# McKinney Communications Corporation 401(k) Plan

## Notes to Financial Statements

December 31, 2019

### **1. Description of the Plan**

The following description of McKinney Communications Corporation 401(k) Plan (the Plan) provides only general information. Participants should refer to the Plan document for a complete description of the Plan's provisions.

#### **General**

The Plan is a defined contribution plan covering all eligible employees of McKinney Communications Corporation and participating employers (collectively, the Company) who have completed two months of service and are 19 years of age or older. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

#### **Contributions**

Each year, participants may contribute up to 100 percent of pretax annual compensation (as defined by the Plan) and Roth contributions, not to exceed federal limits. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. The Company may make a discretionary matching contribution to each participant's account based on his or her elective deferrals in a percentage set by the Company. For 2019, the Company elected to match 100 percent of participant contributions up to a maximum of two percent of the participant's annual compensation. Contributions are subject to certain limitations. Participants direct the investment of their contributions and Company contributions into various investment options offered by the Plan.

#### **Participant Accounts**

Each participant's account is credited with the participant's contribution, the Company's contribution, and Plan earnings or losses from that account's investment activities. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

## McKinney Communications Corporation 401(k) Plan

### Notes to Financial Statements (continued)

#### **1. Description of the Plan (continued)**

##### **Forfeitures**

Forfeitures of terminated, nonvested participant accounts are used to reduce future Company contributions. In 2019, forfeitures of \$62,708 were used to reduce Company contributions.

##### **Administrative Expenses**

Certain administrative expenses of the Plan, including accounting fees, have been paid by the Company. Trustee, recordkeeping, investment management fees and participant level fees have been paid by the Plan.

##### **Vesting**

Participants are vested immediately in their contributions plus actual earnings thereon. Vesting in the Company contribution portion of their accounts is based on years of continuous service. A participant is 100 percent vested after three years of credited service.

##### **Benefit Payments**

On termination of service due to separation of service, death, disability, or retirement, a participant may receive a lump-sum amount equal to the value of the participant's vested interest in his or her account. Partial withdrawals are permitted for required minimum distributions only. A participant may obtain an in-service or hardship withdrawal from his or her tax-deferred contributions subject to certain conditions and penalties (as defined in the Plan).

##### **Plan Termination**

### **2. Summary of Significant Accounting Policies**

#### **Investment Valuation and Income Recognition**

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Management of the Company determines the Plan's valuation policies utilizing information provided by the investment advisor and trustee. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

The Plan provides for investments in various investment securities that in general are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

#### **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates that affect the reported amounts of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

#### **Basis of Presentation**

The financial statements of the Plan have been prepared on the accrual basis of accounting.

#### 3. Investment Information

All investment information disclosed in the accompanying financial statements and supplemental schedule, including investments held at December 31, 2019 and 2018 and net appreciation in fair value of mutual funds and interest and dividends for the year ended December 31, 2019, was obtained or derived from information provided to the plan administrator and certified as complete and accurate by TD Ameritrade Trust Company, the trustee.

#### 4. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

- |         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Level 1 | Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Level 2 | Inputs to the valuation methodology include:<br>Quoted prices for similar assets or liabilities in active markets;<br>Quoted prices for identical or similar assets or liabilities in inactive markets;<br>Inputs other than quoted prices that are observable for the asset or liability;<br>Inputs that are derived principally from or corroborated by observable market data by correlation or other means.<br>If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability. |
| Level 3 | Inputs to the valuation methodology are unobservable and significant to the fair value measurement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

### 4. Fair Value Measurements (continued)

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2019 and 2018.

Mutual funds: valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by investment class and level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2019 and 2018:

|              | <b>Assets at Fair Value as of December 31, 2019</b> |         |         |              |
