.

SECTION XIII

ACTUARIAL METHODS AND ASSUMPTIONS

A summary of the actuarial assumptions used in the valuation is presented below:

Valuation Assets - Average of fair market value of plan assets as of the current valuation date and as of the valuation date for each of the prior two plan years adjusted for contributions and distributions from the prior period to the current valuation date. The resulting amount is restricted to fall within 90% to 110% of the fair market value of assets [IRC Sec. 430(g)(3)(B)]. This method is restricted in that the expected earnings are limited by Internal Revenue Code Regulations. Therefore, the resulting asset value may tend to be less than the fair market value of assets over a long period of time. The expected annual rate of return is 7.50% (previously 7.80%), limited to the third segment rate under IRC Section 430.
